The Agency of Colonial and Foreign Banks is undertaken and the Acceptances of Customers residing in the Colonies domiciled in London, retired on terms which will be furnished on application.

All other Banking business connected with England and Scotland is also transacted.

WESTERN BANK OF CANADA

DIVIDEND NO. 31.

Notice is hereby given that a dividend of three and one half per cent. has been declared upon the paid-up capital stock of the bank, being at the rate of seven per cent. per annum, and that the same will be due and payable on and after FRIDAY, APRIL 1st, 1898, at the offices of the bank. The transfer books will be closed from the 15th to the 30th of March.

Notice is also given that the Sixteenth Annual Meeting of the Shareholders of the Bank will be held on WEDNESDAY, the 13th day of APRIL next, at the head office of the Bank, Oshawa, Ont., at the hour of two o'clock p.m., for the election of directors and such other business as may legally come before the Board.

By order of the Board.

T. H. McMILLAN, Cashier.

DECISIONS IN COMMERCIAL LAW.

MEARNS V. ANCIENT ORDER OF UNITED WORKMEN.—As to the interpretation of the words "legal heirs." A widower, having two children, insured in a benevolent society and took out his certificate payable to "his legal heirs" and subsequently married a second time. He died without having altered the certificate leaving his wife surviving with the two children of the first marriage. It was held that the children took the whole fund payable under the certificate to the exclusion of the wife.

ALEXANDER V. IRONDALE, BANCROFT AND OTTAWA RAILWAY COMPANY.—In an action brought by an incorporated company to recover a money demand it was claimed in defence that the indebtedness, if any, was that of the president in his private capacity. Upon an application for a better affidavit, on production of documents, it had been determined that the company had no documents to be produced. Rose, J., held, that upon the examination for discovery of the president, he could not be compelled to produce documents or books which had been determined *not* to be in possession of the company nor his own books and documents. But this decision was reversed by the Divisional Court on the ground that the affidavits showed that the accounts of the defendant company were kept in the books of the president. A subpœna served upon the president had been set aside; the Court held that this should be done only in exceptional cases and the question of production should be raised in ordinary cases before the examiner.

DOMICILE.

The Supreme Court of New York State has recently rendered an important decision as to foreign corporations doing business in the State. It was held that a foreign company, which through brokers carrying on business in the State of New York obtains orders for goods which are sent to it for approval, and when approved are filled by the transmission of the goods direct from its factory not situated in New York State, is not doing business in the State within the meaning of the law for the taxation of foreign corporations that do business there.

MONTREAL harbor will shortly see very large vessels plying into it There are being additions made to the list. According to the Liverpool *Journal of Commerce*, a contract has been let for another Allan liner, dimensions not given, but presumed the same as those of the "Castalian" and "Tunisian," the latter of which is 500 feet long, 60 feet beam, and between 9,000 and 10,000 tons burthen. The Dominion line is building the "Yorkshire" and the "Dominion," the Donaldson line a 7,000 ton steamer for the Canadian service.

HAVING started on insufficient capital, nearly all the funds being used up in fitting the factory, the Walkerton Chair Manufacturing Company is in difficulty, wages and other running expenses having accumulated. A week ago to day, therefore, the company assigned to S. W. Vogan, and a meeting of creditors was appointed for the 22nd instant. The liabilities are $15,049, of which $2,128 is due on local notes. There is a bank claim of $5,000; wages unpaid amount to $820; the manager's salary is $478 in arrear. The town of Walkerton holds a mortgage for $6,000 on the premises.

WE are advised of the death, on Saturday last, of Mr. William Skinner, senior member of the firm Henry Skinner & Co., wholesale druggists, which event took place at his residence, Kingston.

THE Muskoka Beaver Mining Co., Limited, has been incorporated in Ontario, to do mining, reduction and development. Capital, $490,000. Parties: A. R. Pyne, R. A. Pyne, M.P.P., H. M. East, G. R. Ransom, Andrew Nelson, all of Toronto.

SAYS the New Denver *Ledge* of 10th instant: The Payne mine commenced loading ore on the C.P.R. over its new tram last week, and henceforth one-half of its output will go over that road, while the balance will be shipped by the Kaslo and Slocan Railway.

THE hotels at Winnipeg began last week filling up with commercial travelers arriving from the east on their semi-annual trip. The majority are two weeks ahead of last season, and in most cases were not disposed to spend much time in Manitoba, but determined to push forward to the coast, where they are in demand.

ACCORDING to the annual statement of the Canada North-West Land Company its net proceeds of the sales of town lots for 1897 amounted to $13,467, a marked gain over 1896. The balance of principle outstanding in contracts for farm lands amounts to $177,882, of which $168,822 is payable in preferred shares and $11,053 payable in cash.

A STRONG company, including Joseph Allison, W. H. Murray, Geo. S. Cushing, Geo. F. Baird, ex-M.P., Thomas McAvity and other well-known citizens is seeking incorporation as the Cushing Sulphite Pulp Co., to erect a mill in St. John, N.B. The capital is to be half a million and $25,000 has already been subscribed. The outlook for the erection of the mill this year is considered favorable.

WE hear of a case in which suit is brought for infringement of patent. Mr. W. H. Fauber has brought suit against the McKaigh and Dorntge Drop Forge Co., of Buffalo, for infringement of the Fauber one-piece crank-axle patent. The Buffalo people made axles for a number of Fauber licensees and, Mr. Fauber alleges, sold the axles to unlicensed makers or assemblers, as well. Mr. Pool, an attorney representing Mr. Fauber, was in New York last week in connection with the case.

IN answer to a subscriber, it may be explained that the five lake steamers "Saxon," "German," "Grecian," "Briton" and "Roman," which are to run between Duluth, Chicago and Parry Sound, in connection with the Parry Sound Railway, are not new boats. They belonged to the Menominee Transit Company, of Cleveland. They are chartered to the Parry Sound road, and are to enter on their new routes 1st of May. They used to carry ore, but now will carry grain and package freight.

Gold Medals, Paris, 1878 : 1889.

ACCOUNTICS : n.
The science treating of accounts and the art of keeping, verifying, examining and classifying them.

Accountics

A monthly magazine. Publishes each issue ESSAYS ON ACCOUNTING PRACTICE IN LEADING ESTABLISHMENTS in various industries; SHORT ARTICLES ESPECIALLY ADAPTED to the wants of BEGINNERS in office work; REVIEWS AND CRITICISMS of books on accounting and business subjects, written in a way to correctly describe the works; LETTERS OF EXPERIENCE from ACCOUNTANTS AND OFFICE MEN; QUESTIONS AND ANSWERS of interest to subscribers; NOTICES OF MEETINGS and BRIEF REPORTS OF PROCEEDINGS of leading ACCOUNTANTS' AND BUSINESS MEN'S ASSOCIATIONS; ILLUSTRATED DESCRIPTIONS of the BEST and NEWEST devices for OFFICE EQUIPMENT; brief EDITORIAL LEADERS ON TOPICS OF THE MONTH of interest in accounting and office circles; PORTRAITS OF EMINENT ACCOUNTANTS, with BIOGRAPHICAL SKETCHES; ACCOUNTING MISCELLANY, etc.

Monthly. $1 a year. Ten cents a copy.
ACCOUNTICS ASSOCIATION, Publishers,
262 West Broadway, New York.

Mercantile Summary.

A SEIZURE of tobacco and cigarettes, smuggled, valued at $2,000, has been made at Cornwall by Montreal customs officers.

ANOTHER grain elevator, capacity 800,000, is to be built at St. John by the C.P.R. The capacity of the present one is about 300,000 bushels.

JOHN WILDER, of Milltown, N.B., who has carried on a small grocery business there for the past ten years, never making beyond a living, has been obliged to assign.

DR. ALBRECHT LENTZE, the German Consul in Canada, resident in Montreal, has been suddenly recalled by his government, to receive, it is said, a good position in the foreign office. Mr. F. Bopp, vice-consul, will meanwhile act in his stead.

ANOTHER paper mill is promised in Ottawa. Messrs Bonney and Kennatt, former employees of Eddy, have leased the large iron covered building south of the Ottawa electric street railway power house, which they will turn into a paper mill, employing 30 hands.

ORIGINALLY a country merchant at Wellington, and unsuccessful there five years ago, Thomas McKercher, removed to Ottawa and became connected with the Mercantile Syndicate Co., from which he withdrew last fall to open in dry goods on his own account. He is now embarrassed, and reported offering creditors 50 per cent.

A MAN in Essex Centre, Ont., is arranging for the local manufacture of a fertilizer, using ashes, bones, etc. He says he can make a pure bone fertilizer and sell it for $5 per ton less than is now paid for the New York article used there. He argues, not unwisely, that the activity in tobacco cultivation in Essex county must occasion a great demand for fertilizing material, and he thinks he can save money to the tobacco growers and farmers who are now paying $28 to $35 per ton for fertilizers brought in from the States.

IN 1896 the makers of sanitary earthenware, in Canada, dissolved their combination. A good deal of cutting of prices has been going on ever since. Now, we are told, they have again combined and advised contractors, etc., that the three companies concerned, the Canada Stone Chinaware Company, Campbell & Purvis, and the Dominion Sanitary Pottery Company, all of St. Johns, Que., have consolidated under the style of the Pottery Manufacturers' Association, with a selling agent in Montreal. Quotations are withdrawn, and prices will, it is believed, go up.

A DEPUTATION from Manchester, England, which has been interviewing the Montreal commercial authorities with the view of increasing trade between the two cities, has since visited Ottawa, where their errand is to secure a subsidy from Canada for a line of steamers from Manchester to Montreal. If a certain subsidy be granted, the Furness Line is said to be willing to establish such a line. The gentlemen of the delegation are Sir Bosdin Leech, an ex-mayor, and Alderman J. D. Southeran, deputy chairman of the Manchester Ship Canal Company. These gentlemen also interviewed Toronto Board of Trade authorities.

THERE has been a strike at the cigar factory of Messrs. Davis & Sons, Montreal, and some violence on the part of certain of the strikers resulted in the arrest last week and arraignment before the magistrate of two young men named Elzear Martineau and Phileas Guindon, on the charge of seriously assaulting Mr. Steinberger, foreman of the factory. It appears that while on his way home one February night the foreman was attacked by the accused, who kicked and beat him in an unmerciful manner, dislocating his shoulder and causing serious internal injuries.

THE floods of last week had injurious effects in the Province of Quebec; Sorel, Three Rivers, Sherbrooke and other points suffered. On Saturday last so high was the water in the St. Lawrence below Montreal that the fires were put out in the Hochelaga cotton mill. As a consequence 1,050 mill hands have been some days idle, but not much injury is done the mill. On Monday at four o'clock the depth of water in front of Montreal stood at the unusual height of 39 feet 8 inches. The embankment made some years ago on top of the revetment wall saved the low-lying portions of the city from severe loss in the high water of the past few days.

A LEADING dry goods dealer in Sherbrooke, Que., L. E. Chamberland, has shown signs of distress of late, several suits having been entered against him since the first of the year, and he is now reported to be asking a general extension, spread over a year. He is overstocked, and has goods on hand to the extent of some $22,000, while he owes about $17,000.——A young merchant of Amqui, Que., J. L. Langlais, is reported to have arranged a compromise of 25 cents on liabilities of about $2,000.——C. A. Coderre, a prominent hotelkeeper, of St. Hyacinthe, is reported insolvent, owing some $16,000.——Maxime Leguerrier, general store, Ste. Therese, Que., has assigned to a Montreal firm of accountants. His business has been a small one of late, and his position regarded as weak. He owes nearly $2,000.

IT is reported that T. & W. Murray, of Pembroke, Ont., for many years one of the leading mercantile firms of the upper Ottawa, are going into liquidation. They have carried on extensive general stores at Pembroke, Mattawa, Des Joachims, Chapleau, North Bay and other points, and have also done considerable lumbering, as well as dealing largely in feed and general shanty supplies. Owing to somewhat speculative tendencies, and the widespread character of their business, they have never been financially easy, and four years ago they had to call their creditors together, and then arranged a compromise of 50 cents, payable in two years, and secured by a leading creditor. They owed at that time about $230,000 of general liabilities, $58,000 on mortgage, and $4,000 privileged. The value put upon the assets was $240,000, considerably below their face, and the settlement was considered a favorable one for the Murrays, but business since has shown a steady decline, and liquidation has been deemed advisable.

Mercantile Summary.

A STORY wired from Halifax Friday last states that Ottawa and Montreal capitalists, who some time ago bonded gold areas at Whycocomagh, C.B., are finding them rich. Dr. Gilpin, inspector of Nova Scotia mines, has sent to the Provincial Government a report on the result of his recent official trip to Whycocomagh. He thinks the gold discoveries are very valuable, but does not go into minute details. A tunnel has been driven into a mountain where rich deposits exist.

THE following failures are reported from Nova Scotia, all of them traders of a small class. L. H. Bentley, a native of Centreville, opened a harness shop in 1895, which has not been a success, and his assignment is reported. His real estate is mortgaged, and his father and a leading creditor are preferred.——D. J. Ross, of North-East Margaree, was a farmer, who foolishly sold his farm, and with a capital of $700 or $800 embarked in a general store business, in which he was totally inexperienced. Result insolvency within two years.——Charles Blackburn, a peddler and dealer in agricultural implements at Aylesford, has assigned, with small liabilities.——C. E. Gaul, a young man of Berwick, began a store business in a small way about two years ago. A bill of sale for $1 845 was registered against his stock in January last, and he is now reported to be seeking a compromise arrangement at 50 cents.

ANOTHER land mark, in the way of a compendious publication devoted to the wood trade, is issued by the *Timber Trades Journal*, of London, Eng. This is its 25th Anniversary Special Number, dated 19th February. It contains articles on the export pine trade of the Southern States and Turpentine farming; illustrated descriptions of the cities of Charleston, Norfolk, Savannah, Jacksonville; pictures of the Sabine Pass district of Texas, and portraits of its notabilities. There are also papers upon the American hard wood trade, the Russian wood trade, and various wood industries at Stockholm, Sundsvall, etc., in the Scandinavian countries, a description of Her Majesty's new dockyards at Devonport, and an annual review of the timber trade of London, and of various English, Scotch and Irish ports. These last abound with statistics. Snowball's Miramichi figures are in with the rest. There must be 300 pages in this handsome, enormous, interesting number.

IT is some years since the writer busied himself, upon returning from a visit to the British Islands, in making a collection of materials, such as barrels of Canadian grown apples, cases of peaches and grapes, some native wine, pressed flowers and leaves, photographs and water color sketches of Canadian *summer* scenes, which were duly sent to the "Old Country" to help in convincing doubters over there, who had never seen Canada, that it is not a land of perpetual cold, but possesses abundant sunshine and productive heat. These object lessons had a good result. Another way of producing a like effect is to be attempted, we are glad to observe, in the publication by Mr. Morang, of Toronto, during the coming June, of a midsummer annual, entitled "Our Lady of the Sunshine," an implied appellation for Canada which it is contended has a better basis than that bestowed upon her by Kipling "Our Lady of the Snows." By song, story and picture the effort will be made to controvert the notion that Canada is only a wintry land. A very striking cover has been designed by G. A. Reid, R.C.A. Every lover of Canada should wish well to this annual, a large circulation of which throughout the Empire has been arranged for.

NOTICE TO CONTRACTORS.

Sealed Tenders addressed to the undersigned, and endorsed: "Tender for Power House," will be received at this office until Sixteen o'clock on the 2nd of April, 1898, for the construction of a Power House (excepting the iron roof), on Section No. 3.

Plans and Specification of the work can be seen on and after the 24th day of March, 1898, at the office of the Chief Engineer of the Department of Railways and Canals, Ottawa. Printed Forms of Tender can be obtained at the place named.

In the case of firms there must be attached to the actual signatures of the full name, the nature of the occupation and residence of each member of the same, and further, an accepted bank cheque for the sum of $1,000 must accompany the tender. This accepted cheque must be endorsed over to the Minister of Railways and Canals, and will be forfeited if the party tendering declines entering into contract for the work at the rates and on the terms stated in the offer submitted.

The accepted cheque thus sent in will be returned to the respective parties whose tenders are not accepted.

The Department does not bind itself to accept the lowest or any tender.

By order,
L. K. JONES,
Secretary.

Mercantile Summary.

On Tuesday last a London manufacturing concern shipped for the Klondyke trade a large number of portable forges for miners and prospectors, and will shortly send a carload of wheelbarrows for use in the gold mining district.

On Monday last, the premises of Fader Brothers, victuallers, on Argyle street, Halifax, were closed under power of a bill of sale held by a hardware merchant for a claim of several thousand dollars, and a bailiff is in charge of their horses, wagons and stock.

An engagement is made by the lake steamer "Lynn" to carry a cargo of corn, 230,000 bushels, from Chicago to Parry Sound at the opening of navigation. The Parry Sound railway will take the grain to Montreal for export. This will make over 400,000 bushels contracted for at 5¾c. per bushel on corn and 6c. on wheat through from Chicago to Montreal by this route.

The reduction of 20 to 25 cents per 100 pounds on flour from Winnipeg and common points to British Columbia points, says the Winnipeg "Commercial," will prove specially welcome to Manitoba millers at the present time. "It is a well-known fact to those familiar with the grain trade (the agitators to the contrary notwithstanding) that wheat usually brings a considerably higher price, comparatively, in Manitoba than in the agricultural districts of the Pacific Coast States."

To the contention that the head offices of the Grand Trunk Railway ought to be at Toronto instead of at Montreal, because the former city is more in the centre of the system, while Montreal is almost at one end of it, does not find favor with the Montreal *Gazette*, which thus makes light of geography: "In Montreal they [the managers of the road] find themselves in the business centre of the system, and that is of more importance to them than being at the geographical axis."

It brings the matter home to a man, say in Toronto, to find, as we did yesterday, the Mackenzie River steamer route advertised by a small poster on a Bay street fence. The twin-screw steamer "Sparrow" will leave Athabasca Landing (which is 94 miles north of Edmonton), on such a day in April, says this poster, by way of Fort McPherson and Peel River—within the Arctic Circle. "The company will carry you and your supplies on board the steamer, or will carry you on steamer and tow your supplies in canoes." Application for terms, etc., to be made in Edmonton, Alberta. The route is something like 1,900 miles in length.

It is reported from Almonte that Mr. W. S. Connolly, formerly of Smith's Falls, has been made manager of the Morrisburg branch of the Molsons Bank. The Hochelaga Bank will open a branch in Quebec city on 1st May. The offices chosen are, we understand, in the Tache block, St. Peter street. Mr. Arthur Bruneau, agent at Sorel, is named for the management. The Halifax *Chronicle* of Tuesday last says that Messrs. Earle and McKay, of the Merchants Bank of Halifax, are about leaving for the West to take charge of agencies. Mr. Earle goes to Victoria, and Mr. McKay to Rossland. La Banque Jacques Cartier opens a branch in Ottawa, corner Sussex and Rideau streets, this week. The manager chosen is Mr. A. Charbonneau, late accountant of La Banque Nationale.

The Ontario Court of Appeals gave decision this week in the Toronto Street Railway Company tax appeal case. A majority of the court held that they were bound by the decision of the Supreme Court of Canada in the Toronto Consumers' Gas Company case to hold that the rails, poles and wires of the T.S.R. were assessable, the decision of this court in *re* Fleming and city of Toronto overruled. The Montreal *Herald* says, apropos of this decision: "As the rails, poles and wires are not taxed in Montreal, and as they come under precisely the same definition as do those in Toronto, the effect of this judgment will be to add to Montreal's assessment roll a very tidy sum in every ward in the city for rails, at $5,400 a mile of single track, wires $900 a mile, and whatever the value of the poles may be. These are the values fixed in Toronto, and will probably be adopted here."

The British Board of Trade has published, with the last issue of the trade and navigation returns, an explanatory note, from which the following is an extract: "3. A considerable amount of Canadian produce finds its way to the United Kingdom via the ports of the United States in winter, when many Canadian ports are closed by ice. To a limited extent produce from the United States is sent to the United Kingdom via Canadian ports in summer. Where, in such cases, the official documents enable a distinction to be drawn between Canadian and United States produce, it is credited to the true

A Satisfied Customer

Is the Best Advertisement You can Have

THE great satisfaction riders of the Gendron Bicycles fitted with Buckeye Tires have had in riding it is the key note of its popularity, and with the new 1898 improvements it is worthy of your consideration. It is the prettiest, strongest built and easiest running wheel in the market. It has won more road and track races than all other wheels put together in 1897, including the Dunlop trophy, which was won on Buckeye Tires four times out of five. In fact all the principal events in Quebec, Ontario, Manitoba, and Maritime Provinces were won on Gendron Bicycles. Intending purchasers will please note that fact before buying.

GENDRON MANUFACTURING CO., Limited
2413 St. Catherine St., MONTREAL

P. S.—Difficult repairs on all kinds of wheels is our specialty.

country of origin. But, in many cases, such a distinction cannot be made, so that in using the statistics it should be remembered that a certain amount of the trade of Canada with this country, especially in winter, is unavoidably included under the heading 'United States.'"

An assignment has been made by A. R. Burrows, late carpet manufacturer at New Hamburg. A month or two ago his assets were taken over by a party who held a mortgage on his stock.

Since writing about the lumbermen's association, a deputation from New Westminster, Rat Portage and Port Arthur, representing western lumbermen, has interviewed the Ottawa Government, and asked to have an import duty placed on American lumber.

Straight & McDonald were succeeded by McDonald & Johnson, as dry goods dealers, Windsor, in the spring of 1894. A year ago this firm dissolved partnership and the style was changed to McDonald & Co. At the time of the dissolution Johnson took $3,000 out of the business. Since then it has been a struggle for existence with McDonald, and now he is offering creditors 75 per cent. of their claims.

Trottier Bros., general storekeepers, Fosberry, in the Dauphin district of Manitoba, have assigned to S. A. D. Bertrand. They have been about eighteen months in business. Last month they endeavored to obtain an extension from creditors. Failing to do this, the result is as above stated.—J. W. Basset, freight carrier, Penticton, B.C., has been sold out by the sheriff, poor man.

H. G. Smith, butcher, Fort Erie, and John Tyson, in the same line of trade in Berlin, are in trouble, and both have assigned.——The name Klondyke has been apparently an unfortunate one for Samuel Briggs' grocery store in London. Although Samuel is reputed to be a good man, neither that nor the charm of the name could keep the bailiff out of his store. He has only been four months in this line of business.

Since the first of the year the weekly number of failures in Canada seems to have steadily decreased. This week's failures were over 50 per cent. fewer than those of the same week a year ago. This is very satisfactory. The volume of business doing is greater than this time last year, as the bank clearings, the telegraph and postal traffic and other indices show. The share of the Klondyke boom in this increase is very likely exaggerated, but it is undeniable that Klondyke trade is benefiting both manufacturers and merchants in many provinces.

In March, 1895, Beecroft & Sloan, planing mill men, at Flesherton, dissolved partnership. and David Talbot purchased the interests of the latter, investing $1,000 cash. For a considerable time they have been losing ground, and were obliged to mortgage their assets. Now we hear of their assignment.——J. A. Levis, succeeded Adams & McLeod, as a general storekeeper, at Sturgeon's Falls, early in 1886. At that time he was said to possess $1,000 capital. Although he has been considered a good business man, and did a fair trade, still he does not appear to have been a profitable one or he would not have been compelled to assign.

A fire occurred on Tuesday last in the extensive works of Rhodes, Curry Co., Limited, at Amherst, Nova Scotia. It destroyed the foundry and one of the planing mills, and slightly damaged machine shop. But other the buildings were not injured. The company having a large amount of foundry work got out ahead will be able to continue building cars without interruption. We are told that the burned buildings will be reconstructed and in full operation about the 15th April. The fire loss is placed at $28,000 and is covered by insurance.

LONDON LIFE INSURANCE COMPANY.

The result of the twenty-third year of this company's existence is an increase of new business, an increase in premium and interest receipts, and an increase of $80,000 in invested assets. It is interesting to observe that while the total premium receipts of this company for the year were $185,000, the portion of them derived from industrial insurance was $132,000, and from general premiums, $53,000. The cash profits paid to policy-holders, the matured endowments and the claims, industrial and general, made a total of $57,010. By way of providing amply for the liabilities of the company, the reserve required to be maintained at the credit of outstanding policies, has, on a large part of the business, been set aside on a four per cent. interest basis, instead of on a four and one-half per cent. basis, as required by law. A further sum of $10,000 has besides been provided. The company is conducted on prudent and economical lines.

ONTARIO LUMBERMEN'S ASSOCIATION.

On Tuesday last the Ontario Lumbermen's Association held a special meeting in the Board of Trade rooms, Toronto. Mr. A. H. Campbell, the president, presided, and among those present were: John Waldie, Victoria Harbour Lumber Company; W. A. Charlton, M.P.P.; Charles Beck, Penetanguishene; Thomas Conlin, Thorold; ex-Ald. James Scott, A. H. Campbell, jr., J. B. Miller, secretary-treasurer; C. H. Warren, Warren Lumber Company; R. Laidlaw, Longford Mills; R. Cook, South River; John Bertram, Toronto; Allan McPherson, Langford Mills; S. Lougheed, and W. C. Laidlaw. There are some forty members. The body has not met for a number of years, and this may be termed a re-organization meeting. A committee was appointed to re-draft the constitution. Mr. Bertram reported what had been done by the deputation of lumbermen who recently waited on the Government. They had asked that a duty of $2 per 1,000 feet be placed on lumber coming into Canada, so as to counteract the duty the Americans place on Canadian lumber. This was asked in the hope that the United States would see fit to remove its duty and give Canada free trade in lumber. The object was not protection, but increase of international trade. The Premier had said he would consider the question. The C.P.R. managers at Montreal had been approached by Mr. Waldie with a view to a reduction in freight rates, so as to allow the shipment to Manitoba from Georgian Bay districts of inferior kinds of lumber, so as to cut into the trade of the Dakotas. The meeting adjourned until 7th April, when the committee on rules will report.

Debentures.

Live Steam

Costs money. If wasted for want of a good steam trap—means just that much profit burned up in your boiler. Prevent it? Of course you can. Use the "HEINTZ" Steam Trap on all outlets; saves steam, allows no waste of hot water.

You can take a "Heintz" on thirty days' trial—or buy one, use it for a year, and if not satisfied return the trap—we return your money. Did we ever return it? No, never asked to; but it is our guarantee, and we are always ready to meet it.

Booklet will tell our story further. We would like to send you a copy.

LIFE ASSURANCE CO.

OF CANADA . . . .

Head Office, TORONTO, Canada.

Capital, - - $1,000,000

Deposit with the Dominion Government, **$250,000** (market value), being the largest deposit made by any Canadian Life Insurance Company.

PRESIDENT,

The HON. SIR OLIVER MOWAT, P.C., G.C.M.G.

Lieutenant-Governor of Ontario, Ex-Minister of Justice of Canada,

VICE-PRESIDENTS,

1st—JOSEPH W. FLAVELLE, Esq.,

Managing Director The Wm. Davies Co, Limited, and Director Canadian Bank of Commerce.

2nd—A. E. AMES, Esq.,

Of A. E. Ames & Company, President Toronto Stock Exchange and Treasurer Toronto Board of Trade.

This Company has valuable districts not yet assigned to field representatives, and is prepared to deal liberally with gentlemen of intelligence, energy and integrity, desirous of making a record for themselves and the Company.

The unprecedented success of the Company, its strong financial basis of operation, its sound, scientific plans of insurance, and straightforward and simple policy contract, render the Company one of the best for policy-holders.

Communications will be considered as confidential if so desired.

THE SITUATION.

If Secretary Scott's prognostic of the coming vote in the Senate prove correct it will soon be time to consider a substitute for the Mackenzie-Mann contract. Senator Scott drew his conclusion as to the coming vote from the tone of the debate, and especially the applause which speeches in opposition elicited. When the House of Lords throws out a bill, the usual course of the Commons is to wait till the Lords come to a different frame of mind, reaffirming the measure, year after year. But this resource will not be available for the rescue of the Yukon bill. The line of route selected need not be abandoned, if, as is generally admitted, it is best for present purposes. But construction must proceed upon a new policy. It will be necessary to call for tenders and most likely to pay in money. If the Government is to pay the cost of the road, or most of it, why, in the name of common sense, should the ownership be converted into a private benefit, to the sacrifice of the public interest? A railway to the Yukon will, if we may trust present appearances, be one of the best paying roads in America or anywhere else.

A Klondyke deputation, representing British and French Canadian and American miners, sent to complain of grievances, is now in Ottawa. When they left the Yukon, the object was to protest against the mining regulations, some of which have since been improved. When they arrived at Victoria, a new subject of complaint came to their knowledge, in the form of the Yukon Railway contract. Though the mandate of the delegates can scarcely be supposed to cover this new grievance, unless they were vested with plenary powers, it became the main subject of their protest. Starting from the mining region with the object of protesting against the smallness of the mining claims, one hundred feet each, they reach Ottawa to find the hundred feet stretched to two hundred and fifty. The railway contract, the deputation contended, meant the handing over to a private corporation the control of gold mining in the entire district. All the free miners would have to deal with Mackenzie and Mann. They could not secure locations till they had first staked out their claim, while the contractors could cover all the known gold lands with a blanket claim. It would take a free miner six months work before he could secure a claim. The contractors, besides getting the gold lands, could seize the timber lands and deprive free miners of the means of thawing the frozen soil. This picture is a little overdrawn, for the alternate sections would remain open to free miners. Mr. E. J. Livernash, the American representative on the deputation, had the most to say, and he played his part well; but in objecting to the Stikine-Teslin route and advocating that at the head of the Lynn canal, he took a part which is not popular in Canada. When we consider to what extent Canada and the United States are indebted to one another, each for right of way over the territory of the other, there would be little reason for being squeamish about adding another reciprocal advantage of this kind, at the head of the Lynn canal, if the United States Senate had not taken special pains to create alarm on this point. The free miners have, it must be confessed a serious grievance in the discriminating royalty of 10 per cent. imposed on them, against one per cent. charged to a monopoly which Parliament is asked to enthrone in the far north.

In supporting a bankruptcy bill introduced by a private member, the Ottawa Government evinces the necessity of proceeding tentatively and without incurring direct responsibility for the measure. It is perhaps useless to expect that on one point of difference, held by both to be vital, a common agreement can be reached by the merchants and the banks. In this state of things only a strong Government can, by acting as arbiter, cut the knot of the difficulty. The time for doing so has evidently not arrived. Independent discussion of Mr. Fortin's bill may prepare the way for some decisive action by the Government. Meanwhile the suggestion of Mr. Byron E. Walker that the discharge of the insolvent should rest with a Government officer, as in England, is the only way in which a judicial decision can be got. The whole business of winding up an insolvent estate is one in which creditors are chiefly interested; but creditors cannot all be trusted to be willing to grant a release, when there is no reason why a release should not be granted; there is always the danger that some will hold out for better terms than an equal division; and if such demands are acceded to, it is at the expense of the other creditors. A public officer, as Mr. Walker suggests, is alone suitable to the task of deciding whether a discharge ought to be granted or refused; he has no interest or feeling in the matter and can be trusted to give an impartial decision.

Already is visible the germ of the contention on which Spain and the United States are entering. Each country is making an independent enquiry into the cause of the explosion of the American warship "Maine," in the harbor of Havana, and it is probable that they will put different interpretations on the facts, the commission of the Republic finding that the explosion was due to some external cause, and the Spanish inquest reporting that it was produced by some internal cause. It is not likely that the question, how or by whom the external blow was struck, will be answered. That the Spanish Government or any of its officers was responsible for the wreck, is not likely to be charged. But this will not prevent the question of Spain's responsibility being raised; and this question will be answered in accordance with the real or assumed facts. But if, after all other grounds of probability are exhausted, without finding any sure resting place, and the conclusion be reached that the mine was exploded by an irresponsible fanatic, opinion in the Republic will be divided as to the responsibility of Spain. Some, including Mr. Robert

T. Lincoln, ex-Secretary of War, deny that, in the case supposed, Spain would be responsible; others, including Prof. H. E. Von Holst, of the University of Chicago, take the ground that she would be responsible. The ground of this latter conclusion is that the "Maine" was the guest of Spain; that, in the harbor of Havana, she accepted the place assigned to her by Spanish officers; that Spain in effect guaranteed the safety of the "Maine" while there, and that she failed to use due diligence to prevent the catastrophe that followed. This alleged want of vigilance is contrasted with the precautions taken to prevent mischief being done the "Vizcaya," a Spanish man-of-war, in the harbor of New York. There is this difference in the two cases; the reasons for special precaution, in the case of the "Maine," were not patent; in that of the "Vizcaya," which comes after the "Maine" was blown up, the necessity for extra vigilance was obvious.

Canada has hitherto kept her great canals in the hands of the Government, but if Promoter McLeod Stewart can get his own way this will not much longer be true. Mr. Stewart interviews the Ottawa Government with the modest request for a subsidy of $300,000 for twenty years to an Ottawa and Georgian Bay canal. It seems he has gone through the form—farce might be the better word—of entering into a contract with Mr. S. Pearson & Co. The astounding statement is made that the Imperial Government is expected to vote a liberal subsidy, this year, for the work. Really, if this be not downright misrepresentation, which we are unwilling to believe, it is the strongest delusion that ever entered the mind of man.

About the beginning of the engineers' strike, which ended in one of the greatest defeats that Labor Unionism ever met, came, in the form of an Act of the British Parliament, one of the greatest victories which these organizations have yet scored. It is entitled "An Act for Compensation of Workmen for Accidents." It applies to workmen employed on railways, in factories, in mines, in quarries, in engineering works, and in some building trades. Of late years the tendency of legislation has been, in most countries, to increase the liability of employers for accidents to their employees, and in England the employer is made responsible for all such accidents, whether he could have prevented them or not, unless the injury can be traced to the wilful neglect or serious misconduct of the employee injured. In 1837 the British Parliament established what is known as the doctrine of common employment, by which, if one employee injured another working for the same master, the latter was not liable. In 1880, a new Employers' Act removed this immunity; but gave liberty for workman and employer to contract out of the law. The remnant of the common employment doctrine thus permitted to exist, when exceptional contracts were made, is now entirely swept away. After being strongly opposed, the new Act has come to be looked upon as one of insurance, and the estimate is that the insuring of his workmen will cost the employer £1 12s. each, per annum. Something like this has been voluntarily done by some companies, the Midland Railway Company being quoted as having contributed £16,293 to a friendly society. The new law will come into force on the 1st of July.

Though it did not need the new British Act relating to the liability of employers for accidents to their workmen as an example to be acted upon in America, there being similar Acts in Massachusetts, it is likely to be duplicated, in some States, perhaps as early as the date fixed for it to go into effect. There is a bill with a like object before the legislature of the State of New York. But in some respects it scarcely goes so far as the British Act. By it the right of redress is founded on a defect in the building used, the ways, works or machinery connected with or used in the building, but only when the accident occurred through the negligence of the employer or some person in his service. The latter words negative the doctrine of common employment. But the Albany bill goes farther; it provides that warning of danger shall not be construed as an assent by the employee to a wrongful act, as neglect or omission, or as an assumption of a risk of personal injury; though it does not exclude proof that on some of these grounds he ought not to be entitled to recover. And there is a special provision against contracting out of the law.

THE INTERCOLONIAL R.R. TARIFF.

A revision of the tariff of the Intercolonial Railway under the new traffic manager, Mr. Harris, naturally provokes criticisms usual in such cases. Mr. Harris explained, at a meeting of the St. John Board of Trade, that when he entered on his duties he found the want of a regular system in making charges, different rates being exacted on the same classes of goods. He found a system of rebates, of which it was necessary to get rid. The absence of the practice of weighing, resorted to everywhere else, led to overloading, with the result that the rolling stock of the road was unduly damaged. While removing inequalities and introducing checks and improvements, the manager kept in mind the desirability of adhering, as nearly as possible, to the old rates. A Government road is not debarred from making competitive bids, and Mr. Harris is, in this way, reaching out for an increased share of the export lumber trade. He saw that, last year, the Grand Trunk carried 1,750 cars of lumber to Portland, at the rate of ten cents per 100 lbs. He reduced the rate on the Intercolonial to seven and a half cents. This distinct advantage given to St. John, he complains, has not been appreciated; the steamships at that port, his complaint is, charge a much higher rate for lumber than is charged at either Montreal or Quebec. He added that, if the vessel owners at St. John refuse practically to co-operate with his efforts for the good of that port, by giving the merchants of New Brunswick and Nova Scotia the same ocean rates as prevail at Montreal and Quebec, he will be obliged to withdraw the favorable tariff which he had made on lumber to that port. This is another illustration, added to the many that have gone before, of a low internal freight tariff being made ineffective by relatively high ocean freights. Is there any good reason why ocean freights should be higher at St. John than at Montreal and Quebec?

The new tariff of Manager Harris on the Intercolonial Railway has caused something like an outburst of anger from persons whom the charges adversely affected. That some of the complaints were well founded has been practically admitted by concessions since made. Where water competition has to be met the rates are made lower than inland in obedience to a rule acted upon everywhere. To complain of this is, in one sense, to arraign nature for the actual geographical configuration. As between local and through traffic there is the usual conflict. The road was built as a means of linking the Confederation together, and was intended to serve both local and through traffic. The fault of much of our railway management has appeared to be that the local traffic was unduly burthened compared with the through; and this often when the through traffic was foreign. When local traffic alone will not pay, through traffic has to be carried at such rates as are obtainable; the latter should never be below the remunerative point. In recasting the Intercolonial tariff, the rate on first and second-class goods was lowered, while on third, fourth and fifth classes there was a slight increase. One complaint is that while on the three latter classes the freight to St. John has been increased, the rates to Montreal remain the same. If there is to be a valid ground of complaint concession is likely to follow. It is essential, however, that to mere clamor the manager should refuse to yield, and it is more essential that he should be unyielding when he is in the right, than that he should give way to pressure merely because it is strong. In the Intercolonial the system of Canadian Government railways is on its trial; the aim should be to obtain from such a road as this a reasonable return on the capital expended.

FINANCIAL REVIEW.

We give below a condensation of the figures of the statement of Canadian banks for the month of Feb., 1898. It is compared with the bank statement for the previous month, and shows capital, reserve, assets and liabilities, average holdings of specie and Dominion notes, &c.

Canadian Bank Statement.

LIABILITIES.	Feb., 1898.	Jan., 1898
Capital authorized	$74,258,684	$74,258,684
Capital paid up	62,294,922	63,050,148
Reserve Funds	27,580,999	27,580,999
Notes in circulation	$35,823,923	$35,011,722
Dominion and Provincial Government deposits	6,819,130	7,437,798
Public deposits on demand	78,939,572	79,195,911
Public deposits after notice	140,799,375	140,704,038
Bank loans or deposits from other banks secured	......	......
Bank loans or deposits from other banks unsecured	2,821,895	3,300,764
Due other banks in Canada in daily balances	185,007	196,982
Due other banks in foreign countries	509,585	376,143
Due other banks in Great Britain	2,067,557	1,058,837
Other liabilities	731,345	551,358
Total liabilities	$268,697,468	$267,833,734
ASSETS.		
Specie	$8,619,198	$ 8,498,424
Dominion notes	14,873,224	16,422,068
Deposits to secure note circulation	1,883,067	1,883,067
Notes and cheques of other banks	9,775,768	9,168,922
Loans to other banks secured	....	....
Deposits made with other banks	3,918,650	4,485,359
Due from other banks in foreign countries	20,793,570	23,015,439
Due from other banks in Great Britain	12,109,646	15,101,061
Dominion Govt. debentures or stock	4,800,686	4,572,955
Other securities	32,819,699	30,577,201
Call loans on bonds and stock	21,497,983	20,001,729
	$131,091,491	$133,726,243
Current loans and discounts	211,659,749	207,532,321
Loans to Dominion and Provincial Governments	1,264,404	1,086,965
Due from other banks in Canada in daily exchanges	319,781	165,406
Overdue debts	3,232,918	3,230,417
Real estate	2,153,466	2,143,100
Mortgages on real estate sold	581,283	558,085
Bank premises	5,751,886	5,746,375
Other assets	1,520,786	1,708,421
Total assets	$357,575,974	$355,897,624
Average amount of specie held during the month	8,618,517	8,305,202
Average Dominion notes held during the month	15,592,966	16,590,821
Greatest amount notes in circulation during month	36,099,032	37,575,524
Loans to directors or their firms	7,581,920	7,712,397

The Bank Statement for last month has appeared at a reasonably early date this month, and the changes that are to be noted in it are a little more "up-to-date" than is the case sometimes.

The most noticeable change is in the item of discounts, which have increased nearly four millions and a half during the month of February, giving clear evidence of great activity of business. This is especially the case with the banks doing the leading business in British Columbia. As might have been expected, the extraordinary developments in the Klondyke region have already begun to affect the volume of business done by traders in Vancouver and Victoria; and the stories as to shops being open almost night and day, and clerks being, so to speak, worked to death, and proprietors at their wits' end to keep up the supply of goods, so fast are they going out, are no doubt in the main true. And yet, apparently they are only at the beginning of the great expansion, which must inevitably come when the full tide of Klondyke adventurers pours itself out upon the Pacific Province. The banks out there are fortunately able to provide all the accommodation needed so far, or that is likely to be needed in future, without the least difficulty. The Bank of Montreal, the Bank of British North America, and the Bank of British Columbia, have all of them been long established in that province, and have a firm hold of the business community there. The newer banks which have ventured into this field will find it not easy, for a time at all events, to attract a large amount of business to their offices, especially since the determination of the Canadian Bank of Commerce to occupy the two chief points, as an auxiliary to their Klondyke agency. With respect to this it is said that some of the banks are complaining that the arrangements made with the Bank of Commerce are too much of the nature of a monopoly, claiming that the banks generally should have the same protection for their offices within the walls of the mounted police enclosure that the Government bank has secured, and also that they be accorded the same protection when sending down gold from the mines to the cities. There can be no objection in the public interest to the Government making one of the Ontario banks its agent for Government business in the Klondyke, provided that the arrangements are not such as to keep out other banks altogether by making it impossible for them to do business safely and profitably. Representations are being made to the Government on the subject, and doubtless arrangements will be made of a satisfactory character to all parties. There can be no doubt it will be an enormously expensive place to do business in, and enormously expensive to send men both to and from. The Government therefore ought to deal reasonably and liberally with the banks that undertake to do business in that difficult field, and there can be no reasonable doubt that they will.

YUKON RAILWAY.

If the railway already contracted for be built this season, it can only be looked upon after all as a temporary make-shift. But even as such, it will be a great convenience to those desiring to get into the Klondyke country within reasonable time; and it must very greatly facilitate the transit of goods. Still, for some time to come, the bulk of goods going in will immensely exceed that of the gold coming out. The transit of merchandise is measured by *tons*. Now, a ton of coal is worth about five dollars; a ton of hay is worth ten, a ton of wheat is worth nearly thirty. And so we may go on valuing such articles as a ton of steel, a ton of iron and so on.

But a ton of gold is worth about *four hundred thousand dollars*.

An ordinary freight car will carry about ten tons of merchandize, so that it is possible for all the gold that can be mined in the Yukon, in a whole season, to be packed into half-a-dozen cars or even less. It is highly improbable that any other export than gold can ever come out of such a region as the Klondyke, for if agricultural development is possible (and no doubt it is to some extent), all the supplies of food, cattle, etc., that can be raised will be required by the mining population. Therefore, the whole export trade will be gold. And a single small train of cars may bring over the whole produce of the mines for a year.

Of course all these calculations as to what the district may possibly produce in a season are vague enough. Only one thing is certain, viz., that a single carload of gold, if ever a car is loaded to the full with such a precious metal, is worth nearly five millions! But the stimulus to railway transportation by the transit of prospectors and their supplies, is already becoming phenomenal, and is likely to develop much more largely as the time goes on. Meanwhile a very brisk trade in Klondyke supplies is being done in Montreal, and the demand is making some Ontario manufacturers busy.

But the Government ought to open up the route from Edmonton as well. A few hundred miles to the northwestward from that point would open up a magnificent country agriculturally, with a good prospect of gold being found in paying quantities here and there; while the value of a connection with the Yukon via this route will be demonstrated when prospectors begin to return, in which case everything should be done to induce them to remain in our North-western Territories.

INSOLVENCY LEGISLATION.

It is hard to know whether the Insolvency bill introduced by Mr. Fortin, a Montreal lawyer, is brought forward seriously or not. The mover of the resolution has had no communication whatever with Boards of Trade or men of business on the subject, and although he is said to have a considerable acquaintance with the subject, it is scarcely a reasonable way to bring on a measure of such vast importance without consulting them. No copies of the bill have been printed yet, but from the speech of the mover of the resolution the bill will be as radically objectionable to the business community as any that have preceded it.

The discharge clauses are mischievous to the last degree; and if the bill passes in its present form it might just as well be entitled "A Bill to Promote Insolvency," or "Insolvency Made Easy." There is every reason to believe from past experience that the effect of it would be to send thousands of traders into insolvency who are perfectly able to pay their debts. Then we should find the country once more flooded with notices of cheap stocks to sell by men who having got their discharge in insolvency, and bought back their estates, perhaps for 30c., or 40c., in the dollar, can undersell all their neighbors. Hundreds of other honest and solvent debtors alongside of them will thereby be compelled to do business at a loss and drift into insolvency themselves. And so the ball, when once set rolling by such a bill as this, will go on increasing in power until insolvency becomes so general as to be an intolerable nuisance. Then the bill will be repealed after having done an incalculable amount of mischief.

Legislators would do well with regard to this matter, to take note of the following main points:—

(1) There is no need in Canada for a bill for the relief of insolvent debtors. Insolvent debtors as a rule, know how to relieve themselves, and can get relieved without an Act of Parliament.

(2) Canada does not want a bill to make insolvency a comfortable, respectable and money-making process.

(3) There is not a class of people in the country, who, for want of an Insolvency Bill, are wasting their lives in services of little value to the country.

But Canada *does* want (1) A measure by which dishonest traders can be compelled to give up their estates; (2) By which they can be prevented from preferring their relatives and friends. (3) By which an equitable and economical division of an insolvent's estate can be made, and lastly, by which an *honest* insolvent can obtain his discharge with consent of such a number and such a value of his creditors, as would make it impossible for a *dishonest* debtor to take advantage of it.

ABSTRACT OF BANK RETURNS.

28th February, 1897. [In thousands.]

RECIPROCITY WITH THE STATES.

Again and again, any time these twenty years, have we heard by letter and by word of mouth expressions of wonderment by intelligent Americans that the powers at Washington should be so determinedly blind to the advantages of reciprocity between the United States and Canada, or so inexplicably opposed to it. People in Boston, in Portland, in Albany, in the lake cities of the Northern States, in Minneapolis, who know Canada intimately and trade with her freely, are eager for an interchange of trade on freer terms than the present tariffs on either side of the boundary will permit. But what common sense dictates and common interest appears to recommend cannot be got—and why? It used to be considered that the opposition to reciprocity was wholly political, that the treaty in existence from 1858 to 1866 was abrogated because Canada had sympathized with the Southern States during the rebellion and had harbored Southern refugees. But it now appears that this is not the real reason. The real reason is an organized opposition to Canadian products and manufactures being admitted free to the United States. As an American newspaper puts it: "We desire to increase our exports, but we are not willing to increase our imports, and so we turn our backs, so far as legislation goes, upon our best customer upon this side of the ocean."

In the course of a review of the arguments in favor of reciprocity with South American republics and Mexico, and a recapitulation of the results of the experiment of thirty years ago made by way of a treaty with Canada, the New York *Journal of Commerce* ridicules the trade to be done with those Latin communities as pitiably small as compared with what might be done with Canada. For eight years prior to reciprocity the annual average exports of the United States to Canada were a little over nine million dollars; during the eight years of the treaty they were well over twenty-five millions. But the average annual imports of the United States from Canada for like periods increased from a little under four to nearly twenty-three million dollars. "In eight years before reciprocity we imported but two-fifths as much as we exported to Canada. The total amount of our commerce increased from a little more than a hundred millions in eight years before the treaty, to $625,000,000 during the treaty, but our imports amounted to nearly $300,000,000; that fact [the imports], is the reason why no reciprocity treaty can be secured."

It is freely admitted by the journal quoted that the advantages of freer commerce between the United States and Canada would be obvious and immense. "The balance of trade was in our favor before the reciprocity treaty, during the treaty, and is now." But it is pointed out that there are interested parties, and powerful parties, in the States, eager to stir up animosity to Canada and get lumber and other products of the Dominion excluded. "There are railroad companies adverse to the admission of Canadian coal into New England; there are farmers who fear lower prices for hay if Canadian hay be admitted; there are politicians who find it much easier to talk about protecting American labor from cheap foreign competition than it is to deal with the currency or any other topic that demands immediate action. Hence we shall for some time continue to put obstacles in the way of our trade with the Dominion, and resort to all sorts of nostrums to stimulate our trade with the tropical part of the continent, whose populations will not be nearly so valuable customers as the highly civilized people speaking our own language who live in the rigorous climate to the north of us."

It is agreeable also to find a paper like the *Manufacturer*, of Philadelphia, a strong protectionist, taking up the subject of reciprocity and giving strong reasons for its contention, that the time has come for a new commercial treaty with Canada. The cause for this outspeaking just now is the adoption by Canada of the preferential system of tariff duties, under which Great Britain, or any other country granting favors to Canadian exports, shall be entitled to a reduction of duties.

EXPORTING CATTLE.

While Canadians are attempting to build up a profitable export trade in dressed beef there continues to be an increased movement in cattle and sheep to Great Britain and the United States. It is becoming pretty generally admitted in foreign countries that the hue and cry raised some years ago against Canadian cattle was quite unnecessary. The experience of the past year goes to show that the diagnosis of the Imperial officers, on the authority of which the cattle trade of this country was subjected to severe limitations, was erroneous. Of the 117,428 cattle exported in 1897 no trace of pleuro-pneumonia or any contagious lung disease was found by the inspectors. When it is considered that these cattle were gathered from all parts of the Dominion east of the Rocky Mountains, it must be admitted that the herds of Canada are in a sound, healthy condition. The following table shows the number of cattle and sheep inspected for export for Europe during the past four years at Montreal and St. John, N.B.:—

	Cattle.	Sheep.
1894	82,217	121.504
1895	99,606	187.328
1896	101,502	117,428
1897	117,428	62,406

Since the removal of the regulations which required a quarantine retention of 90 days on cattle entering the United States from Canada, this trade has shown marked development. During 1895, there were only 882 head sold in this trade, 1,646 cattle in 1896, and in 1897 when the new regulations were passed, 57,857 cattle were sent across the border line. In this way a profitable outlet has been found for cattle which were not of a suitable size for shipment to Great Britain. The demands from the United States has been largely for young store cattle. Our farmers are, as a rule, not well provided with facilities for feeding these cattle to a thoroughly fattened condition, and would do well to turn more attention to the matter.

REACHING OUT FOR TRADE.

A year or more ago, we printed a communication from the then Japanese Consul in Canada, Mr. Nosse, stating that his nation was rapidly learning to use Canadian flour, and that it was prepared to like and use Canadian butter. He, therefore, recommended that pains be taken by Canadians to put these products on the Japan market. The movement to do so has been but slow. Still, when Mr. Anderson, the Canadian Trade Commissioner to Japan, returned from that country to Canada, he induced the Department of Agriculture to send a consignment of a ton of butter to Japan. This was done, and three days after its arrival a cable was received to repeat the consignment. Mr. Anderson is now in receipt of the following information from the consignees: "The butter sent arrived in good order, and is certainly the best that ever came into this country. It went like greased lightning. Every day or so a note comes in asking for more. I can safely report to you that the brand forwarded [a North-West product] is an established butter in Kobe." This was creamery butter, and it was first-class. It would be a mistake to send poor stuff. The Japanese are a dainty people. Let us see to it that the "one ton" of yesterday becomes a hundred tons or a thousand tons in successive years.

LIFE ASSURANCE IN CANADA.

We are progressing in the matter of life assurance in Canada. The number of life policies issued in the latest twelve months was 284,454, which compares well with the 245,000 of 1895 and the 198,000 of 1893. This number of policies means, if we assume that each policy means a life, that more than one in three of the married male population of Canada has his life insured. Of course there are more policies than lives, but the statement is not far from accurate that 36 per cent. of the married male population by the last census have passed through the hands of the life underwriters.

Most of them are assured in Canadian companies, too. Out of the net assurance in force in all Canada at the close of 1897, which totalled $344,000,000, more than $208,000,-

000 was in Canadian companies. But it must not be forgotten that there were also 97,445 assessment system certificates issued last year, representing the large sum of $136,261,000, of which $96,600,000 is Canadian and $39,600,000 American. If we were to add this to the other the ratios given above would have to be changed. Particulars can be found in the Table on page 1265 of this issue. Comparison with former years shows that the preference for our companies continues to grow. The amounts at risk in the different groups of companies last year were as under :—

	1894,	1896	1897.
Canadian companies........	$177,628,941	$195,303,042	$208,927,011
American "	97,282 411	97,660.009	100,094,693
British "	33,884,529	34,837,448	35,292,744
	$308,795,881	$327,800,499	$344,314,448

There is thus an increase shown by every group in each year, though the ratio of increase is in favor of the Canadian companies, of which there are now fifteen in the list, where there were but eleven in the previous year. The Canadian companies not before appearing in the Ottawa Blue Book are the Excelsior, Northern, Imperial and Royal Victoria. The Excelsior has recently procured power to do a Dominion business; the other companies are new. As in former years, the Canada, the Confederation and the Sun are far in advance of the rest of the companies in aggregate business, with, however, the Ontario close behind.

Of the fourteen British companies, eight of which do new business, the Standard, the British Empire and the London and Lancashire do more than three-fourths of the whole thirty-five millions written in the year 1897.

American life companies in Canada number fourteen, of which number ten are doing new business, as in the previous year's Blue Book. The big American companies as they are called in the profession, the New York, the Mutual, the Equitable and the Ætna, do $75,000,000 out of the $100,000,000 done by our friends from the States. A noteworthy business is being done in the industrial insurance by the Metropolitan, which has written more than five millions in each of several recent years.

INSURANCE LAW IN CANADA.

To say of a law book that it is agreeably readable is to pay it an unusual, and, possibly, a doubtful compliment. The books of the most widely read commentators on English law are so complicated in arrangement, and difficult to understand, that the student of law is almost led into a confusion of erudition and obscurity. But while the new book of Mr. C. M. Holt, "The Insurance Law of Canada," recently from the press of C. Theoret, Montreal, is well written and the contents easy of reference, it deserves to be called, besides, a very complete exposition of the subject. Book making does not appear to have been Mr. Holt's prime object in preparing his material, as the subject matter was first given to the students at Laval University, in the form of a course of lectures. The first two chapters, devoted to an enquiry into the history of the contract of insurance, and a discussion of the nature of the various kinds of insurance, bear the impress of the scholar's hand rather than that of the barrister. However, but little space is occupied in treating of theoretical problems, and after an outline of the division of the legislative power on insurance matters between Federal and Provincial authorities, Mr. Holt at once takes up the practical questions which arise for solution every day in the insurance world.

It would be impossible in a short review to more than enumerate a few of the principal topics which the author has discussed. Among other subjects, Mr. Holt treats of the making of the insurance contract; the application; payment of premium and delivery of policy; insurance under interim receipt; insurable interest; insurance by mortgage; transfers; agents—their powers and duties; proofs of loss; fraudulent claims; arbitration; foreign companies in Canada; suicide and death by justice; mutual insurance; re-insurance; winding up of companies. An interesting feature of the book, which will be appreciated by students of insurance, is a series of concise definitions of different phrases, which have acquired a somewhat technical meaning, such as "open" policy, "valued" policy, "interest" policy, and the like. The method of discussion, in which general principles are first stated and then hypothetical cases given or legal decisions cited to explain the state of the law, is to be commended, as tending to make matters plain to the student or lay mind. Prolix and intricate legislation has been successfully summarized in this bulky and handsome volume, but in the more important cases the author has not hesitated to give the complete judgment of the court. The book aims at completeness, and contains, we believe, all the statutes and orders-in-council of the Dominion or Provinces on the subject of insurance. This collection—it may almost be termed codification—will be sure to be appreciated by those whose time is limited or whose libraries are incomplete.

VANCOUVER BOARD OF TRADE.

The membership of this body has grown from 76 at the beginning of last year to 147 at its close, a striking indication of the belief of Vancouver's mercantile citizens in the value of boards of trade and the sense of obligation they feel to support theirs. Between 40 and 50 members were present at the annual meeting, when Mr. Godfrey, the president, occupied the chair. His address mentioned with regret the demise of Mr. D. Oppenheimer, the first president of the body, and went on to enumerate the subjects of the council's deliberations for the twelve month, a lengthy list. It appears that her merchants have subscribed no less a sum than $7,545 to advertise Vancouver as an outfitting point for Klondyke travelers or miners, of which $4,514 has been paid, and is expended in using English, American and Canadian journals, and in opening a bureau of information in Seattle.

Agriculture in the Province, which has for years been depressed, is now, the report says, showing marked signs of improvement, the rush to the Klondyke causing brisk demand for horses, cattle, hay and feed. Lumber shipments (foreign) from the port were less in 1897 than usual, partly because shipping was scarce. The number of craft building at coast cities for Klondyke traffic is a noteworthy feature of the season.

The mining figures for the province show a wonderful development. These illustrate the production of gold, silver, lead and copper: 1892, value, $139,440; 1893, value, $297,400; 1894, value, $781,342; 1895, value, $2,342,397; 1896, value, $4,257,179; total, $7,817,758; while in 1897 the South Kootenay produced alone a total of $7,613,344. The salmon pack for 1897 has reached the record figure of 1,007,838 cases, made up as follows: Fraser River, cases, 860,803; northern pack, cases, 147,035; total, cases, 1,007,838. The paragraph upon general business is a glowing one. As to real estate, "quite a number of business lots have changed hands at larger figures than have been given for some years. There has never in the city's history been a time when so many people were passing through, and in many cases staying here, as at present every available house is occupied, and a great many new ones are in course of erection."

Mr. Godfrey was re-elected president and Mr. Tisdall chosen vice-president, and the gentlemen whose names follow were elected members of the council of the board: Messrs. R. H. Alexander, W. F. Salsbury, W. Murray, Sol. Oppenheimer, G. I. Wilson, F. Buscombe, J. C. McLagan, H. O. Bell-Irving, W. Skene, W. H. Ker, C. G. Johnson, F. Cockburn, W. Pellew-Harvey, C. Sweeny and F. C. Cotton. The first six and the last six of the council form the Board of Arbitration.

A resolution was unanimously carried approving the proposed action of the Federal Government in arranging for a survey for a railway from the Stikine River to a point on the British Columbia coast, south of the United States territory. Mr. McLagan mentioned the necessity of new light-houses on the west coast, in view of the Klondyke trade. Insurance rates (marine) have been increased, it appears, 100 per cent. in northern waters, and a committee is appointed to look into the matter.

SHERBROOKE BOARD OF TRADE.

The adjourned annual general meeting of the Sherbrooke Board of Trade was held on Tuesday evening, 15th inst., President W. R. Webster in the chair. Ten new members were ballotted for and five more put up. The financial statement adopted. In his review of the work done by the council during the year, the chairman mentioned the negotiation between the city council and the Gas and Water Company; an unsuccessful attempt made by a deputation to have Saturday cheap fares resumed by the G.T.R., and a successful effort to get the Quebec Central Railway to adjust an accommodation train for the citizens. The St. Francis bridge, the proposed opera house, the paving of Wellington street were other local matters considered by the council. And a meeting with a representative from the Toronto Rubber Co. to have their place in Sherbrooke, closed the work for the year. Good progress has been made by the city during 1897, the president said, and there are good prospects ahead. Officers were elected as under:

President—W. R. Webster.
Vice-President—D. O. Denault.
Secretary-Treasurer—C. H. Foss.
Council—G. W. Gaboury, G. G. Bryant, J. S. Mitchell, W. B. Neil, G. A. LeBaron, N. N. Walley, W. H. Wilson, J. A. Wiggett and W. A. Moorehouse.

ST. HYACINTHE CHAMBRE DE COMMERCE.

An the annual meeting last week of the St. Hyacinthe Chamber o. Commerce, Mr. Dubrule, the retiring president, was in the chair After the election of officers for the ensuing year, Mr. Dubrule read his report for 1897. In it he deplored the apathy of many of the leading citizens, on account of which the Chambre de Commerce has not been as prosperous and influential as it might have been. Most of the questions which have come up before the Chambre during the past year for discussion dealt with the relations of the city to the railways passing through St. Hyacinthe. The city had failed to obtain from the Intercolonial what it had a right to expect, " and this leaves us at the mercy of the Grand Trunk, as formerly. The city owes a debt of gratitude, however, to the Drummond County Railway and to the United Counties Railway for having continued their reduced rates to the surrounding villages on market days." While regretting the destruction of one of their important industries by fire—Moseley's tannery—he was glad to report that the city factories generally were busy, and employing more hands. He looked for increased prosperity through the water with which the city would soon be supplied.

The annual election of officers took place, and resulted as follows:

President—J. N. Dubrule, re-elected.
Vice-President—J. B. Brousseau.
Secretary-Treasurer—Dr. L. V. Benoit.
Directors—Messrs. W. W. Pickett, J. Laframboise, S. Casavant, L. A. Guertin, E. H. Richer, G. H. Henshaw, F. St. Jacques, and E. R. Blanchard.

OWEN SOUND BOARD OF TRADE.

Some very apt remarks were made at the annual meeting last Friday of the Owen Sound Board of Trade on the subject of the value of such bodies to a community and the duty as well as interest of business men in their maintenance. The speaker was Mr. John Wright, the new president of the body. He spoke his mind freely as to those persons who never think it worth their while to lend a hand in the advancement of the town's interest. "Every man is a centre of influence," he said, "and may help to revive the interest of the board. It is all very well to go around annually and stir up the members, but that does not fill the bill. It is necessary to call in outside forces. No one business man could be benefited in the town without some of that benefit going out to others."

Mr. Robert Wightman was chosen vice-president. Mr. Rutherford, who has acted as secretary-treasurer for a number of years proposed Mr. W. H. Smith as his successor, saying he felt that the interests of the board would certainly be advanced by a more frequent change of the position which he had occupied for six years. Mr. Smith was chosen. The members of council are: Jas. McLauchlan, J. W. Maitland, S. J. Parker, S. Lloyd, C. Eaton, M. Kennedy, J. G. Hay, B. Allen, S. Hodder and T. I. Thomson. The Board of Arbitration was chosen by ballot as follows: Jno. Harrison, Geo. Dench, Ewing Buchan, J. R. Brown, W. F. Gray, J. R. Wainwright, Dr. Allan Cameron, P. Eaton, W. M. Matthews, W. T. Lee, J. H. McLauchlan and J. H. Rutherford.

The retiring president, Mr. Ben. Allen, read his valedictory address, and Mr. Rutherford submitted statistics of the trade of the port. The former gentleman congratulated his hearers on the progress of the town, the increase of local grain trade, and of various exports to a degree hitherto unequalled. The deepening of the harbor and the new and modern C.P.R. elevator has increased the shipping of the harbor, and the prospect for an even larger business of all kinds in Owen Sound he considered bright. We regret we cannot make room for the Secretary's figures.

—Lightning did damage in various parts of Quebec and Ontario last Friday, Saturday and Sunday. At Cramahe, a barn was burned, and at Colborne a residence damaged. In Pickering, barns and outbuildings, and some animals were burned, the loss being $4,000. But worse still was the burning to the ground, through lightning stroke, of the handsome Romish church, at Stottsville, south of Montreal. The loss in this fire is placed at $80,000, against which there is only $15,000 insurance.

WITH THE DRY GOODS TRADE.

Whip cords for costumes, promise, in the opinion of Toronto merchants, to sell well this year.

Men's furnishing sales are numerous in Toronto the past few weeks, and stocks of the kind are being cleared up before the new spring goods are displayed.

As an illustration of the value to the city of Halifax of a large wage-distributing institution, a Halifax paper says that the cotton factory's pay roll in that city amounts to $3,000 per week.

American manufacturers of neckties are in receipt of more orders than can be promptly filled. Materials in specialty shades, such as cerise, turquoise, burnt orange and light syndicate colors, are very scarce, which is another feature that tends greatly to delay deliveries.

The most popular fabric of the summer, so say the authorities, will be grenadine, shown in black with colored lines, forming checks and plaids, and also, at any rate, in the more expensive descriptions, in solid colors, chiefly blacks, with an all-over silk brocade of floral design.

In the retail shops, millinery displays are every day coming into prominence. Many of the stores are combining millinery and handsome laces in their window exhibits, and the results in many cases are most pleasing, at least enough so to attract and hold the people for a much longer time than the average display.

A number of merchants are making preparations for a revival in the parasol trade. Aim to have exclusive styles. To sell a parasol to a customer as an exclusive novelty, and then re-order the same styles for stock, would be to lose your customer and injure your reputation. Find new styles to take the place of goods sold.

The craze for golf suitings promises to become even greater this year than last. By improved machinery the cost of making patterned hose has been diminished, and some new varieties have been evolved. Several attractive lines have the pattern embroidered on the surface instead of being knit in the fabric. Full stocks are the order of the day on the part of wide-awake merchants.

The dry goods trade is gradually extending to different centres throughout the Dominion. In respect of wholesale business, the city of Winnipeg is growing in importance. The first millinery openings of the wholesale merchants of that city were held in the second week in March, and were well attended. The styles and shapes then on view were complete, and the whole affair a credit to the city.

FOR GROCERS AND PROVISION DEALERS.

Messrs. McCulloch & Herriot, who have for many years operated a flour mill at Souris, Man., have decided to build a new flour mill at Souris, of three hundred barrels capacity per day, during the present season.

The civic finance committee of the Ottawa city council will recommend that $250 be granted to assist the Ottawa Board of Trade in establishing a cheese board. Carleton county council has voted $250 and Russell county is expected to vote a similar amount. The cost of establishing the board is placed at $1,200, and the board of trade intend to furnish the funds over and above these grants.

A novel export trade has been suggested in the request of the Danish consul at Montreal, that a firm in that city should send a cargo of ice to Copenhagen, as the extremely mild weather in Norway and Sweden, whence the city secured its supply of ice, had rendered a scarcity very probable. It is not at all likely that a cargo will go over, as from present indications Montreal itself will have little enough.

Much interest was felt by Canadian dairymen and dairy exporters in the sale of Canadian cheese by auction, which had been announced to take place on 21st inst. The sale took place, 15,000 boxes were offered, and brought on the whole higher figures than the regular cable quotation. The effect of this has been to improve the tone of the Canadian export market, which has been both weak and dull.

The Canadian tea market is on the whole dull, although the tone is generally firm, of Japans especially so. The demand which was expected in consequence of the burning or soaking of teas at the Carrie warehouse fire last week has not been manifested. Our Montreal letter says that some stocks of tea held there on New York account have been shipped back to the latter city, which offers a better market.

The dairymen of the counties of Richmond and Drummond, Que., have formed a board of trade. At the last meeting the committee on by-laws presented their report, which was unanimously adopted. With a few minor amendments they are practically the same as those of the Cowansville Board of Trade. Messrs. Stenson, M.P., and Bedard, M.L.A., were elected honorary presidents, and James Dickson, secretary-treasurer. Messrs. Watson, Wintle, Miller, Lefebvre, McMurray and Marcott were appointed a membership committee. The next meeting for the purpose of appointing salesdays, etc., and for general business, takes place on the second Saturday of May, at one o'clock.

A WILD RUSH.

The many-headed multitude of the plebs and the aristocrats of Mayfair appear to show equal credulity and lack of sense in running after a promising "gamble." London papers to hand tell curious tales of the insane rush on March 10th and thereabout to get shares in the joint-stock company which is to take over the London business of Sir Thomas Johnstone Lipton, the well-known provision, tea and coffee merchant. The applications were unheard of. Orders were made to the amount of over $125,000,000 for the $12,500,000 asked, of which sum Mr. Lipton, for himself, directors and friends, retains $6,250,000. Ten times the sum required was offered, making the flotation the most remarkable ever known. Not that the people who applied knew anything in particular about the company's affairs—this is not necessary, it seems, if a person only can get a "straight tip" from somebody who does know. The required tip was forthcoming; it was declared to be "a good gamble," and forthwith west end people, ladies of title, officers and public men besieged Sir Thomas Lipton, imploring him to take their money. Extraordinary scenes were witnessed at the Bank of Scotland, where the lists were opened. The police had to regulate the crowds. Sir Thomas Lipton is said to owe his knighthood to an opportune donation of £40,000 sterling which he anonymously made to the London Hospitals Fund, of which the Prince of Wales is president. Who the donor of this princely sum was leaked out, and Lipton's name soared like a balloon. There is nothing discreditable to Lipton in all this, quite the contrary. But the incident shows how truth sometimes beats fiction all hollow.

BOOKS RECEIVED.

Current History, 4th Quarter, 1897; pp. 256. Edited by Alfred S. Johnson, Ph.D. Price, $1 50 a year. Boston: The New England Publishing Co.—We have more than once expressed our admiration of the plan of this publication and our sense of its high value. It was founded in order to present a quarterly digest of the world's progress in all its phases, political, social, scientific, etc., and this it has done with great precision. It is virtually what it professes to be, a compendium of passing events, or "current history." What should commend it to Canadians is that it treats of Canada in proportion to her modernness and importance, which few American journals do. The portraits and maps are an interesting feature of the magazine.

Paris, by Emile Zola.—The recent exciting appearance of M. Zola in the character of a patriotic seer, challenging persons in high places in France at the very time that he himself was being arraigned for treason, lends interest to the present volume. It is an exciting and disturbing book, this, which along with "Lourdes" and "Rome" forms the Trilogy in which are recounted the experiences of a young Abbe, who is disturbed in faith and shaken in hope, but ends by finding peace in charity and nature. The picture of Parisian life is minute and graphic, as Zola's descriptions usually are: the reader is shown the stormy whirl of public life, where the puppets are the soldier, the journalist, the deputy, the anarchist, the banker, the priest; he is one day placed inside the gilded palace of "Society," and the next looks down into the tenements of the outcast poor. Sadness and sin are in both; in both, too, are heroism and self-sacrifice. The book is issued in one clearly printed volume of 700 pages by George N. Morang, Toronto, the translation admirably done by Ernest Vizetelly.

A Man's Value to Society.—A stimulating book,[*] by a man who has studied and observed to some purpose, and has learned to distinguish the shams of the world as well as the realities of human nature. Such chapters as "The Physical Basis of character," and the "Moral Uses of Memory," as well as that on "The Uses of Books and Reading," are full of animating incidents of great men, and epigrammatic reflections on economics, ethics, social problems and science.

—The Postmaster General seems to be resolved that his department shall be up to date, and accordingly the issue of Government postal notes, as they are used in England, will be begun with the next fiscal year, viz., on 1st July next. The new notes are expected to take the place of money orders to a large extent. We are told that the design of the notes is neat; it is also to be hoped that the paper will be good.

ANSWERS TO ENQUIRERS.

W. A. L. Vancouver, asks: "What security, if any, have Canadian banks to put up for their note circulation. An answer through your paper will oblige." [In accordance with section 54 of the Banking Act of 1890 (53 Victoria, chapter 31), every bank has to deposit with the Minister of Finance a sum equal to five per cent. of the average amount of its notes in circulation. This amounted, in January last, to a sum of $1,883,067 on a circulation at that date of $35,011,722.

Worker, Galt.—What you call the Pullman strike was in reality a labor difficulty on a large scale, for it led to the great American railway strike of 1894. The Pullman people could not do impossibilities; they could not pay "good times" wages and employ 6,000 men when they had work for only 2,000 in the bad year 1893. Whatever may be said of the late George Pullman's selfishness it is something to remember to his credit that he laid out and built the model town of Pullman, giving his workmen well-drained streets, sunny and sanitary homes for the same rent in many cases as they had paid for dingy and unhealthy houses. It is doubtful if Pullman was the originator of the sleeping-car idea; we believe he was not. What he did, however, was to make the idea a reality on an enormous scale.

J. M., Hamilton.—(1) Think the company a weak one. (2) Cannot say. (3) At the close of 1896 it had no deposit with Government.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, March 24th, 1898, compared with those of the previous week:

Clearings.	Mar. 24th, 1898.	Mar. 17th, 1898.
Montreal	$13,174,058	$14,252,209
Toronto	9.035,089	8,006,615
Winnipeg	1,233,448	1,344,126
Halifax	1,035,667	1,053,929
Hamilton	703,845	653,040
St. John	453,221	496,344
	$25,635,328	$25,806,263

Aggregate balances this week, $4,570,934; last week, $3,754,034.

—At its final meeting last week, the Association of the Chambers of Commerce of the United Kingdom, Sir H. Stafford Northcote presiding, adopted a resolution on the motion of the Leeds Chamber, recommending the advocacy by all possible means of the compulsory adoption of the Metric System of weights and measures, legalized by the Act of last session, with the view of inducing Her Majesty's Government to afford facilities for the amendment of the law in this respect. It was resolved, on the same occasion, that the absence of an official parcel post between Great Britain and the United States was detrimental to the commercial relations of the two countries, and the Government was asked to renew exertions towards the early establishment of such a service.

—The campaign in favor of good country roads is proceeding in Ontario. Some thirty-six townships have adopted the plan recommended by Mr. Campbell, provincial road inspector, for making the best of the statute labor system of road-making. He suggests the appointment of a paid road supervisor for the township. The roads are then divided into five-mile districts and a foreman appointed for each. All the roads and road-making in the township will be under the direction of the supervisor. The townships are buying machinery for the economical treatment of the roads, and we are justified in expecting good results, the fame of which will impel other municipalities to do likewise.

—Unpleasant news comes from Hamilton this week with respect to the prospects of the payment of creditors of the Homestead Loan & Savings Company, one of the terminating societies of recent institution, whose manager, Col. Studdart, died some ten months ago, suddenly. It was supposed that the assets would pay 40 cents in the dollar; it is now said they will not pay twenty. In such case the assets, which were put down in April or May last at $57,000, have shrunken to something less than half that sum. Mr. C. S. Scott has now only four properties to close up, and he is trying to do that without pressing any of the parties interested unnecessarily.

Robert Young, manager for the Great West Life Assurance Company, at St. John, N.B., has been appointed superintendent for that company, and his place at St. John is filled by Mr. A. J. Ralston, formerly inspector of agencies for the Great West Life.

Correspondence.

HINDRANCES TO TRADE.

Editor MONETARY TIMES.

SIR,—In a recent issue of your paper you say that the commercial travelers' tax in Woodstock has been abolished. Wm. Clark, representing the Maritime Lithographic Co., was in that town last week or a week before, and was waited on by an officer and required to pay $3 for a day license, which sum he paid.

It has gone abroad that there is no commercial travelers' tax in Fredericton, but I was arrested there last fall for soliciting orders for advertisements in THE MONETARY TIMES, *Maritime Merchant*, Montreal *Gazette*, St. John *Sun*, and hotel register. As the least of two evils I accordingly took out a license, feeling keenly the disgrace of being marched along the street in charge of a policeman. I filed bail and consulted a St. John lawyer, who reported that he could find no law to justify such an outrage. I then interviewed Dr. Stockton; he fished the law out of a dusty tome; it was there sure enough, and under its provisions any one not a resident can be arrested for attempting to do business in Fredericton.

A few days ago a man who came here from the West with a carload of beef was first attacked by the market clerk and compelled to pay market fees, amounting to several dollars. He was then summoned before the police magistrate and compelled to pay a license fee. Also, mark this: the St. John sharks issued only a summons, but nothing less than a warrant will do in Fredericton. Our provincial and municipal rulers down here in New Brunswick have not yet laid a tax on air, but they probably would if they could.

I commend these facts above stated to the notice of the members of the Federal Government, with the suggestion that they supply the glib-tongued emigration agents in Europe with copies of the various provincial and municipal acts bearing on licences, commencing with New Brunswick and, say, finish up with P.E. Island.

Yours respectfully,
H. F. COOMBS.

St. John, N.B., 18th March, 1898.

—Japanese matches threaten to drive out the Swedish. The exportation, which was 9,000 gross of boxes in 1884, rose to 9,000,000 gross in 1892, and 18,000,000 gross in 1896. The price per case of 7,200 boxes is $16.50. Japan now supplies China and India, and is working its way into the British market.

Commercial.

TORONTO MARKETS.

TORONTO, March 24th, 1898.

BOOTS AND SHOES.—The wholesale trade is almost on the verge of a campaign for autumn business and operations will probably commence about the first of next month. Within the past three or four months, the value of footwear has steadily advanced with the firmness in the leather market. But in spite of the strength of the market, certain eastern manufacturers continue their cheap lines; it is diffi cult to see where they are to get their money out of the business. For heavy goods suitable to mining use there is good demand. In the coming summer's trade, it would appear that light shoes, in the make of which vesting material has been used, will be popular.

DAIRY PRODUCTS.—Of dairy butter there are large receipts, but stocks have been rapidly absorbed and prices are firm. Offerings of creamery butter are increasing and some of the factories have doubled their output within the past few weeks. Prices remain about as reported last week. We quote: Rolls, 18 to 19c. per lb. and prints, 19 to 20c. per lb. There are no dairy tubs in the market. Creamery tubs are quoted at 20 to 21c. per lb. and prints at 22 to 23c. per lb. Mail advices from London, dated March 11th, report "there is very little Canadian creamery now in the United Kingdom, but at Manchester some of the 'Choicest' fresh made realize 104s. to 106s." The outlook for the future of the trade is somewhat brighter. Our London report continues: "The sudden closing of the Australian market by the arrival of the 'Britannia' (s) on Monday next, with virtually the last shipment of the season, will deprive the market of an average of 9,250 cwts. per week, or about one-third of the total Danish weekly supply. This deficiency, unless made up from some other quarter, ought to have a very important elevating influence on prices. It is worthy of mention that the imports of foreign butter during January and February this year, according to the Board of Trade returns, are 18,097 cwts. below the same months of last year, so that it looks as if the Australian deficiency would not be made up from foreign sources." Cheese is dull and the movement in local trade circles is very quiet and the trade rather uninteresting. Sad news came from Liverpool in the announcement that 15,000 boxes of Canadian cheese had been sold by auction at 37s., which price is equal to about 6½c. per lb. This transaction must have entailed considerable loss, as the cheese could not have cost the seller less than 9c. per lb. The low prices have somewhat increased consumption, but have not resulted in an increase in values. In the local trade about 8 to 8½c. per lb. is asked. Eggs are coming in freely and are selling down very low in price, dealers quoting them in the local market at 10 to 10½c. per dozen. At these prices dealers are not free buyers. At outside points it is reported values are down to 8c. per dozen, and picklers are beginning the season's operations. It is not likely that local egg men will begin their work for the year until after Easter.

GRAIN.—Business has been rather dull during the week and there are few features of interest to report. Transactions in wheat are limited, but values remain as last quoted. Deliveries from first hands are almost *nil* so far as outside points are concerned. The roads are almost impassab'e. Local offerings are in somewhat better condition. The principal interest of the United States markets has centred in the Leiter transactions. All the wheat of this interest it is said will be in movement soon after the opening of navigation. At a meeting to consider the marginal price on wheat Mr. Leiter said that he had a contract for wheat via Montreal as low, Chicago to Liverpool, as 11 32-100c. per bushel. That was on a contract recently made by Lohrke. That, however, was not an all-rail contract. It developed that wheat had been laid down at Liverpool from Chicago all-rail at a little under 15c. per bushel, 14 49-100c. per bushel. Peas are dull and 1 to 2c. per bushel lower in price. Corn remains unchanged. Rye is dull at a decline in prices. The barley market is "off" and the malting season is all but closed for the year.

GREEN FRUITS.—There is a good demand for oranges, and, indeed, prices should favor a large consumption. In a retail way it is possible to sell navel oranges at 25 to 30c. which formerly brought 50c. and even 75c. per dozen. Old Country markets, for marmalade oranges, have been high, and it is difficult to say whether we can expect another shipment from that source this year. We quote:—Washington navels, 96s, 112s, 126s, $3.25 per box: Washington navels, 150s, 176s, 200s, 216s, $3.50 per box; California seedlings, 150s, 176s, 200s, 216s, $2.50 per box; California seedlings, 126s, 250s, $2.25 per box. There is a stronger tendency in oranges. The coming Montreal sales are drawing the attention of the trade. It is not thought importations will be excessive this year. We quote:—New Messina, fancy, 300s, 360s, $2.75 to 3.00; new Messina, choice, 300s, 360s, $2 50 to 2.75. The movement in bananas is gaining ground in view of the mild weather; four cars represents the extent of the market here last week. Fancy fruit is quoted $1.50 to 2.00 per bunch.

HIDES AND SKINS.—The hide market is on a much more satisfactory footing. Merchants have reduced the price of green hides to 8c., and it seems that, in spite of the strong spirit of competition which recently existed in the market, the standard price is being closely adhered to. Sales of cured hides were made during the week at 8c. per lb. This leaves a margin of ¾c. per lb. for the merchant, and if it can only be continued in these days of small profit there should be no cause for complaint. Calfskins are also off 1c. per lb. in value, and merchants quote 10c. to butchers for green skins. Tallow is quiet and rather dull, with values unchanged. Advices from Chicago, March 22nd, state the demand for packer hides was quiet, the few orders received being for small lots, but as offerings were not large values were fairly well maintained, closing at 10½ to 10¾c. for native steers, 9½ to 9¾c. for light Texas, 9¾ to 10c. for heavy do , 9½ to 9¾c. for butt brands, 9¼c. for branded cows, 8¾c. for Colorados, 10c. for heavy native cows, and 10¼c. for light do.

PROVISIONS.—For the season of the year the receipts of dressed hogs are plentiful. It seems certain that there are large supplies still held in the country. The hogs marketed this year have been much lighter than usual and are fully ten to 15 pounds per head under that of last year. This is the result of the discrimination in prices between light and heavy hogs. It would seem that the farmers have gone to extremes, and many hogs are marketed which are of lighter weights than the packers can use with advantege. This has affected the production of long clear bacon and barrel pork, the supply of which will probably be limited next year. If the lumber trade and mining industries continue to increase in importance there will be a shortage in these stocks, and the discrimination in prices may be next year of the opposite nature. Dressed hogs are quoted at about $6 per cwt.

WOOL.—The mills remain very busy and are taking fair supplies of wool. Some interest is being excited in the new season for fleece wool. It is reported that growers hold exaggerated ideas of values which must be removed if the movement next summer is not to be one of serious loss. The London wool auction sales continue to be well attended; competition is animated and prices remain at the base established at the commencement of the series.

MONTREAL MARKETS.

MONTREAL, 23rd March, 1898.

ASHES.—Dullness is still the prevailing feature, and receipts are very light. There is no doubt that the high inspection charges are militating against the ashes trade at this point, with the result that a number of Western makers of potash are now shipping all their product to New York, where there is no public inspection, dealers in that market being allowed to inspect and grade their own ashes, and it is claimed that such branding is quite satisfactory to the European consumer, and means the netting to the maker of at least 15 cents a hundred more than he can get on ashes shipped to this market. When the make of ashes began to show considerable diminution some years ago the inspection charges were increased, with the permission of the Government, and now, with the cooperage, insurance, etc., the charges run up to $1 50 a barrel, and sometimes more, which is quite a material handicap against this port.

CEMENTS, FIREBRICKS, ETC.—With the more open weather attention is being directed to outdoor work, and there is rather more demand for cements, stocks of which are not calculated to be in excess of wants till new shipments arrive, and quotations are very firm at $1 95 to 2 05 for Belgian, and $2.10 to 2.20 for British. Bricks are qoted $17 to 22.00 per thousand.

DAIRY PRODUCTS.—There was an auction sale of some 15,000 boxes of Canadian cheese in Liverpool on Monday, reports of which were anxiously looked for. The results have been rather better than anticipated, the prices realized being slightly above the cable quotation, and giving a little more heart to holders here. Trading, however, is still very dull, and it is somewhat difficult to establish a spot quotation; about 7½c. would be the figure for finest. Good grades of butter bring good prices; fine new creamery is in active demand at 21c.; held stock, 18 to 20c.; good roll butter is scarce and has realized 17 to 18c. There is a plethora of eggs, and new laid are down to 11c. per dozen.

DRY GOODS.—Some improvement is shown in the city retail trade. In wholesale circles business is well sustained for the season, and though the greater proportion of spring shipments of dry goods have been made, there is still quite a steady influx of orders reported, both from travelers and by mail. Recent English letters contain nothing of special note with regard to values, and in domestic products there has been no recent revision of quotations, though some manufacturers of tweeds claim to be getting a little better figures, and the advance in the London wool market, elsewhere noted, may lead to some advance here.

FURS.—Cable advices regarding the Hudson Bay Company's collection of raw furs, which were sold in London last week, are as follows: The comparisons are with figures of last March sales, and as a rule are about equal to the figures realized at the sales in January. Otter, same as last March; fisher, 12½ per cent lower; silver fox, 25 per cent. higher; cross fox, same as March, 1897; red fox, 10 to 15 per cent. higher; white fox, 25 per cent. higher; marten, 10 per cent. higher; mink, 25 to 30 per cent. higher; lynx, 7½ per cent. higher; wolf, 20 per cent. higher; bear, 15 to 20 per cent. higher; skunk, 20 per cent. higher. Sale still in progress. We quote:—Mink, large dark $1.50; small, do., $1.00 to 1.25; marten, $1.75 to 2.25; fisher, $4.50 to 7.00; lynx, $1.00 to 2.00; otter, $1.00 to 12.00 for dark; pale, $5.00 to 7.00; red fox, large, $1.30 to 1.50; small, $1.00; cross fox, $3.00 to 6.00; bear, cubs, $3.00 to 7.00; medium, $7.00 to 10.00; large, $12.00 to 15.00; skunk, 15 to 70c., as to color and stripe; coon, 20 to 75c. rats, fall, 7c. to 10c. kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

GROCERIES.—Country letters report business and collections as somewhat affected by the general break-up of the roads, and, as is usual at the season, wholesale trade is not particularly brisk. As regards values, there is little fresh to note. Sugars and teas both continue somewhat dull. In the former line refiners do not report any improved demand, and quotations remain at last week's level, namely, 4⅜c. per lb. for standard granulated, Austrian refined 4 to 4⅛c., and yellows ranging from 3½ to 3⅞c. We learn that some moderate orders are being forwarded for German and Austrian refined sugars, for shipment by first direct vessels, which it is calculated will cost about $3 75 to 3.80 per cental laid down here. Quotations for teas continue to be steadily held, despite the continued dullness in the demand, and some stocks held here on New York account, are being shipped back to that city, it is said, as affording a better market. Molasses seems rather unsettled on the Island, and apart from the 1,000 puncheon lot reported bought on refinery account, there seem to be few Montreal orders yet placed for new stock. Local quotations for car lots of Barbadoes are from 26 to 27c. per gal., and in a jobbing way 28c. Coffees are not very active. We quote:—Rio, 10 to 11c.; Santos, 11 to 12c.; Mocha, 23 to 25c.; Java, 27 to 30c. Dried fruits, generally, are dull, with the exception, perhaps, of California prunes, for which there is good demand, and coast prices are reported firmer. Stocks of Valencia shelled almonds are about exhausted and parties who have cabled orders report a difficulty in getting even small lots.

HIDES.—The weakness in the hide market, noted last week, has developed into a decline in price of half a cent, dealers now buying on the basis of 9c. per lb. for No. 1: receipts are small, and poor in quality. Calfskins are now coming in quite freely, and realize 10 and 8c. per lb. for Nos. 1 and 2 respectively. Lambskins and clips 10c.; sheepskins, about $1 each.

Hops.—The demand is just moderate, no important sales being noted, but there is a steady market at 16 to 18c. for best grades of Canadian; yearlings, 9 to 11c. and slow of sale.

Leather.—The decline in the hide market affects the demand somewhat, but dealers are stiff in their views, holding that prices of leather are still relatively lower than they should be, as compared with hide quotations. Stocks of black leather are really small, with little coming in. In sole 22½c. is the lowest quotation for manufacturer's stock, and some dealers decline less than 28c. for No. 1 slaughter. Shoe manufacturers are still quite busy, some running overtime and being obliged to decline further orders. We quote:—Spanish sole B.A. No. 1, 24 to 25c.; do. No. 2, 22½ to 23½c.; No. 1 ordinary Spanish, 23 to 24c.; No. 2, 20 to 21c.; No. 1 slaughter, 27 to 28c.; No. 2 do., 24 to 25c.; common, 20 to 21c.; waxed upper light and medium, 30. to 35c.: do. heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 20 to 21c.; juniors, 18 to 20c.; calf-splits, 30 to 35c.; calf skins (35 to 40 lbs.), 60 to 65c.; imitation French calf skins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 24c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; bufted cow, 12 to 14c.; extra heavy buff, 15c.; pebbled cow, 13 to 13½c.: polished buff, 11 to 13c.; glove grain, 12 to 13c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

Metals and Hardware.—Trading in pig iron is still dull. There is some American competition, No. 2 Niagara being offered at $15 net cash, and domestic brands would probably be shaded to meet this. There are apparently very few orders being placed for importation of Scotch iron. Quite a fair quantity of tinned iron is selling at steady prices, and Canada plates are moving fairly at $2.15 in moderate lots. Cable advices report some excitement in copper, owing to war rumors, and lead is reported a little advanced. We quote: — Summerlee pig iron $18.00 to 18.50; Carron, No. 1, $18; No. 3, $17.25; Ayrsome, No. 1, $17.00; No. 3, $16.50; Shotts, $17.25 to 17.50; Carnbroe, $17.00, ex-store; Ferrona, No. 1, $15 to $16; Hamilton No. 1, $16; No. 2, ditto, $15.50; machinery scrap, $14.00 to 15.00; common ditto, $12.00 to 13.00; bar iron, Canadian, $1.40 to 1.50; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas, $2.40; Terne roofing plate, 20x28, $5.90 to $6.00; Black sheet iron, No. 28, $2.25; No. 26, $2.15; No. 24, $2.05; Nos. 17, $2; No. 16 and heavier, $2.15; tin plates—Bradley charcoal, $5.60 to 5.70; charcoal, I. C., Alloway, $3.15 to 3.25; do, I.X., $3.90 to 4.00; P. D. Crown, I. C., $3 60 to 3.75; do., I.X., $4.50; Coke I.C., $2.90 to 2.95 for standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2 70; galvanized sheets, No. 28 ordinary brands, $4; No. 26, $3.75; No. 24, $3 50 in case lots; Morewood, $5.00 to 5.10, tinned sheets, coke, No. 24, 5½c.; No. 26, etc.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.65 to 1.75; English hoops $2.00 to 2.15. Steel boiler plate, ¼-inch and upwards, $1.85 to 1.90 for Dalzell, and equal; ditto three-sixteenths inch, $2.50; tank iron, ¼ inch, $1.50; three-sixteenths do.; $2.00; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to 2.50; Russian sheet iron, 9c.; lead, per 100 lbs., pig, $3.50 to 3.55; sheet, $4 to 4.25; shot, $6 to 6.50; best cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel $2.25; ingot tin, 16 to 16¼c. for L. & F.; Straits, 15½ to 16c.; bar tin, 16½ to 17c.; ingot copper, 12¼ to 12½c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.60 to 4.75; Veille Montagne spelter, $4.60 to 4.75; American spelter, $4.50; antimony, 8 to 9c.

Oils, Paints and Glass.—Turpentine has eased off a point from the recent strong advance of 4 cents a gallon, but is pretty firm at 55c. per gal. the single barrel. Linseed is steady at 57 and 60c. for small lots of raw and boiled respectively, and no change is expected in quotations until the arrival of first vessels with new supplies, as stocks are comparatively small. The demand for Paris green is not active as yet, and there are said to be fair supplies in retailers' hands, left over from last season, owing to the comparatively light visitation of the bug in 1897. In other lines country stocks seem well depleted, and wholesale houses are being pushed for quick despatch of spring orders. We quote:—Turpentine one to four barrels, 55c.; five to nine barrels., 54c., net thirty days. Linseed oil, raw, one to four barrels., 47c.; five to nine barrels, 46c.; boiled, one to four barrels, 50c.; five to nine brls., 49c., net 30 days; olive oil, machinery, 90c.; Nfld. cod, 35 to 37c. per gal.; Gaspe oil, 30 to 32c. per gal.; steam refined seal, 45 to 47½c. per gallon in small lots. Castor oil, 9 to 9½c. as to quantity. Leads (chemically pure and first-class brands only), $5.37½; No. 1, $5.00; No. 2, $4.67½; No. 3, $4.25; No. 4, $3.87½; dry white lead, 4¾ to 5c. genuine red do., 4½c.; No. 1 red lead, 4c.; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.25 to 1.50; spruce ochre, $1.75 to 2.00. Paris green, 50 and 100 lb. drums, 15c.; 25 lb. drums, 15½c.; 1 lb cartons, 16c.; pound tins, 16½c.; window glass, $1.40 per 50 feet for first break; $1.50 for second break; third break, $3.10.

Wool.—The series of London sales now on, which opened on the 22nd, have developed a strong market. An advance of 5 to 7 per cent. was reported the first day, and since then there has been a further betterment of about 5 per cent. The offerings are some 220,000 bales, 100,000 bales short of the offerings at the same date a year ago, and the competition is reported active. Local dealers in imported wools have been endeavoring to get better prices, with some little effect in B.A.'s, but Capes are still selling at old figures. We quote Capes 14½ to 16c, Natals 16½c. to 18½c., B.A. scoured 27 to 34c. per lb.

Meetings.

LONDON LIFE INSURANCE COMPANY.

The twenty-third annual meeting of the shareholders and policy-holders of the London Life Insurance Company was held at the company's office, London, on Thursday, the 3rd day of March, 1898.

There were present: The president, Mr. A. O. Jeffery, in the chair; J. G. Richter, manager and secretary; W. F. Bullen, William Bowman, T. H. Smallman, A. S.Emery, J. E. Jeffery, George McBroom, George F. Jewell, H. Tatham, W. White, J. A. Thomas, of London; Judge Bell, J. W. Humphrey, J. F. Maine, of Chatham: D. C. Lamb, Sarnia; G. M. Harrison, Glencoe; A. Stewart, St. Thomas; R. J. Gourlay, Stratford; B. D. Sykes, Brantford; W. G. Brown, W. C. Hoover, Hamilton; W. R. Brock, Lynden; A. Bretz, J. F. Holden, J. A. Limage, Toronto; J. H. Pardington, Peterboro; S. Levett, Belleville; R. P. Pearce, J. Taylor, Kingston; A. Perry, J. A. Bell, Brockville; J. T. Niblock, A. E. Ferguson, Ottawa; James Dixon, Winnipeg, and others.

The notice calling the meeting was read by the secretary, after which the minutes of the last meeting were read and confirmed, and the directors, report and financial statement for the year ending December 31st, 1897, submitted, as follows:

REPORT.

The directors of the company beg to submit their annual report and duly audited financial statement for year ending December 31, 1897.

During the year 10,843 applications for insurance, amounting to $1,512,112, were accepted, and policies issued therefor.

The net premium and interest receipts of the year were respectively $185,539.30 and $30,560.36, or a total of $216,099,66, being an increase of $10,451.40 over the previous year.

The sum of $43,900.94 was paid for death claims, $7,172.43 for matured endowments, and $5,937.14 for surrendered policies and cash profits, making a total of $57,010.51 paid policyholders or their heirs during the year.

The insurance in force on the company's books at the close of the year, after deducting all re-insurances, amounted to $4,732,501.28, under 2,071 "general" and 30,617 "industrial," or a total of 32,688 policies, an increase of 2,638 policies for insurance of $442,601.65 for the year.

The assets of the company, exclusive of uncalled for, but subscribed capital, amount to $678,176.78, an increase of $86,585.72 for the year. The interest and other payments falling due during the year were in the main satisfactorily met. No losses on investments have been incurred during the year, and only one small parcel of real estate came into the company's possession, and was unsold at the close of the year.

The liabilities of the company under existing policies, and in all other respects, have been provided for in the most ample manner, and after setting aside a special reserve fund of $10,000, the surplus security to policy-holders, exclusive of uncalled, but subscribed capital, is $70,170.60, and after deducting paid-up capital, there remains a net divisible surplus of $20,170.60.

Johm McClary,
President.

To the Shareholders of the London Life Insurance Company :

Gentlemen,—I hereby certify that I have completed a careful audit of the books and accounts of the London Life Insurance Company for the year ending December 31, 1897, and find the same correct and in accordance with the above statement, the reserve fund and all other liabilities being fully provided for. I find the books of the company well and neatly kept, and upon examination of the securities I find them in order.

GEORGE F. JEWELL, F.C.A.,
Auditor.

London, Ont., Feb. 15, 1898.

The vice president, Mr. A. O. Jeffery, in the unavoidable absence of the president, Mr. John McClary, moved the adoption of the report as follows:

Gentlemen,—On behalf of my fellow directors, as well as for myself, I desire to express our appreciation of the interest being shown in the company's affairs, as evidenced by your presence here to-day.

The report of the directors, and the duly audited financial statement of the affairs of the company for the past year, are, as usual, very full and readily comprehensive.

Whatever difference of opinion there may be regarding the necessity of rendering such a fully detailed statement as the one before you, there can be no question as to shareholders and policy-holders of the company being entitled to the fullest possible information regarding its affairs. The directors not only supply such information as may answer the purpose, but also such reasonable details as will enable the actual position of affairs to be readily comprehended.

Comparing the results of the past year with those of the previous year, a marked improvement in practically all essential features will be noticed. The new business transacted during the year exceeded the new business of the previous year by 542 applications for $223,940. The cash premium and interest receipts also exceeded the like receipts of the previous year by $10,451 40; while the total outgo for management expenses exceeded the like outgo for the previous year by only $3,000 05. Deducting the total disbursements from the total receipts, there remains a balance of $80,219.96, by which sum the net invested assets of the company were increased during the year.

As regards the character of the assets of the company, in no instance have investments been taken into account at more than their fair market value, and in some instances there is a considerable margin of excess of market value over the ledger value at which some have been taken into account. That investments are not being allowed to run into arrears is amply evidenced by the fact of the total interest due and accrued at end of year amounting to but a trifle more than half the cash interest receipts of the year. As a fact, only $3,448.95 interest was due and unpaid at the end of the year, and of this sum only $72.48 was overdue for more than a year, and all but $12.48 of this has since been paid. A small parcel of real estate came into the company's possession during the year, by reason of failure in business of the mortgagor. The rental therefrom more than meets the interest and taxes, and we expect to dispose of same without loss to the company.

The liabilities of the company have been provided for in the most ample manner. The reserve fund, required to be maintained at the credit of outstanding policies, has, in a large part of the company's business, been set aside on a 4 per cent. interest basis, instead of on a 4½ per cent. basis, as required by law, and a further sum of $10,000 has been provided towards bringing the remainder of the company's business up to the high standard referred to.

Notwithstanding the conservative basis upon which the company's assets have been taken into account, and the ample provision that has been made for every liability of the company, the net visible surplus shows a marked increase over the previous year, and now stands at $20,170.60 over all liabilities and capital.

With these remarks, I beg to move the adoption of the report.

The adoption of the report was seconded by Judge Bell, who said:—

As a policy-holders' director I am not only pleased with the results of the past year, but also entirely satisfied with the company's financial standing, and the fairness with which the policy-holders are being treated. Contrasting the results of the past year with the results of the previous year, the new business of the past year not only exceeded the new business of the previous year by considerable, but the net gain in total insurance in force at the close of the year also shows a much larger proportionate increase than did the net gain of the previous year. The more favorable showing in this connection, while perhaps partly attributable to improved times, is, I think, even more largely attributable to the increasing favor in which sound and legitimate life insurance is being held by the people. The fact is being more fully realized from year to year that in no other way can a man make so convenient and safe a provision for dependent ones, or for his own old age, as by a policy of life insurance in a reliable company such as the London Life and other like companies. I have much pleasure in seconding the adoption of the report.

The company's auditor, Mr. George F. Jewell, F.C.A., said that each year gave him increased confidence in the methods and substantial success of the company, and that the special provisions toward a contemplated variation of the basis of the insurance reserve was a step made necessary by the gradual decrease of the earning power of money, which he was glad to see taken so promptly. He was confident that the same honorable, liberal and even generous policy of the company, which had obtained during his acquaintance with it, would be continued, and that such a course would undoubtedly insure continued success. Providence is not always with the largest battalions, as was once claimed, but is always with those who pursue an honest, faithful course, and by due diligence command success.

The adoption of the report was submitted to the meeting, and carried unanimously and with hearty applause.

Mr. T. H. Smallman moved, seconded by Mr. W. F. Bullen, that the thanks of this meeting are hereby tendered to the agents and other employees of the company for the very satisfactory manner in which they have discharged their several duties during the past year. The motion was unanimously adopted, and suitably acknowledged by Messrs. George McBroom, A. Bretz, H. Tatham, J. Dixon, W. G. Brown, J. T. Niblock, W. C. Hoover, A. Perry, J. F. Holden, J. S. Bell, J. W. Humphrey, D. B. Sykes, W. R. Brock, J. A. Thomas, J. H. Pardington and J. F. Maine, on behalf of the agents.

The balloting for election of directors for the current year resulted in the unanimous re-election of Messrs. John McClary, Wm. Bowman, George C. Gibbons, Wm. F. Bullen, Thomas H. Smallman, Judge A. Bell, A. S. Emery, G. M. Harrison and A. O. Jeffery.

At a subsequent meeting of the directors, John McClary was re-elected president and Mr. A. O. Jeffrey vice-president.

—Mr. Harmsworth, of the London *Daily Mail*, says: "I believe that half the journalistic notions of what the public wants to read are wrong; I believe the public is a far better critic than is usually imagined; I believe the public does not care an iota about size—if anything a small journal is preferred to a big one; I believe that price has very little to do with the success of a publication; I believe the attractions of illustrated journalism are enormously overrated; I believe party journalism to be practically dead; I believe in independence."

Thos. Walmsley, Treas. Hugh Scott, Mgr. and Sec
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co.,
32 Church Street, Toronto, Ont.

AN UP-TO-DATE AMERICAN.

" If I were a dictator with absolute power in this republic, said Senator William P. Frye, at the recent banquet of the American Association of Manufacturers, in New York, " I would build the Nicaragua Canal, I would annex the Hawaiian Islands, I would aid in the construction of a railroad from our southern border down to Terra del Fuego, I would establish swift steamship lines to China and Japan, to Australia and to every commercial port in South America, and then, by reciprocal treaty, or in any other lawful way in which it could be done, I would participate largely in the trade of the Orient, and I would take entirely the trade of Mexico, of South America, and of the Central American states by the free admission of all our goods into them. Costly, say you? Yes, costly. There was never anything worth purchasing yet that did not have its price. Costly? Not so costly as to find yourself decreasing in profit from year to year, and decreasing in demand at home from year to year; cutting down wages of your intelligent workmen from year to year, and finally degrading and reducing them to the condition of the workmen of Europe. Why, gentlemen, that is so costly that it might, it might I say, risk the life of the Republic itself."

CAPTURED TREASURE.

Rev. W. H. Fitchett, the author of " Deeds that Won the Empire," is publishing in the Cornhill Magazine a series of papers entitled " Fights for the Flag." They help to show what sums were won as prize money, and the extent of treasure that was often at stake in some of the old sea fights, especially in the West Indian waters. Mr. Fitchett gives some fascinating particulars as follows:

" There are some very golden patches of prize money in British naval history. In 1769, for example, the " Ethalion " captured the " Thetis, with 1,400,000 dollars on board. The " Naiad " and " Triton " captured the " Santa Brigida," with an equal amount of treasure. Each captain received as his share of the prize money £40,731 18s., each lieutenant £5,091 7s. 6d., and each seaman £182 4s. 9d. Yet earlier, in 1762, the treasure ship " Hermione " was captured off Cadiz by the " Actaeon " of 28 guns, and the " Favorite " of 18 guns. Each captain in this case received £65,000 as prize money, each lieutenant £13,000, each petty officer £2,000, and each seaman £500. Anson's galleon, however, shines resplendent in even such golden records as these. Yet the gold won by the " Centurion " was its least precious gain. The voyage of the great ship added enduring fame to the British flag, and its record remains as the most splendid example of the fortitude and the valor which have built up the British Empire."

Anson's prize amounted to 1,313,843 " pieces of eight " and 35,000 ounces of silver. And he got it all safely home in two undermanned ships, with nearly five hundred prisoners, through storms abroad, and a French fleet in the chops of the channel.

WHY HE ADOPTED THE CASH SYSTEM.

A western hardware dealer who appreciates the advantages of the cash system has addressed the following letter to his trade:

We want your trade in the hardware and sporting goods line, and propose to make prices an inducement to buyers. Beginning with the first day of January, 1898, we are going to close our books and mark all goods in the house down to a cash basis, and from that time onward do a strictly cash business. We are convinced beyond a doubt that this is the only fair way to do business, because the people then get the benefit of close prices and do not pay long profits, which must be made in order to offset bad debts in doing a credit business. We have been doing a credit business for the past 16 years, and notwithstanding the fact that we have been careful in selecting and extending a line of credit to the people, we find every now and then that a certain account is worthless. We have fought and reasoned with ourselves for several years why we should make such a radical change in our business, but finally jotted down some of the reasons that brought us to it.

1. We will save the salary of a bookkeeper and collector, which amounts to $500 per year, and by taking advantage of discounts on all bills can save money and sell goods closer.

2. Because we will save in stamps and stationery about $300 per year.

3. We will always have from $3,000 to $5,000 more merchandise in the store in place of having it on the books and notes, and can therefore serve customers better.

4. Because we will have no bad debts and can therefore afford to sell goods much cheaper.

5. With the above savings we can save customers from 10 to 25 per cent. on every article sold.

6. Because the cash system is the only system, and quick sales and small profits is the secret of success.

7. Last, but not least, we have been in the credit business for 16 years, and are sick of it.

You can readily see that all these expenses, losses and troubles can be avoided by us in doing a cash business, and a saving of a neat ten per cent. to the customers.

To parties indebted to us we wish to state that we are not going to crowd the collection of their accounts, but will give them a reasonable time to settle, and kindly ask them to continue their patronage, but must insist on cash payment for everything bought from said date. Coupons, which we will issue, will be considered as cash. The fact that goods will be sold closer will not allow of their being charged.

Our stock of hardware, stoves house-furnishing goods, paints, oils and brushes, guns, ammunition and sporting goods will be complete at all times, which will be sold at the lowest possible cash prices.

FROM A PERSONAL STANDPOINT.

" I'm free to admit," remarked farmer Corntossel, "that I won't never get through demandin' more prosperity."

" But you are in comfortable circumstances. What do you mean by more prosperity?"

" Ther's jus' the difficulty. It means somethin' different fur everybody. Ef you've got a mortgage, 'prosperity's' gettin' it paid off. Ef ye've got it paid off, 'prosperity's' ownin' a cabinet organ. Ef ye've got a cabinet organ, 'prosperity's' havin' enough to be able to trade it in fur a grand pie-anno, an' so on."—*Washington Star*.

A RUSH TO INVEST.

A recent London cable says that nothing could be more curious as illustrating the strange new conditions of finance than that a statesmanlike measure like the Chinese loan could be embarrassed by the transformation of a tea and bacon merchant's business into a stock company. The rush for the shares in Sir Thomas J. Lipton's concern has had the effect of locking up nearly $20,000,000 in cheque deposits, accompanying the stock applications at the bank. These applications, numbering some 200,000, can hardly be dealt with in less than a fortnight, during which time a huge surplus of cash is unavailable for other investments. This interferes greatly with all kinds of business, and had the effect of postponing the issue of the Chinese loan till March 21. The scene at the National Bank of Scotland on Wednesday and Thursday beggars description. The bank's first postal delivery on Wednesday consisted of a van-load of 18,000 letters: 27,000 following later, and on Thursday; while the crowd of personal applications rendered the ordinary work of the bank impossible, despite an extra staff, and the engagements of adjoining premises. Similar scenes occurred in the offices of Sir Thomas Lipton and his brokers. Hundreds of clerks have been working night and day classifying and answering the applications, which, when the lists were closed, amounted to £50,000,000 sterling. The post still brings belated applications, and appealing cablegrams are coming from Canada, the United States, South Africa, and South America. Many curious applications have been received, from a modest, ragged, and filthy £1 note of Scotland to a hurried unsigned cheque for thousands of pounds, and envelopes casually stuffed with bank notes to the value of hundreds.

BICYCLE ACCIDENTS.

Bicycle accidents are much more common than the newspapers indicate. Only the serious casualties, which are reported to the police, get into print. A round of the city hospitals that have dispensaries shows that cyclists are becoming one of their most numerous class of patients. Bruises received on the road, that seem trifling at first, often develop into severe injuries when the rider gets home, and in nine out of ten of these cases the necessary surgical attendance is sought at the dispensaries. As most of the young doctors in the hospitals are bicyclists themselves, they generally have experience in work of that sort and a readier modicum of sympathy for that class of patients than they bestow on the ordinary dispensary patient. The casualty insurance companies also report a large number of cases of temporary disability from accidents through bicycle riding. They do not complain, however, as the popularity of the wheel has greatly increased their business. Almost every prudent cyclist nowadays, thinks it a wise precaution to get an accident policy that will at least pay his doctor's bill in case of an upset that will lay him up.—N. Y. *Evening Post*.

BUILDING A RAILWAY WITHOUT BONDS.

A story is told by William E. Curtis in the Chicago *Record*, of a Texas road that is quite distinctively "home made." It appears that in order to reach market with products, a branch line 25 miles long to connect with the nearest railway was necessary for the people of Jasper, Tex., and being unable to induce outsiders to undertake the risk, the community organized, under the direction of their Mayor, and did the work themselves. Not a dollar's worth of bonds has been issued. The citizens of the county, including the farmers who are to be benefited, have nearly all subscribed for more or less stock, and have "worked out" its payment or furnished material in lieu of money. They have done their own grading, cut their own ties for the track and timber for bridges. Everybody from the Mayor to the village blacksmith has taken a hand. The superintendent of the company has been working for $1 a day, and he is the only salaried officer. The line has been finished without a dollar of debt.—*Railway Review*.

—Within six months, says an American paper, the city of Buffalo will be lighted by electricity generated at Niagara Falls, and received in a large new power-house at Buffalo. The plant will be one of the best examples of modern electrical practice, under conditions which differ greatly from those hitherto prevailing. In the new station steam will have no place. What work cannot be done by electricity direct from the Falls will be obtained from generators driven by special motors which will themselves be driven by Niagara power. The first contract made with the Cataract Power and Conduit Co., covers 11,250 kw. air blast transformers.

—The Detroit River bridge project is not dead. A telegram from the capital of Michigan dated Tuesday last, says the Union Bridge Company, of Detroit, has filed articles of association with the Secretary of State. The company is capitalized at $2,000,000, and its purpose is to build a railroad bridge across the Detroit River for use by all connecting railroads in the United States and Canada. The incorporators are the Grand Trunk and Wabash Railway Company, who own 19.980 of the 20,000 shares of stocks.

—The best circular is a newspaper that circulates.—*Printer's Ink*.

AMONG the many trade journals published in Canada The Monetary Times holds a very high position. Since 1866, when it was first issued, it has been recognized as an authority on all matters relating to the commercial life of the country. It has always had a large circulation amongst all classes of the business community in every part of the Dominion, and no matter what other papers crop up there are very few merchants who will drop The Monetary Times in their favor.

These are well-known facts. Are you an advertiser? If not we solicit respectfully your consideration of the advisability of advertising in these columns. Rates on application.

A SPLENDID RECORD

All the leading financial journals say that the

TEMPERANCE AND GENERAL LIFE ASSURANCE COMPANY

Has made a splendid record.

Not a Dollar of Interest in Arrears on Dec. 31st, 1894-5-6 or 7.
No Mortgage ever foreclosed.
No Real Estate ever owned.
The lowest death rate on record in its Temperance section.
Before insuring consider its merits.

HON. G. W. ROSS, President H. SUTHERLAND, Man. Director
Head Office, Globe Building, Toronto

THE

Difference

The difference in taking down a section of line shaft, removing couplings, etc., and putting on solid iron pulley and then putting all back in place, and in putting on a "REEVES" Patent Wood Split Pulley, leaving the shaft unmolested, will in nearly every case pay for the "REEVES" entire.

DECISIONS IN COMMERCIAL LAW.

POWELL VS. WATERS.—This controversy was in regard to the title to certain mines and minerals in the township of Hull. Several interesting points were involved. It was held that where the registered owner of lands was present, but took no part in a deed subsequently executed by the representative of his vendor granting the same lands to a third person, the mere fact of his having been present raises no presumption of ratification of the deed. Writings under private seal which have been signed by the parties but are ineffective on account of defects in form, may, nevertheless, avail as a commencement of proof in writing to be supplemented by secondary evidence.

THE MANUFACTURERS LIFE INSURANCE COMPANY V. ANCTIL.—The action was upon a policy of insurance issued by the company upon the life of one Pettigrew, deceased. The plaintiff Anctil alleged in his declaration that the defendants by a policy dated May 12th, 1894, promised to pay him $2,000 upon furnishing proof of the death of Pettigrew; he affirmed the death of Pettigrew on October 9th, 1895, and the fulfilment of all the conditions of the policy including demand for payment. To this declaration the company made eighteen pleas with only three of which we are interested. They affirm that the plaintiff never had insurable interest in the life of Pettigrew, that the contract of insurance was one really by the plaintiff for his own profit upon the life of the deceased; and that the said policy was simply a wagering policy obtained with a view of making an illegal speculation. The case in appeal came before the Supreme Court. It was shown that the life of Pettigrew had been insured by the company in a policy made payable to Anctil at the instigation of the company's agent, Michaud, the only connection between the beneficiary and the insured being that the former is described as the latter's "protector," in that he had said he would provide for Pettigrew if ever he should be in want, on condition, to use his own words: "*Que la police serait donnée en mon nom.*" Anctil thus exacted that the policy should be entered into by the company directly with himself in his own name, and for this reason refused to accept a first policy which had been payable to Pettigrew's representatives. In the [second] policy issued according to these conditions, it appears that "Pettigrew never had and that it never was intended by the plaintiff that he should have any possession of the policy, any interest in it or control over it," and since "the plaintiff had no insurable interest in Pettigrew's life, the law pronounces the policy to be null and void." Since the law upon grounds of public policy pronounced the policy to be void the doctrine of estoppel had no application. It was argued that by the tontine provisions of the policy Pettigrew, if he lived fiteen years, would derive substantial profits from the policy, but this argument was held of no avail, among other reasons, because the policy could not continue in effect so long without the consent of Anctil, and that by express terms it is the *lawful holder* of the policy who becomes entitled to the benefit of its provisions. It was held by the Supreme Court of Canada that a condition in a policy of life insurance by which the policy is declared to become incontestable upon any ground whatever after the lapse of a limited period, does not make the contract binding upon the insurer in the case of a wagering policy.

Mercantile Summary.

A CALIFORNIAN, by a special process, has succeeded in solidifying petroleum into a black, solid mass, which burns like coal, with less smoke, and throws out thrice the heat. It can be cast in bricks, is clean, and gives out little petroleum odor.

A CONTRACT has been let for stringing the power wire of the Cataract Power Company from Decew's Falls to Hamilton. The contract calls for the completion of the work by May 20. The power house on Victoria avenue is rapidly nearing completion.

A MEETING of the Parliamentary colonial party was called for 22nd inst. to consider the action of the Government in bringing pressure upon Canada for the withdrawal of a Canadian proposal to reduce the postage from that colony from 2½d. to 1½d. per letter.

BOTH the big Canadian railways have issued a circular to agents east of Fort William, cancelling a former one and changing the arrangement governing the transportation of pedigreed cattle in less than car lots between stations on the companies' lines east of Fort William. Hereafter shipments will be way-billed at one-half regular tariff rates and at estimated weights as per Canadian Joint Freight Classification.

HERE is the way in which the Philadelphia *Record* makes game of the impending "war" with Spain, which is exciting the Americans: "The factories of the country are working double turn on swords, guns and bombs, and the war scare is thus putting bread and butter into many thousands of mouths. There may be a drop in the agricultural implement market when the swords shall come to be beaten into ploughshares, but it is early yet for solicitude on that point."

A WEEK ago, the Edmonton Board of Trade despatched an expert blaster and a pilot to clear the boulders from the Grand Rapids of the Athabasca. The business men and Klondykers subscribe the necessary funds. Calgary and Winnipeg Boards of Trade are being asked to assist. These western men are not of the style that contents itself, like the wagoner in Œsop's fable, with calling on Hercules, in the shape of the Government, for help. In the meantime they turn to and help themselves.

THE sudden and regretted death of Mr. James Warnock has occasioned a number of changes in the personnel of the business of James Warnock & Co., makers of edge tools and carriage springs, at Galt. The firm has secured the services of Mr. F. H. Hayhurst, recently with Messrs. Van Tuyl & Fairbank, of Petrolea, who assumes, we understand, the entire management of the business. Pending these arrangements the works were closed for stock-taking, etc.; but these matters having been arranged, the factory is again running and ready to fill all orders.

262 West Broadway, New York.

Mercantile Summary.

Last year the quantity of Canadian logs towed across Lake Huron for Michigan mills was stated at 250,000,000 feet. This year, the quantity so towed to Michigan will be increased to 350,000,000 feet, if a report from Bay City, Mich., is to be believed.

A resident of Skagway, writing last week to a friend in Victoria, said that according to the Customs returns, 5,500 persons had arrived at Skagway between March 1st and March 23rd. It was estimated that the population of the town was 12,000 at that time and still growing.

We have heard that Sir Roderick W. Cameron, of New York, who is heavily interested in ranching in West Alberta, has sent to the Ontario Department of Agriculture asking for 2,500 cattle for stockers. A representative of Sir Roderick is expected in Toronto to look after such cattle.

A meeting of the Winnipeg Retail Association was held last week, when a legislation committee of eight members was appointed. A discussion was had upon the subject of vacant lands around the city, and the association will vigorously help the scheme to secure the settlement of lands around the city.

Arguments are being made before the House River and Harbor Committee at Washington in favor of a 1,500-ton barge bill which calls for the deepening of the Erie canal from seven to twelve feet. It is favored on the ground that the much-talked-of ship canal to connect the lakes with tide water is impracticable.—*Railway Review.*

Two delegates from South Dakota have been on a visit to Alberta Territory, in the Canadian North-West, and will make a favorable report to those farmers whom they represent. Already these delegates have entered for ten homesteads for themselves and near relatives. They anticipate that a large number of their friends in South Dakota will remove to Alberta.

Elisee Roy & Fils, retailers in the dry goods line, at Quebec, are reported in trouble, and to be making an offer of 50 cents on the dollar, secured, and payable at 3, 6, and 9 months. Liabilities are $7,700, with assets of $5,400. Mr. Roy is "an old timer," having been some 35 years in business, and has heretofore always managed to pay in full, but he is not very progressive, never having done beyond a moderate business, and even this has fallen off of late.

The number of vessels that passed through the Suez Canal last year was 2,936. The number in the previous year had been 3,409, or say 94 per day, and in 1895 it was only 2,534, which was at the rate of 69 per day. The receipts of the canal for these three years were 78,884,000 francs in 1895; then 80,365,000 francs in 1896, and only 73,565,000 in 1897. The diminution in last year's receipts is attributed to the famine and plague in India.

The following little group of failures are reported for the week in Eastern Ontario: Wm. Hickey, formerly in the lumber business, and of recent years doing a moderate store business at Deux Rivieres, on the Upper Ottawa, has assigned to A. P. Mutchmore, of Ottawa.——Kimpton & Co., butchers, principally in the pork line, and carrying on two stores in Ottawa, are reported insolvent.——A jewelry firm in Cornwall, F. C. Meyers & Co., a concern of some ten years' establishment, but never of very strong standing, have also made an assignment.

J. Corcoran, a shoe retailer, in business in Montreal since 1890, has been slow pay of late, and his assignment is now recorded. He owes $4,200, and has apparent assets to about the same figure.——A demand of assignment has been made upon A. Lebeau & Co., a contracting firm in a small way, of the same city.——T. Masse, dry goods, Montreal, is offering 40 cents, cash. A year ago he took over the business of his deceased son, then compromising liabilities of $15,000, at 80 cents in the dollar.——J. E. Leblanc, in the same line of business, recently reported failed, has settled liabilities of $14,000 at 40 per cent. cash.

In the Province of Quebec recent country failures are as follows: Upon the demand of Messrs. J. Hamel & Co., of Quebec, a judicial abandonment has been made by G. L. Pelletier & Co., general dealers at Matane, on the Lower St. Lawrence. Mr. Pelletier is one of the oldest merchants on the Rimouski coast, but has not always met with success in the past. He failed in 1892, and has since been obliged to do business under cover of his wife's name. Present liabilities are stated at about $11,000, with assets nominally about the same.——At Little Matane, in the same district, the embarrassment is reported of Mrs. Joseph Guimond, who does a small store trade, while her husband is away working in the United States. She wants to settle her very limited liabilities at 50 cents on the dollar.——From Hopetown, rather further down the coast, is reported the failure of W. C. Ross, who has carried on a small general store, also a custom saw and grist mill, and has been Mayor of the parish. He wrote his creditors asking a settlement at 60 cents, but this offer has apparently not met with favor, and a demand of assignment has been made upon him.——Cyprien Dionne, recently reported insolvent at Fraserville, has effected a settlement at 60 cents, owing $4,650, and J. S. R. Page, general merchant, St. Isidore, has also got a compromise at a similar figure.

—The Virden, Man., Board of Trade is publishing a pamphlet giving lists of vacant lands in the district, with a view to encouraging settlement.

Mercantile Summary.

A WEEK ago yesterday, the Guarantors' Finance Company, of Pennsylvania, was placed in the hands of receivers. It was largely indebted to the Peoples Bank of Philadelphia, whose cashier, John S. Hopkins, had loaned it some $700,000 on inadequate security—it is now said fraudulent or worthless securities, and the bank closed its doors last Saturday. A tragic feature in connection with both institutions is that Hopkins, bank cashier, committed suicide. The manager of the Guarantors' Company has been arrested on the charge of conspiring to defraud the Peoples Bank.

GUSTAVUS HAMILTON & SONS opened a blacksmith shop at Spanish River station. Shortly afterward, they added a general store to the shop. Owing to want of experience in storekeeping, and lack of capital, difficulties supervened, and an assignment is now in order. He owes $2,200 and has about $1,500 nominal assets. —— Since Jan., 1890, Arthur H. McKeown has been doing business as a tinsmith, in Hamilton, and at one time did a nice trade; but, unfortunately, locked up too much of his capital in property. Then he took ill, and the two causes have resulted in his assignment.

A MEETING of the creditors of Laidlaw & Nicol, general merchants, was held at Stayner on Wednesday last, at which about seventy local creditors were present. The statement then submitted showed assets of $52,000 and liabilities amounting to $33,000. But the real position of the firm cannot be ascertained ffrom this statement as it includes the real estate, etc., held by J. D. Laidlaw, but it does not include his assets or liabilities in respect of the Farmers' Loan Co. The appointment of Mr. John A. Cameron, as assignee, was confirmed by the meeting, and inspectors were appointed as under: Mr. M. Gartlan and Mr. D Mathers, of Stayner, and Mr. W. B. Hamilton, of Toronto. If no satisfactory offers are received for the stock by April 4, the inspectors will then dispose of the stock by public auction in Toronto.

A DEPUTATION consisting of 250 persons from the County of Essex, Ontario, visited Ottawa on Wednesday to interview Sir Wilfrid Laurier with the object of impressing upon him and the Dominion Cabinet the urgent necessity of prohibiting the export of natural gas to the States. They represented that while great quantities of gas from the Essex fields were piped 30 miles to Detroit, and used for lighting and cooking purposes, such towns as Essex Centre were refused to be supplied by the producers of this gas. The actual extent of the Essex gas fields is stated to be comprised within a space six miles long by half a mile wide. In Leamington there were about 600 contracts signed for taking gas, but parties had to be refused because of the scarcity in the supply. Mr. Brown, of Kingsville, said that one well supplied that town with gas for six years, giving a revenue of $10,000. The corporation bought the land afterwards for $27,000. The Mayors of Windsor and Chatham asked that the export of gas be stopped, in the interest of those cities. Windsor users spent $90,000 a year for gas, said one gentleman, and if, as appeared likely, the supply was prematurely exhausted by the enormous drain to Detroit, the outlay already made by Canadian householders in fittings for the use of the gas would be lost money. Altogether a strong case was made out. The most serious consideration of the Government was promised.

Mercantile Summary.

When in 1892 G. G. Johnston moved from Palmerston to Exeter, he bought the bankrupt stock of McTavish & Co., amounting to $9,000, at 35 per cent. discount. This was considered a good bargain. Partly owing to inattention to his duties, Mr. Johnston made no progress, and now has to assign to his principal creditor. Stock is being taken, and his debts are said to amount to $7,000.——Having removed from Novar to Elmsdale, in May, 1896, James Tait, harness maker, assigns.

An invitation has been extended to Sir Wilfrid Laurier by the Chamber of Commerce of Cleveland, Ohio, to be present at the annual dinner of the Chamber about the end of April. The wish is expressed that the Canadian Premier shall on that occasion deliver an address on the subject of "International Relations," or "Reciprocity," or some cognate subject. Unfortunately, it is not likely that Sir Wilfred will be able to go to the banquet. Should he do so, however, we predict that he would find in Cleveland much friendliness to Canada, and much sentiment in favor of reciprocity. And these his eloquence might wel tend to increase.

An assignment has been made by J. L. Mader, dry goods dealer at Kincardine. In October 1895 he sold his business in Attwood, and removed to Kincardine, starting a store in February following. He has always been reported well. Now his assets and liabilities are nominally about $6,000 each.—It is almost ten years since Maynard Bros. opened a tailoring shop in Orillia, and in January, 1895, they assigned with liabilities of $6,800. Then a friend bought the estate for them, and they continued as formerly. But the following year one of the brothers was drowned. After this the creditors sold the stock to the wife of the remaining partner. She has just assigned, owing $1,700.——An offer of fifty per cent. is made to the creditors of W. J. Manley, harness maker at Brigden. He owes $1,700, and has nominal assets of $1,200.——George E. Miller, dealer in boots and shoes at Wyoming, has assigned, after being in business for at least six years.——Another assignment is that of F. C. Wanless, grocer, Chatham. He has been there eighteen months.

An assignment has been made by Holden Bros., confectioners, Glenboro, Man.——An extension of time is asked by R. S. Wellwood, general storekeeper at Plumas. Not long ago he had a meeting of creditors, and stock is now being taken in order to ascertain his real position. He owes about $3,000.

THE LUMBER DUTY.

Mr. John Waldie, whose lucid address upon the lumber interests of Ontario, was printed in these columns six months ago, has this week written a letter to the Minister of Trade and Commerce, Ottawa, on the Ontario lumber industry, as affected by the passage of the Dingley bill in the United States last season. He reviews the legislation enacted by the Ottawa and Toronto authorities at the instance of lumbermen. "The lumbermen asked the Government at Ottawa to take authority to put an export duty on sawlogs, by order-in-Council, although subsequently they did not ask the Government to enforce the same, believing that it was possible to attain the desired end in a more equitable way by asking the Ontario Government to make a condition in their licenses that timber cut on Crown land should be manufactured in Canada." After consideration the Ontario Government did pass legislation meeting the wishes of those lumbermen who desired that, so long as the Dingley bill remained, logs cut under license should be manufactured in Canada. "The Ontario Government, in giving a season's notice, acted in respect to the American lumbermen just as they acted with Canadian lumbermen, whose licenses cover lands that are being settled. They gave the lumbermen a year's notice to remove the timber or it became the property of the settler."

Mr. Waldie states, truly enough, that the Dingley bill, with its specific rate, largely destroys the exportation of the coarser grades of lumber, which are more than half of the whole, "and these coarser grades also form the surplus in the lumbering districts of the United States, and while Canadian lumber is prohibited by a $2 per thousand duty from entering United States territory contiguous to the point of manufacture, we find that certain districts of the United States have the advantage not only of their own market, but from nearness to portions of this country have the advantage of both markets. In addition to this, aided by special railroad rates granted to them, into our country, the value of a local market is entirely destroyed by the surplus supply (usually of low grades) forced into Canada during a period of depression." He concludes by expressing the belief that the import duty of $2 on lumber, implemented by the substantial sympathy of a 12 1-2 cent rate per hundred pounds on lumber from Fort William to Winnipeg, given by the Canadian Pacific Railway, would cheapen lumber in Manitoba and gladden not only the people of Manitoba and Ontario, but every Canadian from ocean to ocean.

You can Have

The great satisfaction riders of the Gendron Bicycles fitted with Buckeye Tires have had in riding it is the key note of its popularity, and with the new 1898 improvements it is worthy of your consideration. It is the prettiest, strongest built and easiest running wheel in the market. It has won more road and track races than all other wheels put together in 1897, including the Dunlop trophy, which was won on Buckeye Tires four times out of five. In fact all the principal events in Quebec, Ontario, Manitoba, and Maritime Provinces were won on Gendron Bicycles. Intending purchasers will please note that fact before buying.

GENDRON MANUFACTURING CO., Limited

P.S.—Difficult repairs on all kinds of wheels is our specialty.

THE bill to incorporate the Kettle Creek Railway into the Boundary district of British Columbia, known as D. C. Corbin's road, has passed the committee of the Commons.

NEGOTIATIONS have been going on for some time between the Toronto Rubber Shoe Manufacturing Company and the municipality of Hull, Que., looking to the transfer of the works of the company from Port Dalhousie, on the Welland Canal, to the first-named place. Mr. Thomas Robinson, of Montreal, president, and Mr. R H. Greene, of Toronto, manager, have been conferring with the Hull authorities. On Monday last, a by-law offering a bonus to the company, was submitted to the ratepayers of Hull, and was carried by the extraordinary majority of more than 600, the figures being 639 for to 18 against. The bonus agreed upon is $30,000. The company will use water power from the Chaudiere. Its capacity is about 3,000 pairs per day. The company proposes to erect, at Hull, a main brick building, four stories high, and 60 by 150 feet, and a warehouse 50 by 150 feet, possibly also a heater building, with a cement and varnish house attached. At present they employ about 210 men, and in their agreement with Hull, bind themselves to pay $75,000 in salaries a year. In case the company defaults within five years they are to refund the entire bonus, and if in ten years $20,000. Various places have made proposals to this company, among them Peterboro, Cornwall and Sherbrooke, but it decided in favor of Hull. In all likelihood, the works will take five or six months to build.

Business Chance or Situation Wanted

A young man of good business abilities and fifteen years' experience in office work, wants situation or partnership in good business or a manufacturing concern. Best of references. Can invest some capital.
BOX D, Monetary Times, Toronto.

Cowan's
Healthful and Nutritious
Hygienic Cocoa

Absolutely Pure.

Soulanges Canal.
NOTICE TO CONTRACTORS.

Sealed Tenders addressed to the undersigned, and endorsed: "Tender for Power House," will be received at this office until Sixteen o'clock on the 2nd of April, 1898, for the construction of a Power House (excepting the iron roof), on Section No. 3.

Plans and Specification of the work can be seen on and after the 24th day of March, 1898, at the office of the Chief Engineer of the Department of Railways and Canals, Ottawa. Printed Forms of Tender can be obtained at the place named.

In the case of firms there must be attached to the actual signatures of the full name, the nature of the occupation and residence of each member of the same, and further, an accepted bank cheque for the sum of $1,000 must accompany the tender. This accepted cheque must be endorsed over to the Minister of Railways and Canals, and will be forfeited if the party tendering declines entering into contract for the work at the rates and on the terms stated in the offer submitted.

The accepted cheque thus sent in will be returned to the respective parties whose tenders are not accepted.

The Department does not bind itself to accept the lowest or any tender.

By order,
L. K. JONES,
Secretary.
Department of Railways and Canals,

THE GRAND TRUNK HEAD OFFICES.

That a change should be made in the situation of the head offices of the Grand Trunk Railway to a point more near the centre of the system than Montreal, is so natural a proposal that one is not surprised to hear that it has been mooted by the new management of this road. Of course, Montreal does not like the proposal, and one of its leading newspapers says what we quoted last week, that "In Montreal they (the managers of the road) find themselves in the business centre of the system, and that is of more importance to them than being at the geographical axis." Yes; but in what sense is Montreal the business centre of the Grand Trunk system? She has the offices, the repair shops, car works, the great yard, but what share of the business of the road does Montreal or Montreal's province furnish? The great bulk of the freight business of the road comes from the west—whether grain, lumber, cattle or dead meat. Then the mileage of track east and south of Montreal, say 500 to 600 miles, is not one-sixth of the whole. Things have vastly changed in this respect in forty years.

Ontario has 6,568 miles of railway, and 2,560 miles of it belongs to the Grand Trunk. The company's total mileage is 4,186, and of this 823 is in the United States, and only 793 in Quebec—all the rest is in Ontario, which has a perfect net-work of Grand Trunk tracks, since that great system absorbed the old Great Western, the Northern, the Midland, the Toronto, Grey and Bruce and a dozen other lines, Toronto is the point at which the roads named converge, and Toronto is the greatest business station on the Grand Trunk in number of freight cars handled and in passenger traffic. She is nearest the centre of the net-work and has strong claims to consideration as the natural and proper point for the head offices.

As to the statement that the Grand Trunk authorities are using the threat of removing the headquarters westward because the Montreal City Council does not agree to grant their demand for Beaver Hall hill or Victoria square as a site for head offices to replace those at Point St. Charles, we think such demand, or such threat, if it has been made, an unworthy policy. Montreal's authorities are quite right to refuse to spoil one of her beautiful and necessary open spaces by making it the site of any building, however handsome. There are many other good sites in Montreal for such a structure. But if, as we prefer to believe, convenience and business policy are allowed to dictate where the head offices of the road are to be, no such consideration as a picturesque site near the eastern end will interfere with the placing of them more near the centre of the Grand Trunk Railway system.

Debentures.

Municipal Debentures bought and sold, also Government and Railway Bonds. Securities suitable for Investment by Trustees and Insurance Companies and for Deposit with the Government, always on hand.

THE SITUATION.

A Senate majority of 38 puts an end to the Mackenzie-Mann Yukon Railway contract. The friends of each House censure the course taken by the other; and each side claims that public opinion is with it and against the other. But the mutual recrimination will settle nothing, and will not clear the political atmosphere of the doubts that exist. There is one way in which the true set of public opinion can be ascertained, with as much certainty as if resort were had to a Napoleonic plebiscite or the Swiss referendum. An appeal to the people, through a general election, which the Government would be privileged to make, would settle the question, and it is doubtful if anything else could. But is it necessary to obtain this information at such a cost, as that which the delay would involve. The Stikine-Teslin route has not been condemned by the vote of the Senate; the probability is that a large majority of that Chamber favor it. What they objected to was what presented itself to them as an improvident contract. The reasons for urgency which existed at the first survive the vote of the Senate. The responsibility of the Senate for the course it has taken does not relieve the Government of the duty of providing an alternative method for the purpose of solving the transportation question. It is now plain that the Senate must be reckoned with; and as menaces directed against it would bring no remedy, the best, if not the only way would seem to be to obtain its confidence. The Senate would scarcely oppose a plan which should put the contract for building the road to the test of competition: the usual, as well as the legal course.

While the United States and Spain may both desire peace, they are running a hot race in preparation for war. The American naval enquiry into the destruction of the "Maine" in the harbor of Havana, reported that the blow came from the outside, but failed to fix the responsibility for striking it. Spain, on its part, does not accept the theory of an external explosion. No reclamation is being made by the Government of Washington upon that of Madrid for the "Maine" catastrophe. President McKinley, who has acted with admirable reserve, up to this point, proposes a plan of practical intervention in the form of relief to the starving Cubans. Spain is said not to wholly negative the proposal, but to make the condition that relief be kept distinct from the naval vessels of the Republic. It would be easy to give relief in such a way as to constitute a *casus belli*. In the multitude of rumors, to which every hour makes additions, it is difficult to know what to believe; but everything points to the probability that Spain has been, or soon will be, required to cause the strife in Cuba to cease. The problem seems to be on what condition Spain is willing to acknowledge the independence of Cuba; whether she would be willing to cry quits on receiving a money compensation, which has been put at $200,000,000. If such an offer could be made good by Cuba, either through an American guarantee or otherwise, it would seem to outsiders as if Spain would get well out of her present difficulty by accepting. She cannot conquer the Cubans; and if war with the United States should intervene, she is bound to lose in the end, not only Cuba, but the indemnity, which she might now get for permitting the island to take upon itself the entire responsibility of its own government. Having the most powerful navy in the world, with the exception of that of England, Spain could inflict great injury on the United States in the earlier stages of the contest. Peace is the interest not only of the two nations but of humanity at large.

Whatever may be the merits of the projected railway to connect Washington territory with British Columbia at Kettle Creek, a clear distinction exists between it and the road projected over the White Pass. At the latter point possible obstructions, in the form of customs regulations, might be made by the Government of Washington, but this is not to be apprehended at Kettle Creek. The reason that determines Canadians to seek a route to the Yukon through their own country has no application to Kettle Creek. A Kettle Creek valley road, it is objected, might take trade from British Columbia across the border. But it could only take trade if it were the interest of those engaged in it that it should go there. And a road over the international line would bring trade in as well as take trade out. There may be special circumstances which induce some people in British Columbia to oppose the proposed road. Let them do so if their interest so dictate, but that is no reason for laying down rules of exclusion, which, is generally acted upon, would build a Chinese wall around the country and shut out all foreign commerce. Much less it is a reason why Parliament should lend its sanction to any such narrow rule of exclusion.

In the case of Molsons Bank vs. Cooper, the decision of the Privy Council has a direct bearing upon the attitude of the Canadian banks on the bankruptcy question. The contention of Molsons Bank arose in a case of bankruptcy. The bank made certain advances to Cooper [& Smith], to be covered, in whole or in part, as the borrower found it possible, by deposits. When Cooper assigned, the bank had collected $83,000, and yet it thought itself entitled to sue for the whole amount advanced, $145,000, in order to increase the amount of dividend. Mr. Justice Rose decided in the bank's favor; the Divisional Court reversed the decision; the Court of Appeal restored the judgment of Mr. Justice Rose, and the Supreme Court was unanimous in deciding the same way. When the case came before the Privy Council, the Lord Chancellor in giving judgment said: "No such right as alleged by the bank could possibly exist." And he gave as a reason that "as the bank received the money, or turned the securities into money, when they received it, it is impossible to say that the indebtedness between them and the debtors was otherwise not diminished to the extent of the money that the bank put into its pockets."

While Toronto is considering the question of railway connection with Hudson Bay, it is well to begin by taking a general view of the bearings and possibilities of the Hudson Bay water route. Though a desire to reach Hudson Bay by railway is evinced in several quarters, the prompting motive is not equally strong at Winnipeg, Toronto and Lake St. John, Quebec. A good deal depends upon whether Hudson Strait is commercially navigable; a problem which cannot yet be regarded as satisfactorily settled. In this branch of the question Winnipeg and the adjacent country has the greatest interest; Toronto has no direct interest, though this is not true of Ontario, whose North-western confines rest on James Bay. Much of the valley of Hudson Bay, whether in the Province of Quebec, or Ontario, or the North-West, is directly interested in this navigation. James Bay, the southern continuation of Hudson Bay, has deep water in the centre, but on the coasts, especially the western, the water is shallow, and it is possible that no harbor could be found capable of admitting large vessels short of Churchhill. As the crow flies it is about 900 miles from Toronto to Churchhill, and the railway distance would of course be more. Once there an excellent harbor would be found; but the northern half of the road would run over a country of little value. A deep harbor could, perhaps, be made in James' Bay, at considerable cost. At York Factory, even this would probably be impossible; for there the shallow water, 10 or 11 feet at high tide, goes out many miles, in some places not less than 15. Either Churchhill or Port Nelson is nearer than Montreal to Liverpool; from Winnipeg to Liverpool by Hudson Bay and Strait, the distance is 1,400 miles less than by the St. Lawrence. But this supposes a railway from Winnipeg to Churchill, 650 miles long. Churchhill harbor is in about 50° of north latitude; and yet, there are people who ought to know something about it, who tell the almost incredible story that it "is never frozen over;" that two-thirds of the space near the entrance is never covered with ice. Mr. Tuttle, who went there with the first Canadian expedition to explore the Strait of Hudson, makes the statement. If this be true, Churchhill has an advantage over every other harbor in our far north land. We do not yet know for certain whether Hudson Strait is generally frozen over from side to side in any part of the year; or, if it be so closed, how many months in the year the closure lasts.

When the Canadian Copper Company was incorporated by Act of Parliament, in 1886, the charter required it to establish smelting works in Canada. The bill, in its original form, proposed to enact that these works might be established in Canada "or elsewhere;" but the latter words were struck out by the Private Bills Committee. As copper was sometimes found in alloy with nickel, part of the plans of the company was to erect at Sudbury, works for making "pure alloys of nickel and copper, and also pure copper and pure nickel, as soon as the best works can be considered." So wrote Mr. Stevenson Burke, president of the company to S. J. Ritchie, Esq., May 7th, 1891. This was in answer to a complaint from the late Sir John Macdonald, that the company was not living up to the provisions of its charter and its agreement with the Government. But even since then, the company has gone on evading its solemn engagements in this particular; and it is now being brought to bay, another American company being ready to undertake to set up works in Canada and make its nickel here, if the Government will put a duty on the export of the raw material, the nickel matte. As this seems to be the only course to compel the Canadian Copper Co. to carry out its obligations, an export duty on nickel matte is in order. Most of the nickel found in the world is found in Canada and New Caledonia; but the operators of the mines in the latter country, unable to stand the competition of ours, have been heavy losers. When the United States Government wished to discover where it could procure the nickel it required to make nickel-steel for war vessels, it sent a commission to Sudbury, who reported that the Canadian Copper Company and the Anglo-American Iron Co. had between them the prodigious quantity of 650,000,000 tons of nickel ore. Even if this estimate be beyond the sober fact, still the nickel industry is highly important, and it is not fair to permit the Canadian Copper Company any longer to disregard its obligations to carry on its manufacture in Canada.

TAX EXEMPTION BY WHOLESALE.

The council of the Board of Trade asks that in lieu of taxes on business personalty, a rental tax be substituted. An Act of the local legislature of 1890 gives municipal councils power to make the substitution for "the taxes on so much of the personal property of the ratepayer as belongs to the business." The tax to be substituted would be 7½ per cent. on the rental. If, as is alleged, the municipality would not lose by the change, opposition to its being made need hardly be counted on.

The council of the Toronto Board of Trade did well not to endorse the extraordinary reasoning of the committee on taxation. These arguments favored the abolition of all taxes on personal property. The report laid it down, among other things, that "what a man produces belongs to himself and to him alone;" and that "to take, by the process of force, law, or through taxation, any part of that product which labor has given a clear title to without some just equivalent in cash, personal services or public benefits, is manifestly a robbery of the individual." Socialists contend that what labor produces, neither profit nor interest can take any part of; the committee as if intending to "go one better," contends that what a man produces belongs to himself alone, and the rest of the argument is intended to prove that no part of it can be taken for taxes. It is well, we repeat, that the council of the Board of Trade did not countenance the extreme doctrine of the committee. The plea that would free personal property from taxation would simply throw the whole burthen of the cost of Government on one other form of property.

Mr. Benjamin Harrison, late President of the United States, has recently dealt with this question of the taxation of personal property and the extent to which the tax is evaded. Mr. Harrison lays down a principle which is well worthy of consideration in all countries. "One of the conditions of the security of wealth," he says, "is a proportionate and full contribution to the expenses of the State and local Governments. It is not only wrong, but it is unsafe, to make a show in our homes and on the street that is not in the tax returns." He deplores the loose morality in practice, which leads to extensive evasions of taxes on personal property. "The most serious aspect," he remarks, "of this state of things is the personal injury which results to those who practice these fraudulent evasions. The man who is robbed has not lost his character or self-respect, but the other man has lost both. Taxes are a debt of the highest obligation, and no casuist can draw a moral distinction between the man who hides his property or makes a false return, in order to escape payment of his debt to the State, and the man who conceals his property from his private creditors. Nor should it," Mr. Harrison believes, "be more difficult to follow the defaulter in the one case than in the other." A man who would cheat the municipality out of taxes due on personalty would scarcely scruple to defraud the customs, if he could.

Paraphrasing Mr. Lincoln's declaration that the United States could not continue half slave and half free, Mr. Harrison contends that "this country cannot continue to exist half taxed and half free. The sense of inequality breathes a fierce and unmeasuring anger, creates classes, intensifies social differences and makes men willing to pay their [dollar] debts in half dollars." If a one-sided system of taxation could be established, it would probably end in a social catastrophe.

BUSINESS IN TORONTO.

In the pregnant address, early in the present year, of Mr. Gurney, retiring president of the Toronto Board of Trade, he stated some things about the inequality of railway freight rates to and from Toronto, with those to and from Montreal, that deserve to be remembered. "We know," he said, "that it costs an Ontario man more to place his goods in a Quebec town than it does a Quebec man to place his goods in an Ontario town at the same distance. We know of some inequitable conditions imposed on Ontario as compared with Quebec," and he added the clear conviction "that something should be done, and that there must be somebody to do it." But at the same time, he was careful to state that "it should be clearly held in mind that our policy should not be one of professional hostility to the railways or other carrying companies." Mr. Gurney reiterated then the warnings which, at a previous annual meeting twelve months before, his predecessor and himself had uttered as to the repellant attitude of the city council of Toronto towards railways, factories and other industrial or commercial projects which desired to expend money in the city. In the matter of imposing heavy taxation or other onerous conditions upon such enterprises instead of welcoming them, the retiring president used this strong expression: "Such efforts, at least, convey the idea to combinations of capital and enterprise that this is a dangerous town in which to do a successful business."

The city council of Toronto has for years shown a disposition rather to harass and perplex enterprise with needless conditions than to encourage it by liberal terms. We do not by this mean the refusal of bonuses, which we regard as artificial and costly modes of cherishing enterprise. But our civic attitude has been such as to convey the impression that novel undertakings or extensions of works already existing should be proud of the privilege of being allowed to settle in Toronto, and that their authors ought to be glad to submit to any terms that our narrow civic pride or greed sought to impose. It is true that Toronto has many advantages to offer any man or set of men who wish to do business within her borders. But in these days of competition and narrow profits it is but too easy to offset these advantages with terms such as spirited or self-respecting merchants will not endure. Apropos of the outcry lately heard as to the need of our cultivating friendly relations with the railways, an evening paper reminded its readers the other day that:—

> If the Canadian Pacific Railway management had been allowed to follow the plan mapped out some years ago, two or three million dollars of the company's money would have been spent on the waterfront of this city, and trade would have been brought here that has been diverted to Montreal. Everybody must admit that the railway discriminates against Toronto wherever it can, and they must acknowledge also that the lunatics who drove the company off that portion of the waterfront which was purchased for the erection of the finest station in Canada, discriminated against the C.P.R. to a degree which has given the company excuse, if not justification, for its efforts to build up Montreal at the expense of this city.

Nor is the Canadian Pacific the only road that has been harassed by narrow enactments, demands, lawsuits, and the like, into a condition of lukewarmness, not to say hostility, to Toronto, as compared with other points. The Grand Trunk has had its own battles with our valiant city council, the recollection of which may well form a factor in determining the warmth or coldness of its attitude towards the place in respect of these same inequitable freight conditions to which Mr. Gurney refers.

Nor are the railways or new undertakings of a manufacturing kind the only efforts of capital and enterprise which have been checked and worried by our precious aldermen. The corporation entered upon a prolonged fight with the Gas Company on grounds which have been shown to be futile and inadequate, both expert accountants and the courts having refused to support the city's contention. Next, certain wiseacres at the city hall propose to attack the business of the electric power and light companies by entering into competition with them in order to supply light and power to the city. If Toronto's citizens are paying too much for their supply of electricity—a point which we do not pretend to decide—the corporation can surely find a more economical way of earning the profits supposed to reside in this business than that of using civic money to duplicate light and power plant, and thus create a rivalry that will waste the capital of both parties. Rather than see their capital confiscated by such long-continued wasteful competition, we should think the private companies would sell out to the city, which might then experiment as it chose with power supplied from Lake Simcoe or the Humber.

It is not pleasant, but it may be salutary, to recall what a member of Parliament, formerly president of the Toronto Board of Trade, had to say upon one public occasion: "The sentiment of Toronto seems to be one of suspicion towards all enterprise in her midst. There is plenty of energy to pull down, but none to build up. I myself know of more than one industry that should have been located here, but which has gone elsewhere because, rightly or wrongly, the impression is abroad that Toronto does not treat enterprise in a broad and liberal spirit. . . . We are ready to go into all sorts of civic schemes, voting large sums of money to carry out fads, anything that would cause large amounts of money to be spent, without giving one thought to what would be the result." One step in the direction of curing the illiberality and wrongheadedness of aldermen in relation to industrial enterprises would be to establish intimate and friendly relations between city council and Board of Trade. The broader-minded and more commercial spirit of the latter might well assist in getting our civic fathers to do their business in a business-like way.

DIRECT TRADE WITH MEXICO.

Both by the Atlantic and Pacific routes Canada ought to do a considerable direct trade with Mexico, whose total annual commerce exceeds $50,000,000. We know that the trifling amounts which appear in the Ottawa Blue Book from time to time do not by any means represent the export of Canadian merchandise to that country, for it reaches the Mexicans at second or third hand via New York or London, and is by them put down as American or Canadian merchandise. This is what Mr. E. E. Sheppard, the Government commissioner to Mexico, tells us, and it is not pleasant to hear. The Canadian provinces of British Columbia and Nova Scotia ought to do quantities of trade with Mexico, for she is a rapidly growing republic, and both countries want what the other produces.

With the view of testing what we had heard of the remarkable development of Mexico in late years, and also of learning what articles might best constitute the basis of a trade between the two countries, we have arranged for a series of papers from a Canadian, now resident in the capital of that country. The first of these we present to-day. It shows how great the progress of the Mexican Republic has been within a dozen years in the matter of fiscal organization, in railways and telegraphs, in harbors and drainage, in mining and manufactures. It shows, too, how vastly the foreign trade of Mexico has changed its channels. Twenty years ago Europe took 60 per cent. of the exports of Mexico, and supplied 74 per cent. of her imports, while less than a third of the total American trade was done with the United States. To-day, however, as a result of railway communication and Mexican enterprise by rail and water, the United States received last year 79 per cent. of Mexico's exports, and sent more than half her imports.

Taking up the last Ottawa return of Trade and Navigation we find that $37,425 worth of Canadian goods were sent to Mexico in 1897, three-fourths of them lumber, telegraph poles and coal from British Columbia, the remainder including bicycles, sewing machines, etc., from Quebec and Ontario; while our purchases, consisting of coffee and cigars, were under $10,000. And yet we know that hundreds of thousands of dollars' worth of Canadian products have been forwarded to Mexico by United States firms as American products, and have gone to swell the $46,261,000 worth of goods bought within the year by the smaller republic from the larger one.

Bearing in mind what was related to us by Mr. Sheppard last year of his reception by President Diaz and the anxiety that functionary expressed to cultivate trade relations with Canada, we are sure of warm treatment by the Mexican Government. But the average Mexican merchant does not know Canada; he does, however, know France, Britain and the United States, who buy from him and sell to him. And he will not know Canada so long as Canadian manufacturers and exporters are willing to send their goods through American houses. Why not ship from Canadian ports and use our own vessels instead of American ports and ships? Surely our Halifax and St. John merchants can trade by vessel with Progresso, Vera Cruz, Tampico, or other Gulf of Mexico ports just as well as New York vessels can. If in the West Indies we can compete, why not in Mexico? And on the Pacific coast British Columbia can do more.

Mr. Sheppard, the trade commissioner, contends that Canada should handle her own trade. Mr. Lindsey, who is on the spot, says that Mexico will take our coal and lumber; our breadstuffs and provisions; our lard and dairy products; our agricultural and mining machinery; besides textile and rubber manufactures, chemicals and drugs, malt liquors, prepared fish. On the other hand we can buy from Mexico sugar and coffee, oranges and other fruits, tobacco leaf, fancy woods, flax, hemp, jute. Is not the experiment worth while? If it is let it be made in a spirited and modern way, recognizing that we have great competitors.

—"'Tis a pleasure to look at a well dressed man. A plain man with a good figure, square shoulders, erect and symmetrical—well drilled and better dressed—is a sight that ever pleases the fair sex."—*Sidney Smith.*

MORE ASSESSMENT KICKING.

The Mutual Reserve Fund half-price assessment concern, of New York, is getting a large amount of advertising of late, of a sort it does not relish. Newspapers all over the country are giving instances of people who are out of sorts on account of the company's tremendous bi-monthly calls upon their "pocket reserves." One of the most powerful kicks we have noticed is that of President M'Kinley, the head of the widely-known M'Kinley Music Co., of Chicago. He was drawn into the meshes of the half-rater by the example of other good business people, and was led to believe that the bonds that would be issued to him every five years, would greatly reduce, if not entirely dispel his assessments after fifteen years. He has now got there, but got it in the neck, instead. He was in the Massachusetts Benefit for a large amount when it closed up, after he paid its increased assessment for a time or two; and now to have the Mutual Reserve call for $325 bi-monthly ($1,950 a year) caps the climax with him. He elevates his battle-axe and goes for the company in a lively fashion. He says: "If I had been held up by foot-pads, I would consider myself the victim of circumstances, but to be held up by this insurance (?) association in such a bare-faced and apparently legal manner, is an outrage." He wrote the president of the Mutual Reserve Fund, as follows:

> You are probably aware that the music company of which I have the honor of being president, is known from one end of the country to the other, and we have agencies in every city and town in the United States. We distribute through these agencies millions of catalogues and circulars. It is my intention to give a wide publicity on the back of these circulars and catalogues to my experience in the Mutual Reserve Fund Life. I am satisfied that it will act as a warning to any contemplating insurance in your company.

Mr. M'Kinley has received bushels of letters from all parts of the country commending his course. One of them is from a man who says he joined the Mutual Reserve in 1885, at the age of 39, for $5,000, the assessment to be $6.80 bi-monthly, which, with $15 for annual dues, came to $55.80 per annum. Cheap enough. Pretty soon it jumped to $76.20; then to $86.82; and now to $112.30. He is puzzled, and thinks he had better stop short off. What a fool he was to suppose any concern could cut down Old Mortality's demands to one-half what they had always been. A very little penciling might have shown him that no person aged 39, with 29 years of expectancy, could honestly get $5,000 for $40.80 per annum—omitting the $15 of expense fees. Even if paid for thirty years that would only come to $1,224. Where would the other $3,776 come from? And how would all the holes made by early deaths be filled. Many would die during the first ten years, contributing very little, and more the next ten, and nearly all the remainder the third ten, while a few would linger on and pay heavily for possibly another ten or fifteen, only one or two passing the "age 80" mark out of each 100 who joined at 39 years of age. But no association could live long enough on such a rate to be there when old age was reached.

William McGill, coal dealer, of Bathurst street, Toronto, gives his experience. Put in tabular form it runs as follows:—

Number.	Date.	Amount.	To 1895.	To 1897.	In 1898.
33,098....	Oct. 17, 1885,	$2,000	$39.36	$55.92	$ 87.36
67,417....	Dec. 14, 1887,	3,000	70.38	97 38	131,04
Totals.............		$5,000	$109.74	$153.30	$218.40

From 1895 to 1898 his assessments have about doubled, and he warns the public to keep clear of assessment insurance. He must now pay $218.40 or drop out. Next year, $240.90. At 65, the rising rate shows $330.90; at 70, no less than $480, and at 80 it calls for $1,098.55 for the year.

A Hamilton gentleman also gives his experience as a warning, through the public press. He writes:—

> As a warning to the public, and especially to my fellow members, insured in the Mutual Reserve Fund Life Association of New York, I wish to submit the results of my unfortunate experience as a member of that assessment company. On the 31st December, 1888, I insured in the Mutual Reserve Fund for $1,000, under policy No. 80,879. It was represented to me at the time by the agent of the company and by its literature that I could get valid insurance in that company for one-half the usual rates charged by level-premium companies. I was told that these old line companies were charging exorbitant rates; that they were collecting thousands and millions of dollars unnecessarily from the public; that their reserve fund was like a fifth wheel to a coach, and that the Mutual Reserve Fund would carry my insurance for half the cost. Accordingly I, like many others, bit at the Mutual Reserve bait, and now, after nine years' experience with assessment insurance, I have to say that the whole thing is a miserable sham, and that in my old age, when unable to secure and pay for new insurance, I am now frozen out of the Mutual Reserve Fund by the increase of assessments, as will appear from the following facts.

He then goes on to show that from 1889 to 1894 inclusive, he paid $34.68 each year, and in 1895 was raised to $38.07, and in 1896 to $41.46, and now to $61.68. And for the future, if he were to continue upon the scale furnished him by the Reserve Fund actuary, he would be paying, five years hence, $88.14, and in ten years $144.54, and fifteen years hence $219.76. And all this for a $1,000 certificate that would be good for nothing if a miss of a day were made any one time of the six possible times each year. He contrasts the above with his experience in a regular company in which he took $1,000 three years earlier, for which he has paid $44 per annum for twelve years past, and which sum the profits on his policy have now reduced to $37.20, with a prospect of going still lower during each five years he holds out. He thinks "the time has arrived when the people of Canada should arise in their might, and banish from our land this miserable system of assessment insurance."

The fact is that this "miserable system" is rapidly on the wane in this country, in so far as it has been pushed by the Mutual Reserve, the Covenant Mutual, and the now defunct Massachusetts Benefit Life. The following statement shows the new business done by these three (the only American assessment concerns operating under deposits at Ottawa) during the past six years:

Year.	Mutual Reserve.	Covenant Mutual.	Mass. Benefit.
1892	$3,720,100	$2.043,875	$411,500
1893	5.398,600	1,783,625	391,000
1894	5,131,000	1,193,250	539,900
1895	3,686,000	958,375	441,400
1896	3,708,000	205,000	173,800
1897	2,006,300	157,500	17,500

How the "Unsettled Claims" have been increasing of late is shown by the following statement from the blue-books, giving the sums confessed to be lying over, unpaid, on the 31st of December in each of the past three years:

Year	Mutual Reserve.	Covenant Mutual.	Mass. Benefit.
1895	$79,300	$14,833	$51,550
1896	92,500	17,125	67,838
1897	124,200	14,750	76,950

The claims resisted are set down in 1895 as $15,000; in 1896 as $3,500; and on 31st Dec. last, as $15,000. Of the latter sum $10,000 is by the defunct Massachusetts Benefit. The Ottawa Government still holds $100,000 as security for all honest claimants against the Massachusetts Benefit, and $100,857 of the Mutual Reserve Fund's money, while for the Covenant Mutual's fidelity, it has only $53,533. The $124,200 of unsettled claims standing against the Mutual Reserve Fund exceeds its deposit by $23,343, so that the living Canadian holders of its certificates appear to have no real security whatever, but on the contrary, a large deficit to be made up before they will be safe. It is most probable that the $124,200 has largely increased since the opening of the new year, with the increase of the assessments. There can be no doubt that many deaths have occurred since Jan. 1st, and we may safely predict that some thousands of the best lives from among the 16,550 on the books in Canada will throw up their certificates as worthless during the present year. But no official information can be had, in the ordinary course, as to its business in Canada, until about this time next year. It reports to the Government only to the 31st Dec. in each year. An official examination is now going on, however, at its head office in New York, and the finding will no doubt be published in a few months.

A LATENT INDUSTRY.

The request of the bee-keepers for legislation regarding the adulteration of honey, and the discussion of the subject which followed, has done more than anything else within recent years to emphasize the possibilities of this industry. It is a well-known fact, we believe, that the honey produced in northern countries is of a superior quality; the conditions in Canada, where the climate is cold, and yet not severe enough to prevent the blossoms from distilling nectar in sufficient quantity to pay the bee-keeper for his trouble, should be favorable to the development of a profitable trade. The consumption in the home market is capable of expansion. As the president of the Bee-keepers Association, at the recent convention remarked, "If the attention of manufacturers of such articles as confectionery, vinegar, liquors and tobacco was drawn to the usefulness of honey, it would lead to a hundred-fold increase in consumption." Some of the enthusiasts maintain that honey as an article of food should have as wide a use on the table as butter or cheese, and although this view in its entirety would scarcely be acceptable to the public, there is little doubt that the use of honey could be extended with advantage. For beeswax the local demand is greater than the supply. We are told of a firm in the Province of Quebec which would be willing to place an order for 1,000 pounds of beeswax a month, could that quantity be obtained. The more attractive channel of development lies in the export trade. The annual production of European countries is very large, authorities placing that of the leading countries as follows: Germany, 44,800,000 pounds; Spain, 42,500,000 pounds, and France, 22,500,000 pounds. In spite of this enormous production, these countries are accustomed to import supplies from abroad. The natural market of the Canadian producer is Great Britain. In this industry, as in others, it is essential that we send a pure article and market it as CANADIAN, to avoid confusion with the honey of the United States, which, as a result of adulteration and other sharp practices, commands in Great Britain only about half the price of the local product. We can produce with advantage in Canada at least two toothsome commodities, honey and maple syrup. Let us see that their value is appreciated abroad.

GENERAL CONDITION OF MEXICAN TRADE.

BY A CANADIAN, RESIDENT IN MEXICO.

The industrial and commercial advancement of Mexico, and the general development of the country, during the past twenty years, has been rapid, indeed. Mr. Lummis, in the February, 1897, number of *Harper's Magazine*, aptly calls Mexico "an ambitious marcher in the procession of nations," and says: "She is no longer old Mexico; while in the United States we have been achieving a material development, she has wrought the political and social miracle of the century. Within less time than has elapsed since our Civil War invented millionaires, Mexico has stepped across as wide a gulf. From a state of anarchy, tempered by brigandage, she has graduated to the most compact and unified nation in the new world.... There is progress everywhere, material, intellectual, moral.

In 1879 there were only 372 miles of railway in the country (the greater part of which consisted of the Mexican Railway connecting Mexico City with Vera Cruz, and about 5,000 miles of telegraphic communication. In 1883 the total railway mileage had reached 2,800. In 1887 there were open for traffic 3,870 miles, and, at the present time, there are forty railroads in the Republic, with a total of 7,384 miles, and a large number of other roads are building and being prospected. The report of the Minister of Communications, just issued, gives the total telegraphic communication at 27,900 miles, not including lines belonging to railways.

The country is progressive, well protected and favored with soil and climate unequalled. It has also stable government under Porfirio Dias, who has occupied the presidential chair for twenty years, and to whose able guidance the present prosperity and development of the country is mainly due. During the administration of Dias, public works have advanced apace. The valley of Mexico has been drained at the cost of $18,000,000. The harbor at Tampico has been improved to the extent of $7,000,000, that at Coatzacoalcos to a like amount, and an appropriation of $20,000,000 has been voted for the same purpose at Vera Cruz, a great deal of which has already been expended. Railways have been bonused to the extent of $110,000,000, and the Government is ever ready to meet the reasonable requirements of those having enterprises calculated to advance the interests of the Republic.

The tariff is high, but, in reality, not so protective as it would appear to be, for large inland revenue taxes are collected from every industry and business house in the country, besides the burden of the Stamp Act. The duties are in every case specific and there is no discrimination in favor of any outside country.

Although a large number of new industries are starting up, the country cannot be said to be a manufacturing one, the scarcity of fuel being a great drawback to manufacturing. The main output consists of minerals and products of the soil. The principal articles of manufacture are blankets, carpets, wool and cotton cloths, prints, underwear, hats, shoes, silk, fabrics, soap, and a small quantity of paper. The wool and cotton manufactures have already assumed large proportions, and are rapidly on the increase. Wool is produced in abundance, and a large amount of cotton is grown, but as yet, not enough to supply the home demand. The deficiency is supplied from Texas.

THE PROGRESS OF UNITED STATES TRADE.

For a long time the trade of the country was held by Europe, which had the best means of communication. The United States, has, however, with the growth of railroads and steamship connection, made strenuous efforts to extend its trade with Mexico, and with the wonderful result shown by the statistics given farther on. Mr. Crittenden, the United States Consul-General, reported to his Government with reference to foreign competition in Mexico : "I think the merchants and manufacturers of the United States could profitably establish permanent exhibitions of their wares in this (Mexico City) and other cities of Mexico, under the management of those informed and speaking Spanish as well as the English languages. This exhibition of goods will insure their introduction and sale into every part of Mexico, more rapidly, in my opinion, than any other way. The trade in Mexico has been commanded so long by England, France, Germany and Spain that it will not be deflected or divided except by the most industrious methods. The merchants and manufacturers of the United States should organize for this commercial battle, as those other nations will only yield it after the most stubborn fight."

The International American conference in 1890 reports the reason why purchasers buy in Europe: "Trade is no longer done to any extent by correspondence. The buyer and seller must see each other. Acquaintance fosters confidence, and confidence is the foundation of all trade. Whenever foreign merchants have obtained mastery of the markets in Latin America, it has been by sending agents to study the tastes and wants of the buyers, and to lay before them samples of the merchandise they have to sell, and by furnishing prompt and cheap transportation facilities."

Referring to the steady increase of commercial relations between the United States and Mexico, Mr. Carden, the British Consul, says in his report, issued August, 1897 :

"The great increase in imports of American goods this year must be regarded by British merchants and manufacturers as another warning that, unless they soon make a serious effort, they will have to give up all hope of profiting by the increase of the Mexican import trade, and may even lose part of the very limited share of it they at present enjoy."

"The proximity of the United States and the consequent facilities her manufacturers enjoy for filling orders rapidly, gives them, of course, a great advantage; but it is one which could, to a great extent, be neutralized if English manufacturers had enterprise enough to establish depots in Mexico of the articles for which there is the most ready sale, instead of waiting to send them out till they get orders for them."

"There is a steady and increasing demand for all kinds of agricultural and mining machinery and implements, pumps, threshing machines, steam engines, boilers, rock drills and a host of other articles.

"The United States Congress, in 1889, recognizing the necessity for determined effort in order to advance trade relations between themselves and Mexico, Central and South American countries and the West Indies, called together in international American conference through the Secretary of State, Hon. J. G. Blain, and as a result of said conference, a bureau of information was established at Washington, the annual cost of which has since been some $33,000,besides the amount derived from the sale of the publications of the bureau. The issue of the regular bulletin alone of this bureau reaches nearly 1,000,000 copies annually. The information is mainly collected by the American Consular officers (of whom there are eighteen in Mexico), and the enormous benefit of trade has amply justified the undertaking. In a communication to the President in Dec., 1897, asking a considerable increase in the appropriation to the bureau, the director expresses his firm belief that: 'If the work is pushed with the vigor the improved outlook for business expansion justifies, our trade in Latin America may be easily doubled, and perhaps trebled or quadrupled within the next two or three years.'"

The steps thus taken have assuredly worked wonders. The September number of the American Bureau reports as follows: "So effective was the hint given the manufacturers of the United States by Mr. Joseph G. Donnelly, Consul-General at Neuvo Laredo, in a communication to the Department of State, under date of April 4, 1897, in regard to the establishment of commercial agencies for the distribution of American manufactures in Mexico, that he is enabled to further report on July 21, that steps have been taken for the consummation of this plan, and its inauguration is the work of the near future. Further intimation of the desirability of this enterprise is indicated in the communication of Mr. Reuben D. George, Consul at Nogales, Mexico."

Great Britain, through its National Board of Trade, is carrying on, in the American Republics, practically the same work which devolves upon the American bureau, and the appropriations by the British Parliament for this branch of its work, are in excess of $325,000 per annum.

The British Trade Review for July, 1897, says : "The United States are not only making a determined bid to obtain a large share of the trade with Great Britain, notably in respect to dairy produce, but it would seem that no effort is being spared on the part of the American Government, to provide manufacturers and traders on the other side with full details of all the markets importing manufactured and other goods."

"It is idle to conceal the fact that the industrial activity of the United States is making itself felt in a very marked degree in not a few of those markets which British manufacturers have hitherto regarded as unavailable.

"There can, of course, be no undue sentiment with the buyer in his dealings. He will buy in the best, if not the cheapest market. At the same time it is well for producers here at home to carefully note the concerted actions which the States are making to secure a greater share of our colonial and foreign trade, and to see that nothing is wanting on their part to satisfy to the utmost the requirements of those who are being so assiduously solicited by the American producer."

In 1873 Great Britain took 39 per cent. of the total exports from Mexico, and sent to that country 34 4-5 per cent. of the total imports. The United States took 36 per cent. of the exports, and sent 25 3-10 of the imports. All other countries, almost entirely European, took 25 per cent., and sent a little less than 40 per cent.

For the year ending June 30, 1897, Great Britain took something over 12 per cent. of the exports, and sent a little over 15 per cent. of the imports. The United States took nearly 79 per cent. and sent 53½ per cent. All other countries took less than 9 per cent., and sent 31½ per cent.

W. L. M. Lindsey.

City of Mexico, March, 1898.

To be continued.

DRY GOODS CONDITIONS.

The spring trade in textiles has been exceptionally good. Assorting business is commencing well, and the prospects are favorable for an active movement next autumn. The representatives of Canadian houses are reported to have placed orders freely in the United Kingdom for Yorkshire goods, but in Manchester and Nottingham their requests upon stocks are said to have been of a limited nature This was to be expected in view of the reduction in the customs tariff which is scheduled to take place in British goods next July, merchants naturally feeling disposed to delay their imports and take advantage of the lower duties. The textile journals of the United Kingdom are paying considerable attention to the Canadian trade. The *Drapers' Record* remarks that : "A further reduction of 12½ per cent. in the duty on British goods, making, with the 12½ per cent. already granted, 25 per cent. in all, will shortly come into force, and should greatly help Midland houses in the Canadian market. There is, of course, the risk of German goods being forwarded to this country, and trans-shipped, leaving British ports as articles of British manufacture. This, with a preferential duty of 25 per cent. as an inducement, will certainly be done if the stamping under the Marks Act can be removed so as to banish all traces of origin."

American sales agents were in the Canadian cities recently with print goods samples, but we have yet to learn of their receiving anything but nominal orders. So far as the cloth and dye are concerned, the American goods are fully equal to those of British origin, but in the matter of patterns and finish the goods of the mother country stand without a peer. The manufacturers of the United States lay claims to an immense number of patterns which will not bear close scrutiny. To illustrate in a line which an American agent termed six patterns, the more accurate description would be one pattern in six colors. The capital required in fitting out a plant with expensive copper rollers and other machinery necessary to give the requisite variety in designs, is apparently invested in the print manufacturing of no other country than Great Britain.

THE WOOL SITUATION.

Wool growers are now beginning to discuss the prospects for the season of 1898. A few parcels of early-clipped unwashed wool are beginning to come forward. Breeders who are anxious that their flocks should make a good appearance at the autumn fairs are clipping their sheep that the wool may have a full growth, while those who are preparing lambs for an early market also find it advisable to clip the ewes who, kept in warm quarters, would otherwise shed their fleeces. From these two sources come the first offerings of wool for the season. The washed wool will scarcely begin to find its way to the market before the closing days of May; the washing operation may be either hastened or delayed by weather conditions. Those growers who hope to realize the good values obtained last season will probably meet with severe disappointment, as the barriers erected before the entrance to the United States market have rendered difficult of access the one profitable foreign outlet for Canadian wools, and the home mills have not sufficient capacity to consume all the long coarse wools grown in this country.

A summary of the world's wool statistics, while it is of only indirect value to Canadian wool growers, will prove of more than passing interest to importers and manufacturers. The total quantity of raw-wool available for consumption in 1897, exclusive of old stocks, is placed by Messrs. Hellmuth, Schwartze & Co., London, Eng., at 2,304 million lbs. against 2,263 million lbs. in the preceding year. The increase was larger than expected and partly due to heavy importations of sundry wools, particularly Persian, Central Asiatic, China, Punta Arenas and Mohair, and to the heavier weight of River Plate bales, and partly to quicker arrivals of Australian and River Plate wools in December. The actual production of Colonial wool was less than in the preceding season. The United States clip was thirteen million pounds less and was the smallest since 1879. Calculated in clean wool the increase was proportionately still greater owing to the larger quantity of River Plate crossbreds.

A division of the past twelve years into four year periods shows that the increase in the supplies since 1886-88 amounts to 20 per cent., or allowing for the growth of population to 9 per cent., while the price is reduced by 16 per cent.

The quantity left for consumption last year was 195 million lbs. more in North America, 25 million lbs. less in the United Kingdom and 129 million lbs. less on the continent, the European consumption having been the smallest since 1891.

With regard to this year's supply it is not likely that the receipts of "other sorts" will show another increase in the presence of a depressed market for coarse wools, while the imports of Colonial and River Plate wool for the calendar year will probably be reduced by the equivalent of 200,000 colonial packages, taking everything into consideration, the decrease in the colonies, an almost stationary production at the River Plate and the early arrivals last December. This would mean a reduction of the total quantity by 70 million lbs., say to 2,234 million lbs. The decrease will be entirely in merino wool, the production of which will in our opinion be smaller than at any time since 1888.

ITEMS ABOUT MANUFACTURES.

The Shepard & Morse Lumber Company, of Ottawa, have received a carload of mahogany from Honduras. The wood is valued at $2,000. The company named is interested in the mahogany forests of Honduras. This wood, in logs, is carried from Central America to Boston and there cut up into lumber.

The structural iron workers of Pittsburg organized last week and decided on a new wage scale which they will demand after April 1st. It calls for 30 cents an hour and nine hours a day, except on city work; on this, an eight-hour day.

Belts that slip, says a manufacturing journal, not only do not drive properly, but they wear out rapidly. A belt that is too tight is overstrained, and will also wear out rapidly. A thoroughly reliable belt dressing is a necessity.

During last year the Hartford Steam Boiler and Inspection Company investigated the condition of no fewer than 206,657 boilers in the United States. The following comparison of the work of its inspectors in two years shows that with an increase in the number of boilers inspected, there was a decrease in number of defects discovered :

	1896.	1897.
Visits of inspection made	102.911	105,062
Whole number of boilers inspected......	205,957	206,657
Complete internal inspections	78,118	76,770
Boilers tested by hydrostatic pressure....	8,187	7 870
Total number of defects discovered......	143,217	131,192
" " of dangerous defects	12,988	11,775
" " of boilers condemned	663	588

There is a proposal to transfer the charter of the Peterboro and Ashburnham Street Railway Company to the new electric railway company in Peterboro. Every shareholder must give consent to such a transfer, and the Canadian General Electric Company is a shareholder. The *Review* considers it probable that the transfer will be made.

The last issue of the *Iron Trade Review* announces that the Chicago *Industrial World* has been amalgamated with the former journal. The paper has now offices in Cleveland, Pittsburg and Chicago, and is one of the best informed journals of the West on the subjects of machinery, metal-working, and iron and steel interests in the States.

Andrew Carnegie has given $10,000 to the Carnegie Library at Pittsburg, to start a reference library of technical works, to cover mechanical, civil and electrical engineering, chemistry, metallurgy and manufactures. Something similar, we presume, to the Crerar Library, of Chicago.

In anticipation of the spring freight rates which come into effect on April 1st, importers and manufacturers of hardware, metals, chemicals, paints, and such heavy goods, are getting spring orders or held over orders ready to ship. There is thus considerable activity in Montreal and Toronto warehouses, as also in the various other manufacturing cities and towns East and West.

We are informed that a winding-up order has issued in the matter of the Canadian Watch Case Co., of Montreal, and that a meeting of the company's creditors is called for the 9th April. The company was organized something like two years ago, with an authorized capital of $10,000, but it would seem has not been successful.

The Pacific mill, at Tacoma, State of Washington, the largest shingle mill in the world, was completely destroyed by fire recently. The loss was about $100 000, and the insurance only partial on the building, while it was *nil* on the stock.

Japanese auctions are conducted on a plan which gives rise to none of the noise and confusion which attend such sales in the United States. Each bidder writes his name and bid upon a slip of paper, which he places in a box. When the bidding is over, the box is opened by the auctioneer and the goods declared the property of the highest bidder.

Illustrations were given the other day in our Western contemporary, the Winnipeg *Commercial*, of the extensive packing factory of J.

Y. Griffin & Co. in that city, extensive improvements and enlargements of which have been under progress for some time. This week, it was expected, the factory would be able to resume operations, and its capacity will have increased from a possible of 200 hogs per day to 500. The new building was planned and erected under a Chicago architect, an expert in such structures, who has made cold storage buildings a special study. The firm proposes to open a branch in Vancouver about the middle of April.

IN THE DRY GOODS STORE.

As to improvements in the manufacture of figured fabrics, this object is effected by employing different materials, as wool and cotton, so that when the wool forms the figure on the face the cotton forms the ground also on the face. When the fabric is dyed in such a manner that the wool takes one color and the cotton another, a reversible fabric of a very novel effect is obtained. In some cases warps or wefts of three or more different materials are employed, and so manipulated as to produce ground and figure of three or more different colorings, or with shaded effects.

"Very few people outside the trade," said a leading wholesale dealer in handkerchiefs in New York to a Washington *Star* reporter recently, "are aware that the consumption of handkerchiefs throughout the United States amounts to about 75,000 dozen daily. This means 27,375,000 dozen yearly, or 328,500,000 single handkerchiefs. To satisfy this enormous demand there are always kept in stock in this city at least 350,000,000 handkerchiefs. A comparatively small number of handkerchiefs are manufactured in this country, and those that are made here are mostly of the cotton and inferior silk varieties. The finest silk goods are imported principally from Japan, which country sends us annually between 17,000,000 and 18,000,000 Japanese pongees. The best cambric article comes from France and Belgium, and linen handkerchiefs come from the north of Ireland and also from St. Galls, Switzerland."

The finance committee of the Kingston council is considering a suggestion from the Dominion Cotton Mills Company relative to their Kingston mill. Mr. Whitehead is prepared to show that the Kingston mill has been losing money, and is losing money at the present time, so that, under existing circumstances, it is not very likely that the company will continue in business there. The question, therefore, is, will the city give a bonus of $50,000 to enable the company to rebuild and extend its works at Kingston? It is claimed that the mill must be doubled in size, that only by so doing can they remain in Kingston, as at the present time the Kingston mill is not paying and the plant will have to be removed to one of the larger mills. The present capacity of the cotton mill is 20,000 pounds per week, with 290 looms. If the present scheme went through, new looms and machinery, together with power plant, would have to be put in. The present Kingston mill is about the same size as the Brantford mill. The cost of operating the new mill and the wages would be about double the present figures. The Dominion Cotton Mills Co. are operating mills at Montreal, Magog, and Coaticooke, Que.; Moncton, N.B.; Halifax, Windsor N.S.; Kingston and Brantford, Ont., and for some time a number of the smaller mills outside of Montreal and Magog have been steadily losing ground at the expense of the large and profitable mills. The bulk of the machinery is old and out-of-date in the Kingston mill.

FOR GROCERS AND PROVISION DEALERS.

The *Corn Trade News* has reduced its estimate of Argentine export surplus of wheat to 20,000,000 bushels.

Argentine shipments of wheat last week were reported the largest on record, due to late bad weather holding back shipments.

The British Board of Agriculture pronounces the present potato crop to be the smallest since 1884, namely, 52,100,000 cwts., against 71,200,000 last year.

The use of the maple leaf as a brand for merchandise should be carefully reserved for the best goods. The Cowan Cocoa Company has combined it with the word "Perfection" in trade marking one of their best grades of cocoa. The national emblem should be associated with nothing but the best.

Frost has done serious damage to the small fruit crop of California during some days past. Apricots, prunes, etc., being "in the bud" were badly injured. As a consequence, prices of dried fruits are looking up. Our Montreal correspondents say that apricots are a cent higher, and prunes indefinitely higher.

The Dominion Government authorities are of the opinion that the use of antiseptics at any stage of the preparation of milk, as condensed milk, should be prohibited. They state that in very few cases does the milk used by the manufacturer come up to the standard for whole milk. In most cases a greater or less amount of cream has been used before concentration, and in some brands the cream has been all but completely removed.

There are in Sweden 1,800 large dairies, of which 1,420 are devoted to butter-making alone. Most of the butter is exported to England. Keenly alive to the importance of the English market, the Swedish Government keeps a dairy agent established in Manchester to advance the trade. In every county an expert is stationed, whose duty it is to travel about his district, giving advice and information respecting dairying. These are paid by the agricultural societies of the different counties.

Of the world's total sugar product of 8,000,000 tons, about 4,500,000 tons are prepared from beets, of which Germany and Austria furnish nearly two-thirds; France, Russia, Belgium and Holland supply the remainder. The American beet sugar product has increased from 2,800 tons in 1889 to 43,000 tons last year. England leads the world in sugar consumption, averaging 86 pounds per capita; Denmark averages 45; Switzerland, 44; Holland, 31; France, 30; Norway and Sweden, 25; Austria, 19; Italy and Turkey, 7; Greece, 6; and Servia, 4 pounds.

INSURANCE ITEMS.

"A cheerful disposition is worth everything to a man, and he will be more cheerful for the knowledge that he has insured his life and his property, so that in case of loss there will be something to show to somebody besides a long face. If you don't learn to laugh when troubles are in front of you, you will have nothing to smile at when you are old and troubles are all about you."

Sanction has been given by the Committee on Banking and Commerce in the Dominion House to a change of name by the following companies: The name of the Manufacturers' Guarantee and Accident Assurance Company, to be changed to the Dominion of Canada Guarantee and Accident Insurance Company; the Federal Life Assurance Company of Ontario, to that of the Federal Life Assurance Company of Canada; the Dominion Building and Loan Association, to that of the Dominion Permanent Loan Company. But objection is taken to the title of the last-named, and a deputation from Toronto has asked the Government not to permit it.

We note that the Equity Fire Insurance Company is about removing from Bay street to larger premises in the Manning Arcade. This is a newly formed company licensed to do business in Ontario, having a nominal capital of $1,000,000, of which we are told a third is subscribed. A list of the directors and officers of the company is as under: President, Arch. Campbell, M.P.; vice-president, Thomas Crawford, M.P.P.; manager, Wm. Greenwood Brown; directors, C. C. VanNorman (The Harvey VanNorman Co), Edward Morgan (Judge, County Court), David Carlyle (vice-president Toronto Radiator Company), Wm. Hendrie, jr., Hamilton; James Minnes, Kingston; W. H. Biggar, ex-M.P.P., Belleville; Dr. Lowery, Brantford; A. F. McLaren, M.P., Stratford; Stephen Noxon, Ingersoll; C. H. Elliott, London.

An Ottawa paper says that "Jennie Abrams, who carried on a general dry goods business at 185 Rideau street in that city, and who was burned out on July 12th, last year, has entered two important actions in the High Court. One of these is for $5,511.62 against the General Fire Insurance Company, of Paris, France, and the other for $2,000 against the British and American Exchange Association, of London, England." Has Jennie been well advised, in the first place to insure her "general dry goods business" in two underground offices? We do not find these two offices in the list of those licensed by the Government to do business in Canada, and it may trouble Miss or Mrs. Abrams to get her money. Regular companies do not usually take eight months to settle legitimate claims; irregular companies settle when they feel like it—which is not always.

ANSWERS TO ENQUIRERS.

Settler.—In your issue of the 18th there is reference to a pamphlet prepared by the "Western Immigration Board." Could you give any information as to the status or composition of this board—whether a Government or private corporation? [It is not a Government affair at all, but an organization resulting from a gathering a year ago or more of men from Western Ontario, Manitoba, the Territories and British Columbia, whose object is to help the development of this Great West of ours, and to assist immigration. The secretary is F. W. Heubach, of Winnipeg. We recommend you to write him.)

R. B., London.—It was not ours. Another journal published in this city took an original article from our issue of 11th February last, reprinted it in pamphlet form, and is selling the pamphlets, we are informed, at $5 per 1,000 copies. Our reprint of the same article is sold at $8.50 for 5,000 copies.

BANKRUPT ESTATES—HOW TO TREAT THEM.

At a banquet in New Orleans, on the occasion of a gathering of the Credit Men's Association of that city, Mr. W. H. Preston, of Sioux City, Iowa, gave an address in which he outlined a plan for co-operation among creditors for the better handling of bankrupt estates. We quote the concluding part of his paper:

"I feel," he said, "that our customers ought to be treated so that they will count their creditors their best friends. And hear me, O Ye Credit Men, I believe that when your customer does come to you, even though you might receive a preference, it is your duty, if you feel that the merchant has a chance to pay out, to arrange for him to do so. As long as the laws allowing preferences continue, we feel that when a man cannot pay all, the most diligent must and will have his preferences, but the allowance of preferences is a wrong principle and should be abolished.

"But here is a case where a South Dakota merchant was behind in his payments, got scared and assigned. He claimed his exemptions (which I fully justify, except that I think exemptions should be less in some states) and counting expense of assignee and sacrifice of values, etc., there did not seem to be any chance of paying 10 per cent.

"I called on him and found one of his creditors had him arrested on a trumped up claim, another had attached, and the process of tearing him to pieces had commenced. It could easily be seen that it was an honest failure, that with his exemptions and an extension of time he could pay out. He, like nearly all others, was willing to put his exemptions in if he could pay his debts and have something left. He gave me as trustee for the creditors, a deed to his homestead and a bill of sale of his stock and accounts, including exemptions, and I took notes for all the creditors, due in ten months with 10 per cent. interest. The assignee delayed filing schedule or qualifying, to give me an opportunity to obtain the consent of the creditors to this arrangement. I wrote them all, explaining the situation, all consented, the assignment was dropped, and before any of their notes were due they were all paid, the creditors receiving face of their notes, the interest paying all the expense of the trustee. Not only that, he had enough left to continue a good business. Did the effort pay? Co-operation of creditors accomplished the result.

"I want to emphasize that my purpose in thus reciting these cases is only to show what the creditors can do if they will only get together and do it."

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, March 31st, 1898, compared with those of the previous week:

Clearings.	Mar. 3tst, 1898.	Mar. 24th, 1898
Montreal	$11,623,222	$13,174,058
Toronto	7,324,991	9,035,089
Winnipeg	1,110,575	1,233,448
Halifax	986,966	1,035,667
Hamilton	577,293	703,845
St. John	436,872	453,221
	$22,059,919	$25,635,328

Aggregate balances this week, $3,066,416; last week, $4,570,934.

—Five hundred settlers per month is not exactly a bad rate of immigrant entry, though we would rather see it five thousand. The statement of homestead entries at the Dominion Land Agencies between 1st January and 15th March this year shows their number to have been 543, while the total number of settlers in Winnipeg and the North-West was 1,233. The districts and numbers are as under:

District.	Entries.	Settlers.
Dauphin	38	88
Edmonton	83	211
Lethbridge	35	99
Little Saskatchewan	46	99
Calgary	18	43
Alameda	22	42
Prince Albert	8	20
Qu'Appelle	73	193
Red Deer	22	71
Winnipeg	73	174
Touchwood	16	60
Regina	10	21
Brandon	99	112
Total	543	1,233

It is thus seen that the largest number of actual settlers went to the Edmonton district, next to which came that of Qu'Appelle. Then Winnipeg, Brandon, Dauphin and Lethbridge in turn attracted many, Regina and Calgary being, however, about the lowest on the list.

—In the opinion of a Paris correspondent of the London *Economist*, the spread of anti-Jewish feeling among the French people is not the only nor by any means the greatest reason for the extraordinary manifestation of feeling at the recent trial of Zola. Some perceive a clerical-military conspiracy; it is declared that a plot exists to extirpate all "foreigners," Protestants, Jews and Free Masons, and that Catholicism must be supreme. "But," says this correspondent, writing on March 10th, "the real cause of the late manifestations is to be found elsewhere. It is the universal desire for protection which Frenchmen feel. Protectionism is not only considered to be the remedy for the sufferings of agriculture, commerce and industry; it is desired now by all classes of French society, physicians, lawyers, teachers, clerks and workmen; even officers want to be protected against foreign competition—protection not only at the frontiers, but everywhere in France That is the principal reason for anti-Semitism, which, notwithstanding its name, seeks to exclude Christian foreigners as well as Jews."

—It is like a breath of bracing air from the prairie to have a chat with a live Winnipeg man. Such a man is Mr. William Hespeler, who has been visiting Eastern Canada in the course of the winding up of the Commercial Bank of Manitoba, of which he is liquidator. Mr Hespeler is chairman of a committee which has taken in hand the settlement of vacant lands near Winnipeg. And he tells us of a step forward in the work of the committee. It has succeeded in obtaining the consent of the Government at Ottawa to the appointment of land guides for that district, who shall be authorized officers of the Government. One such officer will be at once despatched to look after the settlement of immigrants on the long vacant lands near the capital of Manitoba. But the Winnipeg people are accustomed to do things for themselves, too. So they are raising a fund of, say, $2,000 to prepare a list and a description of the vacant lands, and to print 30,000 or 40,000 of the pamphlets for distribution.

—On a single express train arriving at Winnipeg one day last week there were some half dozen bank officers from eastern institutions, bound for fresh fields and pastures new in the West. The *Free Press* recognized among them Mr. M. Dickie, manager of the Merchants Bank of Halifax, at Truro, N.S., who was on his way to the coast on an inspection trip of the bank's branches in the Kootenay, of which there are five; Mr. E. Earle, of Charlottetown, Prince Edward Island, was en route to Victoria to take a position as accountant in the bank's branch there, and with him was Mr. J. R. McKay, going to Rossland to be a teller in the bank at that point. Mr. H. Grey arrived at Winnipeg on the 24th from Simcoe, Ont., en route for Morden to manage the new branch of the Bank of Hamilton about to be opened.

—A new lighthouse, with steel frame, is being erected, to replace the inadequate wooden structure so long existing at the Eastern Gap, on Toronto Bay. At the suggestion of the Harbor Commission of Toronto, the proposed lenses in this lighthouse will be altered and the character of the light changed. It was intended that the new light should be a white flashing light. But it was pointed out by mariners and others that the light at the west end of Toronto Island was a white flash light, and that there was danger, in case a vessel should approach the harbor in thick weather, that she might get the two lights confused. In view of this consideration, the Government promptly agreed to have a red light on the new lighthouse, which is to be ready in a week or so and will be much appreciated by seafaring men.

—Navigation is open on the Bay of Quinte. The steamer "Hero," began running on Monday between Kingston and Belleville, which is the earliest opening for years. Toronto Bay has been open some time, and the "Lakeside" began to ply across Lake Ontario from St. Catharines a week ago. Detroit River is open and steamers are plying from Cleveland to Detroit and from Amherstburg to Windsor. The Richelieu River has nearly freed itself from ice, and the harbor of Montreal is open and the St. Lawrenec clear as far as Sorel, but the ice-bridge at Quebec stands firm.

—Manitoba is finding it hard to keep expenditure within comfortable distance of income. Her public accounts statement shows a revenue of $683,705, while the expenditure was $807,608. But her credit is good, and the difference was easily borrowed. In the face of such a harvest as that of 1897, the average Manitoban will ask, what is a deficit of $123,903?

Correspondence.

BE CAREFUL ABOUT LIFE INSURANCE.

Editor MONETARY TIMES.

SIR,—I write you the following letter on behalf of your numerous readers and the public generally, giving you my experience as a policyholder in the New York Mutual Reserve Fund Life Association, of New York, showing that during the thirteen years time that I have been a member of that association they have more than doubled the rates of premium, which would look as if they calculated to freeze out old members. Hence I would strongly advise intending insurers to be very careful about the companies they intend insuring in, We have now to pay on policies granted on the 17th October, 1885, and 14th December, 1887, respectively, more than double the rate first demanded, nor can we see anything to prevent the management doubling it again.

Their motto was "Life Insurance at Cost," and they used this argument to induce people to insure, but my experience shows that it is a very dear insurance compared with other companies I am insured in.

Again, should any member fail to make the payment to the Mutual Reserve punctually the policy would be forfeited, and he would lose all that he had paid on it. We see that the president draws $75,000 per annum, which would account for the direction in which some of the money goes. On the following page I give you the numbers of my policies and what has been paid on them:—

Policy 38,098—$2.000. Dues thereon, $5.56 every two months, or $33.36 per annum, coupled with a further annual charge of $6 for dues, or $39 36 in all.

Policy 67,417—$3,000. Dues thereon, $10.23 every two months, or $61 38 per annum, coupled with a further annual charge of $9 for dues, or $70.38 in all.

These rates were enforced from date of policy to 1st June, 1895. Then the rates were raised as follows:

Policy 38,098—$2,000 Dues thereon, $8 32 every two months, or $49 92 per annum, coupled with a further annual charge of $6 for dues, or $55 92 in all.

Policy 67 417—$3 000. Dues thereon, $14 73 every two months, or $88.38 per annum, coupled with a further annual charge of $9 for dues, or $97.38 in all.

Now, mark you, these rates remained in force till January 1st, 1898, when the rates were again increased as follows:

Policy 38,098—$2,000. Dues thereon, $13 56 every two months, or $81.36 per annum, coupled with a further annual charge of 6 for dues, or $87 36 in all.

Policy 67,417—$3,000. Dues thereon, $20.34 every two months, or $122.04 per annum, coupled with a further annual charge of $9 for dues, or $131.04 in all,

Hoping you will be good enough to give this space in your journal for the benefit of intending life insurers, and thus greatly oblige an old reader.

WM. MCGILL,
Cor. Bathurst St. and Farley Ave.
Toronto, 18th March, 1898.

DUTY ON FRESH SALMON.

Editor MONETARY TIMES.

SIR,—Allow me a small portion of space in your valuable journal to ventilate a most serious and stupid piece of legislation enacted by the Liberal Government at Ottawa, a Government which has in season and out of season denounced anything pertaining to protection, and has always advocated when out of power, cheap food for the people.

About two weeks ago the Board of Trade of this city passed resolutions strongly urging the Dominion Government to continue the admission of fresh salmon free of duty, as has been the case for the past number of years.

To their surprise, they received a reply by telegram from the Deputy Minister of Customs, stating that on and after the 15th of this month a duty of ½c. per lb. would be collected on all fresh salmon imported into British Columbia, and this in face of the fact, which is well known to the Government, that a number of the most enterprising cannery owners have invested a very large amount of capital in buildings and plant for the special purpose of taking care of and packing said imported salmon. Besides, the imposition of this duty will be the means of driving all labor, material for packing—such as tin, lead, salt, etc.—manufacture of boxes, printing of labels, steamboat hire, and all other necessaries incident to packing—to the other side of the boundary line, without, so far as I can see, any corresponding advantage, because the salmon will still be packed on the American side, and will enter the English markets in competition with our Fraser River salmon.

I would further state that salmon caught on the American side are Fraser River salmon on their way from the seas to the Fraser River spawning grounds.

Trap fishing is prohibited by the Canadian Government, but is allowed in the State of Washington; the result is that large quantities of Fraser River salmon are caught in this way on the other side. And is it not better that we should at least pack our own fish, retaining in our own country the large amount of money necessary to that end?

It might be urged that the admission of fresh salmon free of duty would interfere with our own Canadian markets; such, however, could not be the case, as not even a sixth of the Fraser River pack can be marketed in Canada, the great bulk of our salmon being exported to the United Kingdom; nor could any benefit possibly accrue to the Customs, the present state of the salmon market being so low as to make the duty practically prohibitory. In Eastport, State of Maine, where sardine factories are established, the American Government for years past has suspended the duty, and allowed vessels with cargoes of small herring caught in Canadian waters to enter free, in order to benefit their own industries and thus keep all possible expenditures in their own country.

I think, in the interests of the industry, the Minister of Customs should reconsider his decision and permit fresh salmon free, as heretofore, or as in the case of wheat, allow them to be brought in in bond for the purpose of packing.

Yours truly.
B.C.

Vancouver, 19th March, 1898.

BUSINESS OF AMERICAN BANKS.

A Washington despatch, bearing date 25th March, says that the volume of business of the national banks of the United States has returned nearly to the maximum of the prosperous period before the panic. The reports made to Comptroller Dawes on the condition of the banks on February 18, 1898, show loans and discounts amounting to $2,138,078,280. This is an increase of $252,000.000 over the corresponding date a year ago. and $56,000,000 over the condition at the date of the last preceding report on December 15, 1897.

The highest range of loans and discounts ever reported was during the summer of 1892 and the following spring. The volume of these transactions on September 30, 1892, was $2,171,041,088. The figures on December 9 following were $2,176,615,720; May 4. 1893. $2,161,401,858.

INDIVIDUAL DEPOSITS NEVER SO HIGH.

A decline of $141,000.000 occurred by the date of the next statement, on July 12, 1893, and a further decline of $177,000,000 before the next report on October 3. This marked the low ebb of the panic, $328.000,000 below the maximum of 1892. The figures fell materially in 1896, and were only $33,000,000 above the minimum of 1893 on October 6, 1896, when terror prevailed lest the country should go to the silver standard.

The individual deposts of national banks now stand higher than ever before in their history.

The highest deposits before the panic were on September 30, 1892, when the amount was $1,765.422,983. There was a gradual decline down to October, 1893, when the deposits dropped to $1,451,124,330.

INCREASES IN A YEAR.

The deposits a year ago were $1,669,219,961. There was an increase of $59,000,000 on May 14, a further increase of $42.000,000 on July 23, one of $83,000,000, on October 5, and one of $63,000,000 on December 15, 1897, when the individual deposits were $1,916,630,252.

The banks are strong also in specie and legal tender notes. The specie reported is $271,377,925, of which $222,855,516 is gold coin or gold certificates. The specie holdings on July 12, 1893, when the panic was near its height, were $186,761,173. The amount a year ago was $233,948,862. The gains were small up to December last, when the amount was $252,163,552, or about $19,000,000 less than by the latest reports.

LEGAL TENDER NOTES.

The legal tender notes now held amount to $169,515,185. This is somewhat less than a year ago, when the notes were lying idle in the custody of the banks to the amount of $186,232,852, but is in excess of the amount on October 5, 1897, which was $149,494,929, and in excess of the amount on December 15, last year, which was $158,404,875.

The country banks appear to have unusually large reserves in the reserve cities, for the amount reported among their resources as due from approved reserve agents is $360,277,020. The amount was only $258,430,000 a year ago.—*Philadelphia Record.*

EDISON'S HUMOR.

A gentleman representing the building committee of a city church called to see Mr. Edison, the electrician and inventor. The committee had been unable to decide whether to equip the church with lightning rods or not, and had sent to secure Mr. Edison's opinion on the matter.

"By all means," said Edison, "put on the rods. You know Providence is sometimes absent-minded."

Two things are unknown to Thomas A. Edison—discouragement and worry. Recently one of his associates had to report to him the failure, in immediate succession, of three experiments involving enormous expenditure of money and labor. But the inventor simply smiled at the recital. The associate, worn out with the nervous strain of his long watch, and disheartened by his disappointment, said, impatiently: "Why don't you worry a little about it, Mr. Edison?"

"Why should I?" was the inventor's reply. "You're worrying enough for two."
—Ladies' Home Journal.

—Rubberbestos is the name of a new sheet packing manufactured by a Boston firm, and which is meeting with great success. Being compounded of rubber and asbestos, it is very durable and stands high pressures perfectly. Being made of asbestos it cannot burn or char, and the rubber core gives it sufficient elasticity. while the specially prepared metallic wire used on the outside reduces friction on the rod, and adds greatly to its success in resisting high pressures. It is already largely in use on steamers in the Atlantic coast trade, as well as in a large number of the lake steamers.

—Buffalo's new blast furnace plant, building on the old Union Iron Works tract, Buffalo River, is said to be planned on a scale that will make it the most modern furnace for foundry iron in the country. This is the enterprise undertaken by Frank B. Baird. There is deep water up to the works, and it is said that contracts are about to be let for the construction of an ore dock 500 feet long and of about 65 feet average width, on which there will be installed hoisting apparatus capable of handling 200 tons of ore per hour.

THE EGG TRADE.

A free discussion of trade methods is necessary to secure desirable improvements. Messrs. Gunn Bros. & Co., of Toronto, have recently issued a circular pointing out some of the defects in the present methods of the egg business, and they offer several valuable suggestions for improvement. They say: "It is the little things that often make or unmake great industries. We do not intend to offer any advice as to the best breeds of poultry, further than to say that farmers do not, as a rule, look after their poultry with that intelligence and care that is bestowed on other live stock of the farm. Experts tell us that by selecting only the best layers for breeders, and mating to suitable purebreds, the average egg production of whole flocks has in a few years been raised from 150 to 250 eggs per annum. In addition the size of the eggs has been increased, a very important item, as in the export trade it is essential that the eggs should average one and one-half pounds per dozen. * * The loss in the value of eggs offered in Toronto and other markets through careless handling, is each year considerable. The slightest crack renders the egg valueless for pickling or cold storage purposes, and when sold as "checks" or cracked eggs, from two to three cents per dozen less than standard prices must be accepted. Collected from the nests in a haphazard way and carried to market over rough roads in an ordinary basket, there is usually considerable breakage before the eggs reach the store. where they run the chance of further loss by the handling of the merchant or his assistants. Loss in this way is inevitable, so long as proper egg carriers are not used. These egg cases can be purchased at a very nominal figure, say 25 cents for a thirty-dozen case, and by careful usage will last for years. 'Keep the eggs clean,' is the advice which every merchant would impress upon the owners of poultry. An abundance of fresh straw in the hen-house is not a heavy expense, and it is essential to a profitable market."

Great Britain spends annually about $15,000.000 in purchasing foreign eggs, and by the exercise of care and intelligence the farmers of Canada should be able to secure a fair proportion of this amount.

THE price of rubber, which has been for some time advancing, is now so high that the Canadian rubber factories have resolved upon an advance in prices of rubber shoes and other products. New price lists are now in preparation, and the change will, we are informed, shortly be made known to the trade. The Canadian factories are: The Canadian Rubber Company, of Montreal, capacity 7,000 pairs a day; the Granby Rubber Company, say, 3,900 pairs; the Toronto Rubber Shoe Manufacturing Company, of Port Dalhousie, 3,000 pairs; the Gutta Percha and Rubber Company, of Toronto, 1,500 pairs, and the Rubber Works at St. Jerome, Que., say 1,000 pairs. Their combined capacity is thus about 5,133,000 pairs per annum, sufficient to provide one pair of rubbers for each man, woman and child in the Dominion. So great is the output and so varied the styles of rubber shoes now produced in Canada that the importation of such goods from the United States has become very small. According to the trade returns, it amounted to only some $29,000 in the last fiscal year.

RESOLUTIONS PASSED BY VANCOUVER BOARD OF TRADE.

Whereas, large quantities of Fraser River salmon are caught in traps in American waters, while on their way to the said river, and a large amount of Canadian labor is required and employed on this side in taking care of and packing said salmon, in the manufacture of boxes, labels, etc., steamboat hire, and in various other ways:

And whereas such trap fishing on the American side by Canadian cannery owners in no way interferes with the fishermen on this side, special preparations being made for handling all fish so caught:

And whereas large numbers of our white and Indian fishermen are leaving for the Klondyke gold fields, and the railway construction to Teslin Lake, thus very materially decreasing the available numbers of fishermen:

And whereas the cannery owners are greatly hampered in the prosecution of their business by the uncertainty as to whether the Dominion Government intends, as heretofore, to admit fresh salmon free of duty:

And whereas the only effect of such a duty would be to force Canadian canners to build canneries and carry on their business on the American side, and such duty would be a great blow to the canning industry, and to the workmen employed therein in this province:

And whereas the canning industry is one of the greatest in British Columbia, and very large sums of money are annually expended on material and labor in connection therewith in this country:

And whereas the Treasury will receive no benefit by the imposition of such a tax, as the same is simply prohibitory:

Now, therefore, be it resolved: That this board do most earnestly urge the Dominion Government to continue the admission of fresh salmon free of duty, and respectfully request an early decision and reply:

And be it further resolved: that copies of this resolution be sent to the Minister of Customs, the Minister of Marine and Fisheries, the Minister of Trade and Commerce and to all the British Columbia members.

Vancouver, March, 1898.

SOME twenty persons in Kent county and Chatham city have received Ontario letters patent under the name of the Chatham Hedge Fence Company, Limited, to grow and construct hedge fences and hedge and wire fences, combined or separate; and to do other business of this nature. Capital $25,000. Five persons in Toronto have secured letters patent to deal in provisions and produce under the name of the King-Darrell Produce Company, limited, capital

STATISTICS of the British Columbia salmon pack for the last season, just compiled by Messrs. R. P. Rithet & Company, give the following totals: Fraser River pack, 860,459 cases; Skeena River, 65,905; Rivers Inlet 40,207; Naas River, 20,847; Lowe Inlet, 10,666; Namu Harbor, 4 357; Albert Bay, 8,602 West Coast, V I., 4,434 The total pack for the season was 1,015 477 cases, as compared with 601,570 during last season. The shipments were as follows: By sea, to England 733,704 cases; overland, 43,330; to Eastern Canada, 130,815; to Australasia, 27,579. Salmon dealers have stocks amounting in all to 74,000 cases yet on hand.

—The route for the James Bay Railway, as proposed to the city's commission by Mr. W. T. Jennings, C.E., is as follows: North from Toronto, to a point on the Canadian Pacific, midway between Sudbury and North Bay, thence north-east to Lake Temiscamingue, whence a branch runs south to North Bay, while the main line goes on through Lake Abbitibe district to Moose factory, on James' Bay; from there it follows the west shore of Hudson's Bay through Fort Albany, and Fort Nelson to the terminus at Churchill.

A SWEDISH PLAN OF CO-OPERATION.

A profit-sharing scheme which works satisfactorily has been for some years in operation in a large Swedish pulp mill. Each man is paid according to services and position, and the workmen receive also 5 per cent. of the profit, one-half being paid in cash, and the balance deposited in a savings bank, to remain until the workman is 55 years old or has left the works three months. In a black book are recorded faults, especially drunkenness and laziness, a third of the yearly profit being deducted for each mark, and three marks resulting in dismissal. The result of the plan has been a great improvement in the industry and sobriety of the workmen.

MUTUAL RESERVE FUND LIFE.

In the Old Country, as well as on this side the Atlantic, comments are being freely made about the recent rise in rates imposed by this company on its older insurants. The March number of *Banking and Insurance*, of Edinburgh, has the following: "We were under the impression that this so-called insurance society was dead so far as this country is concerned, but we find we are mistaken, as during the past month we have received two letters from British policy-holders, both groaning at their being called upon to pay double the rates they have hitherto been charged. We cannot say we are surprised at this, nor ought the recipients of this unwelcome double assessment to be so either, and the best thing they can do is to assure afresh in a good home company and leave Yankee speculations alone in future. The eloquent gentleman who had his headquarters at St. Enoch Hotel, Glasgow, is, we believe, responsible for both these cases, one of them actually surrendering a good Scottish policy to go in for this half-price sham. Both gentlemen were promised that though there was power to raise the rates it would never be exercised. It is said that Jove laughs at the false statements of lovers; if he has to do the same thing at the false statements of American insurance agents he must get very tired of grinning."

NEW YORK v. LONDON FIRE BRIGADE.

Figures concerning the strength and organization of the New York Fire Brigade have recently been supplied by the chief of the New York Fire Department. New York city—that is the area now occupied by Greater New York—spent last year over £700,000 on its fire brigade—over four times as much as the London brigade cost, while it keeps 1,700 men employed, against London's 1,000, and they receive about twice as much in wages as do our men. The Insurance *Record*, of London, supplies some further points of contrast: For example, "New York uses on an average 19,000 gallons of water for each fire against our 10,000 in London, which is not remarkable, as New York fires are usually of greater magnitude than ours. During last year Greater New York had 5,835 fires, or about 18 a day, the cost of putting out each of which averaged about $600, or £120, while in the same time London had about ten fires a day, each of which cost about £40, or say, $200, to subdue. Greater New York spends annually about four shillings a head of its total population for maintaining its fire brigade at its high state of efficiency.

—The oldest match manufactory in the world is in Sweden. Matches were made there long before the old roughly trimmed splinters of wood, tipped with sulphur, were discarded with the tinder boxes for which they were used. In 25 years the export trade of Sweden in foreign matches increased ten-fold.

HOMICIDE.

In two recent numbers of the "North American Review," Cesare Lombrosa, the Italian criminologist, gives statistics to show that the crime of homicide is more prevalent in the United States than in Germany and England, and moreover, that in the first-named country it is on the increase. A close examination of the professor's figures, however, shows that there is no great cause for alarm. The relative proportion of homicides per 100,000 inhabitants is 96 in Italy, 75 in Hungary, 58 in Spain, 25 in Portugal and Austria, 18 in France and Belgium, 13 in Sweden and Norway, 5 in Germany and England, and 12 in the United States. This country, therefore, in number of homicides compares very favorably with most European countries, and if the statement is correct that 40 per cent. of the homicides are committed by the negro population, it is clear that if it were not for the negro population the comparison would be still more favorable.—*Investigator.*

LUMBER CONDITIONS IN THE STATES.

In the New England and Middle States the lumber trade is gradually recovering from winter apathy. The wholesale trade at Tonawanda is evidently assuming fair spring proportions, as is that of Buffalo in the distributive as well as consumptive branches. Business at Albany has fairly reached spring proportions, though a flood in the river there has hindered shipment by water. The New England demand on Albany stocks gives earnest of a sizable trade in that section during the season. Affairs are reviving in the New York district, and the movement of lumber is now fairly large, with increasing interest manifested in further supplies. Philadelphia demand is stimulated by the resumption of building operations in and around the city, which call for hemlock, northern, southern and Carolina pine, as well as the hardwoods. The Baltimore business is moving on to a spring basis. Boston is a little backward this season, it being claimed there that suburban building was overdone last year. But there is a likelihood that Maine spruce will not be in as plentiful supply this year as was expected, on account of the early closure of the logging season, caused first by an enormous snowfall, and secondly by a rapid thaw, which prevented further operations. A stiffer spruce market will be a benefit to the Boston and New England trade.

As has been before indicated, a peculiar condition of the market for northern pine is becoming manifest this spring. Prices at the mills, both on dry-stock and that to be cut, are held at prices higher than prevailed last fall. As eastern and western dealers express it, the mill operators have their noses in the air, and are demanding prices without any apparent regard to those prevailing in the distributive trade. If that was their attitude before the early breaking up of the logging season, it is emphatically so now that there has been a failure to put in from 15 to 25 per cent. of the logs intended to be banked.

Dealers from the east and lake markets have already made pilgrimages among the mills for the purpose of sizing up the situation and some contracts have been made. But generally speaking the attitude of the wholesale trade, east and west, is that of waiting for further developments. The situation is made more interesting by the aspect of the lake carrying business. The newly organized Vessel Owners' Association has determined that the season shall open with the rate from Duluth to Buffalo at $1.75 a thousand, instead of $1.62½, as last season. The shippers are already protesting against this and taking measures to fight the combination rate.

The northern pine mill operators have some reason for demanding higher prices than last year, and holding firmly to them. Dry stocks have been sold off to such a degree that good chances to purchase are scarce. There has been a remarkable demand for box lumber and culls, and large blocks have been sold. Dimension was not over-plentiful last fall, and the supply to come forward this spring is comparatively meagre, while wholesale and retail stocks in city and country yards are rapidly diminishing under the influence of the spring trade. There soon must be replenishment, with less than the usual amount to be drawn upon. It is probable that hemlock dimension will this year be in larger request than usual as a means of escaping the higher prices that will be demanded for Norway pine lumber.

Reports from all the yellow pine markets continue to indicate remarkable prosperity. In the Middle Gulf States orders for railroad and car factory material seem to be as plentiful as ever.—*North Western Lumberman.*

STOCKS OF GRAIN AT LAKE PORTS.

The following table, prepared from reports of the Chicago Board of Trade, shows the stocks of wheat and corn in store in regular elevators at the principal points of accumulation on the lakes, March 19, 1898:

	Wheat, bush.	Corn. bush.
Chicago	7,796,000	17,049,000
Duluth	3,020,000	3,084,000
Milwaukee	113,000	123,000
Detroit..	109,000	17,000
Toledo..	223,000	897,000
Buffalo	648,000	756,000
	11,909,000	21,926,000

As compared with a week ago, the above figures show, at the several points named; a decrease of 343,000 bushels of wheat and an increase of 88,000 bushels of corn. On the same date there was afloat at Chicago 1,693,000 bushels of wheat, 7,920,000 bushels of corn, 232,000 bushels of oats, 198,000 bushels of rye, and 93,000 bushels of barley: at Buffalo 386,000 bushels of wheat; and at Milwaukee 1,509,000 bushels of corn and 316,000 bushels of oats.

WILL COME TO YOUR HOUSE.

The beautiful Hindoo fable of Kisagotami is based upon the universality of death. She was a lovely young wife, who had just lost her first-born child, and was found by a priest on the wayside moaning bitterly over her bereavement. The priest soothed her in his simple and earnest manner, and finally promised her that if she would go from house to house and find one where death had not entered, and bring to him a certain kind of seed therefrom, he would restore her lost child to life. So Kisagotami walked up and down the land enquiring at every door for the house over whose threshold death had failed to pass. Her search was long and tedious, for nowhere was such a house to be found. After many months she returned to the priest and related her fruitless and pitiful search; but she had gained these—patience and knowledge.

This is said to have happened in Asia long ago. But there are many in our land to-day who seem to think death should not or will not happen to them. It may visit the folk afar off, and in other lands; it may even come to their neighbors, but the last thing they have in mind is that it will ever come to them. Some mental hasheesh has created this delusion, which should be thrown off. Death is certain, and the deliverance from its earthly ravage is found only in life insurance.—*The Weekly Statement.*

—Despite the industrial depression which prevailed in England during 1897, the amount of alcoholic beverages manufactured and sold in that year shows an increase of $17,500,000 over the figures for 1896. The inevitable conclusion seems to be that idleness is conducive to thirst.

PAY UP.

Now is the time when all owing small accounts at the stores should make it a point to call and settle up. The merchants do not get their goods for nothing, they are not doing business for the love of it, and when they are kind enough to oblige a friend by giving them his goods, that person should make it a point to pay for all the goods he got, not wait until he is dunned and dunned, and dunned, then to pay up the account, give impertinence and say mean things. The individual that will do that will do worse only for the law. Some people get credit and when repeatedly asked for the amount, say: "Just get it when you can now that you are in such a hurry; have only had your goods ten or eleven months," and they act as if the merchant does not keep books or know all about the transaction. How they promised on the honor of a man to pay at such a time, and that time has long gone past and no pay, proving beyond any doubt that their word was no good. We wish to inform all such persons that the merchants from whom they got their goods knows all about them, points them out on the street, "There goes a man that owes me so much, promised to pay but did not; he is a dead beat." The merchant and everybody else knows them. Did you ever think of that, Mr. Debtor? If not, just think of it now and rush and pay up every cent you owe and be a free man.—Wallaceburg *News.*

—French post-office employees are between the devil and the deep sea. They have just received an order first forbidding them to read postal cards and next directing them not to allow insulting or libellous postal cards to pass through the mail.

—An old colored citizen, hearing the rumors of war with Spain, applied for the position of cook to the army. "What experience have you had?" he was asked. "I wuz cook in de Confedrit army, suh," he replied—"dat is, I had de position of cook, but, ter tell de truth, I didn't wuk at it." "Why?" "Dey wuzn't nuttin' ter cook, suh!"—Atlanta *Constitution.*

Commercial.

TORONTO MARKETS.

Toronto, March 31st, 1898.

DAIRY PRODUCTS.—Receipts of both dairy and creamery butter are increasing. The export demand is not much improved, and creamery men are marketing their output here in preference to the United Kingdom. Prices remain as quoted in our last issue. There is a little better outlook for cheese. Some export enquiry has come to hand, and although quotations are low, it is pleasing to know that transactions are taking place. Local quotations are 7¾ to

8¼c. per lb. Supplies of eggs are coming forward very freely, and city picklers, as well as those at country points, are busily employed. At Ontario points 8½c. per dozen is quoted, but in the city 9½c. to 10c. is the standard price.

Dry Goods.—The wholesale warehouses are not usually active at this season of the year. The spring movement is over and the only business doing is in the sorting trade. Considerable interest, however, is turned to the purchase of autumn supplies. Many buyers of carpets, tweeds, serges and suitings, have finished their work, and returned from the United Kingdom and the Continent. Those representatives entrusted with the purchase of men's furnishings, silks, satins, dress goods, linens, gloves, prints, small wares and haberdashery of all kinds, are still abroad making selections for the autumn. Values remain on the whole very steady, and few if any changes of importance have been made during the past two weeks.

Green Fruits.—There are free offerings of California oranges, but the demand is also good, and stocks do not accumulate. The following quotations are submitted: Washington Navels, 96s, 112s, 126s, $3.25 per box; do., 150s, 176s, 200s, 216s, $3.50 per box; California Seedlings, 150s, 176s, 200s, 216s, $2.50 per box; do., 120s, 250s, $2.25 per box. The fine weather of the past few days has resulted in an increased consumption of lemons, and prices are firm. We quote: New Messina, fancy, 300s, 360s, $2.75 to $3; do., choice, 300s, 300s, $2.50 to $2.75. The consumption of bananas is increasing, but enquiries are still for small lots. There is only a small trade in pineapples as yet, but the trade is developing. The local movement in apples is limited. Several large export shipments of cold stored apples are being made. The experiment was made last year, but dealers were not satisfied with the test of the markets then made, and by large shipments hope to get a more accurate idea of the possibilities of this trade.

Grain.—There are fair offerings of wheat when the season of the year is considered. Red winter is quoted at 83c. at outside points. Barley is quiet and uninteresting. At 48c. rye is somewhat weaker. For corn there is a steady market, dealers quoting 31c. per bushel. Peas continue without change. For oats there is fair enquiry, 28c. being quoted at outside points.

Hardware and Metals.—Business has opened up nicely. There is a decided improvement in the situation within the past two or three weeks. Large shipments of barb wire and ordinary fence wire have been brought here recently from the United States. The Canadian manufacturers appear to have lost their hold on the barb wire market since the reduction in the customs tariff. Prices are very low, merchants quoting $2 f.o.b. Toronto. Orders for spring supplies are being freely booked, viz.: Screen doors, screen windows, harvest implements, garden tools and lawn mowers. There has been a brisk demand for ropes, and prices have advanced, merchants quoting manilla on a basis of 8c., and sisal 7¼c. per lb. In iron pipe there is considerable activity, and from 1⅞ to 9c. per ft. is quoted for from ¼ to 2-in. pipe. A new brand of horseshoe nails has recently been placed on the market, made in only one pattern countersunk head, which is being offered at 20 per cent less than the regular prices. In metals trade is fairly steady, and most lines have an upward tendency. Ingot tin is firm at 16¼ to 16½c. Ingot copper has advanced materially, selling now at 12¾c. in quantity, and 13c. in small lots. Sheet copper is accordingly firmer in price. Sheet zinc is firm at 5⅝c. in cask lots, and 5¾c. quoted for broken parcels.

Hides and Skins.—The hide market is rather weak in tone, and values have an easy tendency. For green hides merchants are paying 8c. for No. 1 Toronto inspected, and 1c. per lb. less for each lower grade. Cured hides are quoted at 8½ to 8¾c. per lb. Calfskins are coming forward slowly, and are quoted at 8 to 10c. per lb. There is little doing in sheepskins. Tallow is dull and quiet. From Chicago, March 29, we have the following: "Market was iregular. There was a limited enquiry for light hides, and they sold at steady prices; but for heavy hides demand was flat, with packers looking for bids. The close was at 10¾ to 11c. for native steers, 9¾ to 10c. for Texas, 9½c. for butt brands, 9¼ to 9½c. for branded cows, 8¼ to 8¾c. for Colorados, 9¾ for heavy native cows and 10c. for light do."

Provisions.—For pork products there is good demand, extending over all staple lines. Dry-salted meats are active, while barrel pork finds good request. Prices are steady at former quotations. Dressed hogs are coming in freely for the season of the year, and the receipts are considerably larger than was expected. Lightweights continue to be the principal part of the offerings, and few heavy hogs are coming forward. Products of the heavier class are in short supply. Merchants quote select weights at $5.90 to $6, and heavy-weights, $5.75 to $5.80 per cwt.

Wool.—The local market is very quiet and the offerings coming forward are unwashed and limited in amount, bringing 10 to 11c. per lb. There continues to be a good attendance at the London wool auction sales. The bidding has been active, and the tone of the sale firm. The offerings at late auctions consisted principally of merinos. The Continental buyers took the most of Queensland greasy, a supply of scoured and good cross-breds, which were principally medium.

MONTREAL MARKETS.

Montreal, 30th March, 1898.

Ashes.—There is neither improvement in the demand nor any increase in receipts, and the business doing is of a limited peddling character. For first quality of pots about $3.50 to 3 55 is being realized for good tares, seconds $3 15 to 3.20, pearls $4.50 to 4.75 per cental.

Cements and Firebricks.—A good local demand is now reported for small lots of cement, but no large orders for import are being placed as yet. European markets continue very firm, and shaded cable offers for round lots have been declined. Prices for new stocks to arrive have not yet been fixed, and sales from stock continue to be made at $2.10 to 2.20 for British, and $1.95 to 2.05 for Belgian. Firebricks sell at from $17 to $22 as to brand.

Dairy Products.—In cheese there is still an almost total absence of business, and the same difficulty, as before stated, exists with regard to establishing a quotation, though about 7½c. is regarded as about the limit for fine goods. The butter market is steady, with good demand for fresh made goods; new creamery is held at 20 to 21c, held stock 18 to 19c.; there is a scarcity of new dairy, but a fair supply of rolls at 17 to 18c. Eggs are in large supply, and have been quoted as low as 9¾c. per doz.

Dry Goods—Trade in general dry goods is keeping up very steadily. The cut railway rates continue to attract country dealers to the city in order to make personal selections. Wholesale houses say they have not seen so many of their customers for years as within this month, and are much gratified at being able to come into personal contact with their clients. In the city the large departmental stores are well employed, but the general run of retailers do not seem over busy. Country collections are satisfactory for the season of the year.

Furs.—The report of Lampson & Co.'s sale of raw furs in London, following the Hudson Bay Co.'s sale, and closing on the 24th March, is as follows: Cross fox, 3,300 skins, sold 20 per cent. higher than in March, 1897; 3,200 blue fox, 15 per cent. higher; 2,600 fisher, 12½ per cent. lower; 33,600 squirrel, same as last March; 1,000 wolverine, 10 per cent. lower; 955 sea otter, 20 per cent. higher; 1,100 silver fox, 25 per cent. higher; 32,000 red fox, 20 per cent. higher; black bear, 30 per cent. higher; 4,500 lynx, 10 per cent. higher; 10,000 wild cat, 40 per cent. higher; 18,000 marten, 17½ per cent. higher; 2,800 Labrador otter, same as last March; 650,000 muskrat, about same as January, except fall drats, which sold 10 er cent. lower than January; 25,000 black muskrat, 10 per cent. higher than January; 155,000 mink, 5 to 30 per cent. higher than last March; 17,000 gray fox, 10 per cent. lower; 203,000 skunk, 25 per cent. higher; 125,000 coon, of these the Western and South-Western sold from 10 to 25 per cent. higher; Northern, same as last March; 5,600 wolf, 40 per cent. higher. We quote:—Mink, large dark. $1.50; small, do., $1.00 to 1.25; marten, $1.75 to 2.25; fisher, $4.50 to 7.00; lynx, $1.00 to 2.00; otter, $1.00 to 12.00 for dark; pale, $5.00 to 7.00; red fox, large, $1.30 to 1.50; small, $1.00; cross fox, $3.00 to 6.00; bear, cubs, $3.00 to 7.00; medium, $7.00 to 10.00; large, $12.00 to 15.00; skunk, 15 to 70c., as to color and stripe; coon, 20 to 75c.; rats, fall, 7c. to 10c. kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

Groceries.—Sugars continue very inactive, both the local refineries reporting a very dull demand, even more pronounced than a week ago, but there is no weakening in quotations, standard granulated being quoted at 4⅜c, Austrian refined 4 to 4⅛c., and yellows ranging from 3½ to 3⅞c per lb. With regard to molasses, the situation in Barbadoes is apparently unchanged, and no transactions are reported during the week for this market. A cable quotation received to-day figures out laid-down cost here at about 22¼ to 22½c. per gal. In teas trading on spot continues pretty much of a hand-to-mouth character, buyers apparently holding back in hopes of a break in prices, but importers are satisfied to hold out stiffly at present quotations. Some moderate sales are reported to the west, and there has been some American enquiry for Japan teas about 15c. California advices report very disastrous damage to prunes, apricots, etc., which are in the bud, there having been 15 degrees of frost registered pretty generally in the fruit-growing districts; as a result prices of dried fruits generally are very much stronger. Already dried apricots are advanced a full cent, and shippers don't know what to ask for prunes. The grape vines are said not to be affected, and prices of raisins are about the same. Supplies of Mediterranean fruit are very light on spot; cable advice was received to-day that one of the direct Medi-

Their "All Round" Reliability

Has made them popular.

One Shingle.

Eastlake Steel Shingles

Can't Leak! Can't Rust! Can't Burn!

And they can be laid more quickly than others, because of their perfect patented construction.

There's true economy in using Eastlake's—they've never yet failed to give thorough durable roof protection.

Write—and let us tell you more about them.

terranean fruit steamers for this port was timed to leave Patras on the 2nd April, where she is loading about 75 tons of currants for this market.

Hides.—The market for beef hides is fairly steady at the decline of last week. The quality of the stock now offering is poor, and the volume of receipts small. There is no supply of beef hides on hand, and of heavy hides the supply is limited. Calfskins are coming in freely, with considerable competition shown in the buying, 11c. per lb. being paid in some cases for No. 1, though the general quotation is 10c. for No. 1, and 8c. for No. 2. Lambskins are quoted at 10c.; sheepskins, $1 each.

Hops.—No special demand is to be noted, but steadiness marks the situation, and holders are firm in their ideas at 16 to 18c. per lb. for good to choice Canadian kinds; yearlings, 9 to 11c. per lb.

Leather.—The market for all leathers continues quiet, the decline in the hide market apparently affecting the demand, though the shoe manufacturers continue very busy. A purchase of a 3-ton lot of Western splits is reported at 20c., which is considered a low figure, and is the only recent transaction of importance heard of. We quote:—Spanish sole B.A., No. 1, 24 to 25c.; do. No. 2, 22½ to 23½c.; No. 1 ordinary Spanish. 23 to 24c.; No. 2, 20 to 21c.; No. 1 slaughter, 27 to 28c.; No. 2 do., 24 to 25c.; common, 20 to 21c.; waxed upper light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 20 to 21c.; juniors, 18 to 20c.; calf-splits, 30 to 35c.; calf skins (35 to 40 lbs.), 60 to 65c.; imitation French calf skins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 24c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; bufted cow, 12 to 14c.; extra heavy buff, 15c.; pebbled cow, 13 to 13½c.: polished buff, 11 to 13c.; glove grain, 12 to 13c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

Metals and Hardware.— We hear of an order for a 50-ton lot of Summerlee iron being booked for import, but this is about the only transaction in British iron reported this spring so far, and the appearances are that less British iron than ever will be brought out this year. In domestic brands trading is dull at the moment, and Hamilton pig would probably be quoted down to $15.50 and $15 for Nos. 1 and 2 respectively, to induce business. Domestic bars are being sold from the mill at $1.40. Plates generally unchanged; a cable offer for a fair lot of tinplates, made the other day at 3d. below quotation, was accepted, which would indicate that the English market inclined to easiness. As indicated last week, copper shows a tendency to advance, and 12½c. is quoted as the lowest figure for lots; tin is also stiffer at 16½c. for L. & F.; antimony is very scarce on spot, and 9½c. is asked in small lots. Spelter showed some advance last week. We quote: — Summerlee pig iron $18 00 to 18.50; Carron, No. 1, $18; No. 3, $17.25; Ayrsome, No. 1, $17.00; No. 3, $16.50; Shotts, $17.25 to 17.50; Carnbroe, $17.00, ex-store; Ferrona, No. 1, $15 to $16; Hamilton No. 1, $15.50; No. 2, ditto, $15; machinery scrap, $14.00 to 15.00; common ditto, $12.00 to 13.00; bar iron, Canadian, $1.40 to 1.50; British, $2.00 to 2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas, $2.40; Terne roofing plate, 20x28, $5.90 to $6.00; Black sheet iron, No. 28, $2.25; No. 26, $2.15; No. 24, $2.05; Nos. 17, $2; No. 16 and heavier, $2.15; tin plates — Bradley charcoal, $5.60 to 5.70; charcoal, I. C., Alloway, $3.15 to 3.25; do., I.X., $3.90 to 4.00; P. D. Crown, I. C., $3 60 to 3.75; do., I.X., $4.50; Coke I.C., $2 90 to 2.95 for standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2 70; galvanized sheets, No 28, ordinary brands, $4; No. 26, $3.75; No. 24, $3 50 in case lots; Morewood, $5.00 to 5.10, tinned sheets, coke, No. 24, 5½c.; No. 26, etc.; the usual extra for large sizes. Canadian bands, per 100 lbs., $1.65 to 1.75; English hoops $2.00 to 2.15. Steel boiler plate, ¼-inch and upwards, $1.85 to 1.90 for Dalzell, and equal; ditto three-sixteenths inch, $2.50; tank iron, ¼ inch, $1.50; three-sixteenths do.; $2.00; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to 2.50; Russian sheet iron, 9c.; lead, per 100 lbs., pig, $3.50 to 3.55; sheet, $4 to 4.25; shot, $6 to 6.50; best cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel $2.25; ingot tin, 16½c. for L. & F.; Straits, 16c.; bar tin, 17c.; ingot copper, 12½ to 13c.; sheet zinc, $5 to $5.25; Silesian spelter, $0.75; Veille Montagne spelter, $4.75 to 5.00; American spelter, $4.50; antimony, 9 to 9½c.

Oils, Paints and Glass.—Business in these lines continues good, and the warehouses all show activity in the preparation of orders for speedy shipment on and after the 1st of April, when spring freight rates take effect. There has been a further collapse in the recent marked advance in turpentine, and quotations are back to the old level, namely, 52c. in single barrels. All other lines are just as before. We quote:—Turpentine one to four barrels, 52c.; five to nine barrels., 51c., net thirty days. Linseed oil, raw, one to four barrels., 47c.; five to nine barrels, 46c.; boiled, one to four barrels, 50c.; five to nine brls., 49c., net 30 days; olive oil, machinery, 90c.; Nfld. cod, 35 to 37c. per gal.; Gaspe oil, 30 to 32c. per gal.; steam refined seal, 45 to 47½c. per gallon in small lots. Castor oil, 9 to 9½c. as to quantity. Leads (chemically pure and first-class brands only), $5.37½; No. 1, $5.00; No. 2, $4.67½; No. 3, $4.25; No. 4, $3.87½; dry white lead, 4¾ to 5c. genuine red do., 4¼c.; No. 1 red lead, 4c.; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.25 to 1.50; spruce ochre, $1.75 to 2.00. Paris green, 50 and 100 lb. drums. 15c.; 25 lb. drums, 15½c.; 1 lb cartons, 16c.; pound tins, 16½c.; window glass, $1.40 per 50 feet for first break; $1.50 for second break; third break, $3.10.

ESTABLISHED 1885.

HEAD OFFICE:.
Queen City Chambers, Church St., Toronto.
DIRECTORS:
JAS. GOLDIE, Pres. J. L. SPINK, Vice-Pres.
THOS. WALMSLEY, Treas. HUGH SCOTT, Mgr. and Sec.
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co.,
32 Church Street, Toronto, Ont.

THE FORTIN INSOLVENCY BILL.

The following letter addressed to Mr. E. R. C. Clarkson, Toronto, explains the position of the Montreal Board of Trade in regard to Mr. Fortin's insolvency bill. The Montreal Board is in no way responsible for the bill, and the Toronto Board was not consulted about it:

Montreal, 23rd March, 1898.

As you are aware, Mr. Fortin, member for Laval, one of our leading lawyers, and a gentleman well versed in all matters pertaining to insolvency, has introduced an insolvent bill before the present session of Parliament. I observe that the Toronto press is not very friendly regarding the matter, evidently feeling that its Board of Trade has been slighted or overlooked, and my object in writing at present is to explain to you how the matter came about, and the short time Mr. Fortin had at his disposal for the preparation of the act.

The representatives of the board of trade of Montreal, Toronto and Ottawa, waited on the Government a short time ago, with the request that the Government introduce at the present session of Parliament, an insolvency bill; and from their reception came to the conclusion that they could not hope to have their views granted at the present session.

The leading wholesale merchants here then decided that a private bill should be introduced at the present session, and requested Mr. Fortin (who had accompanied the delegation to Ottawa), to prepare such a bill, which he consented to do, basing it largely on the act passed by the Senate in 1895 and approved by all the boards of trade and other associations.

The bill has not, as yet, been submitted to the Board of Trade here, or any other board of trade in the Dominion, but, just as soon as the bill is printed, it is the intention to send a copy of same to each board of trade in the Dominion, with the request that they take same into consideration, and forward any suggestions they may see fit, or appear before the committee when the bill comes up for discussion.

It is not considered a perfect bill by any means, but it took all the time at the disposal of Mr. Fortin, with what little assistance Mr. Kent and myself could render him, to have the bill prepared in time to reach the orders.

I am sure we will have your co-operation in the matter, and trust you will give a proper explanation of the manner in which the bill came to be introduced, to any parties who may feel aggrieved.

Yours faithfully,
A. W. STEVENSON.

SCOTCH INDUSTRIAL NOTES.

Respecting the Clyde ship-building boom, our Glasgow correspondent writes: "In spite of the unsettled state of affairs politically, the Scotch trade outlook appears to improve daily, and there is every prospect of full employment for all branches of industry for twelve months. In the iron and steel centres the general position is strong and works are busier than for years, and despite the advance of 1s. per ton in Scotch hematite, steel makers find it almost impossible to secure all their requirements. The constant strain of production is telling on machinery, and new rolls have to be fixed up; orders for these go wholly to the Midlands. Malleable iron and steel manufacturers stand firmly by quotations, and as much as £5 12s. 6d. per ton has been paid for early delivery of ship plates.

"I hear that the successful tenders for the four British first-class cruisers will not be known until the first week in April. If the Clyde builders' expectations are realized, and two are secured locally, fully 20,000 tons of steel will be necessary. The Clydebank Shipbuilding Company recently placed a contract for two years' supply of plates. As these were fixed at moderate prices, the firm is favorably placed in offering for new work. A tour round the chief shipbuilding centres shows an extraordinary scene of activity, the stocks all being occupied with naval and mercantile work. Indeed, so pressed are some of the firms for room that I hear there will be active bidding for the yard of Napier, Shanks and Bill, which will be put up for sale in Glasgow on Wednesday. The naval work under execution on the Clyde at the moment is: For the British Government—First-class cruiser—Clydebank Company: three second-class cruisers—Fairfield Company (one finishing); one second-class and two third-class cruisers—London and Glasgow Company; three torpedo boat destroyers (30 knot)—Clydebank Company: one torpedo boat destroyer (30 knot)—Fairfield Company. For foreign Governments—One battleship for Japan—Clydebank Company; two torpedo boat destroyers for Spain (almost completed)—Clydebank Company. In addition, the Greenock firms have stern posts, etc., for ships building in dockyards.

"Everything points to shipping doing fairly well this year, notwithstanding the enormous tonnage in course of construction. This big tonnage, however, will not be felt for some months yet. If owners would only refrain from pressing tonnage on the market at low rates when there is no demand for tonnage the business would stand on a more solid footing. Shipowners all admit that the United States Atlantic ports have proved a rich bonanza to owners.

"Machine tool-makers are exceedingly busy, not only in maintaining present machinery, but in bringing forward new inventions. It would appear that the artificial impediments to the free use of such machines which have held this country back in international competition, are likely to be removed or relaxed by a better understanding with the trades unions."—London *Financial Times*, 12th.

ARGENTINE TRADE.

In the Government returns of the foreign trade of Argentina in 1897 the value of the merchandise imports is set down at $98,289,000 gold, and that of the exports at $101,109,000, those totals showing, as compared with 1896, a decrease of $13,875,000 in the imports, and $15,633,000 in the exports. The decline in the exports is largely accounted for by diminished shipments of wheat, owing to the bad harvest of 1896-7, while in the imports the falling off was mainly in cotton goods, timber and sugar. The value of the imports from Great Britain is returned at $36,392,000, which is far and away in excess of the amount credited to any other country, Germany ranking next after us with $11,114,000, followed by France and Italy each with about $11,000,000, and the United States with $10,101,000. Of Argentine exports, however, the largest purchaser is France, to which the shipments in 1897 amounted to $22,999,000, Germany following with $14,047,000, Great Britain with $12,985,000, and the United States with $8,321,000. The foremost position of France and Germany as receivers of Argentine produce is mainly due to their large purchases of wool.—*Economist.*

A SAVANT'S OPINION OF CANADA.

"I am almost tempted to advise my lady readers to get their butter from Innisfail. The distance is about 5,200 miles, but the middleman is such a costly luxury." The ladies live in England; Innisfail is the site of the great creamery on the Calgary-Edmonton Railway; the writer is Prince Kropotkin. It is not every stranger visiting Canada who takes so much trouble to verify his conclusions and who offers conclusions on so many questions of moment as this distinguished man of science has done in preparing his article for the *Nineteenth Century.* He accepted the invitation to Toronto of the British Association and its friends, and among the hospitalities for which he expresses so much gratitude was "a most instructive trip" across the continent by the C.P.R. Prince Kropotkin is a man of insatiable curiosity, but he had a special interest in Western Canada as the counterpart of a region for the study of which he had made good use by peculiar opportunities. He found the comparison justified not only of the prairies with the steppes, and of the woody tracts of Eastern Canada with the like tracts in northern middle Russia, but extended the parallel to the tundras and sub-tundras of Arctic and sub-Arctic Russia-in-Asia as corresponding with Canada's Barren Lands. The continental analogy was completed by collating the deserts of Mongolia with the deserts of the American plateau in the United States. * * * * "There are inexhaustible resources everywhere," he says, so that, though he lays stress on Canada's agriculture, cattle-breeding and dairying, those are by no means the only natural resources of the Dominion. It is his conviction, indeed, of Canada, as of other parts of the world, that its resources are greatly in excess of the men, the intelligence and the energy available for their development. He mentions its millions of acres of unoccupied prairies; its rivers teeming with salmon; its inexhaustible mines, as economic features that also characterize Siberia. Looking at both those vast countries, he finds in them ample assurance of room and sustenance for the generations to come, and he thinks it a good thing that men should even now spread out over these immense heritages, thus planting the seeds of civilization at the very ends of the earth. But, while taking that hopeful view, he cannot help regretting that the same activity and enterprise should not be applied to the old lands as well as to the new.

The square-block township system is, Prince Kropotkin thinks, liable to many inconveniences. It is not dispersive enough to bring about the diffusion of foreign elements among the mass of the native population, while, for the combined effort of those who try to adapt it to the village settlement system, it is most disadvantageous. The groups of four families may remain separated by a large interval, so long that a hamlet may never grow up at all. Nevertheless, the free homesteads are being taken up and busy little towns and thriving farms are not uncommon along the lines of railway. Around Edmonton there is a population of various nationalities—Austrians (from Galicia), Germans, Swedes, French-Canadians, etc. The Galicians told him to write home for more settlers. They have "accomplished wonders in their new abode." Edmonton itself, picturesquely situated on the banks of the Saskatchewan, was once a H.B. fort, and is still a fur trade emporium; it is also the thriving metropolis of a thriving region, with good hotels, stores, schools, churches. * * * * * * * *

We need not quote figures that the scientific tourist takes from Mr. Johnston's Handbook and other official sources, but what he says of Prof. Robertson's work and co-operative dairying in Canada is well worthy of attention. He contrasts our cheese production with the growth of wheat, with results unfavorable to the latter. But in time the disparity will right itself, he thinks. The fertility of the prairie land was, he considers, exaggerated at first; he regards Ontario as quite equal, in some respects—the great root crop, for instance—superior in productiveness to Manitoba. While settlers can get on without capital, a sum of £100 or so to start with is a great advantage. In every province there is "no end of land" awaiting cultivation. This land he describes by chosen samples, from east to west. "Millions and millions of men could find a living in all parts of the country," such is the impression made on the minds of those members of the British Association, who, like Prince Kropotkin, gave patient and thoughtful attention to the diversity and vastness of our resources.—*Montreal Gazette.*

Money in Insurance WHEN SECURED

ON THE COMPOUND INVESTMENT
PLAN OF THE
NORTH AMERICAN LIFE
ASSURANCE COMPANY

The special provisions of this advantageous plan of insurance are:

(1) The return as a mortuary dividend of all premiums paid beyond the 10th year, together with the face of the policy should death occur within the investment period selected.

(2) The loan to the insured if desired of all premiums beyond the 10th year, and should death occur after that and within the investment period selected, the full face value of the policy is payable, premium loans, if any, being cancelled.

The North American has a larger ratio of assets to liabilities and net surplus to liabilities than any other Canadian Company.

Pamphlets explanatory of the Compound Investment and other attractive plans of insurance furnished on application to

CAPITAL

$6,000,000

PAID-UP.

The Canadian Bank of Commerce having been appointed agents of the Canadian Government for the

YUKON DISTRICT

(KLONDIKE)

to receive the royalty on gold and to transact other banking business for the Government, will establish an agency at

DAWSON CITY

at the earliest date in the coming spring that the means of travel will permit.

* * *

Drafts and Letters of Credit payable at Dawson City may be obtained on application to any branch or agency of the Bank.

The Dominion Bank

DIVIDEND NOTICE

Notice is hereby given that a dividend of three per cent. upon the capital stock of this Institution has this day been declared for the current quarter, and that the same will be payable at the banking house, in this city, on and after Monday, the 2nd day of May next.

The Transfer Books will be closed from the 20th to the 30th of April next, both days inclusive.

THE ANNUAL GENERAL MEETING

of the Shareholders for the election of Directors for the ensuing year will be held at the banking house, in this city, on Wednesday, the 25th day of May next, at the hour of 12 o'clock noon.

By order of the Board.

R. D. GAMBLE, General Manager.

Toronto, 28th March, 1898.

DECISIONS IN COMMERCIAL LAW.

RIELLE ET AL v. REID ET AL.—A merchant who wished to get over the difficulty "which might arise in connection with his personal covenants on mortgages given by him," and "wished to place himself in a position to avoid payment of them," formed a company to take over his business. No outside assistance was invoked in the formation, all the stock being held by the merchant and his wife, with the exception of three shares distributed to three employees. The five shareholders were directors, and at a meeting held soon after the inception of the company, the merchant was elected manager for a term of five years, at a salary of $2,000 a year. On the same day, the shareholders, the same five individuals, decided to ratify this act in meeting assembled. One week later, by-laws were enacted, a call of 10 per cent. on stock made, and the salary of the manager increased another $1,000 per annum. The business then continues under unchanged management, and the profits are received by the same individual as before the organization, with this difference, that the property is ostensibly beyond the reach of the former creditors. It was in an attack upon this point that the suit arose. Judgment was given for the plaintiff, declaring that the company was the agent of the defendant, and that all transfers of property made by him to the company were as against the creditors of the plaintiff, fraudulent and void, and that the assets of the company were a part of the general assets of the defendant, and liable to be applied in the satisfaction of his debts, subject to the rights of the creditors of the company. This decision must do much to prevent the formation of "one-man" companies with the object of defeating creditors.

BOULTON v. LANGMUIR.—The question of the material alteration of a note came up for decision. The payee of a note payable on demand with interest changed its date to a later period. The judge remarked in regard to this part of the case: "To alter the date of a note was to make it appear to be a different contract from that which the defendant had entered into, both as regards the date at which it became an existing contract and the time from which it bore interest. I do not see that the fact of its being thereby made in one respect more favorable to the defendant affects the question of the materiality of the alteration. It is the change in the contract, not the surrounding circumstances which the law regards."

IF the Fredericton "Gleaner" is well informed, the lumber cut for this season by the several operators upon the North-west and South-west Miramichi will aggregate 49,000,000 feet, where last year's cut in the same localities made up 79,000,000 feet. Here are the estimates: Snowball, down river, 7,000,000 feet; Snowball, up river, 3,000,000 feet: Richards, 8,000,000 feet; Hutchison, 6,000,000 feet: Ritchie, 4,500,000 feet; Welsh, 3,500,000 feet; Lynch, 3,500,000 feet: Sinclair, 3,500,000 feet: Vaughan, 3,000,000 feet; Burchill, 1,000,000 feet: Robinson, 1,000,000 feet; smaller parties, 4,000,000 feet; Barnaby River, 1,000,000 feet. Total, 49,000,000 feet.

Secretary.

Mercantile Summary.

The Dominion Express Company has adopted a new system for handling, and made a large reduction in its rates for the collection of notes, drafts, and accounts

On Saturday last work was suspended in the coal mines of the Ohio district. The cause is the fact that the 10 per cent increase in wages agreed upon by the miners and mine owners at Columbus and Chicago, has not yet been applied to the common laborers in the mines.

In answer to J. McH., Ottawa, it was not W. R. Callaway, formerly passenger agent of the C.P.R., who was appointed president of the New York Central Railway the other day. It was his brother, S. R. Callaway, who is a Canadian by birth, and began railroading under Sir Joseph Hickson in the Montreal office of the Grand Trunk. He has been president of several American roads, the last being the Lake Shore and Michigan Southern. Mr. Callaway is only 47 years of age.

A deputation of three members, representing the Western section of the Ontario Executive of the Trades Congress of Canada, and two from the Eastern section, went to Ottawa a day or two ago to interview the Dominion Government on questions of Chinese immigration, current rate of wages on Government contracts, an amendment to the Trades Mark Act, giving recognition to the Union label and better inspection of gear and tackle at seaport towns.

The Montreal Grain Elevator Company, capital $300,000, asks incorporation, the applicants being Andrew Allan, Hugh McLennan, Thomas A. Crane, Alexander Paterson, and Alexander MacDougall. Also the Canadian Mining Exhibit Co., capital $5,000; James Fish, T. J. Cooke, R. King, A. R. Forrester, F. X. de Grandpre, M. R. Cuddihy, S. Agnew, Alph. Renaud, and the Rock Forest Gold Mining Co., capital $100,000; R. Wilson Smith, S. O. Shorey, C. C. Kennedy, M. P. Corcoran, and M. F. Hackett.

In New Brunswick the following recent failures have occurred: J. S. G. McGinley, formerly a clerk in St. John,. started a small clothing business at Bathurst in 1895. He recently assigned, and has since left the town.——P. J. Frenette, who has been doing a small general business at Petit Rocher, is already reported to be in financial difficulties.——A tinsmith at St. Martin's, P. Poertner by name, has assigned, with small liabilities due in St. John.——W. Henry Laurence, of Burrt's Corners, a manufacturer of shoes in a small way, has left the place involved in debt.

Publishes each issue ESSAYS ON ACCOUNTING PRACTICE IN LEADING ESTABLISHMENTS in various industries; SHORT ARTICLES ESPECIALLY ADAPTED to the wants of BEGINNERS in office work; REVIEWS AND CRITICISMS of books on accounting and business subjects, written in a way to correctly describe the works; LETTERS OF EXPERIENCE from ACCOUNTANTS AND OFFICE MEN; QUESTIONS AND ANSWERS of interest to subscribers; NOTICES OF MEETINGS and BRIEF REPORTS OF PROCEEDINGS of leading ACCOUNTANTS' AND BUSINESS MEN'S ASSOCIATIONS; ILLUSTRATED DESCRIPTIONS of the BEST and NEWEST devices for OFFICE EQUIPMENT; brief EDITORIAL LEADERS ON TOPICS OF THE MONTH of interest in accounting and office circles; PORTRAITS OF EMINENT ACCOUNTANTS, with BIOGRAPHICAL SKETCHES; ACCOUNTING MISCELLANY, etc.

Monthly. $1 a year. Ten cents a copy.
ACCOUNTICS ASSOCIATION, Publishers
202 West Broadway, New York

Mercantile Summary.

H. M. Condie, formerly a clerk in Montreal, started in a small general store at Bainsville, near Cornwall, Ont., in the fall of 1896. He has already assigned to J. T. Tennant, of Brockville.

The Quebec Central Railway is making extensive additions and improvements at the car shops in Newington. A new engine-house, with a capacity of ten engines, has been erected.

On Monday last, Mr. C. F. Reynolds, who has a 200,000 acre ranch in Texas, and feeds upon it 11,000 head of cattle, bought from Mr. Stone, of Guelph, two carloads of thoroughbred Hereford bulls to be forwarded to Texas.

Victorians say the C.P.R. new steamship "Tartar," for the Alaska route, is a large and handsome one. She arrived from England on Sunday last. The "Tartar" is a ship of 4,500 tons, 376 feet long, and lighted throughout by electricity. Her speed is 18 miles per hour. Her sister ship, the "Athenian," also formerly one of the Union Steamship Company's mail steamers, is due at Victoria on the 10th.

The Bazar Company of Toronto, limited, is the name of an incorporated body under letters patent, capital $24,000; parties, Henry Nerlich, Emil Nerlich, John Glass, T. A. Doherty, and Louis D. Merrick. The H. A. Christy Company, consisting of Henry A. Christy, of Chicago; H. Victor Cawthra, Harold A. Wilson, George B. Burns, of Toronto, and Robert I. Towers, of Sarnia, will buy out H. A. Christy & Co.'s bicycle business. The capital is $10,000.

The list of creditors sent out by the assignee of the Quebec firm of G. Bresse & Co., manufacturers of boots and shoes, while it can hardly be called interesting reading, is assuredly instructive. The firm owed $43,478, and they owed it to 117 creditors in twenty-four places in Canada and the United States. There are 69 in Quebec, 18 in Montreal, half a dozen in Boston and New York and Lynn. From Vancouver to Toronto, from Calgary to Pictou, the lengthy list of credits extends, and the respective amounts, outside of the privileged taxes and employees, and outside of three banks, ranged from $5 to as high as $3,900. The case is an instance of the extent and widespread nature of credit, as given in Canada. A first dividend of 15 per cent. is being declared.

According to an official circular lately issued, the Grand Trunk Despatch has been organized to operate over the Grand Trunk Railway system, West Shore Railroad, and connections. Mr. Sumner Hopkins, of Detroit, is the manager.

The duties collected at the London Custom house during March amounted to $69,639, which was more than $19,000 ahead of the same month last year. For the first quarter of the year the returns show an increase of $60,000.

The executors of the late Oliver Thibaudeau, dry goods merchant at Lauzon, Que., who died in February, have deemed it advisable to make an assignment of the estate for the general benefit of creditors. Mr. T. was formerly of the firm of Isidore Thibaudeau & Co., wholesale dry goods, Montreal, and on the closing of that business, opened in the retail line at Lauzon, in 1894. The assets are estimated at about $12,000, and general liabilities about a similar amount, but the widow has also a dower claim of $3,000.——Allan F. Longfellow, a carriage maker at Ascot, Que., has assigned, owing about $1,200.——The failure is reported of J. B. Poirier & Co., dealing in furniture, sewing machines, etc., at Ste. Scholastique. Mr. P. made a rather bad failure in 1895, when he owed about $5,000, with small assets, and has since done business under cover of a son's name.——A demand of assignment has been made upon P. A. Perron, of Carleton, Que. He was formerly a civil engineer, engaged on the construction of the Baie des Chaleurs Railway, and started storekeeping in 1892.——J. C. Cheval, formerly ran a shoe store in Montreal, but a year ago removed to Waterloo, Que. His career there has been a short one, as he has just assigned; liabilities are stated at $3,000.

The following is Nova Scotia's contribution to the weekly failure list: S. Ritcey, jr., dealing in general merchandise and fish at Ritcey's Cove, recently gave two confessions of judgment to leading creditors for about $1,700, and subsequently assigned. He is now offering 40 cents on the dollar, payable in three months. His general liabilities are about $4,000, and on mortgage $2,100.——Mrs. Mary Gillis, Sydney, widow of Angus Gillis, since whose decease in 1887, she has been carrying on general business, is seeking a settlement at 50 cents. Her affairs have been in bad shape for some months past, part of the time being in the hands of a trustee.——The assignment is reported of R. McLeod, of Truro, a trader in cattle, lumber, etc. He failed before in 1894, when he owed some $4,000——T. D. Shand, formerly a carpenter of Lunenburg, moved to Halifax two years ago and engaged in a general building and contracting business. He has not met with success in this larger sphere, and several judgments being recently recorded against him, he has now assigned.——Mrs. G. E. Warner, who has been a milliner in Halifax for some 25 or 30 years past, has now been obliged to assign. She owes about $2,500.——F. E. Burke, a general dealer in a small way at Joggins, has written his creditors, asking them to relieve him of 50 per cent. of his liabilities. He began business a few years ago on a capital of about $500.

Mercantile Summarv.

THE Edmonton Board of Trade is taking steps to remove the rocks and boulders which impede navigation at the Grand Rapids.

THE Standard Natural Gas Company, of Essex, is proposing to supply consumers in Chatham with natural gas for heating purposes.

A PROJECT is on foot to start a piano factory in the old Waterous factory building in Brantford. One would think we will have piano factories enough in Canada—soon.

THE small merchants of Chicago have at last hit upon a legitimate and effective way of meeting the competition of the departmental stores. They intend to start a department store of their own.

MR. W. BARCLAY STEPHENS has been elected a member of the Montreal Stock Exchange. It costs something to belong to this body, which, like the celebrated Academie Francaise, limits its members to forty. Mr. Stephens is said to have paid $3,500 for the seat—it is the fortieth—and to have been since offered $7,000 for it.

HUNTINGDON, Que., village council is willing to submit to the ratepayers a by-law by which the mill property owned by the Henderson estate, with the water power, would be given as a bonus to the Montreal Cotton Company, together with exemption from taxes for twenty-five years, to remove their works to Huntingdon.

THE fire of last week, which destroyed the commodious window-shade factory of Geo. H. Hees, Son & Co., in this city, was a destructive one. But the firm are making energetic arrangements for its rebuilding. Meanwhile they have taken, as a temporary factory, the premises on McMurrich street, formerly occupied by the Warren Organ Company, and have already turned out newly-made goods thence. It is fortunate that the company had their warehouse down town, apart from the factory. The firm has sent to the fire brigade a cheque for $200, in recognition of the efforts of the firemen at their Davenport Road premises. One hundred dollars of this is requested to be given to the widow of Thomas Deacon, the fireman who was unhappily killed, the remainder for their benevolent fund.

—INCORPORATION is sought at Ottawa by the following companies: The Montreal Boot and Shoe Co., capital $50,000; applicants, Joseph O. L'Abbe, Andre P. Cimon, Denis McLyn, George A. Archambault, Frs. X. Galibois, and Telesphore Beaupre. A charter is asked for the Hudson's Bay Knitting Co., capital $50,000. The applicants are Joseph John Westgate, Charles Leander Higgins, Benjamin Workman Higgins, Hiram Eslie Higgins, and Robt. Lucas. Montreal Mining and Trading Co., capital $50,000; R. Bickerdike, W. J. Turpin, J. A. L. Strathy, R. Costigan, J. Ogilvie, E. T. Bartlett, F. W. Hibbard, A. McNaughton. The New Walrond Ranche Co., capital $500,000; W. W. Ogilvie, W. Hanson, S. A. McMurtry, A. F. May and J. A. Gemmill. The Canadian Food Supply Co., capital $50,000; Hugh O'Neill, H. G. Hurcomb, Jay Gardiner, A. S. Sutherland and J. T. Burgess.

Mercantile Summary.

THE exhibit made by the report of the Grand Trunk Railway for its latest six months, is a gratifying one, and reflects credit upon the judicious management of the new regime. To find the floating debt extinguished for the first time in years is a circumstance that occasioned rejoicing comment at the meeting in London, and well it might.

ABOUT five years ago M. L. Henry & Co. bought the grocery and liquor stock of John Garvey at Peterboro, at 10 per cent. discount. The purchase, which was made for cash, amounted to $27,000. In February, 1896, the firm dissolved, and P. Henry retired. The senior member of the firm continued the business. While he did a nice trade, he granted credit too freely, and now we hear that his troubles have ended in an assignment.

BOTH the mercantile agencies show us a gratifying reduction in the number and amount of failures in Canada for the March quarter. According to Dun & Co., they were 423 in number, with liabilities of $2,941,067; which compares very favorably with the 674 failures and $5,185,000 liabilities for the corresponding three months of 1897. Bradstreet's figures show a very similar reduction, of between 30 and 40 per cent. In the United States, too, there is a marked decline in number of failures, namely, from 3,932, with liabilities of $48,007,000 in three months of 1897, to 3,687 with $31,710,000 in three months this year. An improved condition of mercantile affairs is clearly marked by this exhibit.

OWING to the fact that Clayton Pattison, Bridgeburg, was a man of obliging disposition, he got into trouble through assisting his friend by endorsing notes. Since doing so he has found it necessary to conduct his furniture store under cover of his wife's name. Now, she, too, is in difficulty, and makes an assignment. Sloan & Campbell, shingle manufacturers, Gravenhurst, also assign.——About seven years ago W. S. Volume bought the grocery stock of S. Ross at Madoc. He had but little capital, and that little he did not manage well, hence his assignment is not surprising.

IN Quebec Province authority has been taken under the joint stock company clauses, R.S.Q., to form the Jacques Cartier Pulp and Paper Company, of Montreal, capital $28,000. E. G. Penny, M.P., Robert Archer, Wm. Strachan, Wm. Currie, Robt. Law are the parties. Another concern is the Montreal Hotel and Navigation Co.: capital $25,000, to acquire and conduct athletic grounds, hotels, etc. Applicants, C. H. Catelli, Chas. Harris, C.E., of Ottawa; William L. Hogg, Hormidas Laporte, John P. Mullarky. Then there is an aqueduct company at Richmond, Que., capital stock $100,000, composed of Montreal and Melbourne men and women, to acquire the Richmond aqueduct.

IN the fall of 1896 Shoemaker Bros. bought the bankrupt stock and baking plant of J. B. Magee at Norwich, for $450, for which sum they gave notes. Being unable to retire their paper as it fell due, they have assigned.——W. J. Butler, after having been lumbering for two years at Stratford, finds that he cannot make any money, and gives up all he has to an assignee.——After changing his location several times, Joshua McKim succeeded Chas. Little as a dry goods dealer in Wallaceburg in September, 1889. But he has not been successful, for in February, 1896, he was obliged to ask creditors to write 25 per cent. off their claims of $5,500. This they did. Now we hear that he has asked them to favor him to the extent of 30 per cent. As they were not disposed to do so, he assigned.——So does W. J. Douglas, lumber dealer at Burlington.——After keeping a general store at Callandar about thirteen years, Joseph Hicks assigned lately the second time. The first failure was in 1888, when creditors acepted 75 per cent.

THE QUEBEC CIVIL CODE.

The long and varied records of the civil law in the Province of Quebec make study agreeable to the scholar with a historical bent, but at the same time complicate the work of the advocate. The task of reference to the different principles, and enactments of the law would indeed be difficult if it were not for the text writer. An advocate of the Montreal bar—Dr. R. Stanley Weir—has recently compiled in a single volume the Civil Code and the Bills of Exchange Act of 1890, with all statutory amendments. Dr. Weir's work has been well done, and the publisher maintains that it is "the most accurate English edition yet published." The book is issued in the form of a pocket edition, and under each article contains the concordance of the articles of the Civil Code, the Code of Civil Procedure, and the Code Napoleon, on which the civil law of the province is based. C. Theoret, publisher, 11 and 13 St. James street, Montreal.

The Gurney Foundry Co., Limited
TORONTO
The Gurney-Massey Co., Limited
MONTREAL

As we had to go to press on Thursday we are without the clearing house figures and our usual Montreal Stock Report in this issue. Our Halifax letter of Tuesday not reaching Toronto in time to make the requisite changes of quotations in Maritime Province bank shares for the stock and bond table, we quote them here: Bank of Nova Scotia, 219 to 225; B.N.A., 129 to 134; Merchants' of Halifax, 188 to 195; Union, 140 to 145; People's, 115 to 120; Halifax Banking Co., 151 to 155; Bank of Yarmouth, 115 to 118; Exchange of Yarmouth, 95 to 98; Commercial of Windsor, 112 to 116.

HIDE VALUES.

During the winter months hides have been maintained at a basis of values which was warranted neither by the supply nor the state of the leather markets. Tanners have been compelled to pay prices for their raw material which they could scarcely realize in the finished product, and profits, where in existence, have been of a limited nature. It was impossible that this condition of affairs should continue forever, and the inevitable reaction has taken place. Prices of green hides, as quoted in the Toronto market, declined one cent per pound in March. On Tuesday of the present week a half cent per lb. decline was announced by merchants, with the statement that next week would probably witness a similar falling off in value. No. 1 Toronto inspected hides are now quoted at 7 1-2c., and several transactions in cured hides are reported at 8 cents during the week. The best informed men in the trade maintain that values must soon reach a basis that will permit of exportation to the United States. Values in American market are somewhat affected by the present strained international relations, as war with Spain must cut off, or at least render difficult of access, the South American source of supply. Tanners are rather indifferent buyers, and are apparently carrying supplies sufficient for immediate requirements. The importation of English hides has been carried on rather extensively this winter, which to those outside of the industry may appear something like carrying coals to Newcastle. These imports have taken the place of domestic hides and have contributed to the weakness which the market is now exhibiting in so pronounced a manner. There is little in the present situation to induce the tanner to crowd his yard with hides. The boot and shoe manufacturers regard the low prices established during the past few years as sacred white elephants which must not be disturbed, and several Quebec firms appear to take pride in announcing that "the old prices still rule."

Chicago is looked to as the index of future developments. Although the market there is not active, there are no signs of the demoralization which some enthusiastic bears in this country have predicted. Our report, dated April 5th, is as follows: "A few orders received from tanners are for small lots, but there are no hides pressing for sale, and values hold steady at 10 3-4c. for native steers, 9 3-4c. for Taxas, 9 1-2c. for butt brands, 9 1-4c. for branded cows, 8 1-4 to 8 1-2c. for Colorados, 9 3-4c. for heavy native cows, and 10c. for light do."

Debentures.

Municipal Debentures bought and sold, also Government and Railway Bonds. Securities suitable for Investment by Trustees and Insurance Companies and for Deposit with the Government, always on hand.

THE SITUATION.

In his Budget speech, the Minister of Finance, at Ottawa, sounded a note of warning against the supposition that the tariff is settled for ten or even five years; permanency, he said need not be expected till the tariff gets down to moderate duties. The changes now made are few in number and moderate in amount. When on the 1st of July, the preference rate of duty will be a deduction of 25 per cent. from the general tariff, preference will be confined to Great Britain, the British West Indies, unless other British colonies or possessions should qualify themselves to receive the benefit by reciprocity of tariff; their tariffs would, in that case, require to be not higher, on the whole, than our preference tariff. The West India tariffs are not protective, even when they are high. We do not, in the meantime, claim from them an exact or measured reciprocity. What we expect to receive from the West Indies are sugar and fruits; and it is hoped that we may increase our exports of fish, flour and lumber, cheese, hams and butter. With the view of assisting them rather than ourselves, we return to the polariscope test in sugar. The interest on Government Savings Banks deposits, reduced last year from 3½ to 3 per cent. is now to be reduced to 2½ per cent. This is done avowedly in the interest of borrowers, and in the belief that the effect will be to reduce the general rates to them. This implies that the banks will be willing to reduce their rates on deposits and also on loans; both will be necessary for the realization of this expectation. Mr. Fielding estimates the revenue of the year at $39,300,000, and the expenditure, including the expense of opening the Yukon district, at $38,750,000. This anticipated surplus would balance last year's deficit.

Between the United States and Spain, the Cuban question may, at any moment, lead to war. The Pope has interested himself in favor of peace, and several of the great European powers are ready to do all they can in the same direction. President McKinley has been doing his best to hold in check the impetuous forces of Congress, which would have preferred more precipitate action, which would have led at once to war. In official utterances, rather muffled than outspoken, little has been said of the explosion of the "Maine," while the disposition in the press to charge the responsibility of the explosion upon Spain has gained ground steadily, from day to day. Great preparations are being made for war; and here the great resources of the United States give her an immense advantage over Spain. Much can be done by money, but not everything. A great navy of the first-class cannot be extemporized; and if war were to break out now, the maritime forces of Spain would be superior to those of the United States. This condition of things would make war costly, in money, ships and men; but the end would leave Spain a wreck, while the great resources of the Republic would be strained, the debt increased, and the pension list reinvigorated.

Intervention by the United States in the affairs of Cuba, it seems, is not desired by the insurgents, who are doing the active work in the field; and the desire that the United States should not interfere is stated on what claims to be unimpeachable authority, to have been communicated to President McKinley. The ground taken by the insurgents is, that Cuba can conquer and maintain her own independence. No question of the United States acquiring the Island has arisen, and the protest of the insurgents may mean that they do not wish any to arise; that they wish Cuba to become and remain a separate independent State.

In the case of war breaking out between the United States and Spain, some war taxes will have to be put on. Beer and whiskey are both marked out for additional rates. The whiskey tax, which stands now at $1.10 per gallon, would bear a considerable addition, without throwing the trade into the hands of the smuggler or sensibly lessening consumption. Our own experience on this point points both ways; but at least it shows that, if a much higher duty encourages smuggling and illicit distillation, a higher revenue, on the whole, is obtained than a tax as low as that now on American whiskey would yield. The tax on beer, now $1 a barrel, it is said, might be doubled, bringing an increased revenue of something like $40,000,000 a year. Still a naval war could not be sustained on such increase as would be possible on the duties on beer and whiskey. The income tax of the war of the rebellion has now been made unavailable by a decision of the Supreme Court. In this way the source of the most prolific war taxes has been dried up.

All hope of saving China from partition having vanished, the question of maintaining the balance of power, in the East, becomes one of pressing interest. For this purpose, Great Britain finds it necessary to obtain concessions. In this she has succeeded. For the commerce of the world she has obtained three new treaty ports, Funing, Tye-Chau and Chin-Wang. Having regard to the balance of power in the East, she has also, with the consent of Japan, obtained a lease of Wei-Hai-Wei, a better maritime port than Port Arthur, which Russia has evidently obtained for other than commercial purposes, the position being strong and on the maritime approach to Pekin. The concession is in the form of a lease, containing the same terms as those on which Russia gets Port Arthur. For commercial purposes the British acquisition is infinitely superior to Port Arthur. Through the exertion of Great Britain, access to the inland waters of China has been obtained for the ships of all nations. Germany, on her part, has given assurance that the territory acquired by her, in China, will be open to the commerce of the whole world. Germany and England, having identical interests in that part of the world, can, Mr. Balfour, acting Secretary for Foreign Affairs, believes, work harmoniously together. Russia, too, had given assurances, but they do not persist: the only thing that is constant with her is to work for new acquisitions in China. For this policy of virtual division of China, Russia has succeeded by being content, in the meantime, to share with France and Germany. But these two latter powers once seated in their new acquisitions, will help to create a new balance of power, in the East; and when Russia is ready to make further advances in the direction she is now taking, the other nations interested in the trade of China may find it to their interest to oppose her.

When the question of opening a wagon road from Edmonton to the Yukon was brought up by Senator Carling, in the Senate, Senator Mills reiterated the opinion that Lake Teslin route is the best for present purposes. This opinion being still adhered to by the Government, we may expect that they will do something in the way of a substitute for the defunct Mackenzie-Mann contract. If anything is to be done, it is clear that tenders must be called for and the best offer taken. The Senate would not be likely to negative this proceeding. What it objected to was the nature of the provisional contract; and that once out of the way, a road is open to begin anew. Not much time would be lost by the action of the Senate, if a new plan were acted upon without unnecessary delay. As an all-Canadian route, the projected road from Edmonton has distinct advantages in its favor. It would run through the fine agricultural district of the Peace River valley, and the southern end of it would be necessary for that purpose, if the Klondyke gold prospects were to vanish at once and for ever. But as a present means of getting to the Klondyke, its great length makes it unavailable. The idea of a wagon road, by that route, is neither new nor antagonistic to the Lake Teslin route. When it was supposed that the latter project would be carried out under an existing contract, the wagon road from Edmonton found advocates in all parts of the country, and the present movement in its favor is but a continuation of that, not the setting up of a new route in opposition to that of Lake Teslin.

OUR POSTAL SYSTEM.

The proposed restoration of newspaper postage is a demand of payment for service rendered; the service costs money, and when the money is not repaid by those who receive the direct benefit of the service, it must be paid in part by others to whom none of the direct benefit goes. One objection made to the proposal is certainly not valid; the weight of the burthen, it is said by way of complaint, will fall on Ontario, where the great bulk of the newspaper matter circulates. The innuendo is that some other Provinces ought to pay a part of the cost of sending newspapers through the post-offices for Ontario consumption. In the plan itself, which makes a restoration of postage partial, there is a patent defect; all newspapers within a radius of ten miles of the office of publication are to go free. This is a discrimination in favor of the local journals, and against the journals which have a general circulation. This discrimination requires justification, which we apprehend it will be difficult to make. On what principles are local journals to be carried free, while the other must bear the cost of their own carriage? The only ground on which, so far as we remember, free newspaper postage has been defended is, that newspapers have an educational mission or effect. But even so, free newspaper postage is liable to the same objection that is often brought against a State Church; one man is made to pay for the propagation of opinions which, far from having an interest in disseminating, he utterly disbelieves and abhors. The analogy of the French practice of paying all churches is nearer to free postage than the payment by the State of one church. But refinements of this kind have not been much thought of. Publishers and readers of newspapers have tacitly conspired to get a benefit at the expense of other people who got nothing in return, and who were simply dubbed dullards and fools for not reading what, for any reason good or bad, they do not want.

The Postmaster-General dwells on the enormous weight of newspaper bulk which, in these latter days, is being carried free of charge by the Government. The discovery of new materials out of which to make paper, and the consequent cheapening of the product, have had much to do in bringing about this result. If paper had remained dearer, the contents of the lesser sheets issued as newspapers, might have had a tendency to improve rather than to increase of bulk. However this may be, the fact of an enormous increase in the weight of newspapers going through the post, causes free postage to present itself to the Postmaster-General as an abuse, which he hastens to abate before it assumes the dimensions of something like a scandal. But while he is about it he should make a complete job of the business, by restoring newspaper postage entirely. There is no charm in the ten mile radius which should entitle it to exceptional immunity.

In the proposal to reduce letter postage from three to two cents, we fear the future may reveal a premature move. The aim should be to make the Post-Office Department self-sustaining; and we fear that even the partial restoration of newspaper postage would not fill the gap which the one-third reduction of letter postage would cause, besides covering the existing deficit. It might be better to defer the reduction on letters, till we are sure that the state of the postal revenue will permit of it. From the statement of the Postmaster-General, it would seem that the question of guaranteeing the safe carriage of valuables, by insurance, has been considered and rejected, on account of the cost, which is put at $2,000,000. If insurance were to be undertaken, the business is on a scale sufficiently large to warrant the Government in becoming its own insurer; and in that case, the cost would be the actual damage paid. There is one dangerous practice extensively indulged in, which, if continued, will some day lead to extensive loss to somebody. The practice of sending large parcels of bank bills through the post-office was a danger that would lead to robbery almost any day on which thieves could assure themselves that the booty is awaiting them. These parcels are merely registered and not distinguished as containing valuables. At numerous points, from the moment they leave the post-office to that of their arrival, a robbery is possible. There are no special guards, no adequate precautions. The bags go through the streets in wagons without other guard than the driver. The senders may, in the light of Mr. Mulock's statement, come to realize that the valuables practically go at their risk. Either senders of money in large amounts should be required to specify the nature and amount of it, and when received at the post-office, it should be placed under special protection; or it should be refused carriage, or taken only on the distinct understanding that it is at the risk of the sender.

REDUCTION OF BANK INTEREST.

The decision of the Government to reduce the rate of interest payable by Post Office Savings Banks from 3 per cent. to 2½ per cent. per annum is a satisfactory one and will, we believe, be generally approved. It is certain to be approved by business men who see in it an indication of a lessened rate of bank discount. And it can not but be welcome to the chartered banks, which have long been forced to pay more for deposit money than it was worth, simply because the Government of Canada maintained in its savings banks payment of a rate of interest which was higher than was justified by the conditions of the money market. When so proper a step has been taken by the Government as this reduction, it is disappointing to find a journal like the *Mail*, apparently for the sake of getting a fling at the Postmaster-General, indulging in sneers at the Government and accusing it of "robbing the thrifty poor" by the change. Truly, politics can become a very petty game, sometimes.

MINERAL DEVELOPMENT IN BRITISH COLUMBIA.

At this time, when so much attention is directed towards the north-western part of this continent because of its golden wealth, and when any news from our mineral fields in that direction is read by many with avidity, the report of the British Columbia Minister of Mines for 1897 is of especial interest. The comparative statements it contains of progress made industrially, as shown by yields achieved last year in comparison with former years are instructive as well as gratifying. They confirm, if confirmation were necessary, the opinions formed of the varied mineral wealth of our westernmost Province. And the volume contains abundant testimony to the efforts made by the provincial authorities in the direction of systematically recording, as well as regulating the work of the mining population. Indeed, when one considers the difficult nature of the country and its immense extent, the amount of serviceable information brought together in the 200 pages of this handsomely printed and illustrated pamphlet is astonishing.

It was known that the provincial mineralogist, Mr. Carlyle, was a faithful and competent official; and the reading of this report must re-awaken regret that his services in that capacity are lost to the Province by his acceptance of a post in the employ of a private company. The most admirable feature of this report, to our mind, is its moderate, practical tone, its freedom from extravagance of language, its judicious warnings and recommendations. So concise is the chapter on The Progress of Mining, for example, and so well does it cover the ground, that one needs neither to condense nor attempt to explain it. We shall therefore quote a great part of the chapter, with here and there a connecting word. Premising that the figures speak for themselves, and that the statistical tables in the first six pages show very clearly the steady growth of the mining industry in British Columbia, Mr. Carlyle says: "The results are so far not startling or phenomenal, but the increase of the output of the lode mines from $100,000 in 1892 to $7,050,000 in 1897, or five years with an increase of $2,750,000, or 65 per cent. during the past year, commands attention. That 1898 will see a substantial increase is assured from the amount of ore now in sight in the different districts, and from the fact that the amount of customs returns for shipments of ore for January 1898 were $1,193,458 as compared with $675,606 in 1897 (these shipments from West Kootenay only). The increase in the amount of gold (lode) was 43,882 ounces, or 70 per cent.: of silver, 2,337,682 ounces, or 75 per cent.; of lead, 14,641,158 pounds, or 65 per cent.; of copper, 1,506,624 pounds, or 40 per cent." Not only, it is important to observe, are gold properties now greatly in demand, but also silver and copper, as the money-making possibilities of the high grade silver ores, as found in the Slocan, Ainsworth and other camps, are acknowledged by investors but often ignored by speculators, who wish to cater to the public's *taste for gold*.

Some words on the subject of Mining Companies are instructive: "During the early part of the year, pending the enactment of the new Company's Act with more stringent regulations, a great many mining companies were registered with a capitalization that savored of the ridiculous, but the payment of $50 or $100 for the license on July 1st was more than a great many of these companies could stand, and they ceased to exist.

"A good many companies, organized solely to make money by the sale of stock, as the public was then worked up to such a pitch as to be willing to buy almost anything offered, have suspended with no assets, as they never possessed anything except bonds or options on property or unworked locations.

"However, strong companies—and the number is increasing—have been purchasing both 'prospects' and developed properties or mines, and mining operations are becoming more extensive, and more thorough and substantial work is being done.

"For the public, in buying mining stocks, it must be very difficult to decide what to choose. In many cases a company is judged by the personnel of its directorate, by no means a sure and safe way, or else by the most tempting offerings in the prospectus of large and speedy dividends, according to the high values in large bodies of ore stated to exist on the properties of the company. The public buys this stock either with the hope of selling out on a rise—so many times engendered by skilful machinations—or for investment, and the offers of a company, if very brilliant and enticing, can often be correctly judged by the query, that if these mines are so rich as claimed, why do the promoters wish to divide up such a good thing with anyone who will buy the stock?

"To the public at large it may be well to state in reference to the mining resources of this Province, that they now promise to become yearly more valuable, that British Columbia can now claim a place among the mining countries of the world, and that with favorable climatic and natural conditions, excellent laws and good government, and rapidly extending means of transportation and cheaper treatment of ores, many opportunities for the careful and proper investment of money are now to be offered. But it is also to be remembered that this is no longer a terra incognita, that there are many here already closely watching for and prepared to purchase any good claims that may be discovered, and it is quite absurd to suppose that any one, probably totally ignorant of mining affairs, can come here and in a few weeks pick up properties with phenomenally rich showings, as has been claimed by some who have come, bought and gone back to float companies by means of most specious prospectuses."

An interesting paragraph is devoted to Cassiar, that far northern district of the Province which stretches from the Peace River and Forts McLeod and Fraser to the Pacific, and to the confines of southeastern Alaska. Into this part of British Columbia, into Cassiar and Carriboo, "long known as an almost untracked wilderness, will now spread a great wave of prospectors, with the consequence that trails and routes will be opened up throughout this vast domain, and what discoveries will be made none can foresee. In earlier days were seen gold excitements at several points; but quartz ledges were not looked for and ignored. But now both placer and lode mines will be eagerly hunted for. Quite a number of men have, in the past, ventured into parts of these fastnesses, to return with favorable reports that were then not listened to, but will now be willingly received. The two railroad companies, with large land concessions, are preparing to offer large inducements and rewards to prospectors who will enter their territory, and may find placer ground or mineral-bearing veins. Hence, the activity in the north will be great, and the discoveries may be of great value." We have not space, at this time, to refer to the coal industry of the Province. That must wait for another issue.

MONTREAL HARBOR.

It was not too much for the chairman to say, in introducing Mr. Thomas Harling to his audience at the Board of Trade meeting in Toronto on Friday last, that the advantage of up-to-date terminal facilities at Montreal is a matter of vital interest to Ontario shippers. The strides that are being constantly made in increasing the size of ocean carriers render it necessary to provide wharves, storehouses, elevators, etc., of a size or on a scale proportioned to that increase. Any Atlantic port on this continent which desires to maintain its place or to win a higher place in the struggle for cheapest transfer of grain and other merchandise from car or canal boat to ship, must therefore offer the most modern facilities for the transfer. The plea for improvement of the harbor of Montreal made by Mr. Harling is one that ought to commend itself to Western Ontario business men. It is true that to those who are not familiar with other and greater ports, and who have long been proud of our chief city and her commerce, the news that Montreal was behind the age came with something of a shock. But it is quite evident that Mr. Harling knows what he is talking about.

The plans of 1889 for the improvement of Montreal harbor, although then thought adequate, are utterly unfit for the traffic of to-day. The increased tonnage of 1896 as compared with 1888 will alone show this. Not only did the tonnage of steamers increase from 742,006 to 1,210,000 tons, but the size of the average steamer grew from 1,400 tons to 1,800. To-day, the increase in size of steamers is greater still. A 5,000-ton steamer is no longer considered a big boat; 6,000 and 7,000-ton steamers are now common in Montreal harbor, and there is serious need for adequate means of handling with promptness the enormous cargoes they bring or take. Mr. Harling, himself an English shipper of great experience, declares that if the proper facilities existed, Montreal could double her export of grain. The statement is a striking one; it means the handling of 54,000,000 bushels where last year she only handled 27,000,000. And yet, the share of the whole obtained by the St. Lawrence route would even then be only one-fourth of the 200,000,000 bushels exported from this continent. It was quite in order for the Toronto Board of Trade to endorse the resolution passed by the Montreal Board of Trade emphasizing the importance of improving Montreal harbor.

WHO WILL PAY THE DUTY?

There is considerable difference of opinion as to the probable effect of the Dingley Act upon Canadian fleece wool. The bill became law after the clip of 1897 had been marketed, and until the growth of 1898 is in the market the problem must remain unsolved. There are good reasons to believe that the tariff juggling of Congress may not result in as great a disaster to Canadian wool interests as has been predicted. Owing to the unprecedented activity of American woolen mills during the eight months since the passage of the Dingley tariff act, it is estimated that between 300,000,000 and 400,000,000 lbs. of free wool brought in under the Wilson Act, and of domestic, have been manufactured into textiles, reducing the supply in the United States to that extent. The United States has always offered a better market for Canadian wool than Canadian woolen goods.

It is estimated that the falling off in imports of textiles since the passage of the Dingley Act represents 85,000,000 lbs. of wool, and that the increase in both population and purchasing power of the American people since 1892, will require at least an additional 40,000,000 lbs. per annum more than was adequate at that time. In spite of these facts the wool clip of the United States has steadily diminished and last year was 13,000,000 lbs. less than in 1896 and the smallest yield since 1879. The natural consequence of an increase in the duty on wool is a larger production of the staple. But the long coarse wool suitable to the manufacture of worsteds, with which descriptions the bulk of the Canadian wools come into competition, are by-products. They are grown on sheep whose economic end is mutton and not wool. As a consequence, an increase in the home production of these wools does not necessarily follow from the increase of the wool duties. The consumptive requirements of the American mills having increased, and the supply of that description of wool in which we are interested remaining unchanged, it would appear that the advantage rests with the producers rather than the consumers, and upon the latter must rest the burden of the tax upon imports.

GENERAL CONDITION OF MEXICAN TRADE.

BY A CANADIAN, RESIDENT IN MEXICO.

TRADE OF MEXICO WITH THE LEADING COUNTRIES FOR THE YEAR ENDING JUNE 30, 1873.

Country.	Imports.	Exports.
Great Britain	$ 7,021,096	$ 6,239,773
United States	5,117,530	5,783,265
France	3,322,145	2,302,208
Germany	2,683,101	401,321
Spain	961,525	391,445
All other countries	1,060,615	842,560
	$20,166,012	$15,960,573
Of the exports precious metals were		$12,686,857
	$20,166,012	$ 3,273.716

FOR THE YEAR ENDING JUNE 30, 1896 AND 1897.

	1896.		1897.	
Country.	Imports.	Exports.	Imports.	Exports.
United States	$ 42.293,230	$20,145,763	$ 46,261,186	$22,593.860
Great Britain	8,233,574	7,905,016	7,140,263	6,881,701
France	1,040,401	6,099,183	936,761	4.989,082
Germany	1,484,396	4,363,229	2,208,372	4,003,263
Spain	406,581	2,174,298	596,164	1,983,794
Belgium	500,196	420.015	567,162	479.850
India	....	142,629	....	210,845
Italy	22,221	150.369	5,382	184,186
Holland	61,977	134,284	27,953	132,728
Switzerland	....	158,210	460	163,298
All others	930,258	660,942	819,255	581,488
	$54,970,834	$42,253,938	$58,562,958	$42,204,095

Of the exports from Mexico to the United States, merchandise amounted to about $16,000,000 for the year ending June 30, 1896, and $18,000,000 for the year ending June 30, 1897, the balance being gold and silver coin and bullion.

All figures are reduced in this list to Canadian dollars, at the rate of exchange for the year in question.

Principal Places Exporting to Mexico.

It would seem that the geographical position of the United States gives her a great advantage over Canada, but the extent of this advantage is not nearly so great as would at first appear. The cost of freight from main shipping points in the United States is equal to, in nearly all cases, that from main points in Canada.

The Mexican trade and navigation returns do not give the countries from which the various imports come, nor to which the various exports go. Enquiry from various sources, however, shows that:

Wool—Comes from South America and England.

Tea—From England, New York and San Francisco. There are no through shipments of tea from producing countries.

Woolen Goods—From Europe.

Silk—From France, China, and Japan.

Drugs and medicines—From St. Louis, Mo., New York and Europe. A great many of the standard patent medicines are manufactured in the country.

Plough-shares—From Waynesboro, Pa.; South Bend Ind.; Louisville, Ky., and Atlanta, Ga.

Pumps and turbines—From Milwaukee, Chicago, Cincinnati.

Tools—From St. Louis and Europe.

Boilers engines and general machinery and leather belting—From Indianapolis, Barherton, Ohio, York, Pa., and Europe.

Pianos and musical instruments—From Europe, Chicago and New York.

Printing presses—From Chicago and Cincinnati.

Clocks and watches—From Europe and New York.

Carts and wagons—From South Bend, Ind., Cincinnati, Brighton, O., St. Louis and Sterling, Ill.

Wheelbarrows—From Columbus, O.

Rifles, guns, etc.—From Europe and Chicago.

Explosives—From San Francisco, Etna, Ind., Williamsburg, Del., Quebec, Canada, and Goes, O.

Manufactures of rubber—From New York.

Asbestos—From Europe.

Soap—From Europe.

Perfumery—From Europe.

Tents—From St. Louis.

Coal—From Baltimore, Alabama, Colorado, and England.

Coke—From Norfolk, Va., and Baltimore.

Horses—From Nashville, Tenn., California and Kentucky.

Hogs—From Kansas City.

Quicksilver—From Europe.

Condensed milk—From Illinois.

Cork—From Africa.

Hops—From Germany and San Francisco.

Cod liver oil—From New York.

Rope and cordage—From St. Louis.

Sacks—From Europe and St. Louis.

Lead and manufactures—From Chicago.

Zinc and manufactures—From Europe.

Paper—From New York, St. Louis and Europe.

Sulphate of copper—From Omaha, Kansas City and Europe.

Caustic soda and potash—From Europe.

Soda ash—From St. Louis.

Calcium carbide—From Merritton, Canada.

Wood pulp—From Detroit, Jackson, Mich., and Europe.

Woods—From Texas, Louisiana, Mississippi. Better grades: Chicago and St. Louis.

Barrels—From Chicago and St. Louis.

Wooden boxes for packing—From Florida, Saginaw, Mich, Wansaw, Wis.

Railway ties—From Texas.

Telegraph poles—From Chicago and British Columbia.

Railway coaches—From St. Charles, Minn., and Mount Vernon, Ill.

Canned meat and fish—From San Francisco and New York.

Lard—From Kansas City.

Butter—From San Francisco and Kansas City.

Cheese—From Germany, France and Holland.

Leather—From Europe.

Prepared calf, patent leather, kid and chamois—From France.

Carriages and harness—From St. Louis, Cincinnati and Brighton, O.

Boots and shoes—From St. Louis, San Francisco and New York.

Agricultural implements—From St. Louis, Chicago, Cincinnati, and Toledo.

Biscuits—From New York, Kansas City and France.

Groceries—From New York and San Francisco.

Candles and Paraffin—From Ivorydale, O., Whiting, Ind., and Europe.

Pails and buckets—From Detroit, New York and Chicago.

Furniture—From Chicago, Two Rivers, Wis., Three Rivers, Mich.

Steel and iron—From Europe, Pittsburg, Chicago and Milwaukee.

Pig iron—From Alabama.

Sheet iron and tin and iron girders—From Europe.

Stoves—From St. Louis.

Glass and manufactures and porcelain—From St. Louis and Germany.

Looking glass—From France.

Jute and linen—From Europe.

The greatest shipping point to Mexico in the United States is St. Louis, and next to her come New York, Chicago and San Francisco. The distance by rail from St. Louis and San Francisco to Mexico City is 2,500 miles; to Chicago is over 3,000 miles. The distance from New York to Tampico is 1,956 by water, and to Vera Cruz, 2,068 miles. The freight rates from New York to Mexico City are less for corresponding articles, than from St. Louis and San Francisco, and, of course, Chicago. Toronto and Montreal and surrounding and intermediate points can easily obtain competing freight rates with principal United States shipping points, via New York and water. The distance from Tampico and Vera Cruz ports in the Gulf of Mexico, to Barcelona, Spain, is 5,840 miles, and it is twenty-four days' journey to Liverpool by circuitous route.

RAILWAY AND STEAMBOAT COMMUNICATION.

Mexico has some forty railways, with total mileage of 7,384 miles. The Tehuantepec Railway is the only line crossing the Republic from the Gulf of Mexico to the Pacific, and is of very little importance, as it only crosses the Isthmus of Tehuantepec from Coatzacoalcos to Salma Cruz. The one other connection from the Pacific coast is the Sonora Railway from Guaymas to Nogales, on the Arizona border, which connects with the Southern Pacific at Benson, in the State of Arizona, which connects in turn with the Mexican Central Railway at El Paso, Texas, on the border line of the Republic of Mexico. There are, however, four lines in course of building, to the Pacific Coast, the Mexican Central being now within 90 miles of Penitas, on the Coast. The Cuernavaca Railway, running from Mexico City via Cuernavaca and Chilpancingo, will reach the coast. A road is in course of construction from Chihuahua, from Porfirio Dias, is already built to Durango, 125 miles from the coast. A road is in course of construction from Chihuahua, a point on the Mexican Central, to the Pacific coast, and will probably have Guaymas as its terminal. The four points of entrance to the United States, by rail, are Nogales, El Paso, Porfirio Dias and Laredo.

The principal Gulf ports of the country, with connections by rail, are Tampico, Vera Cruz, Coatzacoalcos and Progresso, and these connect with the whole interior of the Republic. On the east coast the White Star line of steamers connects San Francisco with all the Pacific ports. A United States shipping company has recently inaugurated a new line of steamers between San Francisco and the Pacific ports, touching at Lodos Santos, San Quintin, San Jose Del Cabo, Mazatlan, San Blas, Manzanillo, Acapulco, Puerto Angel, Salma Cruz, Tonala and San Benito.

On the Gulf side, the New York and Cuba mail connects New York with Tampico and Vera Cruz via Havana. They also touch at Progresso, Tuxpan, Fontera and Campecte. The steamers of the Mexican Gulf Steamship Co., and the Spanish Transatlantic Co. sail between New York and Vera Cruz, the former touching also at Tampico.

The Morgan Line, the Clyde Line and the Lone Star Line all sail between New York and New Orleans and Galveston, Texas, connecting with the Mexican International Ry. and the Mexican National Ry. at San Antonio, Texas.

The Campania Sud Americana de Vapores, sailing under the Chilian flag, but owned mostly by British subjects, and the

Pacific Steam Navigation Co., exclusively of a British corporation, which are both strong and successful lines, running between Valparaiso and Panama, have decided to extend their itinerary to San Francisco, stopping en route at principal Central American and Mexican Ports.

If the Pacific Coast Steamship Company, at present running between Vancouver, Victoria, Puget Sound and San Francisco, were to extend its route to the Pacific ports of Mexico, it would greatly facilitate Canada's trade with Mexico, as it would avoid trans-shipment at San Francisco.

A line of steamers doing a coasting trade betwen St. Lawrence ports and Mexico and Central and South America would be a greater advantage still.

If Canada is to build up trade with Mexico it is necessary that she follow the example of the United States and make a determined effort for the advancement of commerce.

It is necessary to make a careful investigation and study of the trade conditions of the country, and ascertain, as fully as possible, the classes of goods salable and the condition of competition which must be met.

The establishment of an agency and permanent exhibition for the display of Canadian merchandise, where goods can be seen and examined by intending purchasers, is, without doubt, to my mind, the first and most important step towards the advancement of trade. The merit of this method of inducing foreign trade will be obvious to those who have experience in attempting to sell goods without samples, and especially in a country where a foreign language is spoken.

A permanent exhibition would afford a continuous display of goods under conditions ensuring careful attention from buyers. It would also serve as a headquarters for representatives of exhibitors who may visit Mexico for the purpose of selling goods or prospecting the market. The trade conditions and methods of doing business in Mexico could be studied there with great facility, as it should be the duty of the agent in charge to gather complete and reliable information upon all matters relating to Canadian commercial interests, and to give advices of new enterprises likely to need supplies, as well as information regarding the products of Mexico for the benefit of buyers in Canada, and to suggest the best means of transportation, and the best mode of packing and shipping goods. Such information could also be promptly communicated to interested persons in Canada who might be desirous of obtaining the same. The standing of Mexican merchants could also be obtained through this medium, as both R. G. Dun & Co. and Bradstreets' Mercantile Agencies have representatives here. Business houses here are strong and reliable. "The Trader," the leading financial journal in Mexico, reports no mercantile failures during the past month. I propose dealing with Mexican Exports in my next.

W. L. M. LINDSEY.

City of Mexico, March, 1898.

To be continued.

COAL STATISTICS.

In the coal trade the statistics of supply on hand always exercise an important influence upon values. Mr. Frederick E. Saward is regarded as the authority on the coal industry on this side of the Atlantic, and his summary of the situation in the year 1897 is interesting. The anthracite trade, he says, shows a falling off in tonnage produced while the bituminous trade is on the increase. The total output of anthracite coal for the year was 46,182,699 gross tons, as against 48,523,287 gross tons for 1896, while the bituminous output was 145,520,936 net tons, an increase of 8,246,157 net tons over the preceding year. Pennsylvania's output of bituminous coal was 54,674,452 tons. Illinois followed with 20,072,758 tons, and West Virginia came next with 13,500,000, only 1,000,000 tons more than Ohio's output.

The export of anthracite coal from the United States for the fiscal year ending June 30, 1897, was 1,274,417 gross tons, against 1,394,381 tons for the previous year. The exports of bituminous coal for the same period were 2,384,069 gross tons an increase of 137,785 tons over the preceding year. The imports were 1,283,829 gross tons, as against 1,243,835. The imports from British North America were 836,835 gross tons, while the exports from the United States to British North America were 2,975,813 gross tons, a decrease as compared with 1896 of 70,152 gross tons. It is interesting to note in connection with this part of Mr. Seward's statistical review, that while British Columbia coal men are holding their own in the markets of the United States, the Nova Scotia producers have not been as fortunate. In 1896 the Dominion Coal Company shipped 173,620 tons of coal to the United States. Last year it shipped about 70,000 tons, showing a loss for the year in United States shipments of about 100,000 tons. The decrease in the export trade was, however, more than made up by an expansion in the home sales, and the total out-put of the year exceeded that of 1896 by 38,000 tons.

In speaking of the prices of anthracite coal, Mr. Saward says ; " Circular prices really amounted to very little during the entire year, and in this respect the season was a peculiar one. In January the list was supposed to be $3.75 for broken, $4 for egg and chestnut, and $4.25 for stove—merely nominal figures, and 5 per cent. off was the rule. At the close of the year it is said that anthracite could be had free on board at the New York loading ports at the following : $3.40 to $3.50 for grate, $3.75 to $4 per ton for egg, $3.85 to $4.10 for stove, $3.60 to $3.80 for chestnut, $1.65 to $2.15 for No. 1 buckwheat, and $1.40 to $1.70 for No. 2 buckwheat, according to the grade of coal offered. The tonnage record for largest monthly business was broken twice in the past year, and while a large proportion is now made up of the small coals, it is evident that there are strong competitors with anthracite, and that the demand for this fuel for domestic purposes is not increasing in proportion with the growth of population."

—A branch of the Bank of Hamilton is being opened at Morden, Manitoba.

—Notice of motion has been given, proposing an amendment to the by-law of the Montreal Board of Trade, governing the election of the council. At present the council consists of sixteen members, including the four executive officers ; the change proposed increases the number to twenty, including the four officers, president, two vice-presidents, treasurer and twelve members. The object is to have a larger number of branches of trade represented on the council, and it seems to us a good one.

—People write and talk about the decay of British trade, and are often full of apprehension lest the glory of her commerce must presently pass away, and Germany or the United States rise upon her industrial and commercial ruin. Still if we look at the last statement of the Imperial Board of Trade, and at other recent statistics, not much sign is apparent there of either decay or transfer of trade. On the Clyde the shipbuilding work now in hand represents 625,000 tons, as against less than 400,000 tons in the whole of 1897. And the issues of capital in the London market for new enterprises were £38,000,000 for the March quarter, the greatest for ten years. Then the aggregate gross receipts from imperial and local taxes for the fiscal year, which ended on March 31st, were £116,016,314 ($580,081,570), or £3,817,767 ($19,088,835) more than the receipts for 1896-97. The total amount constitutes a record, that is to say, it has never before been equalled. The chief increases were as follows : Customs £542,734, excise £900,256, estate duties £1,364,661, stamps £300,000, property and income tax £600,000, telegraphs and post-office £410,000. The "Old Country" will manage to do business for a while yet.

HOW TO DISPOSE OF A STOCK.

A subscriber writes asking the confidential advice of THE MONETARY TIMES, under the following circumstances : "A person has a stock of various merchandise in a village store, and he wishes to dispose of it to the best advantage, and quickly. Owing to lack of capital, etc., he finds it is not paying as it ought. Besides his health is giving way and his doctor has advised him out-door traveling. The question is how to sell out with least loss. He wishes to pay every one 100c. on the dollar, which he cannot do if crowded too closely, but hopes to do that with a reasonably quick sale at a fair price. Now, sir, would you advise selling all together or separate different departments, would you advise shipping say dry goods of clothing to auction rooms, or any other ? Please give me your straight, honest opinion and advice, as I believe you should be able to render as good advice as possible to obtain in the matter, and I shall feel deeply grateful. The following is a rough estimate and description of the stock, which is all in fair condition: Groceries and crockery. say. $1.500; clothing. $1.000; dry goods. etc.. $2.000; boots and shoes, $1,200; leather and findings. $500; then the fixtures are worth about $250 or thereabout."

[Should not advise the sale of all kinds of stock together and at once. for it is likely possible to get a better price for the whole if offered separately. Sending merchandise to auction rooms to be sold without reserve is in a measure "a gamble." Sometimes. it is true, good prices are realized; but at others we have known of cruel sacrifices by this means of selling. What may be suggested is that your friend who wishes to give up business and dispose of his stock, and thereby lessen the number of competing merchants in the town, should go to the other store-keepers of the place and offer them the chance of buying his merchandise. and so protect them from the bad effects of a slaughter sale or an auction sale. This plan has repeatedly been suggested by boards of trade and associations of merchants and we have heard of it being carried out with satisfaction to the merchant immediately concerned, and with benefit to those of his competitors who would have been injured had his goods come to the hammer in their midst. It would not be a very heavy burden for the various store-keepers of a place the size of the town you describe to dispose of $6,000 worth of groceries. crockery. clothing. boots and shoes. general dry goods and shoe findings. Of course one could hardly expect to get much for the $250 worth of fixtures—Ed. MONETARY TIMES.]

CANADA LIFE ASSURANCE COMPANY.

That Canadian companies do an increasing proportion of the life underwriting of Canadians, is a circumstance to which no resident of the Dominion should take exception, provided that it is economically and safely done. That as a rule it is so done we are happy to believe. Among the companies that have set a good example in the care and skill with which life underwriting should always be done. the Canada Life is conspicuous. And that its methods have commended themselves to the insuring public is tolerably clear from the way in which its business has grown and continues to grow. The last annual exhibit—the fifty-first—manifests that the company's popularity is enduring.

The new business secured during 1897 is represented by 2,608 policies for $5,291,636. as compared with 2,116 policies for $4,492,656 in the year 1896. The net premium income last year was $2,087,994. and the receipts from interest on investments. rents, etc.. brought the total income to almost three millions of dollars ($2,957,041). There was paid for death claims. endowments and surrender values. $1,044,826. for profits to policy-holders, $218,481; and after deducting all other outlays, the sum of $1,272,486 remained. which sufficed to increase the company's assets to $18,678,915. After setting aside a reserve fund at four per cent., there remains a surplus of $1,564,082 over all liabilities. Existing assurances amount to $72,719,000. These are handsome figures. which it has taken half a century to reach, and serve to confirm the high standing of the Canada Life.

With a modesty that is characteristic of the man, Mr. A. G. Ramsay. F.I.A., the president. surveys the report of the year's business in his annual address. And while he comments upon the increased business done, and the large addition made to the profit fund, he does not do so in extravagant or invidious terms. Mention is made by Mr. Ramsay of the recent lamentable failures of companies doing life assurance on the assessment system, and the anxiety these have occasioned to thousands of insurants under that system in Canada and the States. He repeats language he had used a dozen years ago respecting this system, saying: "It can only offer the uncertain hope of a cheap assurance for a few years."

ROYAL VICTORIA LIFE.

The first annual meeting of the Royal Victoria Life Insurance Company was held in Montreal last week, and a statement of the business of the company for its first three months. ended with December, 1897, was presented to the shareholders, who expressed their satisfaction with the progress made. And well might they, for the amount of business already secured indicates that the company is sure of a good share of the favor of the insuring public. At the same time we are glad to learn that the Royal Victoria is not disposed to take risks that are otherwise than sound, nor does it propose to pay too much for the risks they get. The five directors, retiring by rotation, Messrs. Andrew F. Gault, Samuel Finley, Dr. T. G. Roddick, M.P., Rev. R. H. Warden, D.D., and Hon. James O'Brien, were re-elected for three years. At a subsequent meeting of the board, Mr. James Crathern was re-elected president, and Sir J. A. Chapleau and Mr. Andrew F. Gault, vice-presidents, while Dr. T. G. Roddick is medical director.

MANCHESTER FIRE ASSURANCE CO.

The seventy-fourth annual report of this well-known fire insurance company has been issued. The directors report the net premiums of the year 1897 to have been, including those of the "American," of New York, £850,599. This compares favorably with the £847,479 which constituted the combined premiums of 1896.. The losses were not excessive, their amount combined, including full provision for all unsettled claims, amounted to £491,754. This is about 57.8 per cent. After paying all expenses, commissions and taxes, the fire account for the year shows a surplus of £61,754, the income from interest, etc., on investments, yielded £24,358, balance carried to funds £86,113. After writing off certain sums and providing for dividend and interest, there was added to the funds £47,608, which is a very satisfactory result. We observe that the capital accounts and reserve funds now stand at £801,891, or say, four millions of dollars. The growing financial strength of the company during the past five years is indicated by the fact that at the close of 1892 the funds in hand were but £463,689, or say $2,318,495.

THE MARCH FIRES.

The fire loss of the United States and Canada during the month of March, compiled from the daily records of the "N.Y. Journal and Bulletin," shows a total of $7,645,200. This unusually moderate aggregate brings the figures for the first quarter of 1898 much below those for the same period in 1897, and represents the lightest month since last November. The following table gives comparisons:

	1896.	1897.	1898.
January..	$11,040.000	$12,049,700	$9,472,500
February....	9,730,100	8,676,750	12,629,300
March..	14,839,600	10,502,950	7,645,200
Totals...	$35,609,700	$31,229,400	$29,747,000

During March there were 171 fires of a greater destructiveness than $10,000 each. It is thought by some observers that the remarkable absence of high winds in March has much to do with the satisfactory lessening of the fire waste and it is probable that this is true. The fire underwriters are fortunate in having such a diminution of their burden at this time when there is a very general complaint of reduction in premium income. If March had been an expensive month for the insurance companies, they would have lamented loudly, for their receipts have been unusually light during the past sixty days.

INSURANCE ITEMS.

Alfonso, King of Spain, who was surnamed "the Wise," said that the best things in the world are "old wood to burn, old wine to drink, old friends to carouse with, and old books to read." The remark is not far from the truth to-day; but if Alfonso had known anything about insurance he might have found one more unprecedentedly good thing. If you would have peace with plenty, insure to-day.

The Lafrance steam fire engine secured by the city of Montreal, and which is to be tested this week, is said to be the largest ever turned out of those shops.

Mr. Joseph A. Frigon, formerly a well known insurance agent at Three Rivers, Quebec, has been appointed inspector of the Lancashire Insurance Company for the whole Province of Quebec and for Eastern Ontario, with headquarters in the Temple Building, St. James street, Montreal. We understand that he will enter upon his duties at once.

The opera house at St. Thomas, Ont., was burned the other day. There were reports of incendiarism. Accordingly, the chief inspector of the Provincial Detective Department went to St. Thomas to investigate. We are told that the Underwriters' Association has threatened to raise the insurance rate if an investigation is not held. And yet the Mayor of the town, on the advice of the solicitor, refused to sign the requisition, when application was made last Wednesday for a fire inquest. The citizens, we are told, are naturally indignant.

We are told that Mr. Richard J. Kearns has been appointed agency director of the New York Life Insurance Company in Toronto.

R. J. M. Glassford, minister of Chalmers Church, Guelph, writes us: "When the P.P.I. was absorbed by the Mutual Reserve Association, of New York, there was a reserve of over $100,000. I have a number of friends in the Mutual Reserve (because they held policies in the P.P.I.), and for them ask if anything can be done to secure a pro-rata distribution of any reserve the New York Co. may have in our Canadian banks? It seems to be an outrage to allow matters to go on as they have been for some time past, without an effort being made to secure some dividend for those who have been humbugged."

There are some life assurance canvassers whom the average man never dislikes to meet; there are others who make themselves individually a nuisance and impel a business man to hide from them—more's the pity. We have known some men of the first-mentioned class who were always delightful, generally instructive: such an one in days gone by was R. W. Gale, long the Canadian representative of the Equitable Life Society of the United States. Another not unlike him is Thos. Kerr, chief inspector in Canada, of the Standard Life Assurance Company, of Edinburgh, who is with us unto this day. Kerr never bores anybody; he has too much tact for that. But he contrives to get your attention, all the same, and he does somehow rake in the policies. We are told that he starts to-morrow for a trip to the Maritime Provinces and Newfoundland, and we hope he will write a story of the trip, as he is quite able to do.

The granite lion, which is to adorn the drinking fountain being erected on Dominion Square, Montreal, by the Sun Life Assurance Company of Canada is modelled after the famous lion by Bartholdi, the French sculptor. It is a spirited piece of work and does Mr. George Hill, of Montreal, great credit. It will be placed on its pedestal very soon.

There was a bill before Parliament last week to incorporate the Victoria Fire Insurance Company, the charter members being Samuel H. Ewing, Allen R. Macdonald, and Jas. A. Wright, of Montreal; Wm. Pugsley, of St. John; and J. D. Reid, of Cardinal. Coming before the Standing Committee on Banking and Commerce, the bill was however amended by the addition of the word "Montreal." This was done because of objections taken by the Victoria Mutual Fire Insurance Company, of Hamilton, and the bill passed. The capital stock is a million dollars. $300,000 stock must be subscribed and 25 per cent. of it paid up before the election of directors. Before commencing business $80,000 of stock must be paid in cash into the funds of the company.

We hear of a piece of enterprise on the part of the London & Lancashire Life Insurance Company. That company has bought the corner of the block lying on St. James and St. John streets, Montreal, and it is the intention of the company to erect a handsome fire-proof building on this site. It will be of stone, to be imported from New Brunswick or Perth, and six stories high. The premises are to be ready for occupation by the first of May, next year.

FOR GROCERS AND PROVISION DEALERS.

The tariff changes are from 50 cents per 100 lbs. duty on raw sugar to 65½ cents; refined yellow from $1.00 to $1.08 per hundred; granulated from $1.00 to $1.24½. After 1st August next sugar will be on the preferential schedule.

The sugar trade has been somewhat unsettled as a result of the budget announcement altering the sugar duties. Values have not, at the time of writing, been altered to the new basis. There is said to be a considerable quantity of foreign refined sugars in store here.

It is said that Lever Bros., the well-known English soap manufacturers, were offered $100,000 in cash and many acres of land to locate their American plant at a certain spot; but for all that, preferred, on business principles, to purchase a ready-going establishment in Boston.

Latest advices from California say: "The killing frost was not as general as reported, and, while it was fatal or almost so, in many cases, some ranches in sections where frost was most severe escaped with only slight damage, and if nothing further happens will have enough to go around. Apricots suffered most of all and pears and prunes the least."

Here is a scheme for popularizing a particular cigar. The "San Francisco Grocer" tells it: "Messrs. So-and-so have resolved to advertise their King Billy cigar * * * Mr. Metz, director of the famous Primrose & West Minstrels, and composer of the popular song, "A hot time in the old town," has composed a King Billy quickstep and dedicated it to Messrs. So-and-so, who will, in the near future, compliment their friends and customers for the cigar with a copy of the new march.

Mr. Thos. Martindale, the Philadelphia jobber, makes the suggestion that the average retail grocer, doing business in towns of from 5,000 to 10,000 people, should sell his own brands of tea, coffee, oatmeal, laundry soap, and such like; in the case of the first three, buying his own bags and filling them from bulk, and in that of the last-named having a manufacturer use his own die. The idea is that if the grocer pushes these brands properly he can get more money for them than for the well-known advertised brands.

As a fruit-distributing centre, Toronto is gaining prominence. The Wednesday auctions of the Toronto Fruit Auction Co., which, by the way, is composed of two prominent wholesale houses, are well attended, and the results are said to be satisfactory to both sellers and buyers. In the sale of fruit by auction there is considerable saving in handling and the work of finding purchasers. The loss from waste is distributed over the retail trade, and the importers can in this way afford to take lower prices for the fruit. There is a continuous operation of sales, since the winter supply of oranges is scarcely exhausted, when the small fruits, peaches, pears and the like are on the market.

WITH THE DRY GOODS TRADE.

The wholesale milliners of St. John, N.B., opened their warehouses to the retail trade on March 29th with, it is said, satisfactory results.

The Japanese raw silk markets, by recent cable advices were quiet and rather inactive, but from Milan came reports of improving conditions.

The cold weather of the past few days has somewhat reduced the ardor for spring goods which was expected to be all-consuming when April was ushered in.

Dry goods men should remember, and might remind their customers, that all closets and clothes presses need frequent sunnings and airings. Clothing, too, should be exposed now and again, for it is one of the most sweetening measures in the world.

There has been a larger business than usual done this year in fabric gloves, which is accounted for in two ways: the better class of goods taken by retailers, and the gradual elimination from the market of extremely cheap grades in kid.

English textile manufacturers are taking steps to meet the strong trade unions in that country with strong employers' unions. This step is inspired by the fact that the manufacturers believe that to retain their present prestige they must secure lower wage schedules from the operatives. The movement appears to be an early sign of trouble in store.

It appears that the manager of the Dominion Cotton Company is having trouble with the Valleyfield town council in regard to taxes, and the company think of building their extensions elsewhere, for they have had offers for their new mill from Three Rivers, Alexandria, Carillon, Sherbrooke, Quebec, and, as we have elsewhere noted, from Huntingdon.

The spring openings of the Halifax wholesale millinery houses were held March 23rd and 24th. The weather was not favorable to a large attendance of buyers; nevertheless, there was a representative gathering in the city from different parts of the Maritime Provinces. Some of the visitors came very long distances, several being from Cape Breton, and one or two from the north shore of New Brunswick.

American authorities are unanimous in predicting a phenomenal parasol season this year. The "Economist" says: "The parasol world is a world of business to-day. Umbrella people have not been so largely in it, as far as pressure is concerned. In fact, umbrella styles, that is, of the finest variety of silks, have not been sold to such a great extent as formerly. It is to be a parasol season, and everybody can see it."

In Leeds there is apparently a somewhat brighter situation among textiles. A recent report says of that market: "At present most business is done in medium and low-grade fabrics. Some large colonial orders in these branches are to hand. Because of this, some additional machinery and labor has been set on within the last day or two. Prices are firmer a little than they were a week ago of fancy tweeds and medium and low serges in several quiet colors. Best worsted coating makers are taking orders more freely for Canada and France."

The annual general meeting of the shareholders of the Dominion Cotton Mills Company, Limited, has just been held at its offices in Montreal, when some forty gentlemen were present. The customary reports were submitted to the meeting, which appeared satisfied with their tenor. The gentlemen whose names follow were elected directors for the ensuing year: Messrs. A. F. Gault, Jacques Grenier, S. H. Ewing, Hon. J. O. Villeneuve, C. E. Gault, Samuel Finley, Charles R. Whitehead. At a subsequent meeting of the members of the board, Mr. A. F. Gault was nominated president; Mr. Jacques Grenier, vice-president, and Mr. P. C. Shannon, secretary and treasurer. Messrs. Charles R. Whitehead and Leslie G. Craig are the joint managers of the company.

ENGLAND'S PRINTED CALICOES.

Considerable comment is often made as to the remarkable variety in pattern which the British manufacturer of printed goods is in a position to offer the trade. The key to the situation lies in the enormous output of goods. An interesting summary and analysis of the official figures relating to printed calicoes is supplied by a correspondent of the Manchester *Guardian*. From this it appears that in 1896 England printed for export alone 1,072,848,800 yards, equal to 35,761,726 pieces of 30 yards, giving an average production for each machine in the trade of 39,735 pieces per annum, or 794 pieces per week for each machine. The price comes out for cloth and printing 2 37-64d. In 1897 there were printed for the same markets 876,797,200 yards, equal to 29,226,573 pieces of 30 yards, an average of 32,474 pieces per annum, or 649 pieces per week for each machine. The price comes out at 2 19-32d., a difference in favor of 1897, but there is a less quantity per machine. Assuming 10 per cent. as the minimum production for the home trade, the net result would be for 1896 1,180,130,680 yards, or, say 43,708 pieces of 30 yards per annum, or 874 pieces per week for every machine in the trade. For 1897 the net production would be 964,476,920 yards or 36,388 pieces per machine per annum, or say 727 pieces per week. These and similar goods are sent all over the world, to Turkey, Bombay, Brazil, Australasia, Bengal, Burmah, Germany, Holland, Belgium, France, Portugal, Italy, Austria and many other countries. It will readily be seen from this what Canadian manufacturers mean when they talk of the ruinous competition of British textile manufacturers.

SOME BLUE BOOK FACTS.

One does not look to be amused by the contents of a Blue Book but he may occasionally be surprised by them, or if not exactly surprised, we will say aroused to a mild interest. Formerly we have shown some curious fluctuations in our trade with the West Indies. On another page of the same Trade and Navigation Return for 1897, we find a statement of merchandise received from foreign countries and trans-shipped at Montreal. The total value of such merchandise varies much in different years, but the highest point of recent years was reached in 1896, which was $14,191,628. Ten years before, namely, in 1886, the amount was only $5,745,606, whence it rose to $13,202,000 in 1891 and declined to $9,000,000 and $8,000,000, rising to $14,000,000 in 1896, as we have said, and declining to $11,077,825 last year. The bulk of this very considerable business consisted of grain, flour, cattle, dead meats, dairy produce, tallow and lard from the United States, taken by the St. Lawrence water route or by Canadian railways eastward to tide water, destined for Britain, Germany, Belgium and Newfoundland. The share going to Britain, for example, exceeded nine millions of dollars in value; that to Germany four hundred and twenty thousand; to Belgium forty-two thousand; to Newfoundland a million and a quarter, the total thus shipped eastward being $10,630,000. But the thing that is not so generally known is that there was received at Montreal *from seaward* and shipped to the United States half a million dollars' worth of goods, such as tobacco, $38,485; cotton goods, $19,431; earthenware, $107,805; jute goods, $26,534; wines and liquors, $22,400; tin goods, $117,991; woolens, $52,090, besides other manufactured goods and household effects.

—A number of the prominent business men of Oshawa met last week to consider the formation of a board of trade for the town. The mayor, Mr. Hare, occupied the chair. About a dozen persons spoke, and it was the unanimous expression that the place would be better of a board of trade. Accordingly, a resolution was carried that such a body be formed and officers were chosen as under: President, Mr. McLaughlin; vice-pres., Mr. E. J. Rowse; 2nd vice, Mr. D. Cinnamon; sec.-treas., Mr. T. H. Everson; and a council or executive committee consisting of the following: Messrs. L. Cassells, Miller, Ellis, Burns, Hawkins, Grierson, Murton and others.

—Some changes made in the premises of the Bank of Nova Scotia branch, in St. John, have greatly improved their appearance, besides yielding additional room, which the increasing business of the bank at that point rendered necessary. Instead of the apartment of Mr. Blair, the manager, being at the rear of the building, as it used to be, he now has a cheerful room near the entrance, finished in quartered oak and with plate glass windows. The tellers' cages, of bronzed metal, are very neat, and the quarters of the clerks generally improved. Woodwork and fittings were prepared by the Canadian Office and School Furniture Company, of Preston, Ontario. Nor are the staff the only persons to benefit by the new arrangement; the customers of the bank and the public generally have a lighter office and more space.

—For many years, the departure of the grain fleet from Chicago for Buffalo on the opening of navigation on the Great Lakes in the spring, has been an event of great interest. Year by year the condition of the ice in the Straits of Mackinac is watched by seafaring men and grain dealers—and by marine insurance men as well. In the old days, when vessels were comparatively small and of light draft, and the era of 20-foot channels and steel steamers of 4,000 tons capacity had not dawned, the fleet was more numerous and more picturesque. This year the Straits were reported open on 1st April, a very early date, but we are told the liners do not purpose leaving Chicago and Milwaukee till April 15th. The quantity of grain at present afloat on Lake Michigan is stated at 1,693,000 bushels of wheat, 8,254,000 bushels of corn, 2,500,000 bushels of oats, 389,000 bushels of rye, and 93,000 bushels of barley. The opening of the straits is the earliest in sixty years, and the grain fleet, which will possibly begin to move next Saturday, is the largest in Chicago's history.

So far, there appears to be a not altogether unjustifiable opinion abroad, that the present year is an unfortunate one for those branches of insurance included in the names of fire and marine. The fire losses have in the short ten weeks been unusually heavy in this country generally, but it is an open question how much of the losses will actually fall on the British insurance companies. If we turn to the experience of the marine insurance business, the reports to date are still more unsatisfactory. January and February of the present year of grace are believed to have presented to the underwriters a volume of claims, in connection with shipping, that is as unprecedented as it is unwelcome.—Insurance Spectator.

Correspondence.

WEST INDIA TRADE.

Editor MONETARY TIMES.

SIR,—Thanking you for the interest you are, from time to time, taking in the West India trade, I beg to further trespass upon your space, by forwarding copy of a recent letter received from Messrs. Sandbach, Parker & Co., leading merchants of Georgetown, Demerara, which will give some further earnest of the desire to increase trade with Canada. I trust that the trade of Canada, or those desirous of establishing profitable and permanent relations with the West Indies, will back us up in this matter, for I am confident that their interests will, in the long run, be better served through these agencies, which will be conducted strictly on the lines of a brokerage business.

J. A. CHIPMAN & CO.

Halifax, 29th March, 1898.

[Copy of letter from Sandbach, Parker & Co., Demerara.]

Demerara, 25th Feb., 1898.

Messrs. J. A. Chipman, & Co.,
Halifax.

Dear Sirs,

We are in receipt of your three letters dated 26th ult. Memorandum of agreement, and reprint of Mr. Chipman's letter of Oct., '97, to the *Toronto Globe*, all relative to the establishment of agencies for the purpose of fostering and encouraging closer trade relations between the Dominion and West Indian Islands.

We have perused all the documents with interest, and after giving the matter careful consideration, we are of opinion, that if you can get your manufacturers and producers to confine their trade to the West Indies and British Guiana, through the proposed agencies only, there is every prospect of the plan proving a success, and we will do our utmost to further its interests.

As we are in no way connected with the American provision trade, our endeavors will naturally be confined to pushing Canadian products to the front, and we trust in time a good and profitable trade will result between the two countries.

The extracts from Mr. James' letters you have sent us, are iteresting, and we agree with him that to make this agency business (which cannot be carried out without extra expense), successful, there should be a separate apartment, where Canadian samples could be exhibited, and where buyers could obtain at first hand all information regarding cost of the different articles, freight, etc., etc., all which information must be fully supplied by you to us. With regard to the draft Memorandum of Agreement, the clauses appear ample, and seem to cover the whole ground. (What follows is in reference to agreement, which we will omit).

We have touched upon all the principal items in the agreement, and we would ask your particular attention to remarks under paragraph 10. Canada ought to be able to compete successfully against the United States in this market, in many articles too numerous to mention, and we are very glad to find that at last an attempt is to be made to do so.

Samples of your manufactures and products should be sent us as early as possible with pro-forma of invoices giving full particulars of cost, freight, etc.

There are many articles in the hardware and other lines which can only be brought to the attention of our dealers, where samples are received and exhibited.

You, in Halifax, if not aware already of quality and the way American goods are packed and sent to the West Indies and this place, are close to New York and can easily see there exactly what is wanted, which would be far better than written details sent by us.

Under separate cover we send you our market report, which enumerates the chief articles imported, and gives full information as to duties, etc.

We await your reply to this letter, before signing the agreements sent to us, as we wish to feel sure that we thoroughly understand each other before doing so.

Our chief products are, as you know, sugar and rum, to which must also be added coffees, cocoa and timber. Samples will be sent to you at an early date.

We are, dear sirs,
Yours faithfully,
Sandbach, Parker & Co.

BRITISH LIVE STOCK.

An interesting letter from Liverpool on this subject, bearing date 26th March, appears in Monday's Montreal "Gazette." We quote a portion, showing the increase of cattle and dead meat import for the quarter :

It used to be the case that, during Lent, the demand for meat of all classes fell off very appreciably, but it is not so now, as our live stock and fresh meat imports seem to go on increasing steadily. The mere fact that every beast, every sheep, and every ounce of meat is sold at a loss to the exporter, makes no difference. A shipping agent in his office the other day declared that the imports were very much less this year, "as neither Canada nor the United States had surplus stocks to send." When he was told that locally his figures might be all right, but that taking the United Kingdom, he was all wrong, he got quite angry and said he made it his business to keep track of such things and didn't open his mouth at random. The idea with him was that freights were going to rise, because shipments were less, and more money was going to be made by the sales on this side. What are the actual facts? Why, that more cattle, sheep, beef, mutton and pork have already been received this year than last, and it looks like being a record. Here are the figures (official), made up to 19th March last :—

Live stock imports into United Kingdom for 12 weeks of 1898, and corresponding period of 1897 :—

	Cattle. No.	Sheep No.
1898	124,003	155,913
1897	109,349	113,519
Increase	14,654	42,394

Fresh meat imports in the United Kingdom for 12 weeks of 1898 and corresponding period of 1897 :—

	Beef. Cwt.	Mutton. Cwt.	Pork. Cwt.
1898	610,533	610,231	140,949
1897	558,563	586,479	101,735
Increase	51,970	23,752	39,214

Here we see that over 1,000 head of cattle weekly have been landed into this country more than last year; over 3,500 more sheep, and something like 490 tons more fresh meat. And shipping people will argue blindly that this means increased freights. Bosh! I hope my Dominion friends will not believe such tales, nor assist in "the expansion of traffic" for either subsidized lines or corporation canals. To put the thing in a nutshell: What's the use of shipping either cattle or meat that can only be handled to lose money? Railways, steamships, insurance brokers, feed men, and salesmen all have their bite out of the pie first, and when the shipper comes to get his share—there's nothing left. And yet, "the increasing expansion" of trade is pleasantly referred to as "wonderfully enterprising"—"remarkable energy" and "a great future is evidently, etc., etc." That great future has been trotted out so often, I am surprised anybody can be found with imagination enough to believe in it.

HONEST CRITICISM SUSTAINED.

A lawsuit, which was heard before Lord Chief Justice Russell and a jury in London recently, possessed deep interest for the newspaper world. It was a case against a newspaper, the "Financial Times," for damages for its criticism of a printing or typesetting machine, the invention of Mr. Wicks, the well-known journalist and novelist. Mr. Wicks, who was formerly manager of the "Glasgow Evening News," induced the proprietors of that paper to adopt his typesetting machine, and a number of them have been in daily use in that office for some time back, with satisfactory results, as the evidence from the plaintiff showed. The "Financial Times" alleged that the invention was of no practical value and that it had not been adopted by the press, and was, in short, a failure. The ground of the charge was that the criticism was incorrect, not that it was corrupt or dishonest. The Lord Chief Justice in directing the jury, said :

"If the jury found that the article was an honest one, he would not advise them to look for inaccuracies unless they were very serious and in themselves constituted libels. The duty of journalists was to criticize the invention, which claimed public support, and to criticize it severely. A journalist honestly criticizing such appeals to the public as are made by companies deserved to be protected by the law. If ever there was a time when a jury should hold the shield of protection over an honest journalist, who had honestly criticized the scheme of a company, and its claims to public support, this was the time."

These remarks of Lord Chief Justice Russell will undoubtedly have great weight with the judicial bench of Canada and throughout the British Empire, and will probably be taken as a precedent in all future charges of a similar kind. It may be interesting to our readers to learn that the charge brought by Mr. Wicks was not sustained, as might have been expected after such direction from the Lord Chief Justice.

THE LIVINGSTONE FLAX MILLS.

A proposition has been made for the formation of a joint stock company, to take over the Livingstone flax mills, in Listowel, Ont. James Livingstone, of Baden, is promoting the matter. The value placed upon the farm and mills by the Livingstones is $9,000, and they will take in payment therefor $3,750 in cash, and $5,250 in stock in the proposed company. It is estimated that the company can be floated with a capital of $12,000 with paid-up stock, from the neighborhood, of about $8,000 or $9,000.

The largest advertising sign in the world is said to be on the hillside of an islet off the Grand Canary, north-west of Africa. It is several feet above the level of the sea, and contains four words in letters each 15 feet wide and 30 feet high, each bar of the letters being 3 feet 3 inches broad. The sign is 750 feet long.

THE BUDGET SPEECH.

Mr. Fielding presented his budget to the House of Commons at Ottawa on Tuesday last. We quote the concluding portion of it, as also the Tariff Resolutions as we find them in the "Mail" special of Wednesday morning:

With a view of increasing the revenue and assisting the West Indies, the Government proposed to return the polariscopic system formerly in use.

"We propose," said Mr. Fielding, "to begin at a limit of 75 degrees by polariscopic test, and charge for that degree, or anything below it, a duty of 40 cents per hundred pounds, adding 1½ cents for each additional degree. The average test of raw sugar used is 92, which will make the duty 65½ cents per hundred pounds, as against 50 cents under the present tariff. The preferential tariff, as regards West India sugar, will take effect August 1st. A reduction of 25 per cent. on 65½ cents will leave the preferential rate at 49 1-8 cents per hundred, as against 50 cents at present. In the case of fractions of the degree, less than half a degree will not count, and over half will count one. The effect of this on the revenue can only be guessed at. Upon all sugar from the West Indies a little less duty will be received than now, but whatever may come from other countries will pay an increased duty of 15½ cents per 100 pounds. Our hope and desire is that we shall largely increase the consumption of West Indian sugar, but no estimates can be given as to how far this desire will be realized. With respect to the duty on the refined sugar, the polariscopic test will also be applied. The duty will be $1.08 per hundred pounds on sugar testing 88, or anything below, with 1½ cents additional for each additional degree. On yellow sugars testing at 88 degrees the increase will be 8 cents per hundred pounds. On granulated sugar testing at 99½ degrees, the duty will be $1.24½ per hundred, as against $1 at present. The increase of duty on refined sugar will vary from one-twelfth of a cent a pound on the yellow, or soft sugars, to 24½ cents per hundred on granulated. An increase of a quarter of a cent on the higher sugar and of 8 or 10 cents per hundred on the cheap refined sugars."

Mr. Fielding read the resolutions, and concluded his speech with a glowing picture of the present prosperity and future prospects of the country. He referred to the warm welcome the preferential tariff had received in the Mother Country and all over the Empire, and in this connection quoted the following from a despatch from Mr. Chamberlain: "I desire to add, in conclusion, that the action of the Dominion Government and Parliament in this matter, though unfortunately its full effect will be temporarily postponed, has been warmly welcomed and appreciated by her Majesty's Government, and the people of this country, as a measure, which cannot fail to result in material benefit to the Mother Country and to Canada, and to weld together still more firmly the ties which now unite them." (Great cheering.)

In view of Mr. Foster's illness, the Government agreed to the adjournment of the debate, and the House rose at 9.30.

TARIFF RESOLUTIONS.

Ottawa, April 5.—(Special.)—Following are the tariff resolutions:

That it is expedient to repeal section six of "The Customs Tariff, 1897," and to substitute the following section therefor:

6. The importation into Canada of any goods enumerated, described, or referred to in schedule C to this Act is prohibited: and any such goods imported shall thereby become forfeited to the Crown, and may be destroyed or otherwise dealt with as the Minister of Customs may direct; and any person importing any such prohibited goods, or causing or permitting them to be imported, shall for each offence incur a penalty not exceeding $200.

PREFERENTIAL TARIFF.

That it is expedient to provide that section seventeen of the Customs tariff, 1897, shall be repealed on and after the 1st day of August, in the present year, 1898, and that the following section shall be substituted therefor:

17. Articles which are the growth, product, or manufacture of any of the following countries may, when imported direct into Canada from any of such countries, be entered for duty or taken out of warehouse for consumption in Canada at the reduced rate of duty provided in the British preferential tariff, set forth in schedule D to this Act.

(a) The United Kingdom of Great Britain and Ireland.

(b) The British colony of Bermuda.

(c) The British colonies commonly called the British West Indies, including the following:

The Bahamas, Jamaica, Turk's Island, and the Caicos Islands, the Leeward Islands (Antigua, St. Christopher-Nevis, Dominica, Montserrat, and the Virgin Islands), the Windward Islands (Grenada, St. Vincent, and St. Lucia), Barbadoes, Trinidad, and Tobago. British Guiana.

(d) Any other British colony or possession the Customs tariff of which, on the whole, is as favorable to Canada as the British preferental tariff herein referred to is to such colony or possession. Provided, however, that manufactured articles to be admitted under such preferential tariff shall be bona-fide the manufactures of a country or countries entitled to the benefits of such tariff, and that such benefits shall not extend to the importation of articles into the production of which there has not entered a substantial portion of the labor of such countries. Any question that may arise as to any article being entitled to such benefits shall be decided by the Minister of Customs, whose decision shall be final.

2. The Minister of Customs, with the approval of the Governor-in-Council, shall determine what British colonies or possessions shall be entitled to the benefits of the preferential tariff under clause D of this section.

3. The Minister of Customs may, with the approval of the Governor-in-Council, make such regulations as may be deemed necessary for carrying out the intention of this section.

That it is expedient to provide that secschedule D to "The Customs Tariff, 1897," shall be repealed on and after the 1st day of August, in the present year, 1898, and that the following schedule shall be substituted therefor:

Schedule D.—British Preferential Tariff —On articles the growth, produce, or manufacture of the United Kingdom of Great Britain and Ireland, or of any British colony or possession entitled to the benefits of this preferential tariff under section seventeen, the duties mentioned in schedule A shall be reduced, as follows: The reduction shall be one-fourth of the duty mentioned in schedule A, and the duty to be levied, collected, and paid shall be three-fourths of the duty mentioned in schedule A.

Provided, however, that this reduction shall not apply to any of the following articles, and that such articles shall in all cases be subject to the duties mentioned in schedule A, viz.: wines, malt liquors, spirits, spirituous liquors, liquid medicines, and articles containing alcohol; tobacco, cigars and cigarettes.

Provided, however, that this reduction shall not apply to any of the following articles, and that such articles shall in all cases be subject to the duties mentioned in schedule A, viz.: wines, malt liquors, spirits, spirituous liquors, liquid medicines, and articles containing alcohol; tobacco, cigars, and cigarettes.

Provided, further, that the reduction shall only apply to refined sugar when evidence satisfactory to the Minister of Customs is furnished that such refined sugar has been manufactured wholly from raw sugar produced in British colonies or possessions.

SUGARS.

That it is expedient to repeal items 435 and 436 of schedule A to "The Customs Tariff, 1897," and to substitute the following therefor:

435—All sugar above number sixteen Dutch standard in color, and all refined sugars of whatever kinds, grades or standards, testing not more than eighty-eight degrees by the polariscope, one dollar and eight cents per one hundred pounds, and for each additional degree one and one-half cents per one hundred pounds. Fractions of five-tenths of a degree or less not to be subject to duty, and fractions of more than five-tenths to be dutiable as a degree.

436—Sugar, n.e.s., not above number sixteen, Dutch standard in color, sugar drainings or pumpings drained in transit, melado, or concentrated melado, tank bottoms and sugar concrete, testing not more than seventy-five degrees by the polariscope, forty cents per one hundred pounds, and for each additional degree, one and one-half cents per one hundred pounds. Fractions of five-tenths of a degree or less not to be subject to duty, and fractions of more than five-tenths to be dutiable as a degree. The usual packages in which imported to be free.

That it is expedient to provide that items 445 and 446 of schedule A to "The Customs Tariff, 1897," shall be repealed on and after the first day of July in the present year, one thousand eight hundred and ninety-eight.

TOBACCO.

That it is expedient to provide that on and after the first day of July, in the present year, one thousand eight hundred and ninety-eight, the following items shall be added to schedule B to the Customs tariff, 1897 :—

636—Tobacco, manufactured, for excise purposes, under conditions of the Inland Revenue Act.

That it is expedient to provide that on and after the first day of July in the present year, one thousand eight hundred and ninety-eight, in addition to the excise duties at present levied on manufactured tobaccco, cigars and cigarettes, there shall be levied and collected the following excise duties, that is to say :—

(a)—On all foreign raw leaf tobacco, unstemmed, taken out of warehouse for manufacture, in any cigar or tobacco manufactory, ten cents per pound.

(b)—On all foreign raw leaf tobacco, stemmed, taken out of warehouse for manufacture in any cigar or tobacco manufactory, fourteen cents per pound.

Provided, that the weight upon which such duty shall be computed, shall be with reference to the standard mentioned in paragraph (c) of section 247 of the Inland Revenue Act.

—A Reasonable Supposition.—"Potter Palmer, of Chicago, is going to build a home that will cost $3,000,000." "That looks as if the plumbing was included."—Cleveland Plain Dealer.

ENGLAND'S DRINK BILL.

Dr. Dawson Burns, writing on this subject to the London *Times*, says :

"The national drink bill of 1897, amounted to £152,281,723, and the estimated population of the United Kingdom being 39,824,563, there was an average expenditure of £3 16s. 5¾d, by each man, woman and child, or of £19 2s. 4¾d. by each family of five persons. These averages were, of course, purely arithmetical, the actual expenditure both as individuals and families, varying from sums relatively small to a large proportion of the entire personal or domestic income. The drink expenditure in 1897 exceeded by nearly three millions and a third that of 1896, which was equal to £3 15s. 6d. per head. This increase was composed of £757,125 on British spirits, and £154,016 on foreign and colonial spirits, a total of £911,141, on spirits, while on beer the increase was

£2,405,714 ; but as wine showed a decrease of £7,362, the net increase was £3,309,403. The quantities and expenditure in the three countries are :

England, per head—Spirits, .92 gallons, 19s. 3¼d. ; beer, 36.15 gallons, £2 14s. 2¾d. ; wine and other liquors bringing the total to £4 1s. 9¼d.

Scotland, per head—Spirits, 1.79 gallons, £1 16s. 6¼d. ; beer, 12.11 gallons, 18s. 1¾d, wine and other liquors bringing the total to £3 1s. 6d.

Ireland, per head—Spirits, 1.08 gallons, £1 2s. 1¾d.; beer, 17.23 gallons, £1 5s. 6¾d.; wine and other liquors make the total £2 14s. 2d. The amount of alcohol consumed in the three countries, taken on the statement of the Inland Revenue authorities, that in every gallon of proof spirit, alcohol forms 57 per cent. : Gallons of alcohol per head—England, 2.41 ; Scotland, 1.69 ; Ireland, 1.50. The national expenditure upon intoxicating drinks in 1897 may be realized by comparing it with other great amounts. It was equal to one-fifth of the national debt. It was equal to all the rents of all the houses and farms in the United Kingdom. It was half as much again as the national revenue.

Meetings.

CANADA LIFE ASSURANCE COMPANY.

The annual meeting of the Canada Life Assurance Co. was held on Wednesday, March 30. The following is a synopsis of the report and financial statements: In presenting to the shareholders their fifty-first annual report, the directors are gratified in announcing that the company has fairly shared in the somewhat improved condition of the business of the country, as will be seen by the statements and accounts now submitted. By these it will be observed that the company has transacted a larger business than during the previous year, and has increased its clear surplus by no less than $497,093.05. The applications for new assurances during 1897 numbered 3,006, for the sum of $6,185,996, of which, however, 266 for $521,000, were declined, the lives not appearing up to that standard, which it is in the interests of the company's other assurers should be maintained, and as 191 applications for $373,360 were not carried out, the issue of the year was for $5,291,636, under 2,608 policies, exceeding 1896 by 573 policies for $798,980.

The total business in force at the close of 1897, was $72,719,555.29, of assurances, under 33,407 policies, upon 24,469 lives.

The claims by deaths paid during 1897 amounted to $770,168.45, and endowment policies for $128,846.92, having matured, these sums, as well as $218,481.29, for profits, $145,411.18, for surrenders, and an annuity of $400,000, making in all $1,263,307.84, were paid to policy-holders during the year.

The income receipts of the year were $2,953,272.83, and deducting therefrom all payments to policy-holders for claims by death, for profits, and for matured endowment policies, as well as all other outlay, including expenses of management, there was left the sum of $1,272,486.05, which increased the company's assets to $18,678,915.67.

As appears by the abstract of assets and liabilities, after providing fully for the necessary reserve for all policies of the company, and for all its other liabilities, there is shown a surplus of $1,564,082.05.

THE PRESIDENT'S ADDRESS

The president, Mr. A. G. Ramsay, in moving the adoption of the report, said:

The directors' report and the annual accounts and statements have for some days been in your hands, and have now been taken as read. While the report is brief, it contains, I think, along with the various published accounts, all that is required to enable those interested in the company to judge of its progress and success in the past year. The addition during 1897 of nearly half a million dollars to the surplus or profit fund is a large and satisfactory one, and without invidiously comparing it with the figures of any other particular company, I may say that it was more than was attained by all the other Canadian companies combined.

The new business of the year was, you will observe, of saisfactory and gratifying amount, and in excess of the previous year, and you will be pleased to know that it is of that desirable class which will result more to the profit of the company than would a larger amount obtained at heavier expense, or from less desirable regions than the healthful climate of Canada, and the four Northern States to which we have thus far deemed it judicious to confine the operations of the company. The existing assurances are $72,719,555, or nearly twice as much as they were twelve years ago. The death claims of the year continued of very favorable amount, and being well within what was calculated upon, that fact testifies to the care observed in the selection of the lives, and to the judicious limitation of the business to the healthful climates already alluded to.

The recent lamentable failures of some of the companies doing business on the assessment system, and the anxiety felt as to the others which are based upon the same fallacious principles, lead me to point out that these occurrences are only the inevitable results which were from the first predicted by those whose knowledge and experience enabled them to judge of what the future of companies of this kind must be.

At our meeting in 1887, when concerns of the kind were making strenuous efforts to establish themselves in Canada, I alluded to the miserable failures they had been in England and in America, and I said that their "ephemeral existence indicates how useless the assessment system of assurance is as a family provision. It can anly offer the uncertain hope of a cheap insurance for a few years, till the company breaks down. It cannot afford any guarantee that a definite amount of assurance will certainly be paid to the widow or children after an assurer's death, whether that occurs at an early day or a distant one, and without such a guarantee as that, which our own and other sound companies offer, life assurance must be a fraud and a delusion." I added that "I was aware that agents and managers of companies of the kind pointed to the names of prominent business and professional men who have joined them, or who act as their directors, but as some of them, at all events, allow their names to be employed in that way, simply because policies have been gratuitously given to them, one can judge how little weight should attach to the names of the gentlemen thus used to decoy others to join such companies." One cannot envy the feelings of the prominent gentlemen alluded to, who induced persons to take policies in companies of the kind, from which they are now driven out by their failure, or by the levy of such high payments as they are unable to meet.

As the accounts show, the year's income was within a trifle of three million dollars, and the assets of the company were increased to the very considerable amount of nearly nineteen million dollars, and yielding, after deducting liabilities of every kind, a net surplus or profit of $1,564,082 for allocation at the end of next year. along with whatever additions there may be made to it between now and that time, and as the management and other expenses by which the profits of policy-holders are very largely influenced continue to be of a more moderate percentage than that of any other Canadian or American company, the prospects for our assurers are of a favorable character.

It is anticipated that legislation will be introduced by the Government modifying the present 4½ per cent. rate of interest prescribed by law as the basis for life assurance reserves, and adopting the new mortality tables based upon the observations and large experience of the British insurance companies, in course of compilation by the Institute of Actuaries of Great Britain, and I may say on behalf of the board in reference to the amendment to the charter, alluded to in the directors' report of last year, that the directors purpose to avail themselves of the occasion of that legislation to seek such amendments to the law as may meet the board's requirements.

Commercial.

TORONTO MARKETS.

Toronto, April 7th. 1898.

DAIRY PRODUCTS.—There is a substantial increase in the receipts of butter on the local market. The markets of the United Kingdom are not attractive to creamery men. How long the lethargy will continue there we cannot say, but some authorities look for improvement soon. A London letter, dated March 25th, says: "Experienced houses here are strongly inclined to the belief that we shall see the quotation rise again at an early date, especially if cold weather continues. Many buyers in the North of England and in Scotland cannot long continue their present policy of semi-abstention, and will have to draw all their supplies from current markets, as stocks are nearly exhausted. Imports are still light and home production is being diminished by the cold winds which are damaging the pastures. Danish and Swedish imports have shown no increase during the past six weeks, the only northern countries sending more are Finland and Norway, though the Finnish butter was delayed by ice this week. Yet during the month ended last week the import was 3,600 cwts. more than in the corresponding month of last year, while the Norwegian import was 611 cwts. more." Although the shipments of butter from Canada to Great Britain for the four weeks ending March 12th were 1,059 cwts., as against 713 cwts. the similar period last year, the increase has not been equal to the increase in production in the country. There is some improvement in the tone of the cheese market; values, however, show no quotable advance. Stocks are being gradually cleared up, and when the new season opens, the market should be in fairly good condition. Receipts of eggs are large, and in excess of last year's deliveries. Dealers predict that production will be very large this summer. At country points the standard quotation is 8c. per dozen, while at some places purchases are made at 7½c. per dozen.

Grain.—Transactions at the close of last week were limited, but the past few days has shown marked improvement. Wheat values have gained some strength. Oats are steady and unchanged in value. For barley there is steady demand. Peas are in active request. There is little doing in rye, and that market remains dull. Corn is unchanged. The New York "Journal and Bulletin," April 4th, remarks: "The stocks of wheat, corn, oats and rye at the seaboard and in transit have not only been exhausted, but everything offered to be shipped at or soon after the opening of navigation has been competed for by exporters at a premium, that has increased with the nearness of delivery, so urgent has been this demand, coming from all Continental, as well as United Kingdom markets. That there should be this unusual urgency, even for this unusually urgent export year, there is no cause apparent in supply and demand that has not existed all the crop, for stocks on the other side are not generally lower than they have been, and in some cases are larger, while the Argentine and Indian are nearly due, and crop outlook in Europe as well as here is more than usually favorable after an unusually mild winter on both sides of the Atlantic."

Green Fruit.—The weather has not been all that could be desired. Oranges, however, are selling well. California seedlings have been scarce for some time, but a few cars are now coming forward. California green fruit now arriving is subject to refrigeration charges, which amount to about 30c. per box. We quote: Washington Navels, choice, 96s, 112s, 126s, $3.25 per box; do., 150s, 176s, 200s, 216s, $3.50 per box; do., fancy, 96s, 112s, 126s, $3.50 per box; do., do., 150, 176s, 200s, $3.75 per box. Stock is very fine and prices will advance rapidly. California Seedlings, 150s, 176s, 200s, 216s, $2.50 per box; do., 126s, 250s, $2.25 per box. Lemons are about unchanged; the first sale of fruit arriving via Montreal will probably not be held until May 1st. We quote: New Messina, fancy, 300s, 360s, $2.75 to $3; do., choice. 300s, 360s, $2.50 to $2.75. There is a fair demand for bananas, and trade in the province is reported as expanding. There is a moderate business doing in Louisiana strawberries, imported via Chicago.

Hardwoods.—Trade is more active, and conditions are gradually assuming a better position. For two and three-inch cuts of elm and one and two-inch cuts of oak there is a brisk export demand. The United States markets offer a good consumptive demand, especially for supplies suitable to the manufacture of office desks, furniture and similar goods. Supplies are not large and manufacturers maintain that they will be insufficient to meet anything but a moderate consumption. As a result, in the case of urgent demand, fancy prices are reported as having been paid for special cuts. Values are steady, and the whole tendency of the market is one of strength.

Provisions.—The receipts of dressed hogs are phenomenally large for the season of the year. It is thought that deliveries are quite as large as at any time during the year, indicating that farmers have gone into the hog-raising industry with considerable earnestness. In view of these heavy receipts, prices are somewhat easier and dealers quote a fraction less for both selected and standard weights. Provisions are selling well. The Easter trade in smoked meats has been exceptionally good. Several large transactions in long clear bacon are reported to have taken place. Chicago stocks of hog products show a net reduction of all kinds of 20,000,000 lbs. for March, making them 7,000.000 lbs. less than last year; while the world's stock of lard is expected to show 175,000 tierces less than last year. This showing also helps the growing bullish feeling in all hog products.

Wool.—There is nothing new to report of the market. Small shipments of unwashed fleece wool are coming forward for which dealers are paying 11 to 11½c. per lb. There is every prospect that the coming season will be in marked contrast to that of last year. Whereas a year ago the clip came into the market with a rush, and the season, as a result of the impending Dingley Bill, had a short and glorious career, the movement this year promises to be slow. The market depends entirely upon the situation in the United States, where a phenomenal development in strength is not improbable. The present series of the colonial wool sales closed April 1st, with a smaller number of buyers present. The offerings aggregated 12,534 bales, and consisted of a good selection. Prices were well maintained. A fine lot of Kaffirian clothing sold 10 per cent. above the last sales, and was chiefly taken by the home trade. The bidding was brisk. with medium and faulty selling quickly to the Continent. During the series 202,000 bales were sold, of which 89,000 were taken by the home trade, 113,000 by the Continent, and barely 200 bales by American representatives. The advances noted during the first week of the series were maintained to the close. Following are the sales in detail: New South Wales, 3,700 bales; scoured 9½d. to 1s. 6d.; greasy 7 to 7¾d.; New Zealand, 4,400 bales, scoured 1s. 1½d to 1s. 6d, greasy, 6¾d. to 10d; Victoria, 1,300 bales, greasy 5¼d. to 11½d; South Australia, 200 bales, greasy 7 to 7¾d.; New Zealand, 4,400 bales, scoured 7½ to 11d., greasy 5¾ to 11d.; Cape of Good Hope and Natal, 1,100 bales, scoured, 8½d. to 1s. 2d., greasy 5¾ to 8d.

MONTREAL MARKETS.

Montreal, 6th April, 1898.

Ashes.—No improvement can be noted here. The English demand is still poor, and there is said to be some stock of Canadian ashes in Liverpool, now two years old. Receipts continue very light. We quote: $3.45 to $3.60 for first pots, as to tares; seconds, $3.15 to $3.25; pearls, nominal at about $4.75 per cental.

Cements and Firebricks.—The local demand for cements in small lots continues very fair, and stocks will be pretty well exhausted by the time new supplies by first steamers are due. The awarding of the Government tenders for 120,000 bbls., which is to be decided next Saturday, is looked forward to with much interest. Prices remain at $2.10 to $2.20 for British, $1.95 to $2.05 for Belgian. Bricks, $17 to $22 per thousand.

Dairy Products.—There is nothing of special interest in the cheese situation, except that the Liverpool cable quotation has declined a point to 37 shillings. On spot there is no trading, and quotations for finest range about 7½c. There was a shipment last week of some 8,000 boxes by one house, on which it is said there would be a probable shrinkage of $2 or more a box. For new-made butter there is good enquiry, with some scarcity of stock; fine fresh creamery is quoted at 21 to 22c., and 19 to 20c. for under-grades, dairy makes, 17 to 19c. per lb.

Dry Goods.—The frosty spell of the past few days has affected city retail trade a good deal, but wholesalers generally still report good business, and remittances are favorably reported on. Some of the larger importing houses report that the improvement in collections over last spring is even more marked than the improvement in extent of business. The auction sale, in lots, of the insolvent retail stock of Boisscau Freres, amounting to some $90,000 to $100,000, has attracted some active competition from Western buyers, and good prices are reported.

Furs.—Some fair receipts of raw furs are reported during the past week or two, principally spring rats, fox, skunk, and a sprinkling of mink, marten and bear. Dealers are not paying any larger prices, the advances at the late sales having been pretty well anticipated earlier in the season. We quote: Mink, large dark, $1.50; small, do., $1 to $1.25; marten, $1.75 to $2.25; fisher, $4.50 to $7; lynx, $1 to $2; otter, $1 to $12 for dark; pale, $5 to $7; red fox, large, $1.30 to $1.50; small, $1; cross fox, $3 to $6; bear, cubs, $3 to $7; medium, $7 to $10; large, $12 to $15; skunk. 15 to 70c, as to color and stripe; coon, 20 to 75c; rats, fall, 7c. to 10c.; kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

Groceries.—With somewhat improved country roads reported, and spring rail freights in effect, the movement in groceries shows some improvement over recent weeks. With regard to sugars the probable effects of the tariff changes, just brought down in Parliament, have not yet been fully figured out by refiners and there has been so far no change made in factory quotations, which remain exactly as stated last week. The demand in this line has shown appreciable movement within the last few days. There has been some stiffening in molasses in the Island, where first cost has been advanced from 7c. to 8c. Buying for this market has yet been very moderate, only two moderate cargoes being reported for Montreal outside the one thousand puncheon lot bought some time ago by the Canada sugar refinery. Rather a better demand exists for Japan teas, and the possible imposition of a war duty by the American Government seems to have caused some demand from across the line. One sale of five hundred packages Japans is reported to New York, also a few smaller lots. The direct Mediterranean steamer "Ganges," timed to sail last Saturday from Patras, is still there loading currants for this port, and will likely leave in a day or two with some two hundred and fifty tons consigned to a Montreal house, but the bulk of shipment is to fill Winnipeg and British Columbia orders.

Hides.—No change of any kind has been made in quotations this week, and dealers are paying 9c. for No. 1 hides, 10 to 11c. for No. 1 calfskins; 8 to 9c. for No. 2 do., 10c. each for lambskins, and $1 to $1.05 each for sheep. Receipts of hides have been small, but are expected now to increase, owing to the Easter kill. Calfskins are coming in pretty freely.

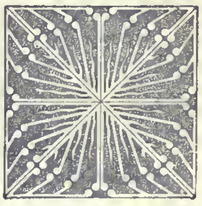
ALL THE REASONS

are strongly in favor of

using our

EMBOSSED METAL PLATES

For Ceilings and Walls



150 Designs to choose from.

They are equally well suited for private houses, stores, or public buildings, and make a handsome finish that is enduringly beautiful—doesn't need renewing.

Besides, think of their fire-proof and hygienic qualities?

Before re-decorating write to us for full information about our up-to-date metal finish.

Prices are moderate.

LEATHER.—The market is without any present feature of interest. Manufacturers of boots and shoes are all still busy on spring orders, but have pretty much all the stock of leather they require at present, and not much improvement in demand can be looked for until they begin the cut of leather for fall commands, a month or so hence. Values in all lines continue very steady. We quote: Spanish sole B.A., No. 1, 24 to 25c. do. No. 2, 22½ to 23½c.; No. 1 ordinary Spanish, 23 to 24c.; No. 2, 20 to 21c.; No. 1 slaughter, 27 to 28c.; No. 2, do., 24 to 25c; common, 20 to 21c; waxed upper, light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 20 to 21c.; juniors, 18 to 20c.; calf-splits, 30 to 35c.; calfskins (35 to 40 lbs.), 60 to 65c.; imitation French calfskins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 24c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.: buffed cow, 12 to 14c.; extra heavy buff; 15c.; pebble cow, 13 to 13½c.: polished buff, 11 to 13c.; glove-grain, 12 to 13c.; rough. 22 to 23c.; russet and bridle, 35 to 45c.

METALS AND HARDWARE.—For general shelf hardware orders are coming in well, and the trade express satisfaction with the spring business. In heavy metals there is a fair movement. Pig iron is lower, the usual reduction in prices at this season having gone into effect. Hamilton No. 1 is now quoted at $15. and No. 2 at $14. in fair lots. A sale of 50 tons of No. 1 is reported at above figure, with negotiations for some larger lots well under way. Summerlee could be bought, it is said, at $18 ex-store, and $17.50 to arrive. In other lines we hear of nothing new. We quote: Summerlee pig iron, $18; Carron, No. 1, $18; No. 3, $17.25; Ayrsome, No. 1, $17; No. 3, $16.50; Shotts, $17.25 to $17.50; Carnbroe, $16, ex-store; Ferrona, No. 1, $15 to $16; Hamilton No 1, $15 to $15.50; No. 2, ditto, $14 to $14.50; machinery scrap, $14 to $15; common ditto, $12 to $13; bar iron, Canadian, $1.40 to $1.50; British, $2 to $2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas, $2.40; Terne roofing plate, 20x28, $5.90 to $6; Black sheet iron, No. 28, $2.25; No. 26, $2.15; No. 24, $2.05; No. 17, $2; No. 16 and heavier, $2.15; tin plates—Bradley charcoal, $5.60 to $5.70; charcoal, I.C., Alloway, $3.15 to $3.25; do., I.X., $3.90 to $4; P.D. Crown, I.C., $3.60 to $3.75; do., I.X. $4.50; Coke I.C., $2.90 to $2.95; do., standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2.70; galvanized sheets, No. 28, ordinary brands, $4; No. 26, $3.75; No. 24, $3.50 in case lots; Morewood, $5 to $5.10; tinned sheets, coke, No. 24, 5½c.; No. 26, etc., the usual extra for large sizes. Canadian bands, per 100 lbs., $1.65 to $1.75; English hoops $2 to $2.15. Steel boiler plate, ¼-inch and upwards, $1.85 to $1.90 for Dalzell, and equal; do., three-sixteenths inch, $2.50; tank iron, ¼-inch, $1.50; three-sixteenths do., $2; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to $2.50; Russian sheet iron, 9c.; lead, per 100 lbs., pig, $3.50 to $3.55; sheet, $4 to $4.25; shot, $6 to $6.50; best cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel, $2.25; ingot tin, 16½c. for L. & F.; Straits, 16c.; bar tin, 17c.; ingot copper, 12½ to 13c.; sheet zinc, $5 to $5.25; Silesian spelter, $0.75; Veille Montagne spelter, $4.75 to $5; American spelter, $4.50; antimony, 9 to 9½c.

OILS, PAINTS AND GLASS.—Business may be called brisk in these lines. Shipment of orders booked since January is being actively prosecuted under the reduced freight tariff, and further commands are still coming in well. The White Lead Association held their regular quarterly meeting here last Friday, but no change was made in the schedule of prices for leads. The price of putty was fixed as follows: Putty in bulk, bbls., $1.65; kegs, $1.80; bladder putty, in bbls, $1.80; smaller quantities, $1.95: 25 lb. tins, $2.05, 12½ lbs. tins, $2.30. All other lines as they were. We quote: Turpentine, one to four barrels, 52c.; five to nine barrels, 51c.; net thirty days. Linseed oil, raw, one to four barrels, 47c.; five to nine barrels, 46c.; boiled, one to four barrels, 50c.; five to nine barrels, 49c.; net 30 days; olive oil, machinery, 90c.; Nfld. cod, 35 to 37c. per gal.; Gaspe oil, 30 to 32c. per gal.; steam refined seal, 45 to 47½c. per gallon in small lots. Castor oil, 9 to 9½c. as to quantity. Leads (chemically pure and first-class brands only), $5.37½; No. 1, $5; No. 2, $4.67½; No. 3, $4.25; No. 4, $3.87½; dry white lead, 4¾ to 5c.; genuine red do., 4¼c.; No. 1 red lead, 4c.; London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to $1.75; yellow ochre, $1.25 to $1.50; spruce ochre, $1.75 to $2. Paris green, 50 and 100 lbs. drums, 15c.; 25 lb. drums, 15½c.; 1 lb. cartons, 16c.; pound tins, 16½c.; window glass, $1.40 per 50 feet for first break; $1.50 for second break; third break, $3.10.

WOOL.—Woolen manufacturers all continue busy, but are not heavy buyers of raw wool, and it is supposed the demand for cheap goods induces a larger consumption of shoddy and other mixtures. Dealers are very firm in their quotations, of 14½ to 16½c. for Capes, and 16½ to 18½c. for Natals; B. A. scoured, 27 to 35c. Another cargo of Cape wool is afloat for this market, as well as some other moderate lots.

HEAD OFFICE:
Queen City Chambers, Church St., Toronto.

DIRECTORS:
JAS. GOLDIE, Pres. J. L. SPINK, Vice-Pres.
Thos. Walmsley, Treas. Hugh Scott, Mgr. and Sec.
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co.,

THE ANGLO-GERMAN LOAN TO CHINA

Japan has refused to wait for the payment of the little bill still owing to her by China. The latter country has, therefore, accepted a loan from the Hong Kong and Shanghai Bank, a British concern, and the German-Asiatic Bank, to the amount of $80,000,000 at 4½ per cent. It is secured by the unpledged balance of the customs and specified provincial duties. The Inspector-General of Customs is to be British as long as England does more trade with China at the treaty ports than any other power. The internal waterways are to be opened, the valley of the Yang-tse-Kiang is not to be ceded to any power in any form, and a treaty port is to be opened in Hunan. The trade of the whole world will profit by this arrangement, and, as Great Britain has the lion's share of China's trade, she will profit more than others. Yet the British papers are not altogether satisfied over the failure of an all-British loan and the admission of Germany.

Money, London, thinks "the pity is, that it is not an all-British loan," but comforts itself with the thought that it is "the next best thing," and says:

"The first reflection which the landing of the loan, after its long and adventurous voyaging suggests, is disappointment that the British Government did not succeed in securing it.......But regrets are vain. And, after all, Great Britain does not come out so badly. Next to an Imperial British loan, a financial arrangement in which a British bank has the leading hand is perhaps the best that could be made.......The Hong Kong and Shanghai Bank is a wealthy and influential British institution, and represents British financial interests throughout the far East. Half of the loan, at least, is to be raised in England, and British prestige and credit are thereby saved. Moreover, the association of a German syndicate with the Hong Kong and Shanghai Bank is satisfactory from several points of view. It unites German and English financial interests in the East; and it will be a token to the world that the two powers are acting together and not against each other."

The *Saturday Review* thinks that England will profit almost as much as if she had the loan all to herself, and that the absence of international jealousies in the present case rewards her for her unselfishness.

The *Economist* expresses itself, in the main, as follows: "What there is left of the import duties—they are already heavily mortgaged—does not amount to much. But the salt and provincial duties will amply cover the new liabilities of China, if the provincial authorities are prevented from meddling. It may be assumed as certain that the two banks have obtained sufficient guaranties. The most pleasing result of the negotiations is that international jealousies have been allayed by them. The material advantages obtained are, however, very great. The opening of the rivers must lead to greater extension of trade, and the stipulation that the vale of the Yang-tse-Kiang is not to be ceded to any power is of special advantage to Great Britain, since she has the lion's share of trade there."

LONDON EXHIBITIONS, LIMITED.

We have received a circular and a bulky prospectus of what is termed the "Greater Britain" Exhibition of 1899. A London paper says of this: "In connection with the proposed Greater Britain Exhibition for next year at Earl's Court, the first meeting of the honorary committee of advice, which includes the Marquess of Lorne, the Earl of Jersey, the Earl of Kintore, Sir Saul Samuel, Sir Charles Tupper, and other distinguished persons, was held yesterday afternoon at the Criterion restaurant. The chair was taken by Mr. P. Cremieu-Javal the chairman of the London Exhibitions (Limited), who pointed out the advantages which the colonies and all interested in their welfare would derive by sending exhibits to London in 1899, as a preliminary to the Paris Exhibition in the following year. The Agents General of the Colonies have been approached with a view to their support, and an enormous number of letters have been received in favor of the proposition from people who are interested, commercially or otherwise, in the British colonies."

The Exhibition, it seems, is to be held in London from May to October, 1899. Important companies, firms and individuals connected with the export trade of Australasia, Canada, etc., have expressed their belief that the proposed Exhibition will have a highly beneficial influence on commercial intercourse between the colonies and the Mother Country. The circular sent us explains that by a previous mail this proposed exhibition has been brought under the notice of the Governor-General of the Dominion, and of the North American provinces, etc., with a request that they would be officially represented. The signer of the circular is George Collins Levey, secretary to the Honorary Committee of Advice.

SAFETY FROM FIRE.

A Boston engineer is responsible for the statement that "fireproof buildings," so far as actually tested by fire, are not fireproof. He claims that the most consistently constructed are simply noncombustible; that is, the materials used in their construction are not inflammable. In following out his line of argument he says :

"The fires recorded amongst steel buildings show that while in most cases the frame is left standing, it is by no means unimpaired, and the terra-cotta walls and floor arches are quite unable to resist the combined fire and water. The contents of such buildings necessary to render them useful as warehouses, stores, office buildings or dwellings offer fuel sufficient for very disastrous fires, as has frequently been shown. Probably the greatest danger to be feared by fireproof buildings is from exposure to fires occurring in adjacent buildings. Brick walls and fire shutters have, in nearly all cases, proved effectual in preventing the spread of fires, but even in warehouses so constructed the shutters are often left open at night.

"Floors of brick arches or of concrete unless the girders supporting them are unprotected, stand well and prevent the passage of fire ; but floors of sectional terra-cotta are likely to break away sufficiently to let the fire through, and have in many cases fallen by the sagging of the girders whose fire protection they were intended to effect. Floors thus punctured or destroyed offer new fuel and greater draft, and so increase the danger to the frame itself.

"In the last two or three years a number of so-called fireproof buildings have been subjected to the fire test.

"The Manhattan Savings Bank in New York caught by front exposure. Its steel frame expanded under the heat, displacing the floor girders and their interior supports, with the result that the roof and floors (terra-cotta), were cast to the ground.

"The Chicago Athletic Club was damaged to the extent of some $60,000, as I remember, by a fire caused by a plumber's stove in one of its fireproof rooms.

"The Leonard Building, in Detroit, a ten-story steel-frame building, with plank floors and terra-cotta walls, caught from exposure and was quickly reduced to its bare skeleton, which though standing was reported by engineers as probably useless.

"In Worcester, a two-story, steel-frame building, belonging to the Washburn & Moen Company, was destroyed, frame and all, by a hot fire originating in the building.

"In Pittsburg a year ago $3,000,000 was lost in a fire in which one partly fireproof and two wholly fireproof buildings were destroyed with all their contents, and another severely injured. Of the two fireproof buildings, which had received the fire from across the street, through their large front windows, the steel frames were mostly saved, and the rear walls of brick with shuttered windows stood to protect, instead of the buildings themselves, the combustible buildings in the rear.

"The recent New York fire that consumed the Nassau Chambers, by a forty-foot leap, attacked the new fifteen-story Vanderbilt Building and injured it severely. The newspaper report runs : 'Firemen found a great deal of trouble in the Vanderbilt Building on account of its great height.'"

A representative of one of our largest building firms, in discussing this matter, recently, said : "In New York we have many buildings which are certainly fireproof. That is, fire could do no great amount of damage to them. For instance, the various offices in these structures do not contain sufficient combustible material to make a blaze sufficient to do much damage. The danger to life or property in one of these buildings is so very minute that it can hardly be estimated. Why, for instance, look at that new Empire building doyn on Broad St. There isn't a thing in it that will burn and when it is completed there will be nothing to burn excepting the doors and window frames and such office furniture as the tenants use.

"All this talk about elevator shafts being fire traps is foolishness when applied to one of the modern buildings, for there is absolutely nothing to burn anywhere in the vicinity of the elevators. Down in the Johnston building even the doors and casings are of wire glass and if a fire started in that shaft it would have to be located in the elevator boy's clothing."

A representative of the United States Fire Insurance Company, said : "Of course there is always something to burn in any building, and the occupants of fireproof buildings still continue to insure their goods. The rates are very low, however, and it would be better for our business if people would build fewer of that class of structures.—*N.Y. Commercial.*

—A man in Saginaw, Michigan, named W. Reimers, has been arrested. He confesses the he started the fire in the A. W. Wright & Co. lumber yard, and has since confessed to having caused the destruction of over a quarter of a million dollars' worth of property. Among the fires included in the confession of the weak-minded fellow are the Central Lumber Company fire, October, 1896, which was adjusted by insurance companies at $91,000; the A. T. Bliss fire at Carrolton, November 18th, 1897, loss $33,000; Saginaw Lumber and Salt Co., January 18th, 1898, loss $88,000, and recently the Houghton school building.

—The Canadian Pacific railway has made a material reduction in passenger rates from Winnipeg to Toronto and Montreal. The new rates are as follows : 1st class from Winnipeg to Montreal, $28.20; old rates $38.90 ; 2nd class, $27.20 ; old rate $36.95. First class to Toronto, $28.20 ; 2nd class, $27.20 ; old rate, $35 ; no second class.

—The first bridges were of wood, and the earliest of which we have any account was built in Rome 55 years before the birth of Christ. The next was erected by Julius Caesar for the passage of his army across the Rhine, Trajan's great bridge over the Danube, 4,770 feet long, was made of timber, with stone piers.

—The steamer, "Titania," which is now engaged in the Nanaimo-California coal trade, carrying coal from the New Vancouver Coal Company's mines, has arrived in San Francisco with nearly 6,000 tons of coal, the largest cargo that ever entered the harbor.

—The longest fence in the world is a wire-netting in Australia, 1,236 miles long, its object being to keep the rabbits from the cultivated fields.

THE character of a paper's constituency is an important matter when you come to place your advertising. A journal that has the confidence of the whole mercantile community throughout a country like Canada must surely be a good advertising medium.

Such a Publication is - -

The Monetary Times

THERE is no other Canadian publication that has so large a constituency, so wide a circulation, and so much influence as has this journal. When considering placing advertising we solicit your enquiries as to rates and position.

**THE MONETARY TIMES

THE
Difference

The difference in taking down a section of line shaft, removing couplings, etc., and putting on solid iron pulley and then putting all back in place, and in putting on a "REEVES" Patent Wood Split Pulley, leaving the shaft unmolested, will in nearly every case pay for the "REEVES" entire.

DECISIONS IN COMMERCIAL LAW.

* MINHINNICK v. JOLLY.—The mere expression by the owner of an intention to sever a fixture from the freehold, and sell it to another even if communicated to one who becomes a subsequent purchaser of the freehold, would not operate to convert a part of the freehold (the fixture) into a chattel, or to alter its character in any way; and in the absence of any reservation in the conveyance, everything attached to the freehold passes to the purchaser.

FULTON v. THE KINGSTON VEHICLE CO.—It was sought to set aside a deed of assignment made by A. R. F. to F., in which the defendant company were preferred creditors, and also a judgment confessed to the said company on the ground that A. R. F. was induced to take this action (1) under threat of criminal prosecution; (2) by an agreement on the part of the defendants to stifle such prosecution if their demand was complied with. It was held on the jury's finding that there was no "understanding between the defendant company or its directors and A. R. F., either expressed or implied to abandon the criminal prosecution if the assignment and warrant to confess judgment were executed;" that the mere facts that threats of a criminal prosecution were employed were not enough to invalidate the security given for a debt admittedly due.

GRAND TRUNK RAILWAY CO. v. PORT PERRY.—In an appeal from the Court of Revision, of the village of Port Perry, it was held by Judge Dartnell, that water tanks and platforms are part of the superstructure of a railway. As such, they are not assessable. The assessment of a sub-tenant of a railway company should be deducted from the total assessment.

BELL v. OTTAWA TRUST AND DEPOSIT COMPANY.—This case came up in the administration of the estate of a deceased partner, who was a joint promissor with his firm on certain notes. It was held that the security upon an asset of the firm (certain timber limits), was not security on the estate of a deceased partner nor security on the estate of a third person for whom he was secondarily liable, as his liability was direct and primary.

THE assessment of Brantford has been fixed at 17½ mills for this year.

WINDSOR, Ont., is counting on a new industry for the manufacture of fence wire.

THE menacing nature of the Cuban situation sufficed, as long ago as Saturday, to induce the Ward Line of steamers, which have long been plying from New York to South and Central America and the West Indies, to withdraw all their steamers plying to Cuba.

To show what a magnet the Yukon gold fields are proving to even business men it may be noted that a week ago a group of business men of Annapolis, N.S., Messrs. W. W. Clarke, hardware merchants; J. A. Langille, watches and silverware, and W. Cunningham, of the Annapolis Royal drug store, left by express for the Klondyke gold fields a week ago.

MAYOR ROBERTSON, of St. John, N.B., reports that the agreement with the Canadian Pacific Railway, by which the latter pays over its contribution towards the west side harbor works in return for concessions made to the company, has been satisfactorily arranged. He also states that the company has promised to build an elevator of 750,000 bushels capacity.

The above is the first $10,000 of the second issue of bonds of $20,000 authorized by the Act of the General Assembly of New Brunswick at the past session, are redeemable in 40 years, and are in denominations of $500 each, bearing interest at 4 per cent. per annum payable semi-annually at the office of the Town Treasurer.

The highest or any tender not necessarily accepted.

Dated at Chatham, N.B., the 5th day of April, 1898.

WARREN C. WINSLOW, Mayor.
JAMES F. CONNORS, Town Clerk.

Mercantile Summary.

THE ice-bridge at Quebec broke on Monday last.

N. D. & W. H. WHITE, sawmillers, etc., of Hawkesbury, Ont., are reported to have assigned to the sheriff. Their affairs have been in bad shape for some time past.

A LEADING firm of haberdashers, in Ottawa, Macdonald Bros., are embarrassed, and are reported as arranging for an extension of time. Their principal creditors secured themselves by a chattel mortgage several months ago. Liabilities are stated at about $7,000, with some moderate surplus shown.

THE assignment is noted of N. Garneau, dry goods retailer in the city of Quebec. The business was started in 1893, as Trudel & Garneau, but Mr. Garneau has been alone for several years past. The liabilities are $11,618, with assets consisting of stock, $9,800; accounts, $1,900, and fixtures, $250.

THE retail dry goods business of Carney & Webber, in St. John, N.B., was started barely a year ago by Carney, a man past middle age, who had many years experience as a clerk, and he was shortly afterwards joined by Webber, who had previously also had some business experience. The firm has assigned; its liabilities are not yet ascertained.

THE result of the smelting operations of the Hall Mines, Limited, at Nelson, B.C. were as follows for the five weeks ending 2nd April, 1898: The works did 31 days' 16 hours' smelting, during which 7,437 tons of ore were smelted: yielding 357 tons of matte, containing (approximately)—156 tons of copper; 111,420 ozs. of silver and 272 ozs. of gold.

HER BRITANNIC MAJESTY approves the gentlemen whose names follow as Consular Officers of the United States of America in the Dominion:—William H. H. Graham, as consul at Winnipeg; Harlan W. Brush, as consul at Clifton, Ontario; Neal McMillan, as consul at Port Sarnia, Ontario. The Queen has also been pleased to approve of Mr. Nosse Tatsugoro Shoschichii as consul of Japan for the eastern districts of Canada.

THE council of St. John, N.B., has ratified the winter port agreement with the Canadian Pacific Railway, and pledged itself to provide the Manhattan Steamship Company with the needed piers for steamers to be run this summer from New York to St. John. The intended arrangement may be disturbed however, for the U.S. Government last week took over two steamers under lease to the Manhattan Company.

A CHEQUE was last week received by the treasurer of Toronto from the Toronto Street Railway of $16,000 for mileage fees; and another for $7,390, the city's portion of traffic receipts for March. A comparative statement of receipts and percentages for March in three past years is as follows:—Company's receipts, March, 1898, $92,375; 1897, $79,334; 1896, $74,409. The city's percentage, March, 1898, $7,390; 1897, $6,346; 1896, $5,952.

WE learn from a late issue of the Winnipeg "Tribune," that the property on Main street, in that city, occupied by the stores of Messrs. H. A. Holman, Paul & Taylor, and S. Barrowclough, has been purchased by Messrs. Walter Suckling & Co. for clients of theirs. It is understood that the price paid for the property was in the neighborhood of $34,000, which strikes us as a pretty good figure. But, of course, it is in a good part of a good thoroughfare.

Monthly. $1 a year. Ten cents a copy.
ACCOUNTICS ASSOCIATION, Publishers,
262 West Broadway, New York

Mercantile Summary.

THE British Columbia Legislature has adopted a resolution urging upon the Dominion Government the establishment, in that Province, of a mint.

A MONTREAL authority states that an order has been given to the Intercolonial Coal Company by the Montreal Street Railway Company for their year's requirements of slack coal, estimated at 30,000 tons.

THE council of Granby, in the Province of Quebec, has approved of a by-law for the issuing of $50,000 in debentures to pay off the floating liabilities of this corporation, to provide for certain debentures falling due, to put in a system of electric light, and make permanent roads and sidewalks. The citizens will vote upon it on the 3rd of May.

A LARGE meeting of the leading men of Amherst, N.S., was held in that town the other evening to discuss the advisability of making Amherst a seaport. The town is not very far from deep water, and it is thought a canal might be dug without any very great difficulty. The town would thus become, it is pointed out, an important distributing point for the maritime provinces.—Maritime Merchant.

THERE was a meeting on Monday last of the creditors (principally Toronto men) of J. L. Mader, merchant, Kincardine. The statement showed assets $6,196 and liabilities $6,798.——On Saturday last the retail dry goods firm of Macdonald & Co., Windsor, Ont., made assignment. They had proposed a settlement at 75 cents in the dollar, but one large house stood out against accepting the compromise.

A FIRM in Amherst, Nova Scotia, H. A. Hillcoat & Co., dealers in musical instruments and merchandise, have been obliged to assign. The business was a considerable one for the place but Mr. Hillcoat has not been able to give all his personal attention to it of late, owing to ill health. The liabilities are said to be some $25,000, direct and indirect. The Bank of Montreal holds a bill of sale to cover a claim of $17,400, and there are other preferences to the amount of about $3,000.——The millinery stock of Miss B. E. Killam, at Canning, N. S., has been sold by the sheriff. She went to Boston several weeks ago, nominally on a visit, but has not returned.

ST. THOMAS and Napanee parties are incorporated as the Rose, Finlay Company of St. Thomas, Limited, to import, buy, sell and deal in all kinds of Japanese, Chinese and other oriental goods, wares, produce and merchandise, with a total capital stock of $24,000. A company has also been formed, some of whose members are Walter C. Bonnell, John A. McGee and Peter Clarke, to take over the fur business of James Harris of Toronto, under the name of the Yukon Fur Manufacturing Company of Toronto, Limited, capital, $20,000. Another company is the Hepworth Manufacturing Company Limited, capital $24,000, which is to take over the lumber business of C. H. Witthun and Benjamin Dankert of Hepworth, in Grey county.

THE following information, issued in a supplement to "Dickerman's Counterfeit Detector," for April, is given by a circular letter from the Treasury Department, Washington. It describes a new counterfeit $10 Treasury Note, series of 1891; check letter C; J. Fount Tillman, Register; D. N. Morgan, Treasurer; it bears a portrait of Sheridan; No. 4040549; small scalloped seal. "This counterfeit is apparently printed from a photo-etched plate, on two pieces of paper, between which silk threads have been distributed. It is so poor that a detailed description is deemed unnecessary."

FAILURES in Montreal, as well as elsewhere in the Province of Quebec, continue few in number, and of minor importance. Hubert & Comtois, a firm of hat and fur retailers, have assigned. They failed before in 1894, when they tried to compromise liabilities of about $5,000, at 30 cents on the dollar; but the estate was sold out, and they have since done business under cover.——Emile Depocas, formerly a hardware clerk, began business for himself in Westmount suburbs, about six months ago, and has already had to assign.——Mrs. L. A. Carriere, carrying on a small grocery business, has also failed; liabilities being about $1,000.

UNDER the caption of "How to avoid the frictions of life, and make the wheels of industry turn smoothly," Alonzo W. Spooner has printed a very ugly, pumpkin-colored folder with certificates on the outside and poetry on the in, designed to exalt copperine. That's all right. We do not doubt that copperine is a good lubricant, in fact we believe it is. But why should not Alonzo say so in handsomer style of paper and printing? Why quote Solomon and Pope and Shelley, and parody Tennyson and imitate Bill Nye, and murder Martin Tupper on a piece of pumpkin yellow paper too big to go in your pocket and too thin for even an engineer's bookshelves? Alas! Alonzo. He insists that "a weed, to him who loves it is a flower." We believe it; we love a weed. But he also tells engineers to "Hitch your engine to a star." This won't do; it is neither good mechanics nor good sense. If it is poetry so much the worse for the poetry.

J. ALLAN EVANS, of Sawyerville, Que., formerly an implement agent, and latterly dealing in stoves, tins, etc., has assigned to the Court, on the demand of Copp Bros., of Hamilton, Ont. He owes about $3,200.——Alex Clement, formerly a tailor at Waterloo, Que., moved to Lake Megantic in the fall of 1896, where he has been keeping store under the style of Clement & Frere. He apparently has not met with much success in his new field, for he is reported to have arranged a compromise at 50 cents, on liabilities of $5,200.——Mrs. J. Guimont, Petit Matane, Que., recently reported in trouble, has compromised her small liabilities at 50 cents.——Claude B. Jamieson, a farmer and trader, of Clarenceville, Que., and a prominent citizen in his locality, having been Mayor of the parish, etc., has made assignment of his estate, and is said to owe $10,000.

Mercantile Summary.

THE city council of St. John, N. B., has voted the sum of $500 to be expended by Mayor Robertson of that city on a trip to Britain for the purpose of laying before the shipping men, merchants, &c., on the other side of that Atlantic the importance of the port of St. John. This action of the council is the result of a largely signed petition from the leading business men of the city.

PARTICULARS of an enterprise which is important to our Nova Scotia coal mining industry are given by Mr. Kendall, M. L. A, to the Halifax Chronicle. Mr. Kendall has recently visited Boston and vicinity and tells what he saw at the works of the New England Gas & Coke Co. at Everett, a suburb of Boston. At that point are being built 400 coke ovens of a capacity each of six tons per day. These must be ready by Christmas, and 200 more are spoken of as necessary to keep up with the demand. Gas is to be sold to the Massachusetts Pipe Line Co. for 15 cents per 1,000 feet, of 20 candle power, and is to be retailed to the consumer at 50 cents per 1,000. A railway is being built and a creek 25 feet deep excavated to admit steamers loaded with 3,000 to 4,000 tons of Cape Breton coal to supply these works. It is expected that this long talked of industry will soon command about 2,500 tons of Nova Scotia coal per day. The success of them is in fact thought to mean winter work in the Cape Breton mines.

THE quantity of ore and matte from the Rossland neighborhood of British Columbia approached in value a million dollars per month for the first quarter of 1898. The shipments for January were 9,506 tons, value $1,197,480; for February, 8,678 tons, value $949,138; for March, 11,749 tons, value $698,415; making the total shipped from the port of Nelson 29,827 tons of a value of $2,845,042. It is remarked by the "Miner" that the Hall Mines smelter made a large shipment of lead bullion, the product of the new lead stack. One week's shipment by that concern amounted to 20 tons lead bullion, and 16 tons copper bullion. In the same period the ore shipped by the Le Roi Mine, Rossland, was 1,680 tons; by the Payne Mine, Slocan, 370 tons; by the Idaho Mine, Slocan, 170 tons; by the Iron Mask, Last Chance and Montezuma, 80 tons each; by the Queen Bess, Rambler, Reco and others, smaller quantities, making the week's total 2,700 tons of an approximate value of $126,466.

A VERY marked increase in the business of the chief commissioner's department of the British Columbia government is shown. It reflects not only the mining activity but also the increase of settlers or visitors other than explorers and miners. The New Westminster "Columbian" prints a comparative statement between the years 1887 and 1897 for the province, which it considers very eloquent:

	1887	1897	Inc.	Per c.
Pre-empt'n records	303	462	159	52
Certificates of improvement	73	204	131	179
Do. purchase	351	977	626	178
Crown grants.. ..	320	766	446	140
Acreage deeded ..	73,950	609,597	535,647	724
Letters received..	3,079	8,034	4,955	160
Free miners' certificates	120	1,206	1,086	900
Field books of survey plotted.. ..	155	894	739	470

In the course of his address on supply the Chief Commissioner made a reference to the great increase in his department which he indicated may necessitate a division of labor between two responsible Ministers ere very long.

Mercantile Summary.

J. O. Peck, for many years a dealer in clothing, etc., Windsor, did not always find it pleasant or easy work. We find that in 1884 he was obliged to ask his creditors for an extension on liabilities of $8,000. In June, 1892, he found an extension of eighteen months necessary. At this date he owed liabilities of $22,000.—About a year ago a fire occurred on his premises which he claimed caused a loss of $13,000 but this amount was considered excessive and now the claim is in court and he makes an assignment.

The creditors of Arthur H. McKeown, tinsmith in Hamilton, were asked to accept as in full 20 per cent. of their claims. This they refused and the estate of McKeown will be sold. He owes $6,000 and has nominal assets of $4,000.——Last December, Cronk & Davis, shoe dealers, Ingersoll, dissolved partnership. The former retired without any capital and Wm. Davis continued. Evidently he has not been able to succeed and now assigns with nominal assets and liabilities equal, $2,800.——J. A. Becker, tailor at Ripley, whose assignment we noted last week, has succeeded in inducing creditors to accept a 75 cent compromise on claims of $6,500.

An extension of time is asked by A. Hartman, dealer in clothing at Kuskonook & Rossland, B. C. He began business in September, 1896, previous to which he had failed in Washington Territory. After he had been one year in business he claimed a surplus of $6,000 over liabilities of $7,000. This does not include mining shares valued at nearly $15,000.——A. McRae & Co., general storekeepers at Elva, Man., has assigned after working in business nearly three years. Previous to this he was a clerk in Winnipeg. He had but little capital, but this did not deter his creditors from extending credit to him as he now owes about $9,000. — C. E. Pineo general store, Griswold, also makes an assignment.

A bailiff has taken possession of the boot and shoe premises of James McGinnis at Seaforth, who has been in business a quarter of a century and was well reported.—— Hugh Baxter has been doing business in lumber, etc., in a small way at Sturgeon Falls for two years. He now assigns.——After handling furs, etc., in Orillia for a short time, W. C. Goffatt has assigned.——W. Dunlop has been tailoring in Petrolia. Now he is asking creditors to accept 80 per cent. of their claims.——A meeting of the creditors of J. R. Bonter, general storekeeper at Trenton, has been called for next week. It is about a week since Mr. B. assigned.——Another meeting of creditors is that of Joseph Hicks, general store, Callendar, but we have not heard any particulars.

A subscriber of ours, who is working a copper and gold camp not far from Kamloops and who reads The Monetary Times to the boys in camp once a week, writes us in high feather. Although an eastern man, and naturally quiet, he is acquiring a little of the warmth of the Wild West. Hear him: "The camp is getting more solid every day, new discoveries and new locations of claims causing quite an excitement. Over one thousand claims have been recorded up to date and everything looks like a genuine "boom" for this season. Capitalists are beginning to develop the claims they have purchased on a large scale, the bodies of ore found so far giving sufficient guarantee for a much larger outlay. The local owners of claims are of course developing on a smaller scale, though the Kimberley Mining Co. have driven a tunnel 150 feet long to crosscut the lead which is over 20 feet wide and have still some distance to drift. The ease of transportation and the high value and self-fluxibility of the ore will undoubtedly make this one of the largest and best camps in British Columbia."

CANADIAN MANUFACTURERS MEET.

The retiring President of the Canadian Manufacturers' Association, Mr. D. W. Karn, in his address at the annual meeting of that body on Tuesday last in Toronto, declined to make a declaration in favor of an Insolvency Law for the Dominion. His attitude is that there are just as many arguments against such a measure as in its favor. The Association however did, by resolution, affirm the desirability of a Dominion measure for the equitable distribution of assets, something about which there will probably be no two opinions.

With much of what the President said on the subject of credits, cordial agreement may be expected in commercial circles. It is something to have the executive head of so influential a body as the Canadian Manufacturers' Association admit that "one of the greatest drawbacks the manufacturer has to contend with to-day, under the present condition of things, is the system of long credits." It is undoubted that in certain lines of manufacture this applies more particularly than to others, that is, some kinds of goods can be sold on very long time at less disadvantage than others. Mr. Karn thinks that "if some united action on the part of those who are affected by this matter of long credits could be taken, possibly a change for the better might be brought about. Another condition of things very much to be desired is to create a sentiment on the part of our people to buy Canadian-made goods. If this could be accomplished it would tend to develop our manufacturing industry as nothing else could do."

A resolution squarely re-affirming the necessity of protection was passed. Indeed these gentlemen go so far as to say that "the prosperity of

TENDERS FOR COAL

The Consumers' Gas Company of Toronto, Ont., will receive tenders until noon on FRIDAY, the 22ND APRIL NEXT, for the supply of

FORTY THOUSAND TONS (40,000)

(Of 2,000 lbs.) of Youghiogheny or Westmoreland lump gas coal; also for

3,000 Tons of Grate Sized Screened Buck Mountain or Cross Creek Anthracite Coal

Gas coal tenders to be made separately for coal screened over three-quarters and one and one-half inch screens.

Gas coal to be delivered in about equal monthly quantities between the 1st of May and 28th February next.

Anthracite coal to be delivered in about equal monthly quantities between the 1st of May and 31st October next:

Tenders will be received for delivery on the cars at the Suspension or International Bridges or Port Dover, or by vessel at the wharf at Toronto, ex harbor dues.

The kind of coal offered must be specified.

Payments to be accepted the Gas Company's weights.

Payments to be made at Toronto one month after delivery of coal at Toronto. Contractors to prepay all railway and other charges to Bridges and Port Dover.

Tenders to state specifically what difference, if any, will be made in the price, provided the Company only accepts a portion of the above quantities

Tenders to be addressed to the President.

Security to be given for the fulfilment of the contract if required.

No tender necessarily accepted.

W. H. PEARSON
General Manager and Secretary.

the country imperatively demands the continuance of a fixed and definite policy of protection." Another resolution was carried which we think deserves to be printed in full. It is on the subject of reciprocal tariffs:

"While heartily commending the Dominion Government for their desire to confine the scope of the preferential tariff exclusively to the Mother Country and the British colonies, this association is strongly of the opinion:—

"1. That our preferential tariff should not be extended to any colony unless such colony accords to us a tariff preference in their market equivalent to the discrimination allowed by us in its favor.

"2. Where our minimum preferential tariff is applied, the minimum rate of duty thereunder should be high enough to protect existing Canadian industries from the competition of countries having lower-priced labor, cheaper raw materials and capital, and whose long established industries give them great advantage over those of Canada.

"3. That although the minimum preferential tariff has already been extended to Great Britain without any corresponding preference to Canada, we would strongly impress upon the Dominion Government the necessity of obtaining reciprocal concessions from the Mother Country as speedily as possible."

The gentlemen whose names follow were elected officers of the association for the ensuing year:—President, John F. Ellis; first vice-president, James Kendry, M.P.; second vice-president, P. W. Ellis; treasurer, George Booth; secretary, J. J. Cassidey. Chairmen of Committees—Executive committee, R. W. Elliot; tariff committee, W. K. McNaught. The following were chosen representatives for the ensuing year to the Toronto Industrial Exhibition Association:—R. W. Elliot, W. K. McNaught, George Booth, A. E. Kemp, J. J. Cassidey.

FRUIT TRADE EXPANDING.

At the Wednesday sales of the Toronto Fruit Auction Company, two cars of Washington navels two cars of lemons, one car of Mediterranean sweet oranges, and a quantity of other fruits were offered to the trade. The movement in Toronto had more than doubled within the past ten years. The merchants of Northern Ontario appreciate the value of catering to the fruit trade, but in Eastern and Western Ontario there is still considerable indifference shown to the trade. The demand requires encouragement, and unless the people have the supplies before them, they are not likely to appreciate the value of fruit as a food product. Great care and good judgment are required in the business. Many merchants possessing these qualities and willing to exercise them can increase their profits by paying greater attention to the fruit trade.

—Chicago despatch of last Sunday says there was in store, at principal points on the lakes, on 2nd April, 11,054,000 bushels of wheat, and 21,594,000 bushels of corn. On the same date there was afloat at Chicago 1,420,000 bushels of wheat, 6,927,000 bushels of corn; 232,000 bushels of oats, and 307,000 bushels of rye; at Buffalo, 18,000 bushels of wheat, and at Milwaukee, 536,000 bushels of corn.

—Returns from the town liquor agents in Vermont show that in the past year the sum of $167,156, or 87 cents for every man, woman and child in the state, was expended there for intoxicants of one sort or another. Every drop of this was sold for "medicinal, mechanical, or chemical purposes," but it would take more than human credulity to believe, that more than one drop out of twenty was used for such purposes or for any other than the quenching of what it is customary to call thirst.

Debentures.

Municipal Debentures **bought and sold**, also Government and Railway Bonds. Securities suitable for Investment by Trustees and Insurance Companies and for Deposit with the Government, always on hand.

THE SITUATION.

War between the United States and Spain is no longer a matter of doubt; at any moment hostilities may begin. The Pope and the European powers have in vain raised their voices for peace. To them Spain yielded so far as to grant an armistice in Cuba, for which the United States had asked in vain. The object of the armistice must be assumed to have been peace; but scarcely had it been granted when the United States Congress showed itself ready to take a step which made war inevitable. It must have been known of course that Spain would not accept the alternative of withdrawing her forces from Cuba without striking a blow. The greatest difficulty which Spain will encounter will be to coal her fleet in American waters; a failure of coal would make her fleet powerless and bring the war to a sudden close. Both countries have left themselves at liberty to issue letters of marque and reprisal, authorizing privateers to prey upon the commerce of the enemy, and both will be likely to avail themselves of this resource. It, is, however, an addition to the calamities of war which most of the great nations of Europe have renounced. It will be a distinct gain, if the result should be that both combatants, after the contest is over, shall likewise debar themselves, in future, from the doubtful privilege of privateering. The maritime trade of Canada cannot suffer and may, indeed, materially benefit by the hostilities, which, however, she will not the less deplore. Our harbors and shipping are likely to be busy when war is declared. The abnormal excitement in Congress is explicable only by the prevalence of a belief, unproved, that the Spaniards are responsible for the destruction of the "Maine."

President McKinley, in his Cuban message, argues in favor of direct armed intervention by the United States. He opposes recognizing the insurgents as belligerents, because he does not know that there is any insurgent government with a status that would warrant recognition; and the same reason has greater force against recognizing an independence which does not exist. In both these positions, he is clearly in the right. Whatever may be thought of the reason advanced by him, in favor of armed intervention, recognition of things which have only an imaginary existence, ought to be out of the question The armed intervention, which the president suggests, has, for its object, the establishment of a stable government. This, in his own words, "involves hostile constraint upon both the parties to the contest." If the United States intervene, its maritime and land forces must conquer the island. If the rebels continued their struggle for independence, against the United States, as well as against Spain, complete conquest of the island would have to precede the setting up of a stable government. If the rebels received the Americans as deliverers, the conquest, once Spain were settled with, might not be difficult; but if the United States had to fight both the rebels and Spain at the same time, the task would not be an envious one. All thought of forcible annexation is disclaimed; of voluntary annexation nothing is said. If the object of the armistice should fail, the President's plan is to fall back on armed intervention, to be carried to the extent of setting up a stable government in the island. The President has done his best to preserve peace, and it was almost a miracle that he was able so long to hold in check the fiery passions of the Senate.

If the United States enters Cuba, President McKinley wants it to enter as master, not as the ally of Spain, which is, of course, out of the question, or the ally of the rebels. He does not wish it to assume, towards the Cubans in arms, any relation that might prove embarrassing, as that of a mere ally, subject to the direction and even the disapprobation of the Government in whose behalf it had intervened. In his view, intervention and recognition evidently clash. If the Government of the insurgents were independent and entitled to be recognized as such, forcible intervention would be out of place. One does not need to read between the lines to discover that he disapproves of the methods of the insurgents, not less than those of the Spanish Government, in the conduct of the war, and believes that neither is likely soon to get the undisputed mastery; and that armed intervention is necessary to impose terms on both combatants. If his aim is, as it appears to be, impartial intervention for the sake of peace, it must proceed without the aid of either of the present contestants. This policy, when it succeeded, would make the United States master of Cuba; intervention as an ally of either party, and that party could only be the insurgents, would, if successful, oust Spain and make the insurgents masters of Cuba. In the former case, the United States, let us suppose, by a great act of national magnanimity, might renounce her victory and hand over the prize to the Cubans. But where would she find the Cubans, apart from the two factions over both of whom she had obtained a conquest? If in the sub-consciousness of the President, there is any *arriere pensee* that looks to the advantage of a condition in which the Republic would be victor, which we hardly think, it is probably not perceived or suspected by the party that cries aloud for the recognition of independence.

Mr. Fielding's announcement of tariff policy, already variously commented upon, is destined to be long remembered. It is a new pledge that a progressive policy of free trade will be cautiously but steadily pursued. Those who desired to stipulate for a given term of protection, ten or five years, got no encouragement.

Constitutionally a bargain of this kind would not be binding on the legislature ; but if it could be made definite, means might be found of giving it practical effect. To a five years' lease of protection, with a guarantee that, at the end of the term, the indulgence would end, even a free-trader, of the staunchest school, might reasonably agree. But the protectionist, even when he asks a definite term for the tariff of his choice, would probably not be willing that a purely revenue tariff should, at the end of that term, succeed. Consequently no bargain can be made between protectionist and revenue tariff advocates, and Mr. Fielding probably feels that nothing is left for the Government to do, in carrying out the mandate they received from the people, but to make gradual and tentative steps towards freer trade, as opportunity may offer. There is a section of the Government party, which exerts some pressure in that direction ; but it is not much, and the party in opposition is protectionist. There is no Villiers to introduce, with invarying constancy, a bill in favor of free trade; no Cobden to demand a commission of enquiry, threatening, meanwhile, that if it is refused, he will, without a committee, find means to " prove the delusion of protection." To the Government alone can those look who favor the gradual reduction of the tariff. An instalment of revenue tariff comes in the form of preference, and it is all the greater that the preference goes to the country which has the most developed stage of manufacture.

THE " REPUBLIC OF CUBA."

By the rule laid down by Senor Quesada, who is described as diplomatic representative of the Cuban insurgents, that all who say that the Cuban rebels have no civil government to recognize, are enemies of the rebels, President McKinley comes under that condemnation. This diplomatic representative, accredited to no government, who has undertaken to unearth a Cuban civil government, tells us that at the beginning of the insurrection, a civil power, with Jose Marti, at its head, was set up, making the sword subservient to the law. Gomez and the other military leaders, Quesada claims, acknowledged the civil authority. Gomez, Maceo and Marti met Mejorana, May 4th, 1895, when " a call for the selection of Cuban representatives, to form a civil government, was made, and Gomez marched to the Central Province to arrange for this important event." It is claimed that, in the pursuance of this decree, 20 representatives were elected to the constituent assembly, to establish a Republican Government. This assembly met at Jimaguayu, Province of Puerto Principe, September 3rd, 1895, declared the independence of Cuba, and " confirmed the existence of the Republic." Nine executive officers were appointed. There is, we are told, besides, a civil governor in every province, with subordinates in his obedience. The provinces, it is added, are divided into prefectures, which implies some municipal government, in working order. President Blanco, is quoted as having officially claimed that he had destroyed the civil organization of the rebels, at one point. Maximo Gomez is quoted as rebuking army officers for unworthy proceedings towards the civil government. A second constituent assembly met October, 1897, and passed an electoral law, under which " 24 representatives were chosen from the six provinces, by all the citizens of the Republic, those in the army as well as the civilians," the election being untrammeled by the military. "This brilliant congress," we are told, " sat most of October and November," but where it sat, or where the civil government is to be found, is a secret, on which no information is vouchsafed. A new constitution was adopted, October 29th, 1897, but where is not disclosed, any more than where the government of the Republic of Cuba has its headquarters. These things were probably all done after a fashion ; but President McKinley can scarcely be blamed if he fails to find in them evidence of the existence of a government of which he could recommend the recognition. A government that does not permit the outside world to know its local situation could only be recognized, by a leap in the dark, without any real knowledge of what actual inspection might reveal.

On the question of the right of the United States to intervene at all by force of arms, in this case, American authorities on international law are not all agreed. Professor Phelps, ex-Minister to England, an expert in international law, while admitting that " a nation may interfere, where to prevent unjustifiable slaughter, and outrage, in another country, it becomes absolutely necessary ;" yet contends that the rule " has no application whatever to this case." The argument by which this position is supported, rests largely upon the character of the Concentrados, men who have been thrown together away from their homes, by the Spanish Government, ostensibly for protection, but whom Mr. Phelps describes as " refugees from the ravages of the real insurgents, thrown on the protection of the Spanish Government." If this description be accepted, it must be admitted that protection has been inadequate, if the alleged mortality among them has been anything like what President McKinley assumes it to be, 30 per cent. It is no doubt true that much of the misery of these sufferers is traceable ultimately, to the irregular devastations which made their homes untenable, and that for these irregularities the insurgents were largely responsible. But whatever the cause of their suffering, these Concentrados are in need of relief; and Mr. Phelps can hardly be wrong when he says that what they need is a voluntary offer of kindness and humanity, not the assertion of doubtful belligerent rights. If, he says, distress caused by the ravages of war be a ground for intervention, " we would feel called upon to interfere in every rebellion that does not immediately succeed." The rebels, at best, are probably incapable of regulated self-government, and Mr. Phelps thinks it pertinent to ask: " Can it be claimed to be the office of humanity to drive out the established government of the island, the only government there is there, and to turn over the population to the tender mercies of such a band as this ?" His remedy is charity, instead of intervention. And thinking that the United States has fallen short of its duty, he exclaims: " Let us put a stop to the expeditions from our country, on which the rebellion is fed." The President, on his part, claims that the nation has done its best in this particular, but he admits that it has not been able to achieve complete success, when he mentions " the expeditions of filibustering that we are powerless altogether to prevent." That being the case, Mr. Phelps contends—though he wrote some weeks before the President's message went to Congress—that the United States cannot hold Spain to account for negligence in the case of the " Maine," unless they admit liability for negligence in the case of filibusters; for, " if negligence in the one case is the criterion of liability, it must be equally so in the other."

PROJECTED MUNICIPAL RAILWAY TO CHURCHILL.

A no less ambitious project is contemplated by the Toronto City Council than a railway from Toronto to Churchill on Hudson's Bay. Soon after the present administration had assumed office the initial steps were taken to carry out this scheme. On Jan. 31st it was resolved that a commission be appointed "to procure a charter for the sole use and benefit of the citizens of Toronto, for the construction of a railway between the city of Toronto and Hudson's Bay, with such branches as may be necessary." This would to the ordinary mind appear to be rather a formidable undertaking, but the city fathers were undaunted by the immensity of the task before them and on March 21st enlarged their plans, empowering their commissioners to report upon all matters pertaining to Toronto's transportation facilities.

Five able and representative business men were chosen and with them the Mayor to act as commissioners. An appropriation was passed to enable them to carry on the work of investigation. The result of their labors in the past three months now comes to light in an application by the six commissioners to be incorporated as the Toronto and Hudson Bay Railway Company. It is proposed to construct a line of railway from the city of Toronto to Moose Factory on James Bay, and then, skirting the west coast of that bay passing Fort Albany and York Factory to a terminus at Churchill on Hudson's Bay. Three branch lines are contemplated, one extending to the North Pacific Junction Railway at or near the town of Gravenhurst, another extending southward from the main line adjoining the watershed near Tamagami Lake to the Northern and Pacific Junction Railway at North Bay or Nipissing Junction, and a third line from Parry Sound to Wahnapitae Lake by way of Sudbury.

There are certainly good reasons for opening up to colonization the vast territory lying immediately south of James Bay. As has been frequently pointed out, much of this land is richly timbered; while the geologists give us reason to hope that considerable mineral wealth exists there. But best of all a large area of the district has been proven of agricultural value. If settlement is to be accomplished here, it is a pardonable provincial ambition that this Greater Ontario should be tributary, in a trade sense, to Ontario's production and commerce. Some communication between Southern and Northern Ontario is certainly desirable. Does the proposed Toronto and Hudson Bay Railway Company meet the requirements of the case? The promoters of the road are evidently set upon reaching James Bay in the very near future, and regard communication with that body of water as of great importance. But colonization is the main object properly to be sought from a railway into this Northern part of the province. From an Ontario standpoint, at least, the test of the doubtful utility of Hudson's Bay as a means of communication with the Atlantic and the exploitation of its fisheries, can well be deferred for a later day. South of the Canadian Pacific line the duplication of railway service by the expenditure of municipal, provincial or Dominion money is at present inadvisable. North of this line assistance might reasonably be granted to a line whose promoters are willing to extend gradually towards the Bay as settlement becomes accomplished.

A road from Moose River to Churchill traversing the marsh lands on the western coast of Hudson's Bay is evidently intended solely for the purpose of obtaining a good port. We are credibly informed a site can be obtained which will afford adequate port accommodation on the east side of James Bay. If the western coast of Hudson's Bay is ever to be the terminus of a railway system, it would be far better that the line should be constructed from Manitoba, affording a more economical outlet for the grain of north-western Canada.

It is scarcely apparent in what relation the city of Toronto is to stand to this new line should the present application for a charter be granted and the road be constructed. To be the real owner of a railway line of this description is scarcely within the province of a city corporation. It is true there has been within recent years a tendency towards the expansion of municipal industrial undertakings. But without entering into discussion of the merits and demerits of this question, we desire to point out the responsibility which the city would assume in undertaking the work of railway building, which is always attended with great risks. The proposed line would no doubt prove of considerable advantage to the city, but it is national rather than municipal in its importance. If the charter be "for the sole use and benefit of the citizens of Toronto," to ask the Provincial Government, and more especially the Dominion, for assistance, is rather a dangerous precedent in a country such as Canada, with numerous trade centres and great "undeveloped resources."

If, on the contrary, the individuals who petition for incorporation are to be the real owners of the railroad, then great care should be exercised in the expenditure of the city's money. They must stand on the same footing as others who contemplate a similar venture and have already obtained a government franchise for this purpose.

THEY WANT RECIPROCITY WITH CANADA.

There is, apparently, a strong movement in the United States to secure a treaty of reciprocity with Canada. Several prominent commercial bodies, including the New York, Boston and Cincinnati Chambers of Commerce, have memorialized congress to the effect that "The cultivation, extension and development of close commercial relations between the United States and the Dominion of Canada, and the Crown Colony of Newfoundland, would, in the opinion of this Chamber, subserve the best interests of this country." Canadians have, for years, maintained that the advantages of trade with the Dominion, were not sufficiently appreciated in the United States, and it was only after numerous and fruitless representations to this effect had been made, at Washington, that the efforts to secure freer trade relations with the Republic were abandoned.

There has been little in the nature of trade that should cause dissatisfaction to our neighbors. Our commercial relations with the United States may, perhaps, be better appreciated by a perusal of the following table, showing the value of our imports from, and exports to that country during the past four years:

	1894	1895.	1896.	1897.
Imports ..	$62,905,779	$ 59,438,317	$ 64,334,800	$ 70,766,316
Exports ..	35,809,940	41,297,676	44,448,410	49,373,472
Total...	$98,715,719	$100,735,993	$108,783,210	$120,139,788

It will be seen that in each year Canadians have purchased more goods in the United States than they have sold in that country. Well may that eminent authority, the N. Y. Journal of Commerce and Commercial Bulletin, remark: "We repeat, what we have often said, that our trade with the Dominion of Canada, whether regarded in the aggregate, or in the excess of exports over imports, is far more valuable than our trade with any other part of this continent, and we should be showing sound business sense if we made more efforts to enlarge our trade with Canada, instead of efforts to enlarge our trade with countries that produce their own raw materials and are very moderate consumers of manufactured goods. Canada is far our best customer on this continent."

Why is it that, in the face of these statistics, Canadian trade interests have fared so badly at the hands of American legislators? Canada has been the victim of the class interests formed by the protectionist policy, which has so long dominated the United States. The Eastern manufacturers, in asking for protection against European competitors, have been compelled to concede similar protection to the farmers, and in carrying out their ends, have taken pains to instil into the minds of the farmers a fear of the consequences of a free entrance of farm products into the United States.

So long as Canadians were content to open their markets to the manufactured products of the United States, on the terms granted to other nations, and at the same time submit to duties on barley, eggs, lumber and coal, levied directly against this country, there was little to encourage a movement in the United States for reciprocity. But when once the policy of giving a preference to the imports of those countries, that allowed a free importation of Canadian staple products, had been established here, the reasons for reciprocity become apparent. Although all parties in Canada are desirous of continuing the closer trade connection, which has recently been formed with the Mother Country, there is no reason why careful consideration should not be paid to any terms of reciprocity which the United States may have to offer, but it should be understood that our neighbors must make all the advances.

TRADE WITH AUSTRALIA.

It will be apparent, from what is said in the letter of our Sydney correspondent, in to-day's issue, that the line of steamers between Vancouver and Australia, is in considerable embarrassment. The circumstances are somewhat peculiar; the two first steamers of the line suffered—much more than they deserved—from a lack of confidence in their seaworthiness, on the part of the Australians, and its latest acquisition, the "Aorangi," a ship in which the Australian public did believe, has proved a disappointment, her engine and boiler being inadequate. Then there is too little capital behind the company, and the company was subjected to the humiliation of the seizure of one steamer, and the delaying of another for debt. This is most unfortunate, the line having done so much to foster of late trade between Canada and the Antipodes, and especially unfortunate at this time when the prejudice of Australians and New Zealanders against the climate of Canada is being dissipated, and that many of them talk of "taking in Canada on the return trip from England and Europe.

Advices from Vancouver, dated Monday and Tuesday, last week, refer to the prospects of these steamers this year as being especially good, since there is a perceptible fever to get to the Klondyke gold fields. The "Miowera" brought 156 passengers, some 70 of them saloon, and of the whole something like two-thirds were bound for the Yukon country, a missionary of the B. and F. M. Society, among them. Her cargo, which was light, included 588 ingots tin, but she is said to have a heavy cargo outward this week, principally Canadian machinery and implements. Mr. Huddart, doubtless, has sympathizers in the financial troubles of his line; but if these should force the withdrawal of the present vessels, others would be found for the service, since the business with Australia must go on. The latest suggestion, from the Pacific Coast, is that in case of need, the C.P.R. steamers "Athenian" and "Tartar," now at Vancouver, one of 4,400 tons, and formerly a liner from Southampton to Cape Town, the other of some 3,800 tons, shall be placed upon the route if necessary.

MINERAL DEVELOPMENT IN BRITISH COLUMBIA.

We recur to the interesting report of the British Columbia Minister of Mines:

Speaking of the work of the year in prospecting of new territory or the development of older claims, the report says: "Some districts were disappointing, as the comparatively limited work disclosed nothing; but progress in the Province is greatly retarded because so much presumably valuable mineral land can be located and held from year to year without the locators doing a stroke of work other than putting in the stakes. This is contrary to the law governing the location and possession of mineral claims; but the fact nevertheless remains that a very large percentage of claims is held from year to year by men re-locating each other's claims, and then deeding them back to the original holders, so that prospecting work, so very much needed, is not done, and men who would do work are kept out by an array of stakes."

For the correction of this serious and growing evil, under the head of Discovery Work, the following suggestion is made: "The simplest plan is to require a certain amount of work to be done within ninety days after date of location. Some at once begin to cry out that this is an outrage on the poor prospector, who should be afforded every facility and protection in his arduous task of exploring these great mountain ranges. So he should; but he should not be permitted, as is now possible, not only to the great detriment of the country at large but to his own, to lock up great areas of country by simply putting up posts and paying a few dollars for recording fees. It will soon be more generally appreciated that if the progress is not being now made that should be, that the reason lies to a great extent in the fact that development is not being done over large tracts of our country that some such regulation as suggested would compel."

Under the head of Prospects, it is stated that during the past two years, "many seeking mining property for strong companies or syndicates have found that their choice must be greatly confined to 'prospects,' or undeveloped properties; and as ore deposits very rarely display their charms on the surface, these seekers have had to turn away disappointed in that so little was done on claims they might have been willing to buy at good prices.

"In some districts, priçes for property have risen to very high figures, even for mere locations, but this phase is gradually correcting itself, and as many owners now wish to join the great rush northward to the new goldfields, they will be willing to sell their claims at more reasonable rates. This stampede to the north will take many from the southern portion of the Province, but an increasing amount of work will be here done, and investors waiting for a lull in the former high prices will return, so that while the different mining towns will be quieter, mining will continue to advance."

On the important subject of silver-lead production the report has something of interest. It appears that the silver mines of British Columbia produced by far the greater part of the out-put of the mines for 1897, and although silver is not now held in such high favor in these days, its friends are getting handsome returns from the high grade ores as produced in West Kootenay. "With the notable exception of the silver-copper ore of the Hall mines, and some of the smaller properties, all the silver ore carries a very high percentage of lead or occurs in galena, in two or three cases galena and blende. West Kootenay produced nearly all of this ore in 1897, the 'North Star' mine in East Kootenay suspending shipments until the completion of the Crow's Nest Pass Railway. As stated elsewhere, the average net or yield of 33,576 tons of Slocan ore were 108.5 ozs. silver per ton, and 45.7 per cent. lead, with a total gross value of $97.70 per ton, or $50 to $55 net."

Not so much space as one would expect is devoted to the production of coal and coke. Possibly the time and attention of the Bureau's staff were more occupied with metals, and there was not time to do full justice to both. It is stated that the production of the collieries on Vancouver Island was about the same as that of the previous year, but in 1898 (the present year) the demand for coal should greatly increase in consequence of the very great increase in the number of steamers engaged in the northern (i.e. Klondyke) trade. The coke ovens at Comox produced over 17,000 tons of coke, mostly for the Kootenay smelters, and large barges are being built so that the coke can be sent to the mainland in cars, to avoid re-shipment there. "The great fields of coal in East Kootenay will soon be available, as the railroad through the Crow's Nest Pass west of the Columbia River will be completed in another year, when coal and coke will be delivered in East and West Kootenay, and thus effect great improvement in the conditions affecting the smelting industry of the interior."

ARE FURNITURE WOODS GROWING SCARCE.

According to the Association of Canadian Furniture Manufacturers, the makers of household and other furniture, in our midst, are experiencing a short supply of their raw material, particularly elm wood. This is a circumstance for which the average Canadian was probably unprepared. We were aware that the Southwestern peninsula of Ontario was pretty well denuded of pine, and we knew that oak was scarce, but if our supply of ash and elm is also failing us, we shall no longer be able to boast our assumed wealth in varied woods. It is largely because so much of our elm has been bought of late by the Americans, that our furniture-makers find it hard to get. United States firms use it, as we do, for office and school desks. Our Toronto market report last week indicated that fancy prices were being paid for choice cuts of elm and oak, and that prices were strong all round. A natural effect of this condition of things is that the Association, at its Toronto meeting, on Monday and Tuesday last, agreed—there were thirty manufacturing firms represented—to advance prices ten per cent. Of course, we cannot sell our cake and yet have it to eat, that is to say if we sell our elm to the Americans we cannot expect to enjoy the cheap prices for furniture that have prevailed.

THE I. O. of FORESTERS.

The last annual statement of the above society, made by Dr. Oronhyatekha to his Executive Council, is called by him a "record breaker." This means, of course, that the new business done during 1897 was greater than during any preceding year. More new certificates were issued than for the previous year, as to amount, by $6,366,500, and the total amount of risk was increased by $25,819,000 out of the $35,224,500 of new risks written in 1897. Difference dropped out somewhere, $10,594,500. Of this very large disappearance only $863,147 is accounted for by death, leaving still $9,731,353 of "adverse selection," as the life insurance companies call it.

It is only a few years since almost the entire membership of this Order was located in Canada, and mostly in Ontario. In January, 1893, there were only two small High Courts outside of Canada, viz.: Michigan with 161 Courts, and New York, just organized, with 53, while in Canada there were no less than 545 Courts with 25,000 members. Since then the Courts have increased somewhat in Canada, but the members here are growing old and the "new blood" is now coming mainly from the United States. The following statement from Dr. Oronyatekha's "record breaker" will show how much this is the case. And it also shows what very poor success the costly attempt to capture Great Britain and Ireland for the Order has met with:

NEW MEMBERS ADMITTED IN 1897.

Location of Members.	New Members.	New Amounts.	Total in Force.
Canada	10,107	$10,965,000	$ 68,750,000
United States	19,180	23,262,000	81,130,000
Great Britain	850	997,500	4,630,000
Totals	30,187	$35,224,500	$154,510,000
1897's increase	6,013	6,336,500	25,819,000

Now, bearing in mind that the Order was founded in Ontario in 1874—some 24 years ago—and that its membership was confined to Canada during all its earlier years, so that all its old men are to be found in this country, let us look at the following table, showing the relative death losses, and the balances yielded from old men in Canada, and from young men in the United States and Great Britain, during 1897:

THE DEATH LOSSES.

Location.	Death Losses.	Income.	Balances Left.
Canada	$473,918.31	$ 667,353.66	$160,067.70
United States	375,094.15	742,017.56	329,822.49
Great Britain	14,135.49	52,866.49	36,087.68
Totals	$863,147.95	$1,462,237.71	$525,977.87

The above figures in the column headed "balances left" mean, in the doctor's own words, "Balance of the premiums after paying benefits, and appropriation towards management expenses." Those management expenses were: In Canada, $33,367; in the United States, $37,100, and in Great Britain, $2,643.

How much was contributed to the surplus, during 1897, by the old men of Canada, (who, however, were as young when they entered as those now joining abroad) as compared with the young men of the United States and Great Britain? The following table will show the amount per member and per $1,000:

SURPLUS PER $1,000, AND PER MEMBER.

Location of Risk.	Amount at Risk.	Surplus Per $1,000	No. of Members.	Surplus Per Member
Canada	$ 68,750,000	$2.32	57,680	$2.77
United States	81,130,000	4.06	63,265	5.21
Great Britain	4,630,000	7.79	3,740	9.65
Average	$154,510,000	$3.40	124,685	$4.22

It is very evident from the above that if the Order had been confined to Canada until now, its yearly surplus over expenses and death losses, would be reaching along dangerously near to the vanishing point. Its 57,680 members will be 57,680 years older a year hence, and five years hence those of them who remain on the books, (taken by themselves, apart from new entrants), will average nearly ten years older than now, because of the deaths and lapses during the period. The manner in which lives rapidly increase in average age, causing the accelerated death losses due to old age, may be seen from the experience of life insurance companies which have ceased taking in new members in Canada. We give herewith two tables showing the premiums received and losses paid in 1877 and in 1897—twenty years apart—by three Scotch and three American life companies in this country:

TWENTY YEARS AGO—1877.

Names of Companies.	Premiums Received.	Losses Paid.	Difference Saved Up
Life Ass'n. of Scotland...	$113,190	$ 73,662	$ 39,528
Reliance Mutual	26,647	6,521	20,126
Scottish Amicable	22,155	35,332	13,177
Connecticut Mutual	166,326	32,200	134,126
Northwestern Mutual	43,397	19,662	23,735
Phoenix Mutual	123,638	43,633	80,005
Totals	$495,353	$211,010	$284,343

The death losses, it will be noticed, did not at that time consume quite half the premiums, except in the case of one company. Observe:

HOW IT IS NOW—1897.

Names of Companies.	Premiums Received.	Losses of 1897.	Paid From Reserve,
Life Ass'n. of Scotland	$ 34,814	$ 62,405	$ 27,591
Reliance Mutual	6,313	14,284	7,971
Scottish Amicable	5,160	15,130	9,970
Connecticut Mutual	33,767	103,250	69,483
Northwestern Mutual	13,436	21,268	7,832
Phoenix Mutual	20,039	35,311	15,272
Totals	$113,529	$251,648	$138,119

The losses in 1897 over-consumed all the premiums collected by about two and a half times. In other words, the I. O. F. payments would have to be about five times as large as they are to provide for such a mortality.

MORTALITY RATE.

All Six Companies.	Insurance In Force.	Losses of the Year.	Cost Per $1,000
In 1877	$15,150,536	$211,010	$13.90
In 1897	4,742,289	251,648	53.06

This last table shows that an annual assessment of $13.90 was all that was needed to meet losses when the members of those six companies were young, and that now, twenty years later, $53.06 per $1,000 of insurance would have to be collected, or there would be collapse, if there was no reserve fund to draw upon.

At age 43, the rates of the I. O. F. call for $13.20 and at age 44 for $14.40, and these rates are now producing a small surplus for Dr. Oronhyatekha, upon the collections in Canada, as shown in the third table above, entitled, "Surplus per $1,000." That surplus per $1,000, is only the trifle of $2.32 toward future requirements. And it is only swelled to that size by the influx of new Canadian members during the past five years. What effect the new-comers in Canadian Courts, added to the old material, has had in preventing a shortage, may be judged by a glance at the figures in the line opposite "Great Britain" in the same table. That business is all under five years of age. It yields a surplus of $7.79 per $1,000, just as the Canadian business did when it consisted (in Jan., 1886) of practically the same number of persons (3,648) almost all within five years of entry. But now that the 3,648 members of twelve years ago, have been sifted by lapses and deaths, it is not likely that more than half of them remain. Those who do remain are twelve years older, and deaths are coming faster; somewhat the same as shown for the six companies. But they are still paying only the small contributions of say $12 (age 42), when for their present age, even on the same low scale (being now 54), they should be paying $36. The man who comes in now at age 54 pays $36 per $1,000, though fresh from the hands of the medical examiner. The man who joined 12 years ago, and is now 54, and an impaired life on the average, contributes only $12 to the death losses of the year. These now far exceed his yearly contribution, as would be seen if an examination were made relating only to the membership of twelve years ago now remaining on the books.

It ought to be very easy to conclude from the figures herein given, that unless every future year is a "record breaker" in the matter of bringing in new members, the race of the I. O. F. against Old Mortality is likely to be a short one, upon such wholly inadequate rates as it is now charging. And the more new blood brought in upon such rates the greater the future shortage must be. We append the rates it collects, per annum (less the five per cent. for expenses), placed alongside of those prescribed in the new Revised Statutes of Ontario. The latter are the lowest that any assessment society, hereafter licensed in Ontario, is permitted to collect upon ages at entry:

Ages.	I. O. F.	The Statute.	Shortage.
18	$6.84	$ 9.86	$3.02
19	6.95	10.20	3.25
20	7.07	10.55	3.48
21	7.18	10.91	3.73
22	7.50	11.28	3.78
23	7.41	11.66	4.25
24	7.52	12.03	4.51
25	7.64	12.42	4.78
30	8.21	14.31	6.10
35	9.28	16.62	7.34
40	10.30	20.18	9.88
45	14.82	24.66	9.84

Which means that upon every one thousand members, each carrying $1,000, entered at age 40, the shortage would be $9,880 a year. At that rate, upon the 125,000 members now in the I. O. F., there is being collected, each year, somewhere about $1,250,000 less money than the Ontario Statute, (page 2072) stipulates as necessary for solvency in any new licensee, with that many members.

On February 1st, the membership numbered 126,328 and the "surplus" was stated at $2,611,155, or a trifle over $20 per member. What is called a surplus by Dr. Oronhyatekha, however, is not the same as life insurance companies call surplus. The latter always provide a full reserve fund, sufficient to re-insure every risk in any other solvent company, and only the margin of their assets OVER AND ABOVE such reserve fund, is spoken of as a surplus.

OUR AUSTRALIAN LETTER.

THE FLOODS—THE STEAMER LINE—CONVENTION—CRICKET MATCHES.

The unfortunate Canadian-Australian Steamship Company has met another, its most serious, and it is to be hoped its clearing trouble. The line was started by Mr. James Huddart. He had two steamers lying idle in Sydney harbour, the "Warrimoo" and the "Miowera," when he heard of the Canadian subsidy granted for a line to Australia, and he proceeded to put these steamers on the route and secured the subsidy. The steamers were built for the New Zealand trade, but proved unprofitable for this purpose. The obstacle to success there was the poor opinion that the traveling public had of those steamers. The general impression was that they were too lightly engined, and too cheaply built for long Pacific trips. And despite the successful runs of the steamers for years, this idea still prevails, and it can be heard expressed on every side.

The next obstacle was that the route required three steamers to make the monthly trips, instead of two. The outcome was that the two employed upon it were overworked, and there were consequent delays and postponements of sailings that still further impaired confidence in the line.

The third drawback was this: there was not sufficient capital behind the line to sustain the initial losses and put the ships, etc., into useful condition. To get this capital Mr. Huddart induced Sir Edward Dawes and friends to join him, and on their doing so, put on the third steamer, the "Aorangi," and this was the worst misadventure of all, and indeed brought on the collapse. Much was hoped from the "Aorangi," and the effect of having a steamer in which the public had confidence, was at once seen, for on her first trip, she had, by far, the largest passenger list that any steamer had carried. She proved a terrible disappointment. The boat was handsomely fitted up, but her engines and boiler were utterly inadequate. There was a series of breakdowns and delays. Three thousand pounds were expended upon her and with very little improvement. And now Sir Edwin Dawes and his friends, who are responsible, it is said here, for the engineering of the "Aorangi" is desirous of getting rid of Mr. Huddart, who had done his best under trying circumstances to make the line a success. The "Aorangi" was seized for debt but was released in a couple of days. The "Miowera" was then taken possession of by creditors, but it is hoped that she will also be allowed to go to Vancouver, though she will be some days late in departing.

The steamers have never had the support of the traveling public that they would have got had there been more confidence in their efficiency for the service; but still for two years past they have had full cargoes from Canada. Freight is now more promising from New South Wales, and a considerable number of gold seekers are seeking passage for the Klondyke, and the line has fair prospects before it. It is to be regretted that quarrels within the company should spoil these prospects. It may be true that Mr. Huddart has expended time and money in promoting a fast Atlantic line that were needed on this, but he has shown a good deal of enterprise, and it would be lamentable if he should now be deprived of the fruit of his energy and lose his money besides.

The Australian steamers "Warrimoo" and "Miowera" have shown that when properly handled they are capable of working the service, and were the "Aorangi" equipped in her boiler and engine room as she ought to be, the three steamers could render useful service for some time longer, though they are not likely to get the share of the tourist business that it was hoped it would secure and which ships more highly thought of certainly would do. There was a good deal of apprehension of a winter trip through Canada, and of the wearisomeness of the long rail ride across the continent, but better information is dissipating these mistaken notions, and people who a few months ago scouted the idea, now talk of taking Canada on the return trip from England and Europe.

Australia suffered last month from intense heat, drought, forest fires and floods. Victoria and Tasmania suffered heavily from intense heat and bush fires. Farm houses and villages perished in the sweeping flames; indeed the story reads like a tale from America. Queensland, on the other hand, had deluges. Near Gympie the rainfall amounted to six feet on the level in a few days. When this flood came tumbling down the valleys and ravines of the coastal mountains you can conceive the result.

With February has come a delightful change. Nearly the whole continent has had useful, and in many cases, abundant rains, and for the first time in three years it can be confidently said "the drought has been broken." The forest fires are extinct and the thermometer has fallen to an endurable level. In some places the rainfall was heavy. Not far from Sydney a rivulet which ordinarily could be stepped across became a roaring torrent one mile and a half broad, and one hundred and fifty feet deep. This heavy rainfall created some washouts on the railways and did other damage, but no one thinks of these ills now that the drought is over. The rains mean plenty of grass and water for the sheep-raising and the butter-making interests, tillable land for the farmer and hopes of good times generally. Business has not improved much as yet but merchants wear more hopeful faces.

The Federal Convention is now in its fifth week of its Melbourne session, and it has not yet got out of the way the deadlock snag that stopped the way at Sydney. It found a new obstacle with which it wrestled painfully and tediously at Melbourne, viz.: "Who should control the River Murray and its affluents?" South Australia wished these great streams of this continent to be placed in the hands of the central government, in order that it might use them as navigable waters to get at trade in New South Wales. The latter colony wanted to retain control in order to use these waters for irrigation. Each side declared that neither could nor would give way on this point, and federation might go to wreck first. Both did give way and as it now stands there is really a joint control, the central government governing the navigation and New South Wales is still to have a vested interest in the waters for irrigation. Practically this means that the question is left for the lawyers of the future federation to fight out.

The Convention for federating the Australian colonies has now sat about four times as long as the Canadian Assembly that devised a constitution for the Dominion. A critic has satirically defended the slowness of the proceedings by quoting Edison's statement that before he was able to arrive at a useful improvement he had to experiment with a hundred ideas that proved unworkable. It would seem that there is some force in this, for the Convention has certainly expended an annoying amount of time in discussing schemes that have been unworkable. The chief difficulty in the way is the narrow selfishness which causes so many of the delegates to seek a special advantage for their particular colony as their prime object.

The grip that cricket has on the Australians is a frequent jest, or sneer, as the case may be. But England must be still more fascinated by the game. The correspondent for the London papers found that they could not get the reports of the matches between England and Australia promptly forwarded at ordinary press rates nor ordinary message rates, so they had them pushed on as urgent, paying three dollars and sixty-eight cents per word for the privilege. During the match at Melbourne $20,000 worth of telegraphy was done from the cricket ground alone. Even at these expensive rates it was impossible to get the cables forwarded fast enough to satisfy the English appetite and grumbles were heard on every side. It is probable that cricket matches have done more to bring the need of another cable before the mass of English people than even a war scare, and so the Canadian Pacific cable project may be helped by the booming of the popular sport.

The Australian Chambers of Commerce are again moving the governments to push forward cable communication with Canada, and at a meeting of Premiers to be held next week it is likely to come up for consideration.

F. W.

Sydney, New South Wales, 5th March, 1898.

GENERAL CONDITION OF MEXICAN TRADE.

BY A CANADIAN, RESIDENT IN MEXICO.

In referring to Mexico's exports, I first mention rubber. For many years the chief supplies of rubber, to the manufacturers of the world, were Africa and South America, but defective handling of the trees at milking time has destroyed a large area of the rubber-producing lands of these countries. Brazil, however, still maintains the lead in the trade, with exports of $100,000,000, annually. Parts of Mexico and Central America are equally well adapted to rubber cultivation, and the industry is growing rapidly, as large tracts of land are being and have been, during the past few years, brought under cultivation. The output will very largely increase in the near future.

Coffee.—The exportation of coffee, for the year ending June 30th, 1897, was 38,758,117 pounds, valued at $4,938,266, most of which went to the United States. The production of coffee is rapidly on the increase, and in three years will probably be treble the present output. Canada took Mexican coffee last year to the extent of $13,506.

Sugar.—The sugar crop is mainly consumed in Mexico, the exports for the last fiscal year only amounting to 1,093,549 pounds, value, $33,652, of the better grade (which is not thoroughly refined), and 930,395 pounds, put down at $15,183, of low grade. Like all agricultural industries, in this country, that of sugar is rapidly advancing, and large quantities of machinery are being imported for manufacturing and refining purposes.

Hemp.—The hemp crop is produced almost exclusively in the State of Yucatan, where its culture shows a yearly increase. Exports for the year were 156,672,519 pounds, $3,715,926

Istle.—The exports of istle, or tampico fiber, were 20,131,191 pounds, of the value of $405,531, most of which, as well as the hemp crop of the country, was exported to Europe.

Tobacco.—Cuba has so long maintained the foremost place as a producer of fine tobacco, that it is difficult to persuade consumers that any other country can compete with her, and, had it not been for the depression in the leaf trade, due to the Cuban insurrection, Mexican tobacco might still be in the background. Four or five years ago, the United States imported no Mexican tobacco. In 1895, they imported leaf to the extent of $14,655, and in the next year, $144,935, the greater portion of which was for use as cigar wrappers. Many Cuban planters have recently transferred their interests to Southern Mexico, not only on account of the unsettled state of their island, but because they are convinced that the richness of soil and general conditions will produce better results than the worn-out lands of Cuba, which now require large quantities of fertilizers. Fancy Cuban wrappers sell for $4.00 per pound, and the same, or even a better quality are produced in Mexico, and sold at from 80 cents to $1.00 per pound, yielding a handsome profit to the planter at that figure. There is no doubt that a large amount of the tobacco shipped at present, as Cuban, has been imported into the island from Mexico. Total exports of manufactured tobacco, for last fiscal year, 926,191 pounds, $500,929; unmanufactured, 2,975,186 pounds, $859,116

Fruits.—The fruits of the country are very numerous, and exceedingly cheap. They are exported chiefly to the United States. About ten cars of Mexican oranges were shipped in the latter part of 1897, to points in Canada.

Chicle.—The chicle industry is rapidly developing. It is a gum used for making chewing gum. The production for 1896-7, was 1,485,464 pounds greater than in 1895-6. The average price in 1895-6 was nearly 24 cents per pound, and in 1896-7, the average price dropped to 16½ cents, with a probability of a still further reduction in 1898.

The other chief articles of export are :

	Quantity.	Value.
Horses, swine, mules and cattle....		$ 2,004,345

W. L. M. Lindsey.

City of Mexico, March, 1898.

To be continued.

THE OTTAWA AND GEORGIAN BAY CANAL PROJECT.

Mr. McLeod Stewart writes to us to say that he "never asked the government for $300,000 a year for 20 years," as a bonus in aid of the projected Ottawa and Georgian Bay Canal, and that he "never went through a farce with S. Pearson & Sons, limited," in the form of a contract to build the canal: but he adds, by way of admission, "I have a provisional agreemet with them and their engineer is on his way to Ottawa to go over the route with me, with a view to starting in our work this summer; the plans are all ready." This information is incomplete, in not stating what amount Mr. Stewart is asking from the government, in aid of his project; money has certainly been asked, and in our opinion none could properly be granted. If the projected canal is to be built at all, it ought to be, like the other great canals, a government work. Why should the government bonus, for the benefit of private parties, a canal scheme which, if successful, would make valueless the St. Lawrence canals which have cost half a hundred millions. On this point Mr. Stewart says: "The government of Canada have a clause in the Charter by which they can take over the canal at any time and pay what arbitrators may adjudge." Whether the canal should, on economic grounds, be built, is more than doubtful; but if this question were decided in the affirmative, the agency of a private company would properly have no place in the work. Mr. Stewart says further: "The statement about the Imperial Government is not astonishing at all." The statement was that a subsidy for the canal was expected from that government. We repeat that in our opinion, if Mr. Stewart is building on the prospect of such aid, he is under a delusion. Here is the substratum of fact which he gives to us to prove that the statement about an Imperial subsidy is "not astonishing at all." "I was," he says, "in close touch with the War Office, the whole time I was in England, last fall. Lord Lansdowne, Secretary of State for War, takes the keenest interest in this project, so much so that he had a report made on this side." Any one who knows how public men are persecuted by promoters with schemes of various kinds, may think Lord Lansdowne got off easily, by accepting a type-written report of sixteen pages, which could be disposed of without disturbing any one's slumber.

THE MANITOBA NORTH-WEST LAND CO.

The negotiations which have been going on for some months looking to the sale of the securities of the Manitoba & North-West Loan Company, limited, and the winding up of that company, have at last been concluded. An agreement has been entered into whereby the Canada Landed & National Investment Company, limited, guarantees the whole debenture debt of the Manitoba Company, amounting in round figures to $850,000. In consideration of this guarantee the latter company sells to the former $500,000 of municipal and school debentures and mortgages, these to be selected by the Canada Landed out of the whole of the assets of the other, which amount to $1,300,000. The half million of securities mentioned are, we understand, purchased on a basis to net the Canada Landed Company 6½ per cent. interest. As security for the balance of the debenture debt amounting to $350,000 the Canada Landed Company have a first charge over the remaining assets and unpaid capital stock of the Manitoba Company, amounting together to not far from two millions of dollars.

The arrangement is one that ought to prove satisfactory to both parties. It is certainly a better one for the Manitoba's shareholders than the proposal of the Central Canada Loan Company was. In the bargain now made the assets of the Manitoba Company not disposed of as we have described, are in their own hands to be made the most of, by sale or otherwise, and liquidation is a matter of their own time. There is too, a further advantage in the arrangement, that under it a competing company is removed from the list. For the opinion is gaining ground that the amalgamation of some of the smaller mortgage loan companies would be a wise policy.

EXTRACTS FROM BANKING JOURNALS, ETC.

The German-Asiatic Bank is about to open seven new branches at different points in China, all of which will undertake agencies for German home firms.

Denver, Colorado, has been chosen by the Executive Council as the place for holding the next annual convention of the American Bankers' Association. The choice seems to be generally applauded.

The valuable computation of the issues of negotiable securities throughout the civilized world, made annually by the Moniteur des Interets Materiels, of Brussels, is published in the Bulletin de Statistique, for February. The issues of 1897 were only 9,596,755,180 francs ($1,800,000,000); as compared with issues in 1896 of 16,722,067,625 francs ($3,300,000,000).

An American journal refers admiringly to the very proper resolution reached by the directors of a large bank in New York City, to pension such of its long-time employees as had become unfit for service by reason of old age or infirmity. But it also speaks of the resolution as if it were a rarity, or a new departure in the States. We, in Canada, are no strangers to the system, for our prominent banks have individually maintained such pension funds for years. And in Great Britain it is the rule instead of the exception.

A pamphlet lately sent out by the American Bankers' Association, entitled "What is a bank?" has for its object the furnishing of information to the masses of Americans concerning the system of banking in the United States. It also aims to dispossess the public mind of prejudices which prevail to a great extent among the people over there against bankers and banking institutions. Mr. W. C. Cornwell, president of the City Bank. of Buffalo, is the author, and he has done his work well. The pamphlet is one that deserves to be widely circulated and carefully read.

"I've just cussed out my bank," said an excited man a day or two ago. "Through some miscalculation I made an over-draft of a few dollars, and my check was returned with the letters in the corner, 'N. G.' Now, I have been a steady depositor there for ten years, carrying a balance of $500 to $1,000 until recently, when outside pressure reduced it. 'N. G.' means 'no good,' and to apply it to a gentleman signifies that he is a fraud. I maintained that proposition when the bank sent back my check thus inscribed, and I am told by a lawyer that an action for damages would lie. It should have been marked 'No funds,' which would simply have been official notification of an overdraft."—New York Press.

In the course of a two page article on the pamphlet of M. Yxes Guyot, the French statistician, on the bi-metallic campaign in France, Rand McNally's Monthly gives a table from the pamphlet (which was written at the request of the gold league of England), showing the fluctuations of the prices of gold and silver in the French market from 1821 to 1895, whch plainly proves that even in the period 1821-1876, when there was unlimited coinage and exchangeability of the two metals, there never existed complete parity between them, but that, on the contrary, gold rose to 17 francs above par in 1833 and silver to 30.8 francs above par in 1857. The commercial price in the markets of the world took little heed of the mechanically fixed ratio of 1:15½, and after 1873 took leave of that basis for all time.

If the settlement of the Spanish trouble should take the form of the purchase of Cuba, says the Bankers' Magazine, what an opportunity would be afforded the country to get rid of its stock of silver, at least at its bullion value. "If a sale of Cuba was agreed upon, the United States would, undoubtedly, have to issue bonds to meet the price. It would be good policy to prevail upon Spain to take the silver dollars and silver bullion at its bullion price, making the silver certificates now outstanding a direct charge on the gold reserve, which would be increased to the necessary amount by an issue of bonds. The United States would gain largely by this operation, even if the loss of the silver was considerable. On March 1st, 1898, the Treasury had on hand, $399,079,443, in silver dollars, and silver bullion, valued at coinage price at $100,819,300. Assuming that it was all coined money, the total would be $499,898,748. The probability is that provided the silver is to be got rid of in this way, nothing will be gained by waiting. The price is more likely to fall further than it is to rise. Of course by maintaining the silver dollars in their present condition, the government apparently makes a gain by the seigniorage. But is not this gain offset by the risk and possible loss of attempting to perpetually maintain so large a mass of depreciated silver at par in gold?"

TORONTO TRADE FIGURES.

The imports at Toronto from foreign countries were larger last month than is usual in March. We have gone back as far as 1893 in our tables of Toronto imports and cannot find any March whose figures equal those of March, 1897, when the value of imports was $3,456,672. To this add the value of exports, $531,778, and we have the aggregate of $2,988,450, total foreign trade for the month. In the previous March the figures were $1,844,984 and $635,457; aggregate $2,480,451. We append a comparison of principal items of import:—

	March, 1898.	March, 1897.
Brass and manufactures of	$ 8,113	$ 7,766
Copper "	166	402
Iron and steel "	192,202	137,455
Lead "	6,838	4,440
Metals and composition, N. L. S.	13,572	6,419
Total metals	$138,127	$116,057
Cotton and manufactures of	$177,803	$135,960
Fancy goods, laces, etc	76,973	67,920
Hats, and bonnets	77,508	33,988
Silk and manufactures of	153,187	83,414
Woolen manufactures	299,786	267,647
Total dry goods	$785,257	$608,929
Books and pamphlets	$27,976	$19,071
Bicycles	53,461	76,928
Coal, bituminous	28,804	15,392
" anthracite (free)	71,819	66,055
Drugs and medicines	27,697	18,403
Earthen, stone and chinaware	15,651	16,392
Fruits, green and dried	33,233	24,971
Glass and glassware	22,871	15,375
Jewelry and watches	34,196	21,343
Leather and manufacturers of	36,148	28,647
Musical instruments	14,103	8,867
Oils of various kinds	19,483	14,694
Paper and manufactures of	51,205	39,245
Spirits and wines	5,760	6,336
Wood and manufactures of	8,576	9,424

It may be thus seen that the increased import of dutiable goods is general, very few items showing an exception. Free goods brought in show an increase from $593,000 in value a year ago to $659,000 now. Coal, dyes, chemicals, furs, wool and settlers' effects being among the items showing increase. Some $80,000 more bullion was brought in, too.

Turning to exports, we find a decrease in those of Canadian production. The principal item in the list, animals and their produce, accounts for this, for, while there is a respectable increase in dead meat shipped, the 3,946 horned cattle exported in March last year has shrunk to 42 last month. A comparison is made below:—

EXPORTS, CANADIAN PRODUCE.

Produce of	March, 1898.	March, 1897.
The Mine	$ 53	30
" Fisheries	465	......
" Forest	3,855	$ 4,612
" Field	98,152	51,675
Animals and their produce	253,620	405,903
Manufactures	159,130	155,964
Total	$515,275	$618,184

BRITISH EMPIRE MUTUAL LIFE ASSURANCE COMPANY.

The fifty-first yearly report of this well-known life underwriting company has been issued. It shows business well maintained in extent, while the mortality is considerably below the expectation. New assurances were about the same as in the previous year, but the total assurances in force exhibit an increase of 232 policies covering £354,370, or rather more than $1,750,000. The total premium income for the year was £278,231 after deduction of re-assurance payments. The revenue from interest was £101,730, being at the rate of £3 18s. per cent. calculated upon the average funds of the year, invested and uninvested. The death claims showed that 404 deaths occurred, by reason of which 453 policies terminated, assuring £154,312, inclusive of reversionary bonus. At the close of the year the total funds amounted to £2,671,413, showing an increase of £122,471 as a result of the operations of the year, notwithstanding the large sum paid away in cash bonuses. The policies in force were 25,688 in number, assuring the large sum of £8,935,618, including bonus additions (after deduction of re-assurances); and 161 securing annuities of £14,254 per annum.

PHŒNIX ASSURANCE COMPANY.

One of the solid and respectable insurance concerns of England is the Phœnix, which seems to be a good deal of an underwriting aristocrat. At all events it may boast age and blue blood—if companies can have blue blood—and it has resources which justify its high reputation for strength. If we are correctly informed, the Phœnix was established in London as long ago as 1782, not in its present shape but as one of the companies of those days which were really private organizations, and nothing was known of its operations until much more lately. Within a few years an Act of Parliament was obtained for the purpose of reconstructing the company. The capital was formerly £71,918. The present arrangement shows a subscribed capital of £2,688,800 in shares of £50 each, on which £5 per share is paid up. The last quoted price on the Stock Exchange is about £45 per share.

The company's business is a large one, showing in 1897 a revenue in fire premiums alone of £1,114,888 and losses under 60 per cent. The operations for the year show that after putting aside a reserve for outstanding risks of £145,954, a balance of £122,853 is carried forward to the profit and loss account. A dividend is, of course, declared, and at the usual rate. The company's balance sheet shows reserves of £1,511,935, which is equal to $7,540,000; for besides the general reserve fund of £573,000 and the reserve of about £416,000 for unexpired risks, there is the amount at credit of profit and loss and the paid-up capital. Insurants who have policies with the Phœnix may expect with every confidence to get their money if their claims are honest claims.

CANADIAN FURNITURE MANUFACTURERS' ASSOCIATION.

A special meeting of the Canadian Furniture Manufacturers Association was held in Toronto on April 11th and 12th. The firms represented were: Anthes Mfg. Co., Berlin; American Rattan Co., Walkerton; Thomas Bell & Son, Wingham; Watson Malcolm, Kincardine; George McLagan, Stratford; Snyder, Roos & Co., Waterloo; Baird Bros., Plattsville; Burr Bros., Guelph; Preston Furniture Co., Galt; Siemon & Bros., Wiarton; Knechtel Furniture Co., Hanover; Darling Leighton, Harriston; John Hoodless, Hamilton; Cobban Mfg. Co., Toronto; D. W. Thompson & Co., Toronto; Simpson Co., Berlin; North American Bent Chair Co., Owen Sound; Button & Fessant, Wingham; Union Furniture Co., Wingham; Charles Rogers, Son & Co., Toronto.

The cause of the gathering, or at least the principal cause alleged, was the decided shortage of their raw material, especially elm lumber, which has risen one-third in price during the past month and is hard to obtain. This is owing to American firms having bought so largely of late that they have practically cleaned out the market. After discussion the gathering came to the unanimous agreement to call in existing price lists, and to advance prices of elm goods ten per cent. This is necessary, they say, if they are not to lose money.

The Association passed the following resolution:

"That this Association is strongly of the opinion that in the event of an insolvency bill now before the Dominion Parliament being passed, that such bill should contain a provision requiring any secured or partially secured creditor of the insolvent to state in his affidavit of claim in detail particulars of the security held by such creditor, and the nature of same, and that the creditor shall rank on the estate of the insolvent for the amount of his claim over and above the nature of such security only; also that the assignee shall be entitled to take the security from such creditor as the value placed thereon by him, and an advance of 10 per cent."

LEATHER AND FOOTWEAR NOTES.

The weather of late has not been all that could be desired by the owners of large stocks of rubber shoes.

There is a great difference in the satisfaction of customers when buying cheap shoes and when wearing them.

A German statistician calculates that the bicycle trade will consume a million feet of cowhide leather this year for bicycle saddles.

At last month's fur sales in London a single skin of a sea otter brought £225 or nearly $1,250. And still, comments an American exchange, some of our tanners talk about high-priced hides.

Shoe manufacturers tell us they see no evidence of the decline of hides in the values of leather. It should be remembered that leather prices were not subjected to the inflation which has affected the hide market for so many months.

The finance committee of the Oshawa Council has been considering the request of Mr. Chas. King, that the town loan him $15,000 for ten years, providing he re-opens his tannery, he to pay the interest on getting exemption from taxation. It is likely that a public meeting will be called to consider the question before the council deal with it.

Sheepskin tanners, says *Hide and Leather*, are tanning sheepskins with the wool on and not saying a word, or despising the less fortunate people who are not benefiting by the Klondyke craze. Wool skins are quite popular for sleeping bags and it is said that several sheep tanners in Seattle are busy and prospering. Furriers also, are doing quite nicely, thank you.

Authorities state that the stains oftened noticed around the eyelets on colored shoes are due to verdigris created by the action of the oil in the leather, in connection with the brass of the eyelets. The way to prevent this, is to order your colored shoes made with fast color eyelets. They have nickle bases that cannot corrode and their celluloid tops will not change color.

A company by the name of the A. D. Fisher Company, Limited, capital $40,000, has obtained power under Ontario letters patent to make, sell and deal in skates of all descriptions and parts thereof, and boots or other footwear to be used therewith; cutlery of all kinds, sporting goods and accessories. The parties are Alexander Douglas Fisher, J. N. Shenstone, John Clark Laidlaw and J. H. Damp, all of Toronto.

Much has been printed from time to time about the rapid increase in the demand for rubber for mechanical and other uses, and fears have been almost as often expressed lest the supply should be exhausted, says a Boston paper. But rubber is to-day coming forward as fast as required for the larger demand and prices have not risen in marked degree. New rubber fields have been discovered year by year, and it is quite certain that the old have been by no means exhausted. "Africa now supplies large quantities of rubber which is about equal in quality to that of Central America, although inferior to Para," said the New York representative of Shipton Green. "Mexico and Central America are planting rubber seed, and may be expected to be ready with a new supply before that from the forest shall have been exhausted."

FOR GROCERS AND PROVISION DEALERS.

The chairman of Lever Bros., limited, the great English soap manufacturers, stated at the last meeting of the shareholders that if they sold their soap at cost, the profits on the side product of glycerine would be sufficient to pay the dividend guaranteed to the preference stock.

The steamer "Ravensdale" sailed from Halifax last week for Havana with 8,491 barrels of potatoes and 1,580 drums of dry fish. The net price paid to the farmers of Kings County, N.S., and of New Brunswick for these potatoes was fifty cents per bushel, making over $11,000.

A British Columbia Exchange says, "Preparations are being made at several of the canneries along the Fraser River for the coming season.

Some of the firms are getting ready to pack spring salmon, should these run in sufficient numbers. At present, however, these fish are not plentiful enough to more than meet local requirements, while the majority are undersized."

Smuggling in the Mennonite Reserve of Manitoba has ceased, in the opinion of the inland revenue officers. The duty collected at Gretna now amounts to a considerable sum, in comparison to that received during the several months of last year. Local dealers are also disposing of large quantities of Canadian tobaccos and other goods for which previously there was little demand.—*Winnipeg Free Press*.

Ontario letters patent have been granted to Hugh Malcolmson and Manson Campbell and others, in Chatham, to can and deal in vegetables and fruits and also meats, under the name of the Kent Canning Company, limited, to acquire Hugh Malcolmson's canning and pickling works. They have power to deal in cold storage, and to appoint branches in Kent and Essex.

Describing the display of Easter beef at the Toronto abattoir agency on Barrington Street, a Halifax exchange declares that almost every side of western beef there displayed on Saturday had found a customer, and another car had been ordered for Monday. The manager has found the demand for Ontario beef exceptionally strong. He has also sold large quantities of beef to wholesalers both in and out of the city.

The Montreal Butter and Cheese Association has addressed a petition to the Ottawa Minister of Agriculture, and to the Ministers of Agriculture of Ontario and Quebec, asking the several ministers to warn butter-makers against the use of boracic acid, because it is an adulterant under English law, and exporters have to give guarantees that the butter they supply is absolutely pure. The petition also especially mentions the use of "preservaline," which is extensively employed by the farmers, as this is said to be an adulterant containing borax, and comes under the English act. It is important to observe that the London Home and Foreign Produce Board has gone so far as to appoint analysts to examine all butter entering the United Kingdom, and any impure importations are heavily fined.

WITH THE DRY GOODS TRADE.

The tailor-made costumes now in vogue have led to an increased demand for ladies' neckwear. In bows a butterfly pattern in fancy silks, chiffons and cottons is very attractive.

The Ayrshire Scotland lace factories, says the *Drapers' Record*, are well employed. The home demand for curtains and curtain nets has improved, while combinations and bar ground effects are in steady request. The shipping trade is not as good as manufacturers would like, but a fair trade is being done with Canada and Australia. The orders from the United States have fallen off considerably.

From Ireland it is reported that bleaching and finished linens are being ordered in increasing quantities, and shipments have been made to a satisfactory extent across channel. Buyers content themselves with purchasing moderate parcels, but as orders are frequent the total amounts to a considerable sum. The making up factories continue to take fair quantities of tailoring linens, and union pales and dowlas are largely in demand by apron manufacturers. Canadian trade is very good. Local stocks are well in hand, and prices firm.

Textile Britain has recently been somewhat excited over the reports of the formation of a combination of cotton manufacturers. The *Draper's Record*, March 26th says: "It is announced that the final details of the great cotton combine have now been arranged. The share capital, it appears, is to be four millions, and not five as originally expected. Of this sum £2,000,000 will be five per cent. cumulative preference shares of £1 each. There will also be an issue of £2,000,000 of four per cent. debenture stock. The executive board, which will be responsible for the working of the company, will, as provisionally appointed, consist of Mr. A. H. Dixon (chairman), Mr. Vernon Bellhouse, Mr. Scott Liggs, and Mr. Louis Rivett. The amalgamation will be known under the somewhat unwieldy title, "The Fine Cotton Spinners' and Doublers' Association."

A description is given in a recent issue of the *Winnipeg Free Press* of an unusually valuable fox skin shipped by a merchant of that city to London. It illustrates what prices rich folk are ready to pay for luxuries to eat, drink or wear, provided they come up to a certain standard. The skin in question was one of a lot shipped by Mr. F. W. Stobart, who ships many furs for his customers to the European markets. He last week received advices about the latest fur sale of Lampson & Co., of London. In looking over the list of prices obtained he came across one item that is a record breaker in its way. A silver fox skin shipped by Mr. Stobart was sold for the enormous price of £135 or about $675. This is all the more remarkable when it is known that the skin was sold in the raw, undressed state.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, April 7th, 1898, compared with those of the previous week:

CLEARING.	April 7th, 1898.	March 31st, 1898.
Montreal	$11,852,182	$11,623,222
Toronto	8,922,878	7,324,991
Winnipeg	1,110,575	1,110,575
Halifax	1,148,527	986,966
Hamilton	762,228	577,293
St. John	537,823	436,872
	$24,334,213	$22,059,919

Aggregate balances this week, $3,584,772; last week, $3,066,416.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, April 14th, 1898, compared with those of the previous week:

CLEARINGS.	April. 14th, 1898.	April. 7th, 1898
Montreal	$8,721,075	$11,852,182
Toronto	6,126,506	8,922,878
Winnipeg	1,257,159	1,110,575
Halifax	1,108,266	1,148,527
Hamilton	609,857	762,228
St. John	454,895	537,823
	$18,277,758	$24,334,213

Aggregate balances this week, $2,365,656; last week, $3,584,772.

—It has been found impossible by Sir Wilfred Laurier to accept the invitation sent him by the Chamber of Commerce in Cleveland, Ohio, to be present with other distinguished men, at its annual banquet, at the close of the present month. The session will not probably then be over, and the Premier can hardly absent himself even for so agreeable and proper a purpose as that of addressing a friendly American audience on the subject of trade relations with Canada. But the Cleveland Chamber, since they cannot get Sir Wilfrid to their dinner, may be able to get him to speak on another occasion, such for instance as the dedication, later in the present year, of the new building of the Chamber. And since they appear to have a decided admiration for the man and the orator, as well as a neighborly interest in the people whom he represents, we predict that they won't stop trying till they get him.

—Some changes recently made among branch managers of the Canadian Bank of Commerce, include the following: Mr. William Manson, for some years manager at Peterboro, goes to take charge of the North-West Toronto branch. His successor in Peterboro is Mr. R. C. McHarrie, who has a good record as manager in succession of several of the subordinate branches of the bank in Toronto, and has most lately been in charge of the Market Branch. In the last-named post Mr. McHarrie is succeeded by Mr. H. W Fitton, long in the responsible position of accountant at Toronto branch. Mr. G. A. Holland, late of North-West Toronto branch, goes to be manager at Blenheim.

—A special meeting of the directors of the Eastern Townships Bank was held in Sherbrooke last week. One of their ~~number~~, Col. Foster, had accepted the position of United States Consul, at Halifax, Nova Scotia, and this rendered necessary the choice of his successor on the board. The meeting selected Mr. C. H. Kathan, of Rock Island, in the county of Stanstead, Que., who was accordingly made a director.

—An important gathering of American iron masters took place on Tuesday last at Cleveland, Ohio. The bulk of the makers of foundry iron in the Northern and Western States were represented. This is a complementary association to those already formed by the non-Bessemer men in the South and in the East respectively. By-and-by these three may be merged into one big "combine." The reason for the formation of this body at Cleveland is the outcome, probably, of the forming of the association of Bessemer steel makers, which was consummated in Cleveland not long ago.

"UNFAIR COMPETITION."

A somewhat novel problem in Board of Trade circles, came before the Council of the Quebec Board recently. This body was requested, through a petition of the brush and broom manufacturers of the city, to look after their interests. The petitioners complained that they were suffering seriously from a competition which they considered quite unfair, on the part of the Grey Nuns, of the Beauport Asylum; that the Grey Nuns were manufacturing brooms and brushes, which cost them nearly nothing, as the work was done by the inmates of the asylum, and were selling them to the trade at prices with which the regular tax-paying manufacturers of the city could not compete. The Council attempted to secure an investigation, on the part of the Provincial Government, but that body was not disposed to act. The Council then took the matter in hand, and reported as follows: It was ascertained, as accurately as it could be done under the circumstances, that the competition which the petitioners complained of, on the part of the Grey Nuns, of Beaumont Asylum, was not as serious as they had honestly represented it to be; that the brooms and brushes as manufactured by the Grey Nuns were of an inferior quality; that only a limited quantity was manufactured, and that they were sold to merchants in part payment of accounts due them by the Grey Nuns.

CALGARY'S BUSY YEAR.

Calgary just now is a very busy town. Every train brings in crowds of people. The hotels are overflowing. The sidewalks of Stephen avenue will soon need renewing. The traffic is increasing daily. The new-comers are mainly composed of two classes—Klondykers and new settlers. The immigration people say this will be a record year for new settlement in Alberta. They are coming from all parts, principally Great Britain and the United States. There is a distinct improvement in the character of this year's immigration so far. They are a moneyed class and most of them practical men, accustomed to work. The season of 1898 will be Alberta's banner year.—Calgary Herald.

IMMIGRATION BOOMING.

Commissioner McCreary, of the immigration department, received word yesterday that three large parties of settlers from Kansas, Nebraska and the Dakotas, had left via the "Soo" line for Northern Alberta. In Mr. McCreary's opinion the estimate of 20,000 immigrants this year will be considerably exceeded.

On an average 1,500 letters reach the department of the interior daily, from people living in all parts of the world enquiring about the Canadian West. Hon. Mr. Sifton leaves for the Old Country at the close of the session, to investgate thoroughly the agencies of the government established there to promote immigration to the Dominion.—Win. Free Press.

—"Why are you leaving here," asked the prospective settler, "if the land is so productive?"

"I'll be hones' with you stranger; I'm gittin' 'long in years an' the plain truth is that the crops here is so dog-gone big that I can't han'le 'em any more."—Detroit Free Press.

—Two milkmen were recently overheard discussing their business. Said one: "I lost three quarts and a pint last week. I don't know what ailed him," and the other said:

"Well, I lost three quarts myself, but I think I can get her back."

Milkmen speak of their customers by the amount of milk each takes.—Chicago Chronicle.

NEW YORK TRADES UNIONISM.

It is learned from a bulletin issued by the New York Bureau of Labor Statistics that the number of persons who, at the close of 1897, belonged to industrial organizations was 173,728. This, considering the vastly greater number of New York State's inhabitants who work for a living, indicates that the trades union idea has by no means as many followers as is generally supposed. The building trades supply almost three times more strength to organized labor than any other affiliation of industries for which statistics are given, the figures being 48,801. Next come the printing and bookbinding trades, with 14,157, and from this there is a rapid fall to the textile trades, with only 457. The proportion of employed to unemployed advanced steadily from the beginning to the close of the year. In the three months ending with March, the percentage of men without work was 24.8. By June 30th, this had fallen to 18.1. The September quarter lowered the ratio to 6.5, and only 5.8 per cent. of the whole number were idle in the last quarter. The earnings of men for October, November and December averaged $174.47, and those of women, $73.71.

DEAL TRADE DULL

Hon. J. B. Snowball says he never knew the demand for deals to be as light as this year. It is not a question of price at all—but simply a question of deals not wanted. This is not because business is dull, as business never was brisker in Europe, but because every timber broker and wood manufacturer has a big stock of deals on hand. The total shipments to Europe were enormous last year, though rather light from this port, and an enormous stock has been held over. Last year the brokers sold to the dealers all they could, and then sold to the dealers' principal customers, and then sold to small manufacturers and other customers, so that there is just now an utter absence of demand at any price.—Chatham, N.B., World.

LUMBER AND TIMBER IN LIVERPOOL

Messrs. Farnworth & Jardine's wood circular, dated Liverpool, 1st April, 1898, says:

"The arrivals from British North America during the past month have been 786 tons register, against 4,787 tons register, during the corresponding month last year, and the aggregate tonnage to this date from all places during the years 1896, 1897, and 1898 has been 43,817, 47,846 and 55,521 tons respectively. Business during the past month has been quiet and the deliveries have been unsatisfactory. Stocks generally are ample for the season of the year, and although there is little change to report in values prices are with difficulty maintained.

"CANADIAN WOODS.—Pine Timber.—Of both Waney and Sqnare the deliveries have been fairly satisfactory, but the stock held over is too heavy though values are without change. Red Pine is seldom euquired for, the stock is sufficient. Oak.— The deliveries have been small, values are steady, but the stock is sufficient. Elm has been in fair demand, prices are firm and the stock moderate. Pine Deals, Boards, &c.—The deliveries have again been disappointing and the stock exceedingly heavy; although there is little change in value to report sales are very difficult to effect.

"NEW BRUNSWICK AND NOVA SCOTIA SPRUCE AND PINE DEALS.—The import consists of a few small consignments by steamer from St. John, N. B., and Halifax, N. S., which have gone direct from the quay into consumption; the deliveries have been small and the stock is too heavy; there is no change in value to report, but contracting for the coming season is difficult. Pine Deals are dull of sale and the stock is ample.

"BIRCH.—Of logs the import consists of small shipments from Quebec, via Portland, which are going direct into consumption. The deliveries have been fairly satisfactory, and the stock is now reduced to a more moderate compass; values are steady. Of planks there has been no import; there has been more enquiry at firmer prices, but the stock is still too heavy.

"UNITED STATES OAK.—Of Mobile a small shipment has been imported; the demand is quiet, prices continue low, and the stocks, although not heavy, are sufficient. Oak Planks have been imported largely, and the deliveries have been fairly satisfactory; stocks, however are heavy, and recent sales have been at lower rates; the total stock is about 293,000 cubic feet.

"PITCH PINE,—The arrivals during the past month have been 2 vessels, 2,594 tons, against 4 vessels, 3,351 tons, during a like period last year. Of hewn, the import consists of a parcel of about 250 logs from Mobile; there has been a good consumption, and stocks are not heavy. Of sawn, the import consists of one cargo to Manchester, and a part cargo to Liverpool; there has been a good consumption, and stocks show a considerable reduction from last month. —Deals and boards have again come forward freely, there has been a good consumption, but the stock is far too heavy for the requirements of the trade.

"OREGON AND BRITISH COLUMBIAN PINE has not been imported; the deliveries have been more satisfactory, but prices are low and stocks heavy.

ADVERTISING FOR PROFIT.

Robert C. Ogden, head of the house of John Wanamaker, in New York, made an address before the Merchants' Association, March 16th, on "Advertising as a business force." Mr. Ogden said that the success of business depended upon three things, merchandise, service and advertising, and he looked upon the latter as the dynamic power of the business. One trouble about it was that merchants did not take it seriously enough. It was the fundamental principle of business, and should receive the attention of the head of the business. It should be made so attractive as to attract the attention of the reader whether he wished it or not. He believed that fully fifty per cent. of the money spent on advertising was wasted through being improperly placed.

Commercial.

TORONTO MARKETS.

TORONTO, April 14th, 1898.

DAIRY PRODUCTS.—Receipts of butter are free and prices are easing off. Dealers have kept their stocks pretty well sold up, although it has required some effort to do so. The make of creamery butter is large, as few of the cheese factories have commenced operations for the season yet, although they look to renewed activity about May 1st. The cheese market is steady and the surplus stocks have been worked off and are now reduced within a compass which makes bright the prospects for a healthy trade in the new make. The Easter trade in eggs was very satisfactory. Supplies in the country are free but city receipts in the face of the operations of country picklers are not in proportion.

DRY GOODS.—The fine weather of the past few days has given a strong impetus to the assorting trade, and the volume of business is reported to be larger than usual at this season of the year. General lines are in good demand, and retailers give a favorable account of the season's prospects.

Grain.—The last few days has developed considerable strength in wheat. Manitoba wheat is firm. There is a steady market for barley at 33 to 36c. per bush. Buckwheat remains without change. Corn is a little firmer. There is a stronger feeling in oats at 31c. per bush. Peas are firmer at 56½ to 57c. per bushel.

Green Fruit.—The weather has been all that could be desired by the trade. The season for navel oranges is about over. The quality of the lemons offered in the market is good, but supplies are not large. It is expected that the supply imported via Montreal this year will not be large and firmer prices are looked for. The Wednesday sale was well attended and prices realized were satisfactory. In bananas there is a large trade doing and six cars, it is said, will be distributed from Toronto this week. A good movement of pineapples is looked for this month. It is impossible to say what the effect of the war will be upon the trade. The chances favor a large crop of pineapples in Florida this year, while from the West Indies and Jamaica good receipts may also be looked for. Imports have been large and increasing this past few years.

Groceries.—A fair business is doing in general supplies. An advance in the price of sugar has led to a strong movement of this staple, which is a delightful relief to the inactivity which has existed since the commencement of the year. The tariff announcement found no excessive stocks here. Teas are rather slow of movement so far as present consumption is concerned. Fair orders are being booked, however, for fall importation. Merchants note that the volume in Japans promises to be large. There is not an abundant supply of California prunes and some of the sizes are out of the market. We quote: 70/80, per lb. 6¼c.; 60/70, per lb. 6½c.; 50/60, per lb. 7¼c.; 40/50, per lb. 8c. According to advices by mail from London, stocks of currants in that market on April 1st amounted to 6,892 tons, against 8,713 tons on the same date last year and 13,244 tons on April 1st, 1896. Of Valencia raisins, London had 984 tons on April 1st, compared with 637 tons on the same date in 1897 and 623 tons in 1896. Of sultanas, London's stock on April 1st was 49 tons in 1898, 50 tons in 1897 and 249 tons in 1896. The primary market for Tarragona almonds has quieted somewhat, the damage to the crop evidently not being as severe as at first supposed.

Hides and Skins.—The market has taken a turn for the better. The expected decline in green cow hides was arrested, and merchants are still paying 7½c. for No. 1, Toronto inspected. There are no large supplies of hides held here, and considerable sales reported at 8c. have relieved the market and dealers are asking 8¼c. per lb. Calfskins remain in unchanged supply, but a decline of 1c. bringing them down to 9c. per lb. was announced on Thursday. Sheepskins are nominal. Lambskins are quoted at 15c; there are few, if any pelts in the market. In the United States, importers' stocks are small, and as receipts are only very moderate, with the general impression that should hostilities break out between Spain and the United States, it would interfere with the movement of supplies from primal markets, holders showed no anxiety to make sales, prices being firmly maintained. From Chicago, April 13th, only a limited volume of business was transacted, as tanners were purchasing on a hand-to-mouth basis; but as packers showed no anxiety to make sales values were well maintained, closing at 10½c. for native steers; 9¾c. for Texas; 9¼ to 9½c. for butt brands; 9¼c. for branded cows; 8¼ to 8½c. for Colorados; 9¾c. for heavy native cows, and 10c. for light ditto

Provisions.—In few seasons has the Easter consumption been larger or the trade more satisfactory. All lines are moving actively. Values remain without change. Dressed hogs have not been in as good supply, the offerings having diminished no doubt on account of the pressure of farm work. Packers look for an increase in deliveries within a week or two. We quote, selected weights $5.75 to $5.50 to $5.60 per cwt. The movement depends almost entirely on weather conditions.

Wool.—There is no change in the local wool situation. Business in Canadian fleece is of a nominal description. The talk is all of the new clip and its prospects. The Canadian mills remain busy and are taking fair quantities of pulled wools.

MONTREAL MARKETS.

Montreal, 13th April, 1898.

Ashes.—Business is dull, and offerings small, the weekly receipts of late only averaging from 25 to 30 brls. Some fair lots are expected by first Western boats, when the canal opens. We still quote $3.45 to $3.60 for first pots, seconds, $3.15 to $3.25, pearls about $4.75 per cental.

Cements and Firebricks.—For cements there is quite a brisk local demand in small to moderate lots, but stocks are quite small, and some brands are quite run out. Of English makes there is practically none available, and for deliveries to arrive, prices are advanced to $2.25 to $2.35; for Belgian, quotations are $1.95 to $2.10. First steamer from Antwerp, with new supplies, is timed to sail the 15th inst; London and Newcastle steamers will follow later. The awarding of the government contracts, for 120,000 brls., for which tenders were to be opened Saturday, has not been completed; so far as can be learned, two Montreal firms have been awarded lots of 37,000 and 10,000 brls. respectively, but figures have not transpired. Bricks in good demand, at $17.00 to $23.00 as to brand.

Dairy Products.—Under rather freer receipts, butter has eased off a little in price, about half a cent or so, and 21 to 21½c. per lb. is about the present figure for finest new creamery, with under grades at 20 to 21c. There is a scarcity of new dairy makes, and really good butter of this sort would bring pretty close to figures realized for creamery. In cheese there is still a total absence of activity, with prices of fine makes ranging about 7¼ to 7¾c. per lb. The Liverpool cheese market is reported lower than it has been for some years at date, while for butter, in the same market, prices are a good deal higher than for a good many years past.

Dry Goods.—Since last writing we have enjoyed a spell of simply delightful weather, almost too fine for the season of the year, it is feared, but the results have been very favorable to the city retail dry goods men, the milliners, and the clothiers, who have all benefited by the general desire of womankind to don something new in the way of Easter apparel. Country roads, too, have dried up rapidly, under a warm sun, and country stocks are being well broken into, with the result that general remittances are coming in well. Wholesalers report a steady run of sorting orders, but nothing very much is as yet being done in fall goods. With regard to prices nothing new is reported.

Furs.—Fair offerings of mixed lots of raw furs continue to be offered from interior points, but a few weeks from now will close the season. We quote: Mink, large dark, $1.50; small, do., $1 to $1.25; marten, $1.75 to $2.25; fisher, $4.50 to $7; lynx, $1 to $2; otter, $1 to $12 for dark; pale, $5 to $7; red fox, large, $1.30 to $1.50; small, $1; cross fox, $3 to $6; bear, cubs, $3 to $7; medium, $7 to $10; large, $12 to $15; skunk, 15 to 70c, as to color and stripe; coon, 20 to 75c; rats, fall, 7c. to 10c.; kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

Groceries.—Roads in the interior of the province are becoming fairly settled, and travelers are now moving about freely, with the result that jobbers report a more liberal distribution of goods, while collections are also coming in fairly. There has been further movement of teas to the United States, some local importers reporting very fair sales to both New York and Chicago, of Japans principally, and values are well held. Private mail advices from Yokohama houses to Montreal agents, just to hand, say that everything points to the likelihood that the market, which opens about the middle of May, will rule distinctly firm for all common to medium grades. London advices indicate a rather easier feeling in Indians and Ceylons. Business in coffees is quiet; we quote Rio, 8 to 13c.; Santos, 9 to 14c.; Mocha, 20 to 24c.; Java, 20 to 24c.; per lb. In sugar quotations there has not been any marked advance; on Monday prices were put up a sixteenth, making factory price for standard granulated 4 7-16c.; Austrian ditto, 4 3-16c.; yellows, 3 9-16 to 4c. The demand from jobbers is fair, but hardly so brisk as a week ago. In molasses there is nothing specially new; Barbadoes is still quoted at figures equal to 23c. per gal., cost laid down, and Antigua at 17½ to 18c. In the local market jobbers now quote Barbadoes at 24 to 25c. as to lot. Rice inclines to firmness. Canned goods are rather inactive at $1.20 for tomatoes, corn, 85 to 90c.; peas, 90c.; salmon, $4.60 to $4.80 per case for standard brands.

Hides.—The market for beef hides is rather weaker, in sympathy with the decline in the West, but so far local quotations remain as they were. At the usual weekly meeting of the Hide Association, on Monday, the question of a reduction in prices was discussed, but no action was taken, and a further meeting was held this afternoon at which it was apparently decided to continue present prices for the meantime, namely, 9c. per lb. for No. 1 beef hides, 10 to 11c. for No. 1 calfskins, 10c. each for lambskins, and $1.00 to $1.05 each for sheepskins. Some moderate lots of country hides are reported, but, on the whole, receipts are on the small side.

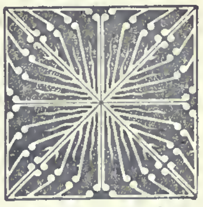
Leather.—Nothing in the way of change is to be noted here. It is now a sort of between seasons time, and no special demand is looked for for several weeks. Stocks are in limited and healthy shape, and value steadily held. We quote: Spanish sole B.A., No. 1, 24 to 25c. do. No. 2, 22½ to 23½c.; No. 1 ordinary Spanish, 23 to 24c.; No. 2, 20 to 21c.; No. 1 slaughter, 27 to 28c.; No. 2, do., 24 to 25c; common, 20 to 21c; waxed upper, light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 20 to 21c.; juniors, 18 to 20c.; calf-splits, 30 to 35c.; calfskins (35 to 40 lbs.), 60 to 65c.; imitation French calfskins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 24c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; buffed cow, 12 to 14c.; extra heavy buff, 15c.; pebble cow, 13 to 13½c.; polished buff, 11 to 13c.; glove-grain, 12 to 13c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

WHY USE **Paper**

When our metal finish will give you more enduring economical satisfaction.

Our

EMBOSSED STEEL PLATES



One of many Designs

Make the handsomest interior decoration you can find, and are also fire-proof and hygienic.

Let us have an outline giving the shape and measurements of your ceilings and walls, and we will send you an estimate, with full information about this reliable up-to-date finish—the best for any building.

Metals and Hardware.—Business is just about as reported last week, and no changes of consequence are reported with regard to values. Canada plates are easier on spot, due to a desire on the part of holders to reduce stocks before new supplies arrive. It is reported cheap coke tins are firmer in Britain, but prices are without change locally; Terne plates can be bought in fair quantity at $5.75. In pig iron there is no special activity; a few small sales of Summerlee are reported at $18.50 ex-store, but nothing is apparently being done in the way of placing orders for import this spring. Domestic brands of pig iron remain as quoted. We quote: Summerlee pig iron, $18 to $18.50; Carron, No. 1, $18; No. 3, $17.25; Ayrsome, No. 1, $17; No. 3, $16.50; Shotts, $17.25 to $17.50; Carnbroe, $16, ex-store; Ferrona, No. 1, $15 to $16; Hamilton No 1, $15 to $15.50; No. 2, ditto, $14 to $14.50; machinery scrap, $14 to $15; common ditto, $12 to $13; bar iron, Canadian, $1.40 to $1.50; British, $2 to $2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas, $2.40; Terne roofing plate, 20x28, $5.75 to $6; Black sheet iron, No. 28, $2.25; No. 26, $2.15; No. 24, $2.05; No. 17, $2; No. 16 and heavier, $2.15; tin plates—Bradley charcoal, $5.60 to $5.70; charcoal, I.C., Alloway, $3.15 to $3.25; do., I.X., $3.90 to $4; P.D. Crown, I.C., $3.60 to $3.75; do., I.X. $4.50; Coke I.C., $2.90 to $2.95; do., standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2.70; galvanized sheets, No. 28, ordinary brands, $4; No. 26, $3.75; No. 24, $3.50 in case lots; Morewood, $5 to $5.10; tinned sheets, coke, No. 24, 5½c.; No. 26, etc., the usual extra for large sizes. Canadian bands, per 100 lbs., $1.65 to $1.75; English hoops $2 to $2.15. Steel boiler plate, ¼-inch and upwards, $1.85 to $1.90 for Dalzell, and equal; do., three-sixteenths inch, $2.50; tank iron, ¼-inch, $1.50; three-sixteenths do., $2; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to $2.50; Russian sheet iron, 9c.; lead, per 100 lbs., pig, $3.50 to $3.55; sheet, $4 to $4.25; shot, $6 to $6.50; best cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel, $2.25; ingot tin, 16½c. for L. & F.; Straits, 16c.; bar tin, 17c.; ingot copper, 12½ to 13c.; sheet zinc, $5 to $5.25; Silesian spelter, $0.75; Veille Montagne spelter, $4.75 to $5; American spelter, $4.50; antimony, 9 to 9½c.

Oils, Paints and Glass.—The bulk of orders for despatch by rail have now gone forward, but there is still a considerable aggregate of goods being held for shipment, when canal navigation opens, and travelers continue to report good business. With regard to prices the only noteworthy change is a further reduction in turpentine of 2c. a gallon. Stocks of glass are low, but considerable supplies are expected by first Antwerp and Hamburg steamers. We here quote: Turpentine, one to four barrels, 50c.; five to nine barrels, 49c.; net thirty days. Linseed oil, raw, one to four barrels, 47c.; five to nine barrels, 46c.; boiled, one to four barrels, 50c.; five to nine barrels, 40c., net 30 days; olive oil, machinery, 90c.; Nfld. cod, 35 to 37c. per gal.; Gaspe oil, 30 to 32c. per gal.; steam refined seal, 45 to 47½c. per gallon in small lots. Castor oil, 9 to 9½c. as to quantity. Leads (chemically pure and first-class brands only), $5.37½; No. 1, $5; No. 2, $4.67½; No. 3, $4.25; No. 4, $3.87½; dry white lead, 4¾ to 5c.; genuine red do., 4¼c.; No. 1 red lead, 4c.; Putty in bulk, bbls., $1.65; kegs, $1.80; bladder putty, in bbls., $1.80; smaller quantities, $1.95; 25 lb. tins, $2.05, 12½ lbs., tins, $2.30. London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to $1.75; yellow ochre $1.25 to $1.50; spruce ochre, $1.75 to $2. Paris green, 50 and 100 lbs. drums 15c, 25 lb drums, 15½c.; 1 lb. cartoons, 16c.; pound tins, 16¼c.; window glass, $1.40 per 50 feet for first break; $1.50 for second break; third break, $3.10.

Wool.—Considering the apparent briskness among the woolen mills, it cannot be said that manufacturers are liberal buyers of raw wool, but we hear of recent sales of several hundred bales of Capes at about 16¼c. The market rules decidedly firm, and B.A. scoured has been advanced from 1 to 2c., nothing being now available on spot below 27½c. per lb.

HEAD OFFICE:
Queen City Chambers, Church St., Toronto.

DIRECTORS:
JAS. GOLDIE, Pres. J. L. SPINK, Vice-Pres.
Thos. Walmsley, Treas. Hugh Scott, Mgr. and Sec.
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co.,
32 Church Street, Toronto, Ont.

Extended Insurance

Is granted by the Unconditional Accumulative Policy of the Confederation Life Ass'n. Under this provision the full amount of the policy is, in the event of the non-payment of the third or any subsequent premium, extended as a term insurance, and the policyholder is held fully covered for the full face value of the policy for a term of years definitely stated therein.

Paid-up and Cash Values are also guaranteed.

Rates and full information sent on application to the Head Office, Toronto, or to any of the Association's Agents.

NORTH BRITISH PREFERENCE STOCKS.

Our Glasgow correspondent writes:—While the political unrest tended to cripple speculation in the early part of the week, bona fide business in the leading branches of Scotch trade has gone on apace, and instead of there being any diminution in the demand, consumers have been more pressing than ever for prompt delivery. An evidence of the strong position of trade is the substantial increases shown by the leading Scotch railways, despite the heavy figures shown for the corresponding weeks last year. Indeed, Scotch railway traffics for months ahead will compare with increasingly heavy figures, and if future traffics are maintained, directors and shareholders will have small reason to complain. A strong feature of the position is the extraordinary demand for steel and iron manufactures, and it is contended that at no time during the present decade has the pressure been so great. Producers are taxed to the utmost, and naturally enough hold for full prices. Ironmasters cannot deliver iron fast enough, and steel makers are compensating themselves by insisting upon 2s. 6d. advance, or 5s per ton above the ruling list prices at the beginning of the quarter. With the spring shipping season just at hand, the difficulty is to see how extra markets are to find their full supplies. Orders for ships continue to flow in, and the surprise is that tonnage rates have not gone higher. The bookings this week have been for a superior class of work, and of large tonnage. Three of the American lines have added to their fleets, the Allan line having given out two steamers of 10,000 tons each, the Dominion Line one twin screw steamer, and the Cunard a couple of cargo boats 550 feet long. There is now hardly a shipping company of any note placing boats under 5,000 tons. The weight of work in all Scotch shipyards is given as near half a million tons. The Glasgow Iron Warrant Market has shown a firmer front for hematite, owing to the pressure at the steel works, but Scotch and Cleveland have been dull, and the business has been almost wholly of an inside jobbing character.

Yet another proposal is put forward to amalgamate certain trades. This time the proposal is to fuse the interests of the bleaching firms in Fifeshire and Forfarshire. There are in all twenty-three, and the idea has been well received, as competition in this branch has long been unduly keen.—Financial Times, Mar. 26.

MARINE WAR RISKS.

The fluctuations in the rates for marine war risks, during the past three weeks, have been very great. There can be no fixity in the rates, as every new development in the situation between the United States and Spain affects them. Nor are the rates offered uniform among the offices. Every risk is considered according to the particular circumstances that affect it, and the proper charge for war hazard is determined by each underwriter according to his own judgment. To record the fluctuations of two weeks past in detail, would demand great labor and no little space.

The demand for marine war indemnity has been steadily increasing, and the past week has seen a rush to get the hazard covered.

Bankers have for some days demanded, when making advances on goods in transit, that the war exemption clause in the marine insurances be stricken out, or the war hazard covered by special policies. On open policies, covering goods for future shipment, against which letters of credit have been issued, in many cases the war exemption clause has been erased, and the war rate left open, the same as the rate for the ordinary risk.

Rates for the war risk, as quoted by some companies, are already practically on a war basis. As high as 10 per cent. has been demanded for sailing vessels from ports in the West Indies and on the Eastern coast of South America, which do not sail for several weeks. On vessels from the West Indies and South American ports, which if out when war is declared, must pass fairly under the enemy's guns, the prevailing rates are very high.

The Atlantic Mutual has quoted, within the past day or two, as follows: On American sailing vessels to or from West Indian or South American ports, which have already sailed or sail within a day or two, from 3 to 5 per cent.; on American steamships to or from the same ports, from ½ of 1 per cent. to 1½ per cent. The rate varies according to the nearness of the Southern port to Cuba. On American sailing vessels, loading on the South side of Cuba, from 5 to 7½ per cent.

Conservative British insurance companies seem to take some stock in the war rumors, and are taking measures to protect themselves accordingly. On cargoes from this side against which drafts are made, they insist upon the following clause: "The policy covers all losses not directly occasioned by capture, or seizure, whether legal or illegal, by regularly commissioned vessels of war, privateers, pirates or mutinous passengers"—Ins. Press.

GRIEVANCES OF THE BANKERS.

In discussing the subject, "Collections," before the New York Merchants' Association recently, Alvah H. Trowbridge, vice-president of the National Bank of North America, said: "There may be circumstances under which a merchant in New York will sell goods to a party residing at some outlying point and agree to bear the expense of remitting for the bill. The custom, however, is that, for goods sold, merchants here receive checks on every imaginable point, from the St. Lawrence to the Gulf, and from the Atlantic to the Pacific. Checks on out-of-town banks in the aggregate amount to a very large sum to be collected, and the cost of collecting it should be a charge against the price of the goods sold. The question here arises: Is this a charge against the goods sold? Does the merchant stand the cost of transacting his own business? The membership of this association comprises a considerable number of banks. Speaking from the standpoint of these institutions, I am enabled to say that many merchants do not expect to stand the cost of collecting their country checks, but do expect the banks to do it for them without charge. This may do very well in a small way, and very many banks would not object to obliging their depositors even at the expense necessary to collect a few checks, but the business has come to such proportions that, seeing the banks are not in the mercantile business and can derive no profit from the selling of goods, I think they are being asked to bear too large a part of the burden of trade.

"If the case were incurable, it would be useless to speak of it, but it may be cured so easily, the wonder is that it has been allowed to run so long. The merchant invoices goods at 'cash,' 'cash thirty days or four months,' as the case may be. Why not say 'cash in New York?' Does your Boston, or Lowell, or London, or Paris, or Manchester creditor allow you to send him a check on Port Chester or New Haven, or even Chicago or New York? Why don't you make them take them, as I have been told by merchants their country debtors make them take anything, and they are glad to get what they can? Why can a merchant in the country make you take what you cannot compel your creditor to take? Or, if you are willing to take his country check, why not pay the cost of collecting it, instead of loading the bank with the unprofitable part of the business of selling goods?"—Bankers' Monthly.

NEVER MISREPRESENT.

If there is one point which needs impressing upon the mind of an industrial insurance agent more than another, it is this: Always represent things just as they are. This is important for two reasons. In the first place, the insurance of anyone by misrepresentation works a positive injury to the one insured, and this is in direct contravention of the strongest principle of industrial insurance, the good of mankind. Men who make application for insurance are, for the most part, ignorant of the first principles of the business and are therefore dependent upon the agent for enlightenment. An agent who takes advantage of this fact, and insures a man by representing things to be other than they are, does that man a positive injury, through the very means designed for an opposite purpose. In the second place, misrepresentation injures the business and reacts, in time, upon the good name of the agent. A man who is insured through false misrepresentations, sooner or later learns that fact and the knowledge lowers his opinion of life insurance and of the honesty of the agent who insured him. Probably every agent can tell of men met with in his canvassing whom it was simply impossible to insure, because they had been previously deceived by unscrupulous agents. It is quite in the nature of things that this should be so, and that it is so should be reason enough for representing things just as they are under all circumstances. This is for the best interests of the insured, the business of life insurance, the company and the agent himself, and should therefore be a part of the equipment of every agent.—Indicator.

THE CUBAN SITUATION.

Theodore S. Woolsey, professor of international law in Yale University, reviewed the Cuban situation in a recent issue of The New York Independent, saying: "These are the three justifying reasons, then, for intervention—for the attempt, by national action, to heal this open sore; the burden of neutrality; the dictates of our commercial interests; the call of humanity. Any one of these is strong; together they are very nearly convincing. And if our government should act upon them, I believe the opinion of jurists would incline to be that such action was warranted. This, at least, was the conviction of the present administration early in the year. Because of its remonstrances and wishes, there was made a change of Spanish policy in Cuba. Weyler was recalled, trade was made free, and a system of autonomous government for the island was set up.

"So far as its effect upon the insurrection goes, this change of policy has been futile. Whether the condition of the non-combatant population has been bettered is an open question which our consuls must answer. But it is clear that the trouble remains; that the real question is not materially altered. And I repeat the opinion that some form of intervention by our government is near at hand, and would be justifiable."

Professor Woolsey asserts, however, that it does not follow that because interventional is legal it would be good policy.

The Western Stock Growers' Association will meet at Calgary on Tuesday of next week.

The Paris lawyer, Foley, who pleaded guilty to forgery and misappropriation of clients' money, was sentenced on Tuesday last to three years' imprisonment.

—Post cards enclosed by business houses to their customers, which bear not only their address, but also the nature of their business, have been decided by the United States Post Office, to be advertisements, and therefore chargeable on return with letter postage.

The Canadian Bank of Commerce

CAPITAL

$6,000,000

PAID-UP.

The Canadian Bank of Commerce having been appointed agents of the Canadian Government for the

YUKON DISTRICT

(KLONDIKE)

to receive the royalty on gold and to transact other banking business for the Government, will establish an agency at

DAWSON CITY

at the earliest date in the coming spring that the means of travel will permit.

* * *

Drafts and Letters of Credit payable at Dawson City may be obtained on application to any branch or agency of the Bank.

The Dominion Bank

DIVIDEND NOTICE

Notice is hereby given that a dividend of three per cent. upon the capital stock of this Institution has this day been declared for the current quarter, and that the same will be payable at the banking house, in this city, on and after Monday, the 2nd day of May next.

The Transfer Books will be closed from the 20th to the 30th of April next, both days inclusive.

THE ANNUAL GENERAL MEETING

of the Shareholders for the election of Directors for the ensuing year will be held at the banking house, in this city, on Wednesday, the 25th day of May next, at the hour of 12 o'clock noon.

By order of the Board.

R. D. GAMBLE, General Manager.

Toronto, 28th March, 1898.

DECISIONS IN COMMERCIAL LAW.

FISHER V. FISHER.—A policy of life assurance was issued providing that the insurance money upon the death of the assured should be paid to his wife or such other beneficiary or beneficiaries as he might in his lifetime have disignated in writing endorsed on the policy and in default of any such designation to his legal representatives. It was held that the policy came within the act to secure to wives and children the benefit of life assurance (R.S.O. 1887, c. 137) and was not affected by an absolute assignment endorsed upon it by the assured to a creditor.

BANQUE D'HOCHELAGA V. MARITIME RAILWAY NEWS CO.—As co-partners in the Maritime News Company, C. and D. were served, and defended an action. B. was at the time also a partner in the firm, but the fact was not known to the plaintiffs, and he was not served. Judgment having been given for plaintiffs, C. and D. appealed; the appeal was dismissed with costs. It then became known to the plaintiffs that B. was a partner, and steps were taken to have execution against him, both on the original judgment and for the costs incurred in the appeal. It was held in Supreme Court, Nova Scotia, that B. was liable for the costs of the original action, the judgment, and costs of the appeal.

A TOLL GATE CASE.

The County Judge of Elgin, Judge Hughes, rendered last week a decision that toll roads were not assessable. The case was this: Some time ago the village of Port Stanley sent a bailiff to a toll gate house and for unpaid taxes seized a bicycle belonging to Chas. Hough. The latter took out a writ of replevin, and the judge decided in favor of the plaintiff, Hough, stating that the bicycle could not be seized, and that toll roads were not assessable.

THE TRADE MARK DISPUTE.

An interesting decision has just been rendered by the United States Circuit Court of Appeals at Chicago, Certain Minneapolis flour mills brought a suit against one Eagle, asking for an injunction restraining the defendant from selling flours branded "Minneapolis Mills," which, however, was not manufactured in Minneapolis, but elsewhere. The defendant contended in the proceeding before judge Showalter that the words "Minneapolis Mills" had come to mean flour made from hard spring wheat, under the roller or patent process, and had no reference to the place where the wheat was milled. Judge Showalter held that the complainants had no such property right in the name of the town or place in which their goods were manufactured as to enable them to stop the use of it, even if wrongful, by makers outside of the city. The decision of the Circuit Court of Appeals, however, reversed that of Judge Showalter and granted the injunction.

ON Friday night last a curious accident occurred at the Sydenham Glass Works in Wallaceburg. Between nine and ten o'clock one of the stones in the front end of the tank at the works gave way, and about fifty tons of melted glass poured out over the floor of the factory. Fire ensued, and the alarm was sounded, but the blaze was quenched. After nearly all the glass had run out there was found to be but very little damage, save for small repairs to the tank. The greatest loss to the company will be the delay of a week or more, ere it can be running again as before.

The highest or any tender not necessarily accepted.

Dated at Chatham. N.B., the 5th day of April, 1898.

WARREN C. WINSLOW, Mayor.
JAMES F. CONNORS, Town Clerk.

Mercantile Summary.

On the river St. Lawrence, east of Montreal, steamers have begun to run. The Richelieu and Ontario Company started the "Quebec" for the ancient capital on Monday last.

A civic deputation from Guelph was in Toronto on Wednesday, whose object was to submit to the Provincial Board of Health the plans of the new sewage system proposed for Guelph.

In the case of Ponton versus the Dominion Bank, the venue has been changed from Napanee to Belleville, the Master-in-Ordinary finding that public opinion in the former place is too strongly in favor of the plaintiff.

The Melchers Gin and Spirits Distillery Company, of Montreal, capital $100,000, apply for letters patent to carry on business in any province of the Dominion. Charles H. Nelson, P. C. Ryan, and others, of Montreal, ask for incorporation as the Reliance Cigar Factory, of Montreal, capital $50,000.

A British Columbia exchange tells us that an option has been obtained by an English syndicate on the Iron Colt mine situated on Columbia and Kootenay mountain, in the Trail Creek district. The control of the stock in the Iron Colt Gold Mining Company is held by P. Burns, Nelson; William MacKenzie, Toronto; J. Ferguson McCrae, Rossland, and T. G. Holt, Montreal. The sum of $30,000 has been spent in development work on the mine and there is 2,500 tons of ore on the dump.

The following minor failures are reported in Eastern Ontario: A meeting of the creditors of Joseph Hicks, a small general dealer at Callandar, was held on the 14th inst., when he made an offer of 40 cents, in three and six months, secured.——J. J. Knowles, of Stirling, began a small jewelry business in 1892, but failed in January, 1895. His assignment is now reported. A lack of proper attention to business is given as the cause of his non-success——Kealey Bros. began as confectioners at Ottawa in 1896, and have already assigned.

A building and contracting firm, of Halifax, N.S., Butler & Co., are reported assigned. J. A. Butler is the only partner, and he owes about $5,000, of which $1,100 is preferred.——From Yarmouth, in the same province, we hear of the suspension of the Farmers and Citizens Co-operative Co.; S. P. Goudey has been appointed liquidator. The concern was incorporated in 1888, but has never paid. The original capital was $15,000, paid up, which was reduced in the course of a few years to $10,000, and the expectations are that liquidation will show that the capital has been wholly wiped out.——A trader at Christmas Island, N.S., one H. T. McDougall, is reported assigned. Liabilities not yet ascertained.

In his letter last week, the St. John correspondent of the Maritime Merchant complains of the charge of five dollars for a bill of health that must be paid to the U.S. consul by every Canadian vessel clearing for a United States port. "The tax is very burdensome, especially on small coasting schooners, and there is no justification for it, seeing that there are no contagious diseases to be feared from vessels leaving our ports. It is charged that the tax is imposed in the interests of American built vessels and to cripple our vessel builders and owners, and there is a feeling that if it is not removed there should be a measure of retaliation." Meanwhile the St. John Board of Trade has passed a resolution asking the Department of Marine to try and get the charge abolished.

Monthly. $1 a year. Ten cents a copy.
ACCOUNTICS ASSOCIATION, Publishers,
262 West Broadway, New York.

Mercantile Summary.

The by-law authorizing the Winnipeg school board to raise $100,000 by sale of debentures for the erection of school houses was carried last week by a good majority.

The largest piece of metal ever cast at the Canada Tool Works at Dundas was poured last week, being part of a powerful steam hammer. The casting will weigh about fourteen tons.

The firm of R. Young & Son, of Caroquet, N.B., prominent in business as general storekeepers and fish merchants, who were reported several months ago as compromising at 40 cents, have now assigned.——Orlando V. D. Jones, a druggist of St. John, N.B., is reported as closed up and left the city.

Toronto parties have obtained Ontario letters patent for the carrying on of the Toronto Patent Agency, Limited; capital, $25,000. The Hastings Hat and Cap Manufacturing Company, of London, Limited, capital stock $24,000, is formed to acquire the business of Thomas William Hastings in that city.

We regret not having room this week to reprint, nor even to notice so fully as we should like, the leaflet published by the editor of the Kamloops "Sentinel" in favor of a route via Klondyke to the Yukon country. The arguments in favor of this route are strongly put, one of them is that the Kamloops route traverses the gold belt all the way.

Creditors of W. Davis, dealer in boots and shoes, Ingersoll, met in London on Monday. They confirmed C. B. Armstrong as assignee, and resolved to wind up the estate. The inspectors are G. C. Gibbons, London; R. Miller and J. B. Davidson, St. Thomas, and M. Geary, Toronto. The liabilities are $5,200, and the assets only half that sum.

Mr. B. T. A. Bell has an article in this month's Mining Review objecting to the Government's policy in the Yukon. He calls Ogilvie's reports unreliable, not because Ogilvie is not honest, no one thinks that, but because he is not a miner. Mr. Bell is evidently apprehensive of ill results from exaggerated reports and excessive exploitation up there, though he is a believer in the richness of the Yukon.

Navigation in Northumberland Strait and along the New Brunswick coast is early this year. A despatch of last week says a steamer crossed on the 13th to Point du Chene from Charlottetown and encountered no ice in the straits. There was then a little ice in Summerside harbor. Navigation in the straits 18 days earlier this spring than last year. Advices from St. John about the spring lumber fleet for that the steamship "Arbela" cleared with three million feet for Liverpool last Friday, and the steamship "Simonside," then loading, would take a like amount or more.

The architects of the city, says the Nelson Miner, are kept very busy preparing plans for new buildings to be erected during the coming summer. The prospects are that the appearance of the city will be more changed by the erection of new buildings and other improvements than during any other year in its history.

Progress is being made with the new elevator at Coteau Landing, for the building of which John S. Metcalf & Co., of Chicago, have the contract, 200 men are at work on it. Goldie and McCulloch, of Galt, are furnishing the engine. The dimensions of the building are 200 feet in length by 90 wide and 168 high its capacity 100 cars per day.

A contractor named David Hawthorn, of Scotstown, Que., has left the limits, and his assets are to be sold on the 22nd inst.——P. A. Perron, general store, Carleton, Que., has assigned to the court, on demand of Messrs. Campbell & Brodie, Quebec, and Geo. Manger, of Carleton, has been appointed provisional guardian.——A voluntary assignment is made by O. Lecuyer, who began hotel-keeping at St. Phillippe, Que., two years ago.——J. C. Cheval in the shoe line at Waterloo, Que., is offering his creditors 30 per cent. on liabilities of $3,000.

We hear of the dissolution of the firm of Charles Boeckh & Sons, manufacturers of brushes, brooms and woodenware, Mr. C. Boeckh, senior, retiring. It was more than forty years since Mr. Charles Boeckh, sr., established himself in Toronto, and the reputation for thoroughness of workmanship, integrity of character and strict attention to business, which he long ago established, has been well maintained in the long interval. Mr. Boeckh has fairly earned his repose, and deserves the respect of his fellow citizens. The new firm will be known as Boeckh Bros. & Company, composed of E. C. Boeckh and C. Boeckh, jr., who will continue the business on the same lines and under their personal management. The business is now an extensive one, with a branch warehouse in Montreal, and the goods it produces are familiar throughout the land.

An equinoctial gale at the beginning of the present month played havoc with timber ships in the North Sea. According to the Timber Trades Journal of April 2nd, the East Coast of Britain was strewn with stranded and waterlogged ships and wrecked cargoes from the north of Europe, and from the whole of the coast line of the Baltic similar chronicles of disasters are reported. The wood cargoes consisted mainly of pit props and planed boards. Many of the vessels became unmanageable and were abandoned, whilst others capsized, and the loss of life has been very serious. Six ships were stranded; seven brigs or other vessels went ashore; five were waterlogged; a Swedish schooner sank in the Baltic; a Dutch schooner, board laden, disabled, was towed into Yarmouth; a Christiana schooner put into Portland, leaking; a steamer with wood cargo was ashore at Dunkirk. The north pier at Tynemouth, that took over forty years to build, and cost the country more than two millions of money, was so injured as to be left practically a wreck, while North-bound colliers were unable to continue their journeys, and the coal trade of the North-East Coast was for a time brought almost to a standstill.

Mercantile Summary.

THE St. John Gazette has learned that there is about 2,000,000 feet of deals piled up at Acadia Mines around the rolling mill and blast furnace, ready for shipment, waiting for the change in freight rates.

THE output of the new pulp mills at Milton, Queen's county, N.S., for January, was 1,590 tons, and the manager says this will be increased to 2,000 tons per month as soon as the weather gets a little more favorable.

AT Washington, on Tuesday last, the Treasury Secret Service division announced the appearance of a new $2 counterfeit treasury note, series of 1891, portrait of Macpherson. The portrait, lathe work and parallel ruling, are all poor and the words "Bearer" and "Bureau" are both misspelled.

Two carloads of thoroughbred Durham and Galloway cattle were shipped this week from Brampton and Guelph, to Calgary. Another car will leave Toronto April 15th. The half-fare rates granted by the railway upon such shipments has caused an increase in sales to western buyers.

AN assignment was made in August last by N. P. Finch, dry goods dealer at Aylmer, Ont., and the stock was at that time sold to his brother, J. C Finch. Since then the business has been continued under the style of the N. P. Finch Co., and managed by the former owner. Now we hear that the creditors have placed a receiver in charge of the store.——J. E. Hull, harness maker at Comber, has been slow pay lately, and after being sued makes an assignment.—— So does C. P. Hunter, general storekeeper and postmaster, Quainswick. He will not owe much.

SEVEN years ago Robt. Weir began as a tailor in Peterboro and for some time did a nice trade, but lately he has found competition keen and this week assigns, with liabilities of $2.300 and nominal assets of $1,200——Another tailor in the same town named W. J. Green is also in trouble and puts his affairs in an assignee's hands. He has been in business there for twenty years.——A long established dry goods dealer, W. W Johnston of Peterboro, after many years of effort, finds his chattels mortgaged. His stock has been sold to Robert Fair at 50 per cent. reduction.

A CLOTHIER in Winnipeg, F. Clouthier, found the bailiff in possession of his premises under power of a chattel mortgage in favor of his banker, and now he has made an assignment.——After doing business about three years, A. G. Munroe, general dealer, Stockton, Man., has assigned; his financial position has been uncertain for some time past.——Atkinson & Co., general storekeepers, Hamiota, were burnt out a few weeks ago and they have since assigned. They owe about $4.400.——Angrignon Bros., hotel keepers, New Denver, B.C., make an assignment. They kept the St. James hotel, which has been rented for $100 per month.

A SETTLEMENT has been made with the creditors of Chas. Hendry, general storekeeper at the village of Stirton. They write 40 per cent. off their claims. It will be remembered that Hendry assigned about two weeks ago.——Jos. Hicks, general storekeeper, Callendar, has offered his creditors 40 per cent. to settle their claims, and it may be accepted.——An assignment has been made by A. Hamilton & Co., druggists in Hamilton. The firm's statement shows assets of $10.200 and liabilities of $12,000.——A. B. Wightman, who has a small grocery in Toronto, puts his estate in an assignee's hands.

Union Station, Toronto

Mercantile Summary.

The Welland Canal is to be opened for business today; 40 grain-laden craft from Chicago are in waiting.

The stock of ready-made clothing and men's furnishings at the Campbell's Corner clothing store, New Westminster, was bought by Mr. H. L. DeBeck for 65 cents on the dollar. The total valuation was $11,393.

A Port Arthur despatch of Saturday says that Thunder Bay is clear of ice to the Welcome Islands and navigation is likely to be open on Monday next. Lake Superior is fully two feet lower this season than last.

We hear of the death of Mr. John Bland, of the hardware firm, John Wright & Co., London. He was a prominent and respected business man, had been some thirty years in that city, and was for one or two years president of the Board of Trade.

The directors of the Western Bank of Canada have presented to George Sterling one hundred dollars in gold, for the services rendered during the night when the attempt was made to rob the New Hamburg branch of the bank last month.

We are interested in hearing that Mr. Charles D. Cory, long known, and favorably, in Canadian fire insurance circles, has decided to take up his residence in New York, where he has purchased an interest in a publishing business. With all his other friends we wish him well.

A description of the building to be erected in Vancouver for a branch of the Molsons Bank represents it as a handsome five-story affair on the corner of Hastings and Seymour streets, 90 feet by 100, basement of granite and above that of Calgary free stone. The banking room on the ground floor will be 70 feet by 30, and eighteen feet high, finished in quartered oak, floor and wainscot mosaic and marble. The handsome building is to be ready by 1st March, 1899.

The *Spectator* says that Mr. C. Bartlet, of the Bank of Hamilton, has been promoted to the post of manager of the Winnipeg branch of that bank, and leaves shortly with his family for the West.

A week ago, work was begun at Montreal on the construction of the new C.P.R. Transcontinental Copper Telegraph Line, between Montreal and Vancouver. The line will pass via Vaudreuil and the Short Line to Ottawa, and thence by the main line to the coast.

The British Columbia Chamber of Mines has been thoroughly organized, with Dr. Selwyn, F.R.S., as president, and a strong and representative executive committee. Articles of association and general rules and regulations were duly approved and adopted at the first general meeting of the chamber.

If the special despatch of Wednesday last from Vancouver to the Ottawa Journal be true, it would seem as if the Klondyke fever is dying out. "The outfitting trade has dropped off to a shadow of itself. Steamers catering for northern trade increased in number until there are but few passengers to each steamer. When the rush first subsided the steamship companies tumbled over each other in competing for trade, and as a consequence it is said passage to Alaska can be had for $10 and $15 and freight rates have been cut in half."

The catalogue which a house sends out is by many persons regarded as an index of the character of the house itself. That is, if the catalogue be accurately compiled, neatly printed and illustrated, the house will be regarded as alive and modern. But if slovenly literature, cheap-and-nasty printing, dingy paper, characterize the circulars or books a concern sends out, the reputation of that house will suffer in the minds of many. Quite evidently the Ontario Lead and Wire Company, limited, did not propose to take the risk of a poor job in issuing their Calendar A, of 1898, illustrating high-grade sanitary fixtures. It is a handsome quarto of 160 pages, clear in paper and printing, admirable in illustration, done by The Monetary Times Printing Company. The variety, and no doubt the high quality of the plumbing goods put out by this long-established manufacturing and importing concern will make builders, architects and plumbers anxious to possess one of these attractive books.

Mortgage Sale

OF VALUABLE
RESIDENTIAL PROPERTY

SUDBURY, ONTARIO

Under Power of Sale contained in a mortgage which will be produced at time of sale, there will be sold by public auction at the "White House," Sudbury, on

Wednesday, the 18th Day of May, 1898,

at the hour of Twelve o'clock noon,

The following property: All and singular that certain parcel or tract of land and premises situate, lying and being in the TOWN of SUDBURY, in the District of Nipissing and Province of Ontario, being composed of lot number Fifteen on Edmund Lane in the said Town of Sudbury, according to a plan of Cozens & Wilde, P.L.S., prepared for the Reverend L. Cote, S. J., dated the 15th day of October, 1890, and registered in the Registry Office for the District of Nipissing on the 31st day of October, 1890. Upon the said property is erected a building suitable for residential purposes and well situate in the Town of Sudbury.

TERMS—Ten per cent. of the purchase money at the time of sale and the balance 14 days thereafter with interest.

For further particulars and conditions of sale apply to

J. W. ST. JOHN, Esq.,
"Temple Building," TORONTO.

King of Coasters

Gendron Bicycles

KING OF THE ROAD!

KING OF THE TRACK!

Notwithstanding the claims of unscrupulous pretenders, the Gendron Wheel still holds the coasting championship of Canada, and any information necessary to substantiate this claim can be obtained at the headquarters of this famous wheel.

Forging Ahead

With an untarnished record of success in the past, and a present evidence of the same, the future was never brighter for Gendron Bicycles than it is to-day. Hundreds of hitherto riders of other wheels have decided to change their mounts in 1898 and ride the Gendron Wheel.

SEND FOR CATALOGUE

THE Commercial Bank of Windsor is going to erect a three-story brick and stone building, for use as a head office, in the town of Windsor, N.S.

WE are interested in learning that a joint stock company of manufacturers has been formed to sell Canadian furniture in foreign markets. The company will buy from the factories and act as their own middlemen.

THE Belleville Board of Trade held a meeting on Wednesday, 13th inst., and elected officers as under: J. G. Frost, president, W. H. Gordon, vice-president; J. P. Thompson, treasurer; J. Parker Thomas, secretary.

Now that war is likely between Spain and the United States, some people of the latter country think it wise to profess great regard for Great Britain. One of their senators, Mr. Lodge, has gone so far as to introduce this week a bill appropriating $473,157 for the payment of the claims of Great Britain on account of the Behring Sea awards made by the Commission of 1898, and the New York Tribune declares with great fervor that this award must be paid.

A DEPUTATION of the president and nine members of the St. Thomas Board of Trade called on Saturday last upon Mr. Jones, the superintendent of the road, and gave him and the Wabash Railway line a formal welcome to that city. In reply to a question asked him, Supt. Jones said car and engine shops would likely be erected in St. Thomas; the Wabash contemplated the erection of light running repair shops in Canada, and he thought St. Thomas was the most favorable point. New fast trains are to be put on the Air Line between Windsor and Buffalo.

NEW YORK STOCKS WEAK.

The stock market of the United States, always susceptible to disturbing influences, has been strained to the utmost limit during the past few days. The extremely bellicose tone of Sagasta's speech before the Spanish Cortes, following American action on Cuban affairs and the determination of the President to send an ultimatum to Spain, left little doubt in the minds of the traders that there would soon be an open conflict. The tension was increased by a similar belief in London, reflected in the stock market, and cables from across the Atlantic continuously reported many securities "weak and lower." Sugar and tobacco stocks were naturally the first to feel the influence of war news. Railway stocks showed weakness, and as a reason for the numerous sellers it was announced that the Joint Traffic Association roads were making no effort to maintain rates to the seaboard on any kind of freight. Grain was said to have been taken from Chicago on the 20th inst. at the lowest rate on record. An explanation offered by the roads for the present condition of demoralization was their conviction that the Joint Traffic Association case in the Supreme Court had been decided against the lines, and that the decision would be formally promulgated in a few days. This would place the Joint Traffic Association alongside the Trans-Missouri Freight Association as an illegal organization operating in restraint of trade. It may be said in passing that it is probably to combat just such a situation as this decision would entail that the Vanderbilts are pursuing the policy of unifying their trunk line interests.

—Collector Milne, at Victoria, B.C., has received a check for $19,436.59, the amount of compensation awarded to the owners of the sealing schooner Ariel by the Russian Government on account of her illegal seizure off the Russian coast several years ago.

"The HEINTZ—the best—tho' it has imitators."

Cornwall Canal and River Reaches.

NOTICE TO CONTRACTORS.

Sealed Tenders addressed to the undersigned and endorsed "Tender for Improvements at Upper Entrance of Cornwall Canal and River Reaches," will be received at this Office until 16 o'clock on Saturday, the 30th day of April, 1898, for the works connected with the widening, straightening and deepening of the Upper Entrance of the Cornwall Canal and the River Reaches between Cornwall and Coteau Landing.

Plans and Specifications of the work can be seen on and after the 15th day of April, 1898, at the office of the Chief Engineer of the Department of Railways and Canals, Ottawa, and at the Engineer's office at Cornwall. Printed Forms of Tender can also be obtained at the places mentioned.

In the case of firms there must be attached to the tender the actual signatures of the full name, the nature of the occupation and residence of each member of the same, and further, an accepted bank cheque for the sum of $17,000 must accompany the tender. This accepted bank cheque must be endorsed over to the Minister of Railways and Canals, and will be forfeited if the party tendering declines entering into contract for the work at the rates and on the terms stated in the offer submitted.

The accepted bank cheque thus sent in will be returned to the respective parties whose tenders are not accepted.

The Department does not bind itself to accept the lowest or any tender.

Contractors are specially notified that the condition requiring the works to be wholly completed by the 30th Day of November, A D., 1898, will be rigidly enforced and all penalties for delay exacted.

By order,
L. K. JONES,
Secretary.

Department of Railways and Canals,
Ottawa, 6th April, 1898.

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

BAND and CIRCULAR RE-SAWS

are a necessity in a saw-mill. They increase the capacity of mill one-third when logs are small, by slabbing heavy and re-cutting all slabs on re-saw, using a 19-gauge blade.

They make two plump boards out of a bad face deal.

Transfers supply them and not over four extra men required to run one.

If some large mills can use three and four, you can surely find one profitable. Will be pleased to send you particulars and prices.

SITUATION.

Without acknowledging the insurgent Government, the United States Congress declares the Island of Cuba free and independent. It calls upon Spain to relinquish the government of the island and to withdraw its land and naval forces; and it authorizes the President of the United States to use the entire land and naval forces of the Republic to carry these resolutions into effect. A formal resolution disclaims, on the part of the United States, all desire to exercise sovereignty, jurisdiction or control over the island. These resolutions embody a compromise between the two Houses of Congress, the Senate having favored recognition of the insurgent Government, which the House of Representatives, acting in unison with the President, opposed. A resolution to use the whole force of the Republic to drive Spain from Cuba is practically equivalent to a declaration of war, though it is not technically so in form. The President has given effect to the joint resolution of Congress, and the ambassadors of the two countries have been withdrawn. The first gun may be fired some time to-morrow.

President McKinley in his Cuban message spoke as if intervention in Cuba was to be directed against both belligerents, with the purpose of restoring peace. Congress has given to the intervention which it authorizes a different aim, that of driving out of the island one of the combatants. Before this work can be begun, the Spanish fleet has to be settled with. It is about equal in power to that of the United States, increased as the latter has been by recent purchases. The relative skill of the two navies nothing but an actual test can measure. When the fighting reaches the island, a large Spanish army will be encountered, unless the 60,000 troops now there be considerably diminished by fighting, disease, or inadequate supplies. If the Spanish fleet were out of the way, Cuba could perhaps be invested and starved out. In driving out the Spaniards, it is natural to suppose that the United States will have the aid of the insurgents, the number of whose troops ex-Consul Lee estimates at 27,000. To drive out Spain, a number equal to that of the rebels the Americans would have to send, if the fighting came on before the Spanish troops were reduced in numbers by natural causes. The insurgent government not being recognized, there are some misgivings as to how they may act, if an American force invades their country.

In the course of the Spanish-American war, questions in which neutrals are interested will inevitably arise. One will be: "Is coal contraband of war?" So far as the two combatants are concerned the further question will arise whether they are bound by a treaty between them, which, made more than a century ago (1795), is still in force. As a rule, war puts an end to treaties, but not to such treaties as are made to meet the contingency of war, when alone they can be operative. This treaty in dealing with articles contraband of war, gives a list of prohibited articles, and another list which "shall not be reckoned among contraband or prohibited goods;" in the latter coals are named. If there had been no treaty coal would be contraband of war. Is the treaty obsolete or still in active force? During the present civil war in Cuba it has certainly been quoted by the United States as in full vigor.

Besides the question of contraband of war in disputed articles, the broader question of privateering, as modified by the Declaration of Paris, will come into prominence. At the Congress of Paris it was declared that "privateering is and remains abolished;" that "the neutral flag covers enemies' goods, with the exception of contraband of war;" that "neutral goods, with the exception of contraband of war, are not liable to capture under an enemy's flag;" that "blockades, in order to be binding, must be effective; that is to say, maintained by a force sufficient really to prevent access to the enemy's coast." But these rules were not to apply to any but the nations that signed the declaration, and neither Spain nor the United States signed. It is open to the signatory nations to say that the principles of the Declaration of Paris ought now to prevail; the United States, which of the two combatants has most to lose by privateering, would probably not object, and Spain could not make effective her opposition if she were to oppose. Under the old rules of privateering, neutral vessels would be liable to be searched by either of the belligerents for contraband of war; and it is important that an understanding should be come to, to prevent the inconveniences to neutrals which the revival of the old practice would occasion.

In dealing with the sugar duties, our Government having no experts of its own to present scientifically the effect of any proposed changes, is at a disadvantage. The Minister of Finance admitted that he had got his information from the sugar refiners. These gentlemen are deeply interested, and their evidence could properly be taken only subject to examination and rebuttal, if found to be scientifically incorrect. But the Government has no machinery of its own by which this can be done. The British Government can obtain an independent and reliable solution of such questions from its own Treasury Office experts. If an application were made by our Government, through the Colonial Office, for a decision of these experts upon the case in hand, there is no doubt that it would be granted.

No substitute for the rejected Lake Teslin route railway has been proposed, and it looks as if commerce to the gold region of the North would be permitted to find tracks for itself this year. For the present season this will make little or no difference. The railway, if it had been built, would not have been available to September. Meanwhile the passes further north, over which the traffic has hitherto passed, are being improved and made more practicable. Unless we have an all-Canadian route, which that of Lake

Teslin would not have been, at first, we shall have to do with the American customs regulations at the frontier. These we meet at many other points, and they ought not to be more onerous at one point than at another, nor would they have been unless special efforts had been made at Washington to make them so. Perhaps a year's breathing spell may put a better aspect on the transportation business to the Klondyke.

Pressure has been brought upon the Government of British Columbia to aid a line of railway from the seacoast to the head waters of the Yukon by an advance of $4,000 a mile, to be repaid by "the contractors," whoever they may be. The statement is made that nearly $1,500,000 would be required, and that from a tax on traffic $75,000 a year could be got towards recouping the advance. It is recognized that the enterprise would be beyond the resources of the province, and efforts are being made to have the Local Government work for the attainment of this object in connection with the Dominion authorities. The scheme appears to contemplate something more than a revival of the Mackenzie-Mann project, with a money aid, by way of advance, to be followed by repayment. If this plan could with certainty be worked out, in all its parts, it would be preferable to that which the Senate rejected, in that it would make the payment of the work specific, instead of speculative and uncertain. The objection to it is that it seems to contemplate another deal with contractors, without calling for tenders.

The throwing out of the Kettle River Railway bill is attributed to the strengh of the lobby against it. The incident apparently affords proof of the overpowering influence of the C.P.R. in the House. The Government supported the bill, but the C.P.R. was nevertheless able to make its opposition effective. It is not the interest of Canada to build a wall of exclusion around the Dominion. Such acts beget retaliation, and thus in the end do general mischief for the benefit of a particular company.

EXCESSIVE OR FICTITIOUS RAILWAY CAPITAL STERILIZED.

On the question of stock watering and overbonding of railways, the Supreme Court of the United States, in the Nebraska freight-rate case, has delivered an important judgment. "If," the court decides, "a railroad corporation has bonded its property for an amount that exceeds its fair value, or its capitalization is largely fictitious, it may not impose upon the public the burden of such increased rates as may be required for the purpose of realizing profits upon the excessive valuation or fictitious capitalization; and the apparent value of the property and franchises used by the corporation, as represented by its stock, bonds and obligations, is not alone to be considered when determining the rates that may reasonably be charged." If this decision be generally enforced, it ought to prove a death-blow to stock-watering; it may not, however, in practice be found to have that effect. The judgment is notice to buyers of railway bonds to look after themselves. Their bonds depend for interest upon the earnings, and if rates cannot be increased that bonded interest may be paid, when an excessive amount of bonds has been issued, takers of bonds will have a strong motive for seeing that the amount is not unreasonably large. If this decision had been declared half a century ago, it might have saved many millions of English capital invested in American railway bonds, and lost. Should the rule laid down as applicable to stock be fully enforced, it will become necessary to ascertain how much of the so-called railway capital is real and how much fictitious, in order that rates may be so fixed as to provide for interest only on the real capital, or on amount equivalent thereto; for the court lays it down, "if a corporation cannot maintain such highway and earn dividends," the misfortune to the stockholders "does not require to be remedied by imposing unjust burdens upon the public." "The public can not properly be subjected to unreasonable rates simply that the shareholders may earn dividends." The real and not the apparent character and extent of the property must be taken into account; in other words, the real, not the fictitious character of the capital is to be the guide in estimating what are fair and reasonable rates. According to this rule no railway capital where the power of fixing railway rates is reserved in the Legislature, or vested in other competent authority, could ever get more than such rates of interest or dividends that an impartial tribunal might determine to be fair and reasonable.

How reasonable rates can be earned in all cases, surpasses the wisdom of the Legislature to forecast or insure.

CO-OPERATIVE ASSOCIATIONS—THEIR LEGAL DISABILITIES.

A subscriber, an angry one at that, sends us a description of a concern which he thinks should be pilloried for not paying its debts. This is the Dunwich Co-operative Association, which has its corporate headquarters at Dutton, a pleasant village (boasting four Protestant churches), situate in the county of Elgin, Ontario, and having about 1,000 inhabitants. It is an association of farmers exclusively, and has been five or six years in business. There is a board of eight directors, with John Wright for president. The capital was raised, it is said, by 150 farmers putting up $10 apiece to do a general store business, a good deal of which was in groceries. The manager of the business has been Mr. T. F. Robinson, and it was stated last year that he intended to buy the place out. Evidently these farmers had, like some other people, got firm hold of the notion that there were enormous profits to be made by storekeeping.

Now, says our correspondent, "this concern bought from me months ago a small parcel of goods on credit. They have not paid for it, and when I apply for payment and threaten suit, I am told there is no use suing—that there are other claims in ahead of me, that a chattel mortgage covers the effects, and, furthermore, that the manager cannot be held liable, and that some further immunities are given them by their charter. Is this sort of legislation reasonable or possible in this country, and how can such a concern, called 'A Co-operative Association,' under the sanction of law, buy my goods, refuse to pay for them, and tell me that they are protected and I cannot help myself?"

We are sorry to have to refer our correspondent to the law under which this concern and all such concerns get incorporation. It is known as "An Act Respecting Co-operative Associations," and is known as chapter 166 in the Revised Statutes of Ontario, 1887, and chapter 202 R.S.O., 1897. Section 16 of this Act, which is the same as section 18 in the previous revision, and is apparently unchanged since 1877, makes the distinct provision that "the business of the association [of this co-operative character] must be a cash business exclusively," . . . and its concluding words are: "Everything must be bought and sold for cash only." Not only does the Act give the concern no power to buy on credit, but absolutely prohibits its doing so. The next section qualifies this, it is true, but only to the extent of permitting the concern to buy real estate enough to put up a shop to do business in. We do not discover any penalties in the Act under which the manager can be punished for buying on credit. But we should think that if the section has not been complied with (17 in R.S.O. 1887), which prescribes that there shall be sent once a year to the Provincial Secretary "a general statement of the funds and effects," . . . and such information as may be requisite to show clearly the position of the association, something might be done. Yet, if the concern is in extremis now, as would appear, there would be poor satisfaction in pursuing anybody.

The pertinent fact to be kept in mind by merchants and manufacturers is that neither directors, manager, nor any one else connected with one of these co-operative associations can pledge its credit for anything more than the rent of the premises (or a purchase of land therefor on credit), and the salaries of its clerks and employees. It is ordered by law to buy for cash, and no person should offer it credit.

LOAN COMPANIES' CHARTERS.

Objections were raised by the Banking Committee of the House of Commons to certain provisions of the Central Canada Loan Company's bill, especially that which empowers the company to loan on, or invest in, debentures, bonds, stocks and other Government securities, in municipal debentures, bank stock or the stock of any incorporated company. The objections taken were, perhaps, not all based on the broadest ground which was available. In the infancy of charter granting, powers were scattered irregularly, but on the whole with a lavish hand. Things went wrong, and to prevent a recurrence of the wrong restrictions were imposed. When the privileges were valuable a price was put on them, and millions were paid for them by corporations both in England and the United States. But dissatisfaction with this system grew up, and general laws gradually took the place of special charters. These laws were framed for the security of the public and the protection of the stockholders. A special charter came, and properly, to be regarded as a special privilege to which no one was more entitled than another. Banks and loan companies came to be, saving some old charters, governed by common laws. Any deviation from these laws is jealously watched; by many such deviation is regarded as made in violation of a common right to which all or none are entitled. If one loan company received a legislative favor it could not, in reason or equity, be withheld from all others if they desired to obtain it.

It might, at first sight, appear difficult to show why a loan company should not be permitted to invest in Government or municipal securities. But there is this clear distinction between such companies and banks: the former lend on long terms, the latter on short. An investment in Government or municipal securities, intended to be for a long term, might encounter wide fluctuations in value. A recollection of what occurred in the American civil war will explain our meaning. A bank has the habit of divesting itself speedily of even Government securities, when they show a tendency to decline; the habit of the loan company might prevent equal promptitude on its part, though there is no necessary reason why it should do so. There do not appear to be any strong reasons why a loan company should not purchase Government securities, except that it could not make upon them more interest than it is obliged to pay. The investing in or abstaining from investing in such securities, even by a loan company, ought perhaps to be a matter of prudence. For the same purpose, municipal debentures would have to be regarded with more caution, and selected with considerable discrimination.

But it would clearly not be desirable or safe to permit loan companies to invest in miscellaneous company stocks. The power to do so, if generally conceded, could scarcely fail to be abused; and if given to one loan company, it could not be withheld from others. It is easy to say that the selection might safely be left to directors, who are hard-headed, cautious men; but experience proves that, without the safeguard of inhibitory law, unsafe investments are certain to be made, where strong personal temptations come into play.

FINANCIAL REVIEW.

We give below a condensation of the figures of the statement of Canadian banks for the month of Mar., 1898. It is compared with the bank statement for the previous month, and shows capital, reserve, assets and liabilities, average holdings of specie and Dominion notes, &c.

CANADIAN BANK STATEMENT.

LIABILITIES.	Mar., 1898.	Feb., 1898.
Capital authorized	$74,258,684	$74,258,684
Capital paid up	62,296,786	62,294,922
Reserve Funds	27,634,666	27,580,999
Notes in circulation	$35,930,085	$35,823,923
Dominion and Provincial Government deposits	6,016,429	6,819,130
Public deposits on demand	76,471,017	78,939,572
Public deposits after notice	140,525,489	140,799,375
Bank loans or deposits from other banks secured	......	......
Bank loans or deposits from other banks unsecured	2,555,465	2,821,895
Due other banks in Canada in daily balances	162,669	185,007
Due other banks in foreign countries	509,463	509,585
Due other banks in Great Britain	3,353,429	2,067,557
Other liabilities	529,332	731,345
Total liabilities	$266,051,460	$268,697,468
ASSETS.		
Specie	$8,954,889	$ 8,619,198
Dominion notes	14,566,151	14,873,224
Deposits to secure note circulation	1,883,067	1,883,067
Notes and cheques of other banks	7,937,640	9,775,768
Loans to other banks secured	....	....
Deposits made with other banks	3,433,965	3,918,650
Due from other banks in foreign countries	19,482,365	20,793,570

Loans to Dominion and Provincial Governments	1,377,698	1,264,404
Due from other banks in Canada in daily exchanges	201,057	319,781
Overdue debts	3,237,576	3,232,918
Real estate	2,143,340	2,153,466
Mortgages on real estate sold	690,444	581,283
Bank premises	5,684,498	5,751,886
Other assets	1,903,457	1,520,786
Total assets	$355,876,759	$357,575,974
Average amount of specie held during the month	8,926,759	8,618,517
Average Dominion notes held during the month	14,092,500	15,592,966
Greatest amount notes in circulation during month	36,939,264	36,099,032
Loans to directors or their firms	8,122,579	7,581,920

The inspector of the Canadian Fire Underwriters' Association, Mr. Robbins, has reported that the fire equipment of London demands a second main from the waterworks, and a salvage corps or chemical engine.

THE SHADOW OF WAR.

The effects of impending war on business are already beginning to be felt among us. For although no hostile gun has been fired, unmistakably the prospects of war are imminent. Our Montreal correspondent notes the impending shadow over several trades. In furs, for instance, which are always promptly affected by war, there is a weak feeling, and buyers are extremely cautious. The American lumber market is depressed, and the leather market is unsettled from the same cause; Montreal boot and shoe manufacturers are light buyers. In the States, while some foolish jingoes rejoice in the prospect of a fight, most business men dread it with the financial disturbances that are sure to arise, and with the increased internal taxes and import duties that it is likely to bring. While such a war would enhance the importance of the St. Lawrence route to the sea, it is pointed out by the St. John Globe that the coasting trade of the Maritime Provinces would be paralyzed, and most of the craft now used in conveying lumber and shingles to American ports would be forced into idleness. Besides this trade a great many of the schooners brought back coal, flour, etc. "Craft sailing to the West India and small South American ports would also find their trade very much curtailed in the event of war. . . . The trade that is now carried on to and from the north side of Cuba and Porto Rico would come to a standstill, and . . . the large square-rigged Canadian vessels that now find employment between the gulf ports and the River Platte would also meet with a demoralized trade should hostilities commence."

REACHING OUT FOR TRADE.

It is deserving of note that a Glasgow merchant, Mr. J. F. Brown, has come to Canada to see about shipping a certain class of lumber suitable for box-making. He was in Toronto on Friday last, and left for Parry Sound. About ten years since a Greenock or Leith representative was in Toronto on a like errand. In the earlier case the visitor wanted to induce Canadian lumber makers either here or in Ottawa to ship box stuff in "knock-down" shape to the British Islands, to compete with the Scandinavian wood. In the present case, however, Mr. Brown comes because, we understand, he finds it increasingly difficult to procure the wood he wants from Norway. Canada ought to do an immense business in this direction.

Canada bulks largely in an elaborate article in the "Journal" of the Royal Agricultural Society on the subject of "Bacon Curing." It prefigures a great extension of the bacon curing industry in Great Britain, England being the market of the world for bacon and pig products. Incidentally the author, Mr. L. M. Douglas, quotes some striking figures, which illustrate both this fact and the extent to which Canada has realized and profited by it. Thus, the quantity of pig meat imported into the United Kingdom has more than doubled in twenty-one years, and Denmark has shared largely in the growth of this trade. Canada, however, is rapidly gaining the leading place on the English market. The article goes on :—

> It is safe to say that the coming rival of all other countries in the production of bacon is Canada The attention given to the breeding of pigs by the agricultural authorities and the enthusiastic co-operation of the farmers are alike contributing to this result. "Pea-fed Canadian" is fast displacing Danish meats and taking the leading place in the English market. No doubt the supplies in Canada will continue to increase by the same leaps and bounds as of late years, so long as the Dominion farmers devote as much attention to the quality of hog produced. It is said now that one house alone in Canada often kills as many hogs in one week as the whole of the Danish slaughteries.

In the current number of the Windsor Magazine Mr. Ernest Williams dilates upon the prospect of Canada's doing an export trade in butter which may one day rival her cheese export. He at all events has no doubt of our ability in this direction. He says:

> "Undoubtedly Canada will make great inroads on the butter market. Her wonderful success in the cheese business warrants the rosiest expectations. The present preponderance of cheese over butter is attributed to the capacity of cheese for traveling in ordinary temperatures. Difference in quality and reputation has, I expect, more to do with the case, but there is a good chance of approximation here, and in that event the provision of cold storage at so nominal a cost should put the delicate butter on an equal footing with the cheese. Butter will also get an impetus from the efforts which the Agricultural Department is making, and with success, towards getting the cheese makers to practice butter making in winter. Professor Robertson and his assistants are teaching the people how to turn their cheese factories into butter factories during this off-season. The Agricultural Department goes even farther. In the North-West Territory it undertakes to make the butter for the farmers, and market it, at a small charge to cover the service, for a period of at least three years—that is, for the time during which the Government loan for the creamery association runs."

ORGANIZED LABOR AND THE SHOE INDUSTRY.

Trade unionism has done much to advance the interests of working people. The union is not always, as many suppose, opposed to the interests of employers, and in securing a uniformity in the cost of labor confers oftentimes a boon upon those who are charged with the organization of industry. Manufacturers, on their part, do not object to high wages so long as their competitors are equally bound with themselves. They are then in a position to pass on the costs to consumers. Only the strong unions with an effective national or international organization are able, however, to accomplish this happy result. The weak unions are the cause of untold disaster to manufacturing interests, and to this latter class the union in the shoe industry of Toronto belongs. Trade unionism is impossible, so long as it is merely local in its application. For some years the trade unions dominated in Toronto boot and shoe manufacturing circles and wages were, by their influence, maintained above those paid in the Province of Quebec. The results were that some of the shoe manufacturers were forced out of the business, others transferred their plant to Eastern Canada, while the houses remaining were compelled to do largely a jobbing business, selling footwear that had been made in Montreal and Quebec. These changes were accompanied by serious loss to the capital and labor directly interested, as well as to the general trade of Toronto and the Province.

The unions were forced to disband and a reasonable schedule of wages, about on a basis with that paid in Montreal and still above that of Quebec city, was adopted. Plant which had been idle was called into request and men and women who had been working on short time were busy every working hour in the week. As a result of the reduction in the rate of piece-work wages, the employees were enabled to earn a much larger aggregate wage in the course of the year. The manufacturers have in the reduction of their cost of production, been able to recover some of the ground that had been lost. When the bottom finishers employed by the J. D. King Company, instigated, it is said, by agitators from the United States, decided to form a trade union, it is little wonder their action was resented. The cutters have joined the bottom finishers and 100 men are striking for a principle that has well nigh ruined shoe manufacturing in Toronto. If a national union could be formed strong enough to organize labor in all parts of the Dominion and bring about uniform conditions in the boot and shoe labor market, none would more willingly recognize it than the Toronto footwear manufacturers.

RAILWAY CHARTER POLICY.

It is a principle pretty clearly defined by the different governments of Canada that a duplication of franchises for constructing railway lines in practically the same territory is inadvisable. To grant the petition of the promoters of the Toronto and Hudson Bay Railway Company would be a violation of this policy. The James Bay Railway Company has been incorporated to build a railway from Toronto to James Bay which covers the only part of the territory through which the proposed municipal line would pass where railway construction is practicable. We are not conversant with the detailed plans of the James Bay Railway Company and do not wish to be taken as advocating their cause. The incorporation of a company to build a railway in Canada is but a preliminary step, which is usually followed by securing financial assistance in foreign money markets. The grant of a second charter for the same purpose must necessarily harass those who have secured the first, in their negotiation in the money market. The question is a broader one than the competition between two financial interests; it involves the general policy of the Government in granting charters for important undertakings in which the public are interested. A company should be incorporated for railway construction only after the Government is convinced that the proposed route is practicable and promoters responsible. When once these questions have been decided in the affirmative, only upon strong reasons should other interests be given a second charter for the same purpose. The act of incorporation limits the time within which the construction of a railway shall be commenced and completed, and the public interest is in this way protected from any unreasonable delay on the part of the holders of the charter.

MATTERS IN MONTREAL.

Having escaped a flood this spring—thanks to the ugly structure along the revetment wall that you were pleased to describe when you were down as "beastly," in appearance, and that some of our citizens condemned as useless and rotten—we are looking with something like eagerness for the spring fleet. It will be, there is some reason to think, a bigger fleet than ever. I mean that the calibre of the steamers will be increased. And this brings one to remark that I am glad you have had with you in Toronto, before your Board of Trade, too, a man that could explain what some of our narrow-minded "plugs" don't seem able to take in, that Montreal is not up-to-date as a sea port. Harling is a clever fellow; something of an enthusiast, too. At least he is full of ideas and ready of talk about what is needed here. Even suppose it is true, as some folks say, that he is simply "talking for Harling"—and the Dominion Line, I don't blame him for that. If he can make this harbor what it ought to be, others will benefit as well as Harling. I hope Toronto will shake off her jealousy of Montreal and help us to get what we need.

The old town continues to move, as an American humorist once said of his country, not so rapidly as some giddy young things might desire, but perceptibly and horizontally. You know the peculiarities of Montreal; how we were laid out a first on a small scale, according to Old World notions. Narrow streets! How often have we had to undergo this reproach. How often have people told us that we were three-fourths French, and the other fourth nowhere. But the other fourth is the fourth, and we should not be the Montreal of to-day if it were not for this broad-minded, up-to-date, Anglo-Saxon back-bone of the community.

Our French friends of la Chambre de Commerce gave a dinner to His Honor, the new Lieutenant-Governor of Quebec, the other night. But you will have learned all about that from the papers. Perhaps I ought to mention some of the improvements of the streets made or in progress. There have been a number of good buildings and good blocks built in the business quarter and more are coming. On St. James Street this is especially noticeable. The London and Lancashire Life Assurance Co., has bought the famous Barron Block, which was burnt down a few months ago, you remember, and are building a block of stores thereon of cut stone, six stories high and basement, which when finished will be fireproof and have all modern improvements. It is not yet an old story that the Standard Life building, handsome as it was, has been enlarged and improvements made in it. The Imperial Bank branch, recently established, occupies the basement and Mr. J. A. Richards, the manager, has fitted up his offices both in front and rear, in a very handsome manner. You may be prepared, of course, to hear, also, that our manufacturers are not behind the age in making their premises what they ought to be, or more nearly so. One of the oldest shoe manufacturing firms of the city, The Ames Holden Company, who have extended their premises and manufacturing departments in the city, are doing a business at the present time of about $2,000,000 yearly. They have branches in St. John, N.B., Toronto, Winnipeg, Man., Victoria and Vancouver, B.C. In fact, generally speaking, the business of the city almost in every department is in a very satisfactory condition, so far as I can gather about it in my daily rounds.

That was a sad thing happened this day week when Charles D. Hanson, insurance agent, was run over by a street car and had to have a leg amputated. He is, however, reported doing well. Apropos of this accident, The New York Herald of Sunday last, has a full page of illustrations showing how some men save time by doing similar rash things, trying to catch a moving car, etc.

I hear that Mr. C. H. Nelson, one of the Nelson Brothers, fancy goods dealers, of this city and Toronto, has bought Tasse, Wood & Co.'s cigar business here, and what is more, that he intends to run it. We shall hope he may make a "Klondyke" out of it, but he may not.

I noticed your article on the removal of the Grand Trunk Railway offices to Toronto, but hardly think you mean it. Don't imagine for a moment that the company have any intention that way. Your arguments would equally apply to the New York Central, but who would dream of their moving their general offices out of New York, although that city is really only the beginning of their line? These concerns want to stay in the most wealthy and populous centres, and be among the big ocean shippers. G. O. M.

Montreal, 18th April, 1898.

OTTAWA.

Observations in the course of successive visits, year by year, make it plain that the capital city of the Dominion is developing rapidly. Extensive business blocks and numerous fine private residences have been erected or improved, writes a correspondent, in almost all parts of the city since I was here last. This is especially noticeable on Sparks street and Wellington street, the two principal business thoroughfares of the city, and nearly all are built of cut stone, with fine fronts, plate glass windows, and tasteful ornamentations. In one of these structures is the fine building of Messrs. Butterworth & Co., stove and foundry manufacturers, and general dealers in plumbers' and other hardware goods, which are well displayed on each of the four floors of this large building. The Messrs. Butterworth are an old established firm in Ottawa, having been in business since 1875.

On the corner of Sparks and Metcalf streets is the magnificent block of the C Ross Co of which Mr. Charles Magill, head of the Bank of Ottawa, is president. The general manager of this large business is Mr. C. Ross, who has been in business in Ottawa for a number of years. The building has six floors and the frontage is striking. The interior arrangements, also, are all that could be desired, and a great business is done in this dry goods palace.

On the corner of Sparks and Bank streets is the newly-erected building of the Sun Life Insurance Co. The exterior is beautifully ornamented and all modern improvements have been introduced within. Messrs. Mortimer & Co., the stationers, have also been rebuilding and extending their premises, covering some 99 feet frontage. The Massey-Harris Co. have erected new offices and showrooms on the corner of Parks and Kent streets; Mr. W. J. Best, the manager in Ottawa, has the production of this well-known firm displayed on each floor of the new building.

A building worthy of note is that of the American Bank Note Co., on Wellington street, a fine new building, and there is the new hotel "Cecil," of some seven floors, all adding to the fine appearance of this street. In fact on all sides new buildings and improvements may be noticed. It is evident that the authorities and citizens alike are determining to have their city worthy of the name of the capital of the Dominion.

Wholesale houses in Ottawa report having done a good spring business, and the manufacturing industries, including the lumber, fibre and paper works of the E. B. Eddy Co., at Hull, are all actively employed, and the outlook for the future of this as an important distributing as well as manufacturing centre is encouraging.

T.G.O.

Ottawa, 19th April, 1898.

PORK-PACKING CONDITIONS REVIEWED.

The winter pork packers, that is, those who handle only hogs killed and dressed by the farmers, have closed the season of 1897-98. While some of the houses report having packed more hogs this year than last, it is safe to say the aggregate movement has been somewhat under the average of the past few years. The tendency of the trade is apparently in favor of the packers who have facilities for receiving live hogs, and report has it that their numbers will be materially increased before many seasons have passed. An interesting feature of the trade is the efforts made in differents parts of Ontario and the Maritime Provinces to establish co-operative pork-packing establishments. It is proposed to carry the principles upon which the cheese factories are conducted into this industry. What the outcome of the movement will be, it is impossible to say, but the authorities in the trade are very dubious of its success. The reputation of Canadian pork products has become well established abroad, and it would be a serious matter to have the trade disorganized by unskilled operators.

The prices paid farmers for dressed hogs in Ontario during the year have been comparatively high. The export demand, regulating the hog market, has raised values somewhat above the basis warranted by local prices for provisions We append a list of monthly prices paid per hundred during the season :—

	Selected.	Heavy.
October	$6 10	$5 90
November	5 60	5 30
December	5 60	5 35
January	6 00	5 75
February	6 40	6 10
March	6 15	6 00
April	6 00	5 80

The wide range between the quotations for light weight and heavy weight hogs, combined with the continued rise in the price of feed stuffs had the effect of decreasing the deliveries of heavy hogs. From an abundance of very fat, heavy hogs, the farmers have been sending excessively light, lean hogs to the market, some of them running as low as 75 pounds and quite unfit for packing purposes. The average weight is thought to be 15 to 20 pounds under that of last year's offerings. As a consequence of this falling off in weight, stocks of heavy meat, such as barrel pork and long clear bacon, are rather light.

The prospects for the season are not entirely bright. The North-West trade, however, is much more promising than it has been for some time. The activity in railway construction has resulted in several large orders being placed with Eastern packers. The production of hogs in Manitoba and the North-West Territories has not been large this year. The high price of grain has made hog raising less profitable, and as usual diverted farmers' minds from mixed farming to extensive grain cultivation. The lumber trade has consumed large quantities of provisions during the winter, but it is more than likely that the new regulations of the Ontario Government restricting American lumbermen in Canada will retard trade next year. The principal barrier in the way of profitable trading lies in the high prices, as noted above, paid for hogs. Packers have been compelled to pay more for their material than their competitors in the United States, and many have some difficulty in obtaining a corresponding advance in the price of products.

FOR GROCERS AND PROVISION DEALERS.

The Montreal sugar market is decidedly dull, and the Canada sugar refinery is shut down.

A grocery concern in St. John, N.B., according to the Sun, having issued circulars to the effect that they intend to open up a cut rate patent medicine store in a central part of the city, druggists have decided to cut prices to such an extent that the new house will probably have to abandon their project.

The spring importations direct this year of Mediterranean fruit to Montreal will not be as great as they were last spring. The first steamer to arrive will be the "Mathews," which has left Messina with 28,000 boxes of lemons and oranges, and as she will stop at another Spanish port it is expected she will land about 32,000 boxes of oranges and lemons this week or next.

War prospects have had a decided effect upon American dried fruits. Whereas a fortnight or less ago, dried apricots and peaches were firm because of a restricted crop, last Saturday's San Francisco *Grocer* says the small fruit market is duller than ever, and "Eastern holders of apricots instead of buying here, are offering their holdings on this market, and only asking for cheap prunes, something on the basis of two cents a pound. The prune crop promises to be large in quantity, but of small-sized fruit."

WITH THE DRY GOODS MERCHANT.

The $300,000 additional stock offered by the Montreal Cotton Co. in the United Kingdom has been fully subscribed. The $100 shares of the concern are quoted at 147 to 152.

Bright coloring has the lead in parasols this year. Combinations of many-colored, narrow, cross-stripings on light or white grounds predominate in the medium-priced sunshades in France, whereas, in the more expensive, preference is shown for broad plaids in two colors or two or more shades of one color and the mixture of color with black.

The Paris correspondent of the New York *Dry Goods Economist*, writes: "Plaid silk is most used this season for covering sunshades. The plaids adopted for the purpose are of the fancy order, and although having the usual denomination, 'Ecossais,' are, for the most part, as little Scotch as may be. It is really surprising to find what variety can be obtained by the simple method of crossed stripings as exemplified in the new selections of sunshades."

The modern store decorator—interior or window—suffers nothing to stand in the way of attracting a crowd, and thereby drawing trade. He is constantly on the *qui vive* for new ideas, and the fact that he is compelled to enter strange fields for his material doesn't restrain him. As an illustration, a New York dry goods house recently filled its store with several hundred canaries, while broods of chickens with mother hens in barnyard settings, were scattered about the various departments. Apple trees and cherry trees, planted in real soil and in full bloom—the flowers being artificial—were also employed to the same end, and were very effective.

There is in all branches of trade in the United Kingdom a desire manifested to increase trade with Canada. That this movement has grown beyond the mere sentimental stage and is assuming a practical form is shown, among other things, in the proposition to establish a line of steamers between Manchester and the Canadian ports. It may be interpreted from this movement not only that Manchester interests are anxious to expedite trade facilities with Canada, but they recognize the growing strength of Canadians as exporters and importers, and are anxious to share in this commerce. Sir Christopher Furness is said to have contributed £150,000 towards the scheme, on condition that Manchester raises £200,000, which amount the authorities allege is practically assured. Applications for £250,000 debentures are to be invited.

Special enquiries as to the textile trade have been made by The Draper's Record. It appears that, "the traffic ranges from 40,000 to 50,000 cases per annum, 20 cubic feet (or half a ton measurement) to the case. The freight on this traffic ranges from 25s. to 35s. a ton, the rate in winter being slightly higher owing to the fact that the St. Lawrence is frozen, thus necessitating a longer travel by rail from that port of arrival—Halifax or Portland, as the case may be.

"It must not for a moment be imagined that Manchester can hope to secure the bulk of this traffic. The shipments of cotton goods to Canada amounted last year to 26,000,000 yards, a quantity making probably about 80,000 cases. In actual value, and, in weight also, Yorkshire goods occupy a more important position, although the yardage is a little less. It is open to serious doubt whether Bradford and Leeds goods intended for foreign markets are likely, for some years at any rate, to be forwarded by way of Manchester. The cotton traffic is another matter, although even regarding this class of traffic it should be noted that Glasgow houses have a very large share of the business. The Clyde seems to have very close relations with the Dominion, several houses in the West of Scotland having made a special feature of the trade for many years."

WESTERN BANK OF CANADA.

This bank has passed its sixteenth year, and through all that period has shown a pretty steady, though not a rapid growth. Its paid-up capital is now $384,000, and the reserve $118,000, or more than 30 per cent., built up entirely, if we mistake not, out of earnings. Deposits have swelled to more than $1,300,000 and the totals of assets and liabilities exceed $2,166,000, very respectable proportions for an unpretending country bank. More than half the assets are in readily convertible shape, a circumstance which, while a creditable evidence of strength, is at the same time a disadvantage so far as earning-power is concerned, as, indeed, a paragraph in the report states. Still, the rate of net earning for the year, nearly 10½ per cent., is by no means unsatisfactory. After paying the usual dividend of seven per cent. $6,000 has been added to the Rest, and a larger sum carried forward. We note that the comparatively large proportion of $604,000 is held by the bank in shape of provincial, municipal and other first-class debentures.

LIFE ASSURANCE IN CASE OF WAR.

Most American life companies provide either that in event of death while engaged in warfare the insurance shall be void, or that a permit must be first obtained. And, now that war is apparently at hand the question comes: What will the companies do in case of war? This question having been asked by an American insurance journal is answered thus by various companies:

The New York Life, through its president, announces that "policy-holders may consider themselves released from the restriction which forbids them to engage in military service."

President Greene, of the Connecticut Mutual, also makes a public announcement of the same release, "until other action is had in the premises."

The National Life promises to its policy-holders permits "without limitation or extra charge."

The Penn Mutual will charge an extra premium; but will require no notice and will carry the extra premium as a lien if not paid in cash.

The Metropolitan's new policies have no conditions and President Hegeman applies this liberal feature to all, saying: "Any policy-holder with either form can join the army or navy for active service without extra charge."

All policies more than two years old, in the Mutual Benefit, will be regarded as without restrictions. So states the president, who adds: "As to policies issued within the last two years the restrictions would probably, upon application, be withdrawn where the insured enlisted in such service."

INSURANCE ITEMS.

At the last meeting of the Board of Trustees of the New York Life it was unanimously resolved that Mr. George W. Perkins, third vice-president, should be promoted to replace the late lamented Archibald H. Welch; and Mr. D. P. Kingsley, superintendent of agencies, has been appointed third vice-president, to fill the office thus vacated. Both Mr. Perkins and Mr. Kingsley are well-known and capable life assurance men. Mr. Perkins has been in the service of the New York Life substantially all his life.

At Brantford, the other night, a Fire Committee reported to the Council recommending the purchase of a hose wagon, two horses and harness, total cost, $850. Two or three Aldermen supported the proposal, others demurred to it, thinking that certain manufacturers were to benefit too much by it—a curiously narrow argument, when fire appliances are for the benefit of the whole city. Another alderman protested against improving the fire protection as suggested because apparently no one had asked for it but the chief of the brigade. A slur upon the chief, this, for doing his duty.

President Harbeck, of the Western Union Fire Insurance Association, has announced the following as the large cities committee of that body: Law Brothers, of the Royal; Eugene Cary, German-American; Truman W. Eustis, Manchester; J. W. G. Cofran, Hartford; H. M. Magill, Phoenix; J. M. De Camp, Liverpool and London and Globe; George T. Cram, American Central; William Trembor, German of Freeport; P. D. McGregor, Connecticut; Warren F. Goodwin, Union of London and George W. Hayes, British America and Western. The various elements in the Union are all represented in this committee.

Stores, hotels and dwellings to the number of sixteen were destroyed by the big fire at Sutton, in the Eastern Townships of Quebec, on Friday last. Olmstead & Boright's sawmill and store, with stock of goods and lumber, is gone; also Sweet's large brick store, Edgar Sheppard's grocery, Dr. Cutter's drug store, Dr. Macdonald's residence and H. Boright's store. The postoffice, the C. P. R. station, and the telephone office are gutted. Not improbably the loss will reach $80,000 or $90,000; insurance, as far as heard from, under $20,000. Sutton is in mourning, and her inhabitants are now believers in means of fire protection.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, April 21st, 1898, compared with those of the previous week:

CLEARINGS.	April 21st, 1898.	April 14th, 1898.
Montreal	$12,263,517	$8,721,075
Toronto	8,082,398	6,126,506
Winnipeg	1,626,836	1,257,159
Halifax	1,198,614	1,108,266
Hamilton	691,257	609,857
St. John	574,620	454,895
	$24,437,242	$18,277,758

Aggregate balances this week, $3,643,586; last week, $2,365 656

—Well done, St. John. It appears from a resume of the winter trade done by steamer from St. John harbor to European ports that the exports have been something like $4,750,000 in value, conveyed in cargoes of forty-eight steamers last winter to Liverpool, London, Glasgow, Belfast and Dublin. These steamers have taken on an average cargo to the value of about $100,000. A few cargoes were valued at $150,000 or more, but the majority were under or near the first named figure. Besides this there was the freight carried by the Furness Line, whose steamers have made their usual fortnightly sailings to London, but taking most of their cargo at Halifax. Altogether the increase in volume of winter export trade from St. John has been more than 50 per cent. greater than in 1895-96. Now, they say: "What we need now are increased facilities and larger steamers to go on increasing the trade that has assumed such gratifying proportions in so short a period."

—With a view of enabling its members and others desiring information to hear the views of a recognized publicist and writer on taxation, the Toronto Board of Trade has arranged for an address by Mr. Thomas G. Shearman, of New York, on the "Taxation of Personalty and its Bearing upon Trade and Commerce." This is to be delivered at the Pavilion, Horticultural Gardens, this evening, at 8 o'clock. A cordial invitation to be present is extended to all interested in this important subject.

—We are advised that an expedition under the charge of Mr. David Doig, is now on its way to the Yukon country, to establish a branch of the Bank of British North America in Dawson City. It is expected that the branch will be open for business before the end of May. Mr. James Cran has been appointed manager, and Mr. David Doig sub-manager. The bank is now prepared to issue drafts for the use of travelers to that district.

—The latest point in the North-West at which the Merchants' Bank of Canada has opened an office is Medicine Hat, E. J. Fewings, manager, late of Gananoque. This makes the list of that bank's branches in the prairie country of Manitoba and the Territories as follows: Winnipeg, Brandon, Portage la Prairie, Souris, Neepawa and Medicine Hat.

—At its annual general meeting held on the 15th April, la Chambre de Commerce of Sorel, elected officers as follows: A. E. Pontbriand, President; A. C. Trempe, Vice-President; J A Prouix, Treasurer; W. L. M. Desy, Secretary. Members of Council: Messrs. C. O. Paradis, L. T. Trempe, N. F. Patenaude, L. S. Robitaille, Arthur Langlois, P. C. Lamoine, and E. C. Lalonde.

—The Merchants' Bank of Halifax has opened a branch at Victoria, British Columbia. This, we believe, is the latest addition to the list of this bank's branches in that province.

	STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending Mar. 31, 1898.		CAPITAL.					LIABILITIES.				
			Capital authorized.	Capital subscribed.	Capital paid up.	Amount of Rest or Reserve Fund.	Rateper cent. of last Dividend declar'd	Notes in circulation.	Bal. due to Dom. Gov. after deducting advances.	Bal. due to Provincial Governments.	Deposits by the Public payable on demand.	Deposits by the Public payable after notice or on a fixed day.

J. M. COURTNEY, *Dep'y Min. of Fin.*

THE EUROPEAN RUBBER INDUSTRY.

During the year 1897 there was a steady development of the rubber industry in Europe, although this commodity is yearly growing more and more precious. One important development in this line, perhaps the most important, is the growing use of celluloid whenever it is practicable in place of rubber and gutta percha. The celluloid industry is most intimately connected with the rubber industry, and recent inventions have rendered the use of celluloid more widespread than was possible a few years ago. During the year 1897 the inventions in these lines were about equal with those of the year previous.

THE SUGAR BEET INDUSTRY.

The Secretary of Agriculture has just transmitted to the President of U. S. for information of Congress a report on the condition of the sugar beet industry in that country, and of the operations of the Department during the past season in relation thereto. The principal distribution of sugar beet seed the past season was made through the agency of the agricultural experiment stations, the directors of many stations having been appointed special agents for the Department for carrying this method into effect. Seeds were also sent to about ten thousand farmers in different parts of the country, with instructions for planting, cultivating and sampling for analysis. The best results were reported from the States of New York and Michigan. Other States in which reports were favorable were Wisconsin, Ohio, Indiana, Minnesota, Nevada, South Dakota, Wyoming and Colorado. States giving fair results were Iowa, Nebraska, New Jersey and Pennsylvania. In general, it was found that after passing south of the mean isotherm of 71 degrees F. for the three months of June, July and August, the results were poor. It was found that the belt of territory included between the limits of the isotherms of 71 and 69 degrees may be regarded as the basic belt of the beet sugar industry. The best results are obtained within or north of this belt, other climatic conditions being favorable. Extreme northern limits of sugar beet culture are determined only by the advent of freezing weather. A comparison of analytical data with the thermal area shows a remarkable agreement. In States so situated that their northern portions are in the favorable thermal area, while their southern portions are without, comparison of the analysis of the beets grown in the southern, central and northern portions of these States shows a regular gradation of excellence from south to north.

—The only tea plantation in the United States is located near Summerville, S. C. It is the property of Dr. Charles U. Shepard, who has undertaken to prove that tea, one of the greatest staple articles used by Americans to-day, can be raised by our farmers profitably, says a writer in "The Cosmopolitan." This attempt to add to our now widely diversified list of industries a new one, Dr. Shepard made partly as an experiment and partly as a regular business enterprise. And it is very interesting to note that in a business way it has been quite successful. Last season Dr. Shepard sent to market upward of 1,100 pounds of the finest tea obtainable, and this year's crop, he states, will amount to more than 2,000 pounds.

—An influential deputation waited upon the Government at Ottawa on Wednesday last, to urge the establishment of a marine biological observatory in the Gulf of St. Lawrence for the study of the nature and sources of the food supply of fish, oysters and lobsters, as recommended by the British Association at its Toronto meeting. It will require an appropriation of $15,000, of which $10,000 would be for the outfit, and $5,000 for maintenance for five years, the establishment to be under the management of a board to be composed jointly of representatives of the Marine and Fisheries Department and of the universities. Sir Louis Davies promised consideration.

—The Dominion Cotton Co. have made a proposition to Brantford. They will increase their hands from 200 to 300, advance wages, and put in a completely new plant, if the city buys the wincey mill from them for $30,000 and gives exemption from taxation for ten years.

WAR AND "GOOD TIMES."

To the unthinking, to the reckless and dishonest, and also to the merely speculative, war represents activity, chances for stealing or money-making, and in a word "good times." The wise and thoughtful take a different view. The New York *Herald* financial article says:—"That the fear of war had caused a general suspension of new enterprises became apparent some time ago, and its effects in the countermanding of orders to manufacturers, the diminution of trade and the slowing down of the march of prosperity have now become unmistakable." On all sides there is a "slowing down" process, in presence of the war spectre.

To take another point of view, the cost of war, even supposing we ignore the suffering and death among the combatants, the prospect may well appal. The civil war of the Union from 1861 to 1865 cost up to the end of the last fiscal year 7,000 millions of dollars. When all the pensions and interest are paid the amount will be swollen to 12,000 million dollars. The Troy, N.Y., Press points to three legacies left by that war over a generation ago. The first is a pension list of $150,000,000 a year, a tax of $2 per head on the total population of the United States. The second is the bondholding class, whose money was loaned to carry on the war. Third, the numberless army of tramps, largely the direct outcome of the war.

EDMONTON BOARD OF TRADE.

At the recent annual meeting of the Edmonton board of trade, retiring President Cowie, in his address, dwelt at some length on the purposes, constitution and objects of a board of trade, and asked for active co-operation of all its executive instead of leaving the labor to a few. In concluding his address he said: "Gentlemen, as the commercial custodians of the key to Canada's Northern mineral treasures we have before us most splendid opportunities of enriching ourselves, our district, our Dominion, and our Empire, by unlocking and making known and accessible to miners and capitalists the resources of the eastern slopes of the Rocky Mountains where lie dormant minerals, probably as valuable as any in the Klondyke. It is necessary that each member should be an active worker on any committee to which he may be assigned, and that permanent committees be appointed on each matter of importance. Before concluding, I desire to congratulate the board on the defeat of the Stikine-Teslin lake contract by the senate.

The following officers were elected: President, C. Gallagher; vice-president, W. J. Walker; secretary-treasurer, F. Fraser Tims.

Councillors: Messrs. Bellamy, Kinnaird, Strang, Willmott, Picard, Hourston, Lines, Johnson and Larue.

ARSENIC PRODUCTION.

The arsenious ores of Hastings County, Ontario, are to be made yield arsenic, whether they will yield the refractory gold or not. The Tweed *News* says:

"For the past few months Dr. Henry H. Eames, Ph.D., of Wine Harbor, Nova Scotia, a chemist and geologist of no small reputation, has been in this vicinity making an examination of the mining property owned by Joseph James, of Actinolite. Dr. Eames is the discoverer of a process for treating arsenical ores and, in fact, is the first man in North America who has ever been able to separate from its ores, the red arsenic which is by far the most valuable. Since his arrival, he has procured the apparatus for making his test, and had it erected, so that now there is in operation on the property a complete mill in miniature. The tests have been carried on ever since, not only with the ores from Mr. James' property, but also with ores from other properties in North Hastings. Mr. Eames has been perfectly astonished with the results of the test, and pronounces the ore to be the best for arsenic he ever touched. In some cases the percentage of arsenic taken from the ore is so large that the public would scarcely credit the results.

Mr. James and Dr. Eames have entered into an arrangement by which they intend not only to carry on operations on the property of the former, but also to extend the operation of the patents covering the process owned by the latter gentleman. They will proceed at a moderate rate, erecting only a ten furnace plant. The plant has so far produced arsenious acid, chemically pure, commonly called white arsenic, realgar, which is yellow arsenic, and orpiment, which is red arsenic. The extraction of the arsenic leaves a result from which the gold can be obtained by amalgamation and the gold values in the ore have so far been highly satisfactory.

It is a well known fact that the arsenical mines of England, which practically supply the world's demand for white arsenic, are rapidly becoming exhausted, and, until now, no new mines have been in sight. Moreover, the arsenic produced by Mr. Eames' process is so pure chemically that it is only a matter of time until North Hastings shall have a world wide reputation, being placed on a level with, if not higher than, England and the Kingdom of Saxony in the production of these necessities."

BRITAIN HELD HER OWN.

Mr. S. Y. French, representative of the Sun Life Insurance company, in Japan, spent yesterday in the city with local officials of the company. Mr. French has returned to Toronto after an absence of two years in the Orient. He says that a clash of arms between European powers over eastern questions is not anticipated in the near future; but it is generally felt that there will ultimately be a conflict. Great Britain has maintained her position in China, in spite of Russian intrigues and Chinese corruption, and will, in all probability, gain ground in the future. Britain controls seventy-five per cent. of the trade with China, and will insist that all ports opened will be made free to the nations of the earth. Russian aggression, however, is very pronounced, and serious trouble will come when Russia is prepared for war on the Pacific. Mr. French says the military spirit is very strong in Japan, and the people are most friendly to the British. The Chinese have been robbed so systematically by the mandarins that they have not a spark of patriotism left. Corruption is everywhere rampant in the country, among the officials, but John is invariably honest in business transactions, more so even than the Japs. Mr. French says that Chinamen are not at all bad fellows socially, when they are known and understood.—Winnipeg Free Press.

TRADE WITH TRINIDAD.

Canadian trade with this British island is but trifling in extent. It ought to be much greater. The comparative statement of the values of merchandise imported into Trinidad from the United States and Canada during 1897, compiled from official returns, shows clearly the small part taken by the Dominion in this trade. In the last year, the total of imports from the United States was $1,604,874, and that of the Canadian was $39,033, the proportion of United States to Canadian being more than forty-one to one. This disparity itemized shows in flour $611,390, United States, to nothing Canadian; bread, $43,195, to nothing; pork, beef, etc., $206,563 to $547; butter, twenty to one, and cheese fifteen to one. Surely it is worth our while to make an effort to get a decent share of this $1,600,000 American trade.

A NOVEL LIQUOR CASE.

Charles McKenzie, proprietor of the Victoria Hotel at Megantic, was before Judge Mulvena on Saturday afternoon last, charged with having sold liquor to a person under the influence of liquor, under a clause of the law, which says: "That intoxicating liquors shall not at any time be sold to drunken persons or minors."

It appeared that when on the 15th of March last, Messrs. Gauvin & McKenzie bought this hotel at Megantic, the person to whom the liquor was sold (who in this case was a minister) was staying there, and was in a state of intoxication, and remained in that state until the 23rd of March, when removed from the hotel by friends and Foresters.

These friends paid a bill of about $26 for the minister, out of which amount about $14 was for liquor.

The evidence was very lengthy and conflicting, but the learned magistrate considered that the proof established that liquor had been furnished to the minister in question during the period from the 15th to the 23rd of March, and therefore could come to no other conclusion than to fine the prisoner $75 and costs.

The evidence established that the minister when rescued by his friends, was in a terrible state and was seriously threatened with delirium tremens.—Sherbrooke Record.

—Arrangement has been made in England for the purchase of two new steamers to be added to the Canada and Newfoundland Steamship Company. This will enable the company to give a fortnightly service between Halifax and Liverpool after retiring the "Barcelona." Mr. Brookfield also has secured capital to go on with the erection of cold storage plant and warehouses in Halifax.

—The St. John Telegraph is enthusiastic over the prospects of West Indian trade in connection with the Fielding preferential duties that the English press refuses to become elated over. A reduction of 25 per cent. in the duties on West Indian as compared with other sugar, will undoubtedly cause Canadian refiners and merchants to buy as much as possible of West Indian sugar; but it will not of itself cause a West Indian merchant to buy any more Canadian goods than he does now. The Fielding proposition is for a preference to, not for reciprocity with, the West Indies. Reciprocity would have given Canadian exporters advantages in the West India markets approximating those which are given to West India exporters in Canadian markets.—Montreal Gazette.

—Sir Thomas Lipton, of "Lipton's teas" and Lipton's stores, is a Scotchman, and but 42 years of age. Despite his hard-working life, he is tall, straight, athletic, always well dressed and well groomed, always unassuming. His father was a wage worker. When the son was 15 years old he sailed to America to seek his fortune. For two years he worked in the rice swamps of South Carolina. At the end of two years he had so little money that he stowed himself away on a steamer sailing from Charleston to New York, and was permitted to shovel coal. He went back to Glasgow and started a grocery store on £100 loaned him by his father. He says he has succeeded by advertising. His first advertisement was by two monster hogs, the biggest he could find. They were carefully scrubbed, decorated with ribbons and guided, waddling through the street to the store, with a banner over them "Lipton's Monsters."

—As an instance of the effect of the war scare the Wm. Davies Company, of Toronto, on Saturday sent out $30,000 worth of bacon, 328,000 lbs., by way of St. John. In common with other big exporters this company has already begun to feel the pinch of the curtailment of transportation facilities by reason of the threatened war. The withdrawal of four big American liners from merchant service has already put Canadian exporters to inconvenience. The Davies Company, for instance, which makes a $50,000 consignment nearly every Saturday to Liverpool, by way of Southampton, has experienced difficulty in obtaining accommodation. Other big exporters are in the same straights. One immediate result of the war scare, therefore, is that Canadian transportation companies reap the benefit of trade that hitherto has gone by way of New York.

BRITISH EMPIRE MUTUAL LIFE ASSURANCE COMPANY.

The fifty-first annual meeting of this company was held on Tuesday, 5th April, at Canon Street Hotel, E.C., under the presidency of the Right Hon. Sir John Gorst, M.P., chairman of the company.

Mr. G. H. Ryan general manager and actuary having read the notice convening the meeting, the directors' report and statement of accounts, as follows, were taken as read:—

REPORT.

The directors have much pleasure in submitting to the members their fifty-first annual report on the progress of the company's business.

NEW BUSINESS.

During the year, 1,444 proposals were received for the assurance of $4,843,949 06. The policies issued were 1,185 in number, assuring $3,464,774.67, at carrying premiums of $139,687.83.

Re-assurances were effected with other companies for $605,466.87, at premiums of $21,807.53.

Immediate annuities, 22 in number, were granted for $11,319.87 per annum, the consideration money received being $105,431.40.

REVENUE FROM PREMIUMS AND INTEREST.

The total premium income for the year was $1,354,061.47, after deduction of re-assurance payments. The revenue from interest was $495,086.40, being at the rate of $3.90 per cent. (after deducting Income Tax), calculated upon the average funds of the year, invested and uninvested.

DEATH CLAIMS AND EXPENDITURES

The death claims, though in excess of those of the preceding year, were much below the estimate, and a considerable profit arose from the favorable mortality experienced by the lives assured. 404 deaths occurred by reason ot which 453 policies terminated, assuring $750,985 07, inclusive of reversionary bonus.

Seven annuitants in receipt of $1,204 33 per annum, also died during the year.

The disbursements on account of commission and management expenses include the cost of the periodical valuation and distribution of bonus, but show a reduced percentage on the premium receipts.

As a result of the distribution of profits, the sum ol $135,709.56 was paid to members as cash bonus.

In addition to the usual outgoings, there was a further expenditure on account of the purchase of the business of the Positive and the liquidation of that company.

TOTAL FUNDS AND POLICIES IN FORCE.

At the close of the year the total funds amounted to $13,000,877.98, showing an increase of $591,158.91 as a result of the operations of the year, notwithstanding the large sum paid away in cash bonuses. The policies in force were 25,688 in number, assuring $43,486,674 27, including bonus additions (after deduction of re-assurances); and 161 securing annuities of $69,369 47 per annum.

AUDIT OF ACCOUNTS.

The audit has been continuous and of a very strict character, and was, as usual, conducted by the professional accountants appointed by the members.

Although it was determined last year that, in dealing with the transferred contracts issued by the positive Company in India, the course adopted by that company of treating the rupee as the equivalent of 2s. sterling on both the debit and credit sides of the account should be continued, yet all items of revenue and expenditure in connection with the Indian policies of the British Empire are brought into account at the current rate of exchange; and arrangements are in course of being completed by which new policies will be issued in lieu of existing positive contracts, such policies (though issued in currency) being dealt with in the accounts in sterling, on the basis of the current rate of exchange.

DIRECTORS AND OFFICERS.

The directors retiring by rotation are the Right Hon. Sir John Gorst, M.P., Mr. Pearson Hill, and Sir W. H. Wills, Bart., M.P. The retiring auditor is Mr. Henry Spain, F.C.A. All these gentlemen are eligible, and offer themselves for re-election.

The very satisfactory bonus recently distributed among the members cannot but have increased the popularity of the company, and the directors appeal with confidence to the members and others interested in the welfare of the company to assist them in bringing the great advantages of mutual life assurance under the notice of persons not already, or not adequately, insured. Members may be reminded that the next division of profits will take place early in 1900.

By order of the Board,
G. H. Ryan,
General Manager.

22nd March, 1898.

First Schedule.

REVENUE ACCOUNT OF THE BRITISH EMPIRE MUTUAL LIFE ASSURANCE COMPANY FOR THE YEAR ENDING 31ST DECEMBER, 1897.

Amount of funds at the beginning of the year	$12,409,719 07
Premiums (less re-assurances)	1,354,061 47
Consideration for annuities	105,431 40
Interest (less tax)	495,086 40
Fines and fees	686 71
Profit and loss	356 77
	$14,365,341 82
Claims	$750,989 47
Endowments matured	87,559 53
Surrenders	77,839 25
Annuities	53,226 93
Commission	71,676 81
Expenses of management	167,272 40
Cash bonus	135,709 56
Bonus deduction of premiums	9,775 53
Re transfer of positive business (payments to shareholders, legal and other costs)	10,414 36
Amount of funds at the end of the year (as per second schedule)	13,000,877 98
	$14,365,341 82

Second Schedule.

BALANCE SHEET OF THE BRITISH EMPIRE MUTUAL LIFE ASSURANCE COMPANY ON THE 31ST DECEMBER, 1897.

Liabilities.

Assurance fund	$12,745,671 22	
Reserve fund	255,206 76	
		$13,000,877 98

Agents' balances	79,709 82
Outstanding premiums (payable in January)	218,856 07
Outstanding interest	49,075 10
Accrued interest	133,444 04
Cash:—On deposit	236,821 71
" In hand and on current account	165,792 95
	$13,212,699 01

As regards Indian business taken over from the Positive Company, the rupee is retained on both the debit and credit sides of the account at 2s.

Audited and found correct.

Henry Spain, F.C.A.,
Charles James Fox, F.C.A., } Auditors.

22nd March, 1898.

F. H. Jeune,
W. H. Wills, } Directors.
G. H. Ryan,
General Manager.

The Chairman said—Gentlemen, it is now my duty to move that the report and accounts be received and adopted. I have on this occasion very little to say, and that little is entirely of a satisfactory character. Generally, the society has made good and steady progress in all material particulars. In the case of new business, there has been not so great an addition in the year 1897 as there was in 1896. but the difference is not very serious. In 1896 the new business was £792,000, and in 1897 it was £712,000 in round numbers. The year 1896 was a particularly good one for insurance companies, but 1897 was not quite so good. Our position is not singular. Almost all the great insurance companies had a falling off in new business in the year of which I am speaking, attributable to a variety of causes. Most people say that it was due to the Jubilee, and that people were so taken up with loyalty to Her Majesty, and there were such long holidays in connection with that auspicious event, that they did not pay as much attention to the more prosaic duties of assuring their lives and thinking of the future as they do in ordinary years. But the premium revenue, shows an increase. The peemium revenue, which was £275,000 at the close of the year 1896, was, at the close of 1897, £278,000, a small but satisfactory increase. The rate of interest which was obtained by the company on the invested funds again shows a slight decline. It averaged £3 18s. 10d. per cent. in the former year, and £3 18s. in the latter year, a decline of 10d per cent. That is a decline which members of the society must expect. I do not think there is any probability of the directors being able, with a due regard to the safety of their investments, to keep up even the present rate of interest. The rate of interest is steadily falling all over the world, and if we were to keep it up to the amount at which it stood some years ago, we should be risking your funds, and that would be a matter which, as trustees, we could not possibly entertain. (Hear, hear.) We must recognize and accept the gradual diminution of the rate of interest which we are able to get for our investments. There was again a satisfactory mortality—not quite so satisfactory as in the year 1896, but still very much below the average, and that, of course, is to the interest of the policy-holders. Then, with regard to the expenses, which is the item in your balance sheet upon which the directors are most able to operate, and which ought to be watched by the members of the society with the greatest possible care, there has again been a slight diminution. They were 17.75 in 1896 and 17.64 per cent. in 1897, and that notwithstanding the fact that the greater part of the cost of the valuation fell upon the latter year. If it had not been the valuation year, the expenses would have shown a very considerable diminution, and I hope, if I am here at the meeting next year, that I shall then be able—thanks to the unremitting attention of our actuary, Mr. Ryan—to announce a considerable diminution of the expense at which our business is carried on. (Hear, hear.) The invested funds have increased from £2,549,000 to £2,671,000. The increase of the invested funds is not quite so great as it was in the year 1896, but still they have increased by a very satisfactory amount. Then the balance sheet announces that all our Indian accounts of the British Empire Mutual will henceforth be kept practically in sterling. I think I explained to you last year that when we took over the business of the Positive, we found that they had adopted the plan which other insurance companies adopt, of treating the rupee as the equivalent of 2s. on both sides of their account, but as the credit account is greater than the debit account, of course that caused a slight apparent expansion of our funds. We did not think it right to make a change in the case of the accounts of the company which we took over, and therefore we continued that practice, which is the common practice of companies doing business in India; but since we took over the Positive all our accounts have been kept in sterling, and as we are going to substitute British Empire Mutual policies for Positive policies, the whole of the accounts will come, in process of time, to be kept in sterling, which we think will be a better method of accountancy. The bonus distribution took place in

1897, according to the plan I announced at the last annual meeting, and I am glad to say that the distribution has given very general satisfaction, and future distributions of bonus will be made in the same manner. I do not think I can usefully take up your time by saying anything more. The position of the company is one of prosperity and gradual but substantial advance, and I think you have every reason to be satisfied with the results of the business carried out during the year under consideration. I beg to move that the report and accounts be received and adopted. (Cheers.)

Mr. George Phillips—It is true, as the chairman has pointed out to you, that we did somewhat less business in amount last year than in the previous year, but if you look at the number of proposals and policies issued you will find they were greatly in excess of what they were in the previous year. I have been looking out some figures showing the progress of our company, and I think the figures which I will give you of twenty years ago will prove that the company has made very great strides. Twenty years ago the amount of our new business was £281,125. The policies issued were 951, as against 1,100 for last year, but at the previous date the business was exceedingly small. The total premium then was £130,000 odd, and now it is £379,961. The total funds at that time were £665,000, and at the present time they are getting on for nearly £3,000,000. (Cheers.) The number of policies then in force was 13,000, as against 25,688 now. The 13,000 policies insured an amount of £3,314,000, and at the present time the amount assured is nearly £9,000,000. (Cheers.) I think that will corroborate what the chairman has told you—that the company is not only prosperous, but also perfectly safe. I beg to second the motion.

The report and account were then unanimously adopted.

On the motion of Mr. Evans, seconded by Mr. Leach, the directors retiring by rotation—the Right Hon. Sir John Gorst, M.P., Mr, Pearson Hill, and Sir W. H. Wills, Bart., M.P.—were unanimously re elected.

Mr. Henry Spain, the retiring auditor, was re-elected.

Mr. George Robertson moved a vote of thanks to the directors for their attention to the business of the company during the past year. The members who were enjoying the fruits of their labors, knew them by their works, and therefore he had very much pleasure in moving this vote of thanks.

Mr. T. Moyes seconded the motion, and it was cordially agreed to.

The Chairman—Gentlemen, on behalf of my brother directors and myself I beg to thank you for this expression of your confidence in us. I can assure you that so long as the company remains in its present prosperous and advancing position the management of its affairs is not very difficult. It is usual in returning thanks for the vote you have given us for me also to ask you to give a vote of thanks to Mr. Ryan, our general manager and actuary—(cheers)—and to the other officers of the company, because our efforts would be vain indeed if we were not seconded by the great assiduity and great ability with which our affairs are conducted by the officers who have charge of them. (Hear, hear.) It is only your board of directors who can tell how much you owe to those gentlemen, and it is our duty on a public occasion of this kind to tell you that, if the company has prospered, its prosperity is largely due to the excellent manner in which its affairs are administered by the officers; and I therefore ask you to give a hearty vote of thanks to Mr. Ryan and the other officers for their services during the past year. (Cheers)

Mr. G. Phillips—I shall be happy to second that. I do not believe there is any company which possesses a better set of officers than we have here.

The resolution was carried unanimously.

Mr. G. H. Ryan—Mr. Chairman, it is a great pleasure to me to be allowed to say a few words in acknowledgment of the very kind vote of thanks which has just been passed with so much cordiality. The staff over which I have the honor to preside, hold very strongly, indeed, the opinion that our company is pursuing a prosperous career. We do not aim at any sudden or ambitious expansion of our business. I myself hold that such a policy is rarely conducive to the interests of policyholders, and though that course may be beneficial in other companies, I very much doubt whether in life assurance that is the case. (Hear, hear,) It is a great pleasure and an encouragement to us on occasions of this sort to feel that our efforts are appreciated by the directors under whom we act and by the members for whom we work, and in the name of the staff I return you our cordial thanks for your acknowledgment of our services to-day.

WESTERN BANK OF CANADA,

The sixteenth annual meeting of the shareholders of the Western Bank of Canada, was held at the head office of the bank, Oshawa, Ont., on Wednesday, the 13th day of April, 1898.

The following shareholders were present:—Messrs. John Cowan, W. F. Allen. T. H. McMillan, Thomas Patterson, C. W. Scott, John McLaughlin, W. F. Cowan, Thomas Conant. Dr. McIntosh, and Robert Dillon.

The president, John Cowan, Esq., occupied the chair, and Mr. T. H. McMillan acted as secretary to the meeting. The following report was submitted:

REPORT.

The directors have pleasure in submitting the sixteenth annual report for the year ending 28th February, 1898,

The business of the bank during the year has been of an average nature. Deposits have increased $100,000, compelling an increased investment in debentures of a corresponding sum. A slight improvement is shown in the net earnings, which have been about equal to 10½ per cent. on capital.

Profits have been adversely affected by the large amount of cash assets carried for which legitimate investments could not be found on desirable mercantile securities. Your directors feel warranted in hoping that the increasing volume of business exhibited in every branch of trade will provide profitable channels for absorbing surplus funds before the expiration of another year.

The net earnings have amounted to $39,746,42, leaving (after payment of the usual seven per cent. dividends, amounting to $26,676 94,) a balance of $13,591 41. Out of this balance the sum of $6,000 has been added to the Rest account, which now stands at $118,000, and the difference ($7,591 41) has been carried forward to credit of Profit and Loss account.

The employees of the bank have discharged the several duties pertaining to their positions to the satisfaction of the directors.

JOHN COWAN, President.

Oshawa, 13th April, 1898.

STATEMENT OF PROFITS FOR THE YEAR ENDING 28TH OF FEBRUARY, 1898.

Balance at credit of Profit and Loss account on the 28th of February, 1897	$ 524 93

T. H. MCMILLAN, Cashier.

It was moved by the President, and seconded by the vice-president, that the report as read be adopted, printed and circulated among the shareholders.—Carried.

Mr. McLaughlin, seconded [by Mr. Conant, moved, That the thanks of the shareholders are due and are hereby tendered to the president, vice-president and directors of the bank for the manner in which they have conducted the affairs of the bank during the past year.—Carried.

Mr. Patterson, seconded by Mr. McLaughlin, moved, That the thanks of the shareholders be given to the cashier and other officers of the bank for their attention to the interest of the bank.—Carried.

Mr. Conant, seconded by Mr. W. F. Cowan, moved, That this meeting do now proceed to elect, by ballot, seven directors to fill the place of those retiring, and that Messrs. C. W. Scott and John McLaughlin be scrutineers for said election, and that the poll remain open for one hour to receive the votes of the shareholders, but that should five minutes elapse at any time without a vote having been taken the poll shall be declared closed, and that the scrutineers be paid $4 each for their services.—Carried.

The scrutineers reported the following seven gentlemen as having received the unanimous vote of the shareholders, viz.:—John Cowan, R. S. Hamlin. W. F. Cowan, Dr. McIntosh, W. F. Allen, T. Patterson, and J. A. Gibson, who were duly elected directors for the ensuing year. A vote of thanks was tendered to the Chairman, for his able conduct in the chair, and the meeting then adjourned.

At a subsequent meeting of the new board, John Cowan, Esq., was unanimously elected president, and R. S. Hamlin, Esq., vice-president.

Commercial.

TORONTO MARKETS

TORONTO, April .21st, 1898.

BOOTS AND SHOES.—The assorting trade is not showing as good results as might have been expected. The strike in one of the factories here is of course of great interest to the trade. The old evil of the industry, long credit, is still as formidable as ever. Orders are being booked 1st November, and if the factories are at all slack this summer it is more than probable that shipments will go forward in midsummer on paper dated November 1st, with the certainty of in many cases still longer credit asked for and granted.

DAIRY PRODUCTS.—Receipts of butter this week have been very large and prices have eased off. For creamery tubs 18 to 18½c. per lb. is quoted, while prints bring 19 to 19½c. per lb. There is an abundant supply of creamery in the market and we hear of transactions in which even these prices have been shaded. Dairy is about 15 to 16c. for large rolls and 16 to 17c. per lb. for prints. There are no tubs offering. There is considerable improvement in the export enquiry for cheese. In the local market 8c. is quoted in the jobbing trade. It is thought that when the new season opens the market should be in a fairly good condition. Most of the factories will begin the season's work May 1st, and we may expect new cheese in the market by the middle of the month. Little fodder cheese has been made this spring. As a result of unfavorable weather the receipts of eggs have fallen away. Farmers, too, are busy with their spring work and do not visit the market as often as they have been doing for some time past. Dealers quote eggs 9½c. per doz.

FLOUR.—In sympathy with wheat flour, has made an advance in price, but has not shared fully in its strength. There is an active demand for both flour and meal. Millers see in the Cuban difficulties a chance for an extension of trade in the West Indies.

GRAIN.—The "war news" are responsible for a marked advance in the wheat market, values having risen 5c. to 6c. per bushel during the week, and remain very firm at this figure. There is little wheat offering from country points, and supplies must continue of a limited character until the farmers have completed their spring work. Spring wheat seeding is progressing very favorably, and no doubt the high prices paid for this cereal at present will have the effect of increasing the acreage, particularly in the Northwest. Barley is unchanged. For oats 1c. to 2c. per bush. is quoted in advance of former prices. Rye shows no change. Peas are up to 1c. to 2c. per bush., and remain firm.

Green Fruits.—The consumption has not been quite as large as it should have been the past few days, having been limited by the cold rains. Supplies, however, were not large and values are generally firm. Navel oranges are quoted at a slight advance over last week, Prices are about as follows:—Washington Navels, choice, 96s, 112s, 126s, $3 25 per box; Washington Navels, choice, 150s, 176s, 200s, 216s, $3.50 per box; Washington Navels, fancy, 96s, 113s, 126s, $3.50 per box; Washington Navels, fancy, 150s, 176s, 200s, $3.75 per box; California Seedlings, 150s, 176s, 200s, 216s, $2.50 per box; California Seedlings, 126s, 250s, $2.25 per box. Lemons are about unchanged with interest centred largely in the Montreal auctions. We quote:—New Messina, fancy, 300s, 360s, $2 75 to $3.00; New Messina, choice, 300s, 360s, $2.50 to $2.75. For bananas there is good demand at $1.50 to $2.00 per bunch; each week the trade is assuming larger proportions. The pines in the market are not first quality stock and in consequence move rather slowly. Strawberries find freer movement. Mississippi "quarts" were in the market this week for the first time this year and at 20c. met with good demand.

Hides and Skins—An unchanged market, so far as hides are concerned, must be reported. Merchants are still paying 7½c. for No. 1 green cow hides and quote cured at 8c. per lb. An attempt was made during the week to purchase calfskins at 9c. but failed and 10c. is now the general quotation. Tallow is quiet and unchanged. Sheepskins are quoted $1 and upwards, while pelts bring 15c. We have the following from Chicago, April 19:—Market for hide was fairly firm and demand from tanners was broadening. Sales were reported of 5,000 Colorado at 8¼c. and rumored 30,000 native cows, principally light weights, at about 10c; also recently at Kansas City about 20,000 hides principally Texas at 9¾c, closing firm at 10c. Native steers were quoted at 10½ to 10¾c.; Texas at 10c.; butt brands at 9¼ to 9½c.; branded cows at 9¼c.; Colorados at 8¼ to 8½c.; heavy native cows at 9¾c. and light do. at 10c.

Provisions.—The market for general supplies remains steady and values firm. The situation is elsewhere reviewed at length. In the United States prices are firmer in sympathy with grain and the warlike appearance of the Cuban affair.

Wool.—Frequent requests are coming forward from middle-men as to advice in regard to the probable value of wool this coming season. As yet it is too early to venture a reply. The United States markets are an extremely uncertain factor. The clip will not be to hand for a month or six weeks yet and within that time many events might happen to alter the situation. The list for the series of wool sales, which will open in London on May 3rd, closed the 18th inst. It comprises New South Wales, 67,800 bales; Queensland, 19,484; Victoria, 74,310; South Australia, 8,124; West Australia, 4,931; Tasmania, 6,607; New Zealand, 68,814; and Cape of Good Hope and Natal, 62,512. Of this quantity 72,000 bales of Australasia and 48,000 bales of Cape of Good Hope and Natal were forwarded direct. There are available 208,582 bales, including 16,000 bales held over from the last series.

MONTREAL MARKETS.

Montreal, 20th April, 1898

Ashes.—With the opening of navigation the market shows some little improvement. There is some moderate demand to fill orders for shipment by first outgoing steamships, and as stocks on spot are very light, there being only about 50 barrels in store, better prices are being offered. For good tares of first quality pots probably close on to $4 could be realized, with average down to $3.80; seconds have not advanced proportionally, and are quoted at $3.25 to 3.30. Pearls about $4.75 per cental.

Cements and Firebricks.—It is now known that the Government contracts for some 120,000 brls. of cement, for delivery during the season of navigation, have all been awarded to Montreal. The quality called for is of high grade, the barrels of large size, and the price is understood to range about $2.45 to 2.50. At the moment there is a fair general demand, and quotations for regular brands and sizes are $2.25 to 2.35 for British, and $1.95 to 2.10 for Belgian. Bricks, steady, at $17 to 22 per M.

Dairy Products.—There has been a very marked decline in butter, owing to liberal offerings of new make, and at the moment creamery made and good dairy are about on a par, at the comparatively low figure of 16½ to 17c. for best grades. On the other hand, the situation as regards cheese has improved; the English market shows some betterment, and the one or two dealers having any stock here are now holding at 7¾ to 8¼c. There have been large recent sales of eggs for pickling, and prices are fairly steady at 9 to 9½c. per dozen.

Dry Goods.—Retailers in the city seem satisfied with the sales of the past fortnight or so, and wholesale dealers report a continuation of sorting orders to a very fair aggregate, both by letter and from travellers. Remittances are satisfactory on the whole, and there is an entire absence of failures of late.

Furs.—Some fair lots of winter-caught continue to be reported from interior points, also some spring lots, but of this latter sort supplies seem to be somewhat short. A little tendency to weakness in the market is evident. Indications of war always have this effect on the fur trade, and dealers are in consequence disposed to act somewhat cautiously. We quote: Mink, large dark, $1.50; small, do., $1 to $1.25; marten, $1.75 to $2.25; fisher, $4.50 to $7; lynx, $1 to $2; otter, $1 to $12 for dark; pale, $5 to $7; red fox, large, $1.30 to $1.50; small, $1; cross fox, $3 to $6; bear, cubs, $3 to $7; medium, $7 to $10; large, $12 to $15; skunk, 15 to 70c, as to color and stripe; coon, 20 to 75c; rats, fall, 7c. to 10c.; kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

MONTREAL STOCKS IN STORE.

	April 11. Bushels.	April 18. Bushels.
Wheat	102,296	169,956
Corn	56,830	55,431
Oats	1,049,165	1,098,316
Rye	44,899	49,282
Peas	149,811	160,624
Barley	39,748	41,169
Total grain	1,442,849	1,574,778
Oatmeal	255	238
Flour	22,790	21,965
Buckwheat	74,706	80,154

Groceries.—The sugar market is dull, the present demand being light, and one of the local refineries, the Canada, is actually shut down at the moment. The price of granulated is easier, and the advance of one-sixteenth, noted last week, has since been withdrawn, making the figure for standard granulated, at factory, again 4⅜c., Austrian granulated 4⅛c per lb. This is believed mainly due to competition from foreign refined, as the late slight advance is still held on yellows, in which the lowest figure is 3 9-16c., with a range up to 4c. A lot of some 7,000 bags of Austrian and German refined, bought some time ago by a local operator, and held on speculation, has been a disturbing factor; some of this lot has recently been sold at 4 1-16c. Molasses seems hard to get; advices from the island quote 17c. the gallon, wine measure, laid down here in bond, but there seems to be a difficulty in getting offers from this side accepted, and apart from 2,000 puncheons bought by the Canada Sugar Refining Co., comparatively little stock has yet been secured for this market. There is continued demand for teas from the United States; one broker reports having made purchases on New York account of between 700 and 800 pckgs. of Japans, ranging in price from 14½ to 17c., and we hear of about 1,000 small pckgs., equal to about 500 half chests, going to Chicago. In other lines there is nothing especially new.

Hides.—Local dealers have at last agreed to put down prices in accordance with general easing off in outside markets, and are now buying beef hides on the basis of 8c. per lb. for No. 1, and quoting 9c. to tanners, from whom the demand is moderate at the moment. Receipts since last writing have been very light. Calf skins are quoted at 10 to 11c. per lb. for No. 1; lambskins 10c., and sheepskins $1.00 to 1.05 each.

Hops.—Trading in this line has been light, but values are steady at 12 to 16c. for Canadian as to quality; yearlings 8 to 9c. Choice Bohemian would cost 28 to 30c., and Bavarian 25 to 28c.

Leather.—Moderate lots of dongolas and colored leathers are selling, but shoe manufacturers, though busy still, are light buyers as a rule at the moment. The American market is reported rather unsettled owing to the likelihood of war, and the easing off in the local hide market probably has some effect on the demand. There is, however, no disposition on the part of dealers to concede on prices. We quote: Spanish sole B.A., No. 1, 24 to 25c. do. No. 2, 22½ to 23½c.; No. 1 ordinary Spanish, 23 to 24c.; No. 2, 20 to 21c.; No. 1 slaughter, 27 to 28c.; No. 2, do., 24 to 25c; common, 20 to 21c; waxed upper, light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 20 to 21c.; juniors, 18 to 20c.; calf-splits, 30 to 35c.; calfskins (35 to 40 lbs.), 60 to 65c.; imitation French calfskins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 24c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; buffed cow, 12 to 14c.; extra heavy buff, 15c.; pebble cow, 13 to 13½c.; polished buff, 11 to 13c.; glove-grain, 12 to 13c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

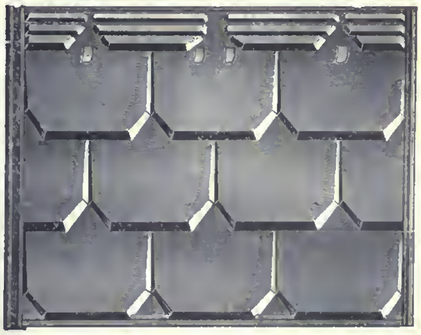
Metals and Hardware.—No important movement can be noted in pig iron, but in the general run of heavy metals, plates, etc., there is a fair demand in moderate lots. A few small lots of Hamilton No. 1

When you get to the Roof

Make sure of durable, economical protection by using our famous

Eastlake STEEL SHINGLES

They can't rust, can't burn and can't leak—but they can be laid quicker than any others, and last indefinitely



Eastlake Shingle.

iron have sold at $16, but round to fair lots can be bought at $15.00 to 15.50. Niagara No. 2 has been offered at $15 on wharf here, on opening of navigation. Scotch warrants are cabled at 46s. which is about the level of some weeks past. Bars, plates, etc., are without any recent change. Ingot tin and copper are rather firmer. We quote: Summerlee pig iron, $18 to $18.50; Carron, No. 1, $18; No. 3, $17.25; Ayrsome, No. 1, $17; No. 3, $16.50; Shotts, $17.25 to $17.50; Carnbroe, $16, ex-store; Ferrona, No. 1, $15 to $16; Hamilton No 1, $15 to $15.50; No. 2, ditto, $14 to $14.50; machinery scrap, $14 to $15; common ditto, $12 to $13; bar iron, Canadian, $1.40 to $1.50; British, $2 to $2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas, $2.40; Terne roofing plate, 20x28, $5.75 to $6; Black sheet iron, No. 28, $2.25; No. 26, $2.15; No. 24, $2.05; No. 17, $2; No. 16 and heavier, $2.15; tin plates—Bradley charcoal, $5.60 to $5.70; charcoal, I.C., Alloway, $3.15 to $3.25; do., I.X., $3.90 to $4; P.D. Crown, I.C., $3.60 to $3.75; do., I.X. $4.50; Coke I.C., $2.90 to $2.95; do., standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2.70; galvanized sheets, No. 28, ordinary brands, $4; No. 26, $3.75; No. 24, $3.50 in case lots; Morewood, $5 to $5.10; tinned sheets, coke, No. 24, 5½c.; No. 26, etc., the usual extra for large sizes. Canadian bands, per 100 lbs., $1.65 to $1.75: English hoops $2 to $2.15. Steel boiler plate, ¼-inch and upwards, $1.85 to $1.90 for Dalzell, and equal; do., three-sixteenths inch, $2.50; tank iron, ¼-inch, $1.50; three-sixteenths do., $2; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to $2.50; Russian sheet iron, 9c.; lead, per 100 lbs., pig, $3.50 to $3.55; sheet, $4 to $4.25; shot, $6 to $6.50; best cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel, $2.25; ingot tin, 16½c. for L. & F.; Straits, 16 to 16¼c.; bar tin 17c.; ingot copper, 12¾ to 13c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.75; Veille Montagne spelter, $4.75 to $5; American spelter, $4.50; antimony, 9 to 9½c.

OILS, PAINTS AND GLASS.—The demand continues good, spring commands by traveler being now supplemented by letter orders in a good many cases. Enquiry is setting in for Paris green, but it is not expected there will be a very large trade done in this article, as stocks in the country are pretty full, owing to a light visitation of the potato bug last year. Prices for linseed oil are very steady as stocks are light, and demand good. New supplies of turpentine are coming in freely in the South, and a further break in prices has taken place; quotations, however, been just reduced two cents. We here quote: Turpentine, one to four barrels, 48c.; five to nine barrels, 47c.; net thirty days. Linseed oil, raw, one to four barrels, 47c.; five to nine barrels, 46c.; boiled, one to four barrels, 50c.; five to nine barrels, 49c., net 30 days; olive oil, machinery, 90c.; Nfld. cod, 35 to 37c. per gal.; Gaspe oil, 30 to 32c. per gal.; steam refined seal, 45 to 47½c. per gallon in small lots. Castor oil, 9 to 9½c. as to quantity. Leads (chemically pure and first-class brands only), $5.37½; No. 1, $5; No. 2, $4.67½; No. 3, $4.25; No. 4. $3.87½; dry white lead, 4¾ to 5c.; genuine red do., 4¼c.; No. 1 red lead, 4c.; Putty in bulk, bbls., $1.65; kegs, $1.80; bladder putty, in bbls., $1.80; smaller quantities, $1.95; 25 lb. tins, $2.05, 12½ lbs., tins, $2.30. London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to $1.75; yellow ochre $1.25 to $1.50; spruce ochre, $1.75 to $2. Paris green, 50 and 100 lbs. drums 15c, 25 lb drums, 15½c.; 1 lb. cartoons, 16c.; pound tins, 16½c.: window glass, $1.40 per 50 feet for first break; $1.50 for second break; third break, $3.10.

WOOL.—Business continues somewhat on the slow side. There are a fair number of enquiries, and a certain number of small lots selling, but there is not the movement dealers would like to see. Values are firmly held, and importers are not disposed to make any concessions. Business reported is mainly in Capes at 15½c., with some sales of low grade B.A.'s at 26c., and fine combings at 36c. There is very little Cape wool available as low as 14½c. A cargo of Cape for a Montreal house was due to leave about three weeks ago.

HEAD OFFICE:
Queen City Chambers, Church St., Toronto.

DIRECTORS:
JAS. GOLDIE, Pres. J. L. SPINK, Vice-Pres.
Thos. Walmsley, Treas. Hugh Scott, Mgr. and Sec.
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co.,
32 Church Street, Toronto, Ont.

Extended Insurance

IS granted by the Unconditional Accumulative Policy of the Confederation Life Ass'n. Under this provision the full amount of the policy is, in the event of the non-payment of the third or any subsequent premium, extended as a term insurance, and the policyholder is held fully covered for the full face value of the policy for a term of years definitely stated therein.

Paid-up and Cash Values are also guaranteed.

Rates and full information sent on application to the Head Office, Toronto, or to any of the Association's Agents.

A NEW OCEAN STEAMSHIP LINE.

The London "Shareholder" of 5th instant makes the following reference to a line of Manchester steamers:

"The directors of the Manchester Ship Canal Company have succeeded in their efforts to raise capital for a new line of ocean steamships to ply between Manchester and American ports. They interested Sir Christopher Furness, the shipowner. in the enterprise, and he undertook to find £150,000 of capital if £200,000 could be locally raised privately. This amount has now been guaranteed in Manchester and the district, two-thirds of it in sums of £500 and upwards. and the rest in smaller amounts. The company will be forthwith launched, and subscriptions for £250,000 in debentures asked from the general public, but it is not intended to raise any additional share capital, the £600,000 which the above will give being deemed sufficient. It is intended to build five steamers of from 8,000 to 10,000 tons (dead cargo and 800 head of cattle) capacity, and able to steam twelve knots an hour."

It is only a week or two since a deputation of gentlemen from Manchester visited Montreal to see what inducements that city would offer if the projected line should run to the St. Lawrence. They did not get all they seemed to want, but they got some encouragement.

WHAT IS PULP WOOD?

A somewhat novel and interesting case is reported in our "Legal Intelligence" this week. Mr. De Hart, of Newcastle-on-Tyne, the owner of the "Reidar" (s), sued Forslind & Co., of West Hartlepool, tor £81 5s. additional freight claimed on a cargo of timber shipped at Narva which he alleged was not in accordance with the description in the charter-party. The cargo was described as "pulp wood." This commodity, as is well known in the trade, consists of round white fir logs of no particular length, but at the commencement of the trade they were shipped in lengths running from 4 to 6 feet Latterly, however, much longer logs have been shipped, running up to 24 feet and over. Of course these logs have to be cross-cut at the pulp mills to fit the size of the "devil" or macerator. These long logs being similar to ordinary mining timber, the claim of the shipowner was that this wood was wrongly described, and the freight should be paid as for mining timber on account of difficulty of stowage and the ship not being able to carry as large a quantity as she could if the logs had been shorter. The defendants won their case very easily, their witnesses not being called, the testimony on behalf of the plaintiff being so contradictory as to the customary length of pulp wood that the judge decided without any hesitation in favor of the defendant.

WARNING NOTES.

Joaquin Miller, who has recently written in a much more sober-minded style about the Yukon, sounds several useful notes of warning in a recent letter to the San Francisco "Examiner." Thus he states, that without the slightest evidence of the existence of gold lodes—the ground being covered with frozen muck or glacier for a depth of from five to fifty feet—many hundreds of quartz claims have lately been located and registered in the Dawson district, with a view to sale either to foolish tenderfeet or else to wily promoters, who will, by means of unproved and probably worthless claims thus acquired, float bogus companies in the United States and England. None but a fool will buy a quartz claim in the Yukon, unless first proved on the best and most trustworthy authority to be not only gold productive, but rich almost beyond precedent. In such a land as the Yukon, a gold quartz claim must be of at least five times the average value of a like profitably workable claim elsewhere, having regard to the extreme cost of labor and machinery, and the great difficulty of mine development.

Another point made by Mr. Miller, and well worth noting by would-be Yukoners, has been made before, but cannot be too often repeated. It is that Dawson, being built on a pestilential mudswamp, is, to quote Mr. Miller, "going to be the sickliest place in spring you ever heard of." The sooner, therefore, those now in Dawson, when and where able, spread themselves further around, the better. The fewer among others who enter there to live, the better also in every way, as the available ground near Dawson has practically all been taken up long since. There will assuredly be terrible trouble, distress and sickness in the Yukon shortly, unless to Dawson City there be added several other fairly large mine camps, that will take away many of the superfluous temporary residents of the town on the dismal swamp. It is already clear to men who know the Yukon well, because they have long been compelled to live in that land under very hard conditions, that there is little chance of a Canadian railroad now reaching the headwaters of the Yukon sufficiently early in autumn to enable the getting in of next winter's supplies. Hence Captain Constantine, the chief of the mounted police at Dawson, has already ordered from the Alaska Commercial Company, for inshipment via St. Michaels, the next winter's supplies for his company of 100 men. Captain Constantine sees serious difficulties in the way of next winter's provisioning of a big host of Yukoners, and it is already clear that if 100,000 or more people enter the country shortly—half of whom will probably only carry with them supplies for a few months—there must of necessity be again brought about a big enforced winter exodus of those whose rations are "running out."—B.C. Mining Critic.

BEWARE OF PRESERVATIVES.

A circular to the following effect has been issued by the Ontario Department of Agriculture.

In building up the dairy industry of Ontario, two things have been taught and urged, namely, purity and high quality of products and economy of production. Whatever setbacks this great industry may have met in the past few years, can be traced to the neglect of one or the other of these important points. The cheese industry of Ontario is now fairly well established, and the annual production of a large amount of well made, whole-milk cheese of uniform quality has given Canada a controlling influence in the British cheese market. Our creamery industry is now rapidly developing, and it is of vital importance that the strictest attention be paid to the turning out in an economical manner of butter of uniformly high quality, pure and unadulterated. This industry will, if properly conducted, assume very large proportions, since the average consumption of butter is much greater than that of cheese, and the British imports of butter greatly exceed those of cheese.

In the British market our butter meets in competition similar goods from Ireland, Denmark, France, the United States, Australia and Argentine. Denmark has attained a chief place by studying the requirements of the market, and now produces nearly all of her creamery export butter from pasteurized milk or cream with the use of special ferments. In some of the countries exporting to Great Britain—Australia in particular—it has become a practice to use some kind of "preservative" in butter-making. Sometimes this is added to butter as a salt; sometimes it is added to the milk. These preservatives are sold under various names, such names as preservalene, preservatine, preservitas, being favorites. They are nearly all mixtures of boracic acid. The increasing use of these preservatives has alarmed the British consumer, and most radical measures are now proposed to exclude all butter in which traces of these preservatives are found. The British public has become alarmed, the press is actively discussing the matter, and public officials are now on the lookout for butter so adulterated. It must be carefully noted that all butter made from milk or cream to which anything but common salt has been added is adulterated.

The butter producers of Ontario must make no mistake. The use of any of these preservatives is dangerous to the dairy interests of this country. Everything possible should be done to discourage the use of such substances, and the press should as far as possible prevent the advertising of them in this country. Ontario has a reputation for producing pure dairy goods of high quality. That reputation must be maintained, and every person interested in the dairy business of Ontario should assist in preventing these "preservatives" from getting foothold in this Province. "An ounce of prevention is better than a pound of cure." We have a reputation now for making pure butter and cheese. Help to maintain that reputation. Do not advocate preservatives. Do not advertise preservatives. Do not use preservatives.

JOHN DRYDEN,
Minister of Agriculture for Ontario.
Toronto, April 15th, 1898.

THE CANADA COMPANY.

The annual meeting of proprietors was held in London, Eng., on 30th March. In the absence of Sir Robert Gillespie, through illness, the deputy governor, Mr. James P. Currie, presided. The report for 1897 was read. It state that the land sold or leased with right of purchase was 10,065 acres, compared with 8.367 acres in 1896. Of this total the land lease with right of purchase amounts to 9,397 acres, against 8,141 in 1896. The total acreage under leases of this description is now 64,711 at a pre-emptive value of £169,610, and the receipts both in the revenue and in the land realization accounts show a fair improvement. The largest contribution to this increase is in the item of purchase money of leased land converted to freehold, the amount received being £6,943, against £4,039 in 1896 and £4,859 in 1895. The amount of rent collected is likewise better than in 1896 by £437. The cost of management is again less than in the preceding year. The land disposed of in 1897 shows an increase over 1896 of nearly 1,700 acres, and the prices obtained are in excess of the valuation of 1894 with only two exceptions, by 9½ per cent. of these two exceptions, one was at Sherbrooke, in the county of Lanark, and another at Wyndham, in the county of Norfolk. The report and accounts were adopted.

BOUNTY FOR TREE PLANTING.

Minnesota has a law to encourage tree planting. A bounty of $2 50 an acre is offered, and at least one acre must be planted, while no one person can collect for more than ten acres in a year, or for more than six years. Any tree but the black locust may be planted. Last year bounties were paid to twenty-five countries for planting 9,524 acres. The law has been in operation sixteen years. In that time more than 100,000 acres have been planted in trees.

FRENCH POLITICS.

Another Parisian scandal is as follows: M. Breton, radical member for Brest, was informed by the correspondent of a little Norman newspaper, that the Government would put in a candidate against him at the next election. The correspondent advised M. Breton to take £4,000 for the good-will of the constituency and retire in favor of Count Greffulke, whose emissary the agent was. In the Temps, Count Greffulke denied that he had tried to corrupt the deputy. M. Breton, however, had witnesses, in four friends, who went with him to the Cafe de la Paix and secretly listened while M. Breton was offered not only £4,000, but also the paid inspectorship of a big farm syndicate.

—"Great heavens, man! Resigned the position I got you as collector for Jones!" "You bet! Why I owed money to most of he men he sent me to dun!" — Harper's Weekly.

—It is said that the days of the old-fashioned wooden match are numbered. Matches are to be made of paper. By a new process the paper is cut into strips. These are saturated with a flame-producing material. They are then rolled into tubes and cut the length of ordinary matches, and dipped in phosphorus to form the head. These matches are lighter, and thought to be more reliable than the other sort.

—Scarcity of vessels in the Pacific coast lumber trade, due to Alaskan gold excitement, has prompted lumber shippers to undertake the building of big rafts, such as have been tried on the Atlantic. A raft to contain 4,000.000 feet of lumber has been begun at Portland, Oregon. When completed it will be floated to San Francisco. It will he cigar-shaped, 400 feet long, 53 feet wide, and 24 feet high from the water, drawing about 17 feet of water. The building of this raft is an experiment, and its performance in the open sea will be watched with interest. If successfully floated to San Francisco, others of the kind will follow.

Money in Insurance WHEN SECURED
ON THE COMPOUND INVESTMENT PLAN OF THE
NORTH AMERICAN LIFE ASSURANCE COMPANY

The special provisions of this advantageous plan of insurance are:

(1) The return as a mortuary dividend of all premiums paid beyond the 10th year, together with the face of the policy should death occur within the investment period selected.

(2) The loan to the insured if desired of all premiums beyond the 10th year, and should death occur after that and within the investment period selected, the full face value of the policy is payable, premium loans, if any, being cancelled.

The North American has a larger ratio of assets to liabilities and net surplus to liabilities than any other Canadian Company.

Pamphlets explanatory of the Compound Investment and other attractive plans of insurance furnished on application to

WM. McCABE,
Managing Director
Head Office. TORONTO.

British Empire
Mutual Life
Office

The Fifty first Annual Report has just been issued. During 1897 the premium income reached $1,354,061, and the interest income $495,086.

The total business in force was $43,486,000 under 25,688 policies.

The cash bonus distributed last year amounted to $135,709; and besides this handsome sum there was a bonus reduction of premiums.

The next division of profits in this strong mutual company will take place in 1900.

DECISIONS IN COMMERCIAL LAW.

CLARRY v. G. T. R. Co.—The plaintiff, a commercial traveller, bought a ticket from the defendant company "good for one first-class continuous passage from Harrisburg to Stratford via Galt and Berlin." Arriving at Galt it was necessary to leave the train and go to another station in the same town in order to get the train for Berlin. An omnibus was at this first station and the driver offered its services to carry him to the second station on payment of a 10-cent fare. This the plaintiff refused to pay, and alleged that he was unable to continue on his journey to Berlin and Stratford, and was by reason of the weather and the blocking of the lines between Galt and Stratford unable to reach his destination for some five days. He claimed on account of the indignity suffered in the presence of the other passengers, the injury sustained from walking through the snow, and the loss of profits and remuneration through delay, the sum of $200. Held, that the plaintiff was entitled to be conveyed from station to station free of expense; but it would have been reasonable for him to have paid the ten cents and made his connection, and the damages should be restricted to that sum.

VIDEAU ET AL. v. WESTOVER.—A life insurance certificate on its face made the sum of $500 payable to the daughter-in-law of the assured, but the latter subsequently, by his will, professed to make a change in the beneficiaries leaving her out altogether. The certificate was issued, the will made, and the death of the assured occurred, before the passing of 60 Vic. c. 36. It was held that secs. 151, 159, 160 of that Act applied to the certificate and declaration made by the will, and by those sections the assured had power to do as he professed by the will, the daughter-in-law being an "ordinary beneficiary" and the re-apportionment made by the will was valid.

WEBSTER v. CHICKMORE.—In the Ontario Court of Appeal it was held that where a preferential security is attacked within sixty days pressure is of no avail to rebut the presumption of invalidity.

THE Canadian Pacific and Grand Trunk Railways have issued a special freight tariff on iron and steel, bar, band, bundle, boiler and sheet; iron pipe and fittings, iron boiler tubes, nails, and spikes, wire, barb fence, or telegraph; horseshoes, railway spikes, bolts, nuts, washers, rivets, straight or mixed car loads, the rates being from Montreal, Brockville, Ottawa, Toronto, Hamilton, and other points west to Winnipeg 57½, Portage la Prairie, 68, and Brandon 74½. This is a considerably lower rate agreed upon by both lines than the lake and rail tariff which went into effect a short time ago.

VALLEYFIELD is to retain the mills of the Montreal Cotton Company, the difference with the council over taxation having been adjusted. Excavation for the foundation of a new building is begun and Mr. Louis Simpson, the manager, has gone to England to buy the machinery.

Horse Show Dress Talk

HENRY A. TAYLOR,

of the Rossin Block, offers these two or three hints of what is proper for patrons of the gentlemen persuasion to wear at the Horse Show. For evening wear the full dress suit to include a white waistcoat with an "Inverness" for the outer garment is the recognized "exactly so." Of course the Prince Albert Coat with a Chesterfield Overcoat will be the popular afternoon dress and will be worn by many in the evening as well. Any time during the day the neat sack suit and covert overcoat will be right. Indications are the Horse Show this season will be the dressiest yet, and gentlemen who are not fully robed for the function will need to be smart in ordering not to be disappointed when opening time arrives. Mr. Taylor will be pleased to consult with you for high-class tailoring along these lines.

Mercantile Summary.

ON Monday last a great fire began in the Clyde side district of Glasgow, and reached a destructiveness of £150,000.

W. J. ALLEN, a jeweler in St. Johns, Nfld.. is reported to be in trouble, and to be asking indulgence at the hands of his creditors, in the shape of a compromise at 40 cents on the dollar, secured.

THE Montreal council has placed a municipal tax on bicycles of $1 each, and a tag fastened to the machine will indicate that the tax has been paid. There are estimated to be 13,000 or 14,000 bicycles in use in Montreal.

A CONTRACT for the supply of 5,000 sets of Dr. Oliver's military accoutrements, which have been adopted for the use of the Canadian militia, has been given to Knight & Munro, of Halifax. Altogether 30,000 sets will be required to equip the Canadian forces.

NEIL MCDONALD, of Baddeck, N. S., is a recent insolvent. He began store-keeping in January, 1896, with a limited capital, but a large family.——E. Lohnes, a trader at First South, in the old German district of Lunenburg, is also reported assigned, with small liabilities.

H. H. FAULKNER, for ten or a dozen years in the clothing and men's furnishing business, in Moncton, N.B., is reported to be financially cramped and trying to arrange with creditors on the basis of 65 cents on the dollar. He "tied himself up" several years ago, by building quite an expensive store, and also a residence.

Two of the large Ottawa lumber mills began cutting operations on the 25th inst., and will continue until the frost freezes up the logs next November. The starting of work again will give summer employment to some thousand hands. J. R. Booth's large mill began with about 800 hands, and the Hull Lumber Company in their restored mill with about 200. Bronson & Weston's mill will begin running next Monday with 350 hands, and Gilmour & Hughson's with about 300.

TRAFFIC earnings of the Canadian Pacific Railway for the week ending the 21st inst., show the large increase of $87,000 compared with the corresponding week of last year. The items are as follows: C.P.R. return of traffic earnings from April 14th to April 21st: 1898, $453,000; 1897, $366,000; increase, $87,000. For the same week the Grand Trunk system shows an increase of $13,302. Grand Trunk Railway system, earnings 15th to 21st April: 1898, $433,595; 1897, $420,293; increase, $13,302.

THE Gillies Manufacturing Company of Gananoque, Ont., manufacturers of carriage hardware, and other goods, have propositions before them to induce them to remove their works to Montreal. Mr. Gillies is considering the matter, and informs us that, although nothing is yet decided upon, the removal may take place before long. If that occurs it will be a serious loss to Gananoque, as a large number of hands are employed, and in other ways the works are an advantage.—Gananoque Reporter.

Monthly. $1 a year. Ten cents a copy.
ACCOUNTICS ASSOCIATION, Publishers,
262 West Broadway, New York.

Mercantile Summary.

BERLIN, Ont., has bought a $3,000 road roller from an Ohio firm.

THE Chatham Oil Company has struck a gushing petroleum well in Zone township, close to Thamesville.

A COMPANY in Macon, Ga., writes the mayor of Galt, asking what encouragement that town would offer to establish its factory there. They make a patent article of shears and scissors.

FOR the steam fire engine advertised for by Winnipeg there were four tenders, of which the Waterous Works of Brantford, and the Ronald Company were lowest. The decision has been left to a committee of the council.

KENT & TURCOTTE, of Montreal, authorized by the inspectors of the insolvent estate of Blumenthal & Sons, have entered a contestation of that firm's statement of assets and liabilities, on the ground that the same was incorrect.

SUPPLEMENTARY letters patent have been issued to the Corticelli Silk Company, increasing the capital from $60,000 to $125,000; and letters patent have been issued incorporating the Brockville Navigation Company, with a capital of $16,000.

A CLEAR case of annoying exaggeration was the report of the occurrence at the Sydenham Glass Works at Wallaceburg, which we copied last week from a contemporary. Instead of five tons (the printer made us say fifty tons) of glass running out of the tank, there was not five hundred pounds. And the loss is but trifling.

As an example of activity in Winnipeg real estate, a firm in that city, Carruthers, Brock & Johnston, report the recent sale by them of Main Street properties as under: The Imperial Bank block for close upon $40,000; the Woodbine restaurant, $17,000; and two stores presently occupied by Holman, Paul & Taylor and S. Barrowclough, $31,000, all cash transactions.

IT is the intention of the Imperial Bank of Canada to make great alterations in its banking premises in Winnipeg, which it purchased the other day. Improvements are to be made both in the exterior and interior of the building. Particulars are not yet given as to the shape the outside alterations will assume, but the inside will be modernized, and adapted to an increasing business.

Tenders for Loan.

Sealed tenders marked "Tender for Loan" addressed to the Town Clerk of the Town of Chatham, N.B., will be received up to noon of the

16th Day of May Next

for the purchase of bonds of the said town to the amount of $10 000, or any portion thereof.

The above is the first $10,000 of the second issue of bonds of $20,000 authorized by the Act of the General Assembly of New Brunswick at the past session, are redeemable in 40 years, and are in denominations of $500 each, bearing interest at 4 per cent. per annum payable semi-annually at the office of the Town Treasurer

The highest or any tender not necessarily accepted.

Dated at Chatham. N.B., the 5th day of April, 1898.

WARREN C. WINSLOW, Mayor.
JAMES F. CONNORS, Town Clerk.

FREEHOLD LOAN & SAVINGS CO.

DIVIDEND NO. 77.

Notice is hereby given that a dividend at the rate of 6 per cent. per annum on the capital stock of the company has been declared for the current half-year, payable on and after the First Day of June next at the office of the company, corner of Victoria and Adelaide streets, Toronto.

The Transfer Books will be closed from the 17th to the 31st May, both days inclusive.

Notice is hereby given that the General Annual Meeting of the Shareholders of the company will be held at 2 p.m., Tuesday, June the 7th, 1898, at the office of the company, for the purpose of receiving the annual report, the election of directors, etc., and that at such meeting there will be submitted for the approval of the shareholders by-laws changing the date of the annual meeting of the shareholders of the company from the first Tuesday of June to such day in the month of February in each year as the directors may appoint, and to provide that the fiscal year of the company shall terminate on the 31st December in each year as required by the loan corporations' act of the Province of Ontario Revised Statutes of Ontario, 1897, chapter 205.

By order of the board.
S. C. WOOD, Managing Director.
Toronto, 27th April, 1898.

TENDERS

Sealed Tenders marked "For Mounted Police Provisions and Light Supplies, Yukon District," and addressed to the Honorable the President of the Privy Council, Ottawa, will be received up to noon on Saturday, 7th May, 1898.

Printed forms of tender containing full information as to the articles and quantities required, may be had on application to Superintendent A. B. Perry, N. W. Mounted Police, Vancouver, B.C., or at the office of the undersigned.

No tender will be received unless made on such printed forms.

The lowest or any tender not necessarily accepted.

Each tender must be accompanied by an accepted Canadian bank cheque for an amount equal to ten per cent. of the total value of the articles tendered for, which will be forfeited if the party declines to enter into a contract when called upon to do so, or if he fails to complete the service contracted for. If the tender be not accepted the cheque will be returned.

No payment will be made to newspapers inserting this advertisement without authority having been first obtained.

FRED. WHITE,
Comptroller of N. W. M. Police.

Mercantile Summary.

THE Ottawa Journal says that J. H. Doherty, insolvent dry goods merchant, Wellington Street, in that city, has been sent to jail for three months for contempt of Court. Doherty refused to obey an order of Justice Street requiring him to place his property in the hands of the assignee to be disposed of.

THE big pulp and paper mills of the Laurentide Pulp Company at Grande Mere, Que., are approaching completion. The immense buildings of the paper and sulphide mills have now been roofed in and the machinery is being installed. The iron flume for conveying the water power to the mill is 14½ feet in diameter. By August next it is expected that manufacture will be begun. Supplementary letters have also been issued to the company increasing its capital from $800,000 to $1,200,000.

MINING is going to be active in the Lake of the Woods region of Ontario this summer. Many mines are being developed. Navigation on that lake will open on the 6th or 7th of next month, when boats will run from Rat Portage to Mine Center. There will be three boats—the "Keenora," "Edna Brydges" and "Shamrock" to Fort Francis, and a new boat will run between the latter point, Mine Center and Seine City. Some of these boats remind one of the R. & O. N. steamers. The "Keenora" is a beautiful steel twin-screw packet, with staterooms for 100 passengers, and fit to carry 600 excursionists on this lovely lake.

WE find among the official notices in the recent Ontario Gazette mention of several enterprises of a financial character. Letters patent have been granted, for example, to A. E. Ames, J. W. Flavelle, A. E. Kemp, Charles McGill and E. R. Wood, all of Toronto, under the name of the Municipal and General Securities Company, of Toronto, limited, formed to buy, sell or lend upon bonds, stocks, debentures; to borrow money on mortgage of lands; and to do a general broking business. Capital $250,000, in shares of $100 each. Then there is the Victoria Financial Company, of Toronto, limited, capital $75,000, which has been granted letters patent incorporating Richard Lane, broker; Duncan A. McPherson, physician; John Alfred Ramsden, County clerk; Henry Sintzel, gentleman, and James Richard Code, solicitor, all of Toronto, to lend on goods and chattels and generally on securities other than real estate; also to act as collecting agents, and carry on the business of warehousing. Another company is recently incorporated, with a capital stock of $100,000. It will transact an agency business for insurers and insured in connection with fire, life, annuity, accident, marine and guarantee insurance; also assist insured persons to meet their insurance premiums; to lend on contracts of insurance; to receive for safe-keeping policies and documents. The parties are Hon. L. M. Jones, Hugh Ryan, W. B. McMurrich, Q.C.; Z. A. Lash, Q.C.; James Hedley, A. E. Plummer and G. H. Roberts, and the name of the company is the Insurance Agency Corporation of Ontario, limited.

Mercantile Summary.

OWING, possibly, to the proximity of the better market and the larger stores of Berlin, the general business of Chas. Liederman, of Baden, has been suffering. He has assigned, and his creditors will meet next Wednesday.——The assets of Mrs. John McLean, hotel keeper, Shelburne, have been seized under power of a chattel mortgage and are offered for sale.

WHETHER occasioned by the expectation of a war duty by the United States on tea or not, there is considerable briskness among the jobbers, and a number of sales have been made to American parties. We hear of transactions of the kind both in Montreal and Toronto during the week, and on Wednesday a Toronto house sold to a New York firm a lot of tea and other groceries amounting to some ten tons.

WHEN a man dies, the question is pretty sure to be asked by some one in the community: "What has he left behind him?" Often he leaves principally debts, mortgages, judgments and other unpleasant things, too numerous to mention. If, however, says the "Ingleside," there is a policy of life insurance among them, his life has not been altogether misspent and his opportunities have not been altogether wasted.

THE tailoring stock of W. J. Green, Peterboro, will be sold by auction in that town on the 9th prox.——That of Milber & Co., boot and shoe dealers in Barrie, was sold to R. McNeil, of Peterboro, at 45 cents on the dollar. ——The dry goods stock of W. W. Johnston, Peterboro, was bought by Robt. Fair at a discount of 50 per cent.

THE grocery and provision business established in Toronto by S. Dawson has changed hands four times during the first six months. The present owner is Mrs. Lucy A. Crandell, and she makes an assignment. In November, 1893, Raymond Walker, who sold furniture on Queen street on the instalment plan, made his first failure with liabilities of $29,000. His stock was then sold. After this he started business under cover of his wife, styling the business the Raymond Walker Co. In this venture they had the assistance of alarge dry goods firm in Montreal, who secured themselves by a chattel mortgage. This instrument has been foreclosed and the stock sold by auction.

THERE are no mercantile failures of special importance to be noted this week. Among the number that have happened is that of C. G. Booth, druggist at Odessa. Two years ago he succeeded his father, who had been in the business thirty years. His father's property was all more or less mortgaged at the time of his death, and as the son has not been able to get out of debt, he has decided not to carry the load any longer and has assigned.——In 1881 Henry Burnett succeeded his mother in the furniture business in Brampton, but made no progress towards wealth. Indeed, in November, 1896, he was obliged to mortgage his chattels for $1,500. This was renewed about six months and now the mortgage is foreclosed.

THE reasons why various beet sugar enterprises in Quebec Province have not succeeded are indicated by an Eastern Townships' paper, in speaking of the advertised sale of the beet-root sugar factory at Farnham. It states that "the factory at Farnham was well equipped, the help of a paternal Government was not wanting, and good beets could be raised nearby. But in our short, forcing summers farmers cannot take their own time with crops; labor costs never much less than a dollar a day, sometimes more, and there is much handwork about beet culture. In Germany, where women and young children are to be hired for such work at a few cents a day, it is different." Here, probably, is the secret of the lack of success the industry has found.

WE note in Montreal the assignment of a contracting and building firm, A. Lebeau & Co., with liabilities aggregating some $60,000 in all, some $55,000 of which is due on mortgage. A demand of assignment was made in March, which they contested, but a second demand results in an abandonment of their estate.——Hubert & Comtois, dealers in hats and furs, are reported to be asking a settlement at 25 cents, cash. The firm failed before in 1894, owing some $6,200, which they sought to compromise at 30 cents, unsuccessfully, and the business has since been carried on with Mrs. Comtois as the registered proprietress. ——A voluntary assignment has been made by Anatole Renaud, a suburban grocer, who held a situation in a down town office, while his wife and a clerk "ran" the store. He owes $1,700, with nominal assets of $1,300.

THE ST. LAWRENCE HALL,

Montreal, is the best known hotel in Canada. Some of the most celebrated people in the world count amongst its patrons. Its excellent CUISINE, central location and general comfort are reasons for its popularity. . . . .

Gendron Bicycles

King of Coasters

KING OF THE ROAD!

Notwithstanding the claims of unscrupulous pretenders, the Gendron Wheel still holds the coasting championship of Canada, and any information necessary to substantiate this claim can be obtained at the headquarters of this famous wheel.

Forging Ahead

With an untarnished record of success in the past, and a present evidence of the same, the future was never brighter for Gendron Bicycles than it is to-day. Hundreds of hitherto riders of other wheels have decided to change their mounts in 1898 and ride the Gendron Wheel.

KING OF THE TRACK!

THE GENDRON MFG. CO., Limited,
TORONTO.

Gendron Bicycles

A MAN, whose career shows how merit will be recognized, was Cornelius Sheehy, the railroad man, who died in Detroit of pneumonia on Tuesday night. Mr. Sheehy came from Ireland when a young man, and entered the service of the Northern railway of Canada as brakesman. He gradually worked his way up, and in 1890 became district passenger agent at Detroit of the Canadian Pacific Railroad. He resigned about a year ago. He was a stockholder in the Kingston and Pembroke railway, and was also interested in Eastern Canada iron properties.

SOME excitement took place a week ago in the Railway Committee of the Commons over a bill to incorporate a company to build a railway from Montreal to James Bay. The bill was strongly opposed by the Great Northern Railway Company, of Quebec, who hold a charter to build from some point on the Lake St. John Railway to James Bay, to which much importance is attached. After a fierce struggle, in which all the Quebec Ministers and members held out for acquired rights, the bill was amended so as to curtail its privileges by allowing the charter to extend only to the height of land between the 48th and 49th parellels.

IT is several weeks since noting in our "Situation" column the unfair attitude of the Canadian Copper Company in not keeping their promise to refine nickel in Canada, but carrying the matte to New Jersey to be refined we declared an export duty on nickel to be in order. Since then the subject has been investigated by a committee of the Toronto Board of Trade, and the council of that body recommend the Dominion Government to place an export duty not exceeding 10 cents per pound on nickel and 2 cents on copper in nickel, copper ores and matte. And at a meeting on Tuesday last the Ottawa Board of Trade unanimously passed a resolution strongly urging upon the Dominion Government the imposition of an export duty upon nickel ore and matte.

A RATHER attractive title is that of the Adjustable Shower-Bath Equipment and Novelty Company of Toronto, Limited, incorporated the other day with a total capital stock of $24,000, in which Messrs. Henry Robert O'Hara, Henry O'Hara, and William James O'Hara, brokers; Isaac Edward Suckling, manager, and William Henry Callaghan, traveler, all of Toronto, are the parties. We observe that the Strathroy Furniture Company, limited, capital $49,000, is incorporated to acquire the business done in that town by Wm. H. Merritt and Samuel M. Smyth.

FAILURES in the Province of Quebec continue to be few in number and of comparative insignificance. The most important of recent failures is that of J. A. Grenier & Co., general merchants, Louiseville, whose assignment is reported, with liabilities of $5,000 or so. Mr. Grenier started five years ago, but failed in '95, and getting no settlement, resumed business in the name of a brother; but recently a sister has been the registered owner of the business.——P. & H. Gobeille, tailors at Waterloo, Que., are reported in trouble, and to be offering their creditors 50 per cent. of claims in cash. The firm succeeded to the business of Jeremie Gobeille, who failed in '96, and who is supposed to have more or less interest in the business since.——A voluntary assignment has been made by Hormisdas Meunier, a carriage-maker at St. Liboire. Liabilities total $1,800; assets consist of a property valued at $900, and about $600 in stock.——A demand of assignment has been made upon H. O. Viau, a young man barely of age, who started selling furniture at Three Rivers, a year ago. He was formerly a dry goods clerk in Montreal, and was assisted to start in "business" by his father, who now makes the demand.

Perplexed?

Cornwall Canal and River Reaches.

NOTICE TO CONTRACTORS.

Sealed Tenders addressed to the undersigned and endorsed "Tender for Improvements at Upper Entrance of Cornwall Canal and River Reaches," will be received at this Office until 16 o'clock on Saturday, the 30th day of April, 1898, for the works connected with the widening, straightening and deepening of the Upper Entrance of the Cornwall Canal and the River Reaches between Cornwall and Coteau Landing.

Plans and Specifications of the work can be seen on and after the 15th day of April, 1898, at the office of the Chief Engineer of the Department of Railways and Canals, Ottawa, and at the Engineer's office at Cornwall. Printed Forms of Tender can also be obtained at the places mentioned.

In the case of firms there must be attached to the tender the actual signatures of the full name, the nature of the occupation and residence of each member of the same, and further, an accepted bank cheque for the sum of $17,000 must accompany the tender. This accepted bank cheque must be endorsed over to the Minister of Railways and Canals, and will be forfeited if the party tendering declines entering into contract for the work at the rates and on the terms stated in the offer submitted.

The accepted bank cheque thus sent in will be returned to the respective parties whose tenders are not accepted.

The Department does not bind itself to accept the lowest or any tender.

Contractors are specially notified that the condition requiring the works to be wholly completed by the 30th Day of November, A D., 1898, will be rigidly enforced and all penalties for delay exacted.

By order,
L. K. JONES,
Secretary.

Department of Railways and Canals,

THE SITUATION.

One good effect of the Spanish-American war comes, at the ontset of the conflict, in the adhesion of the United States to the Paris Declaration against privateering. Singularly enough, the first public announcement of the fact appears to have been made by Mr. Balfour in the British House of Commons. In this war, it was clearly the interest of the United States to discountenance privateering, if Spain could thereby be induced or compelled to renounce the privilege open to her, and which, as having less commerce afloat, means more to her than to the United States. But Spain has elected to take the other course. At the same time she accepts so much of the Declaration of Paris as is implied by neutral flags protecting the enemy's commerce, with the exception of articles which the law of nations classes as contraband of war; and also that neutral merchandise, except contraband of war, is not liable to seizure, on enemy's vessels. Where every sea shall swarm with Spanish cruisers, the United States is likely to come under a strong temptation to offset the seizures made by Spain by issuing letters of marque and reprisal. Congress has shown a disposition to be critical on this point, and there is no saying what it may force the President to do, at some stage of the war.

United States commerce can be made safe, on the ocean, only by transferring her commercial vessels to foreign register. Last year, a little over $30,000,000 of American commerce was carried across the Atlantic, in American bottoms. This was only about 11 per cent. of her total commerce, on that sea. Unless the American commercial marine disappears, in the way indicated, or is protected by adequate convoys, this $30,000,000 is the prize open to Spanish cruisers. Spain carried in her own ships about $21,000,000 of commerce; her whole sea-borne commerce was only $49,000,000, and more than half of it, without any change of ships register, would be protected by a neutral flag. The relative maritime strength of the Republic is greatest in the Pacific ocean, where Spain will probably not be able to commit extensive depredations upon it. Privateering can no longer be carried on in sailing vessels, and if Spanish cruisers could not be insured a supply of coal, in the Pacific, American vessels would be safe there.

Neutrals will, under the actual conditions, be liable to search only for contraband of war, not for enemies' goods. But it may happen that vessels which have nothing contraband on board, will sometimes have to undergo questioning, and if the answer be dubious actual search conducted after a prescribed form. More or less friction is sure to arise from this practice, and the tendency of neutrals is always to desire that it should be put an end to. But ordinary legitimate commerce ought not to be seriously impeded by the belligerents exercising the right of search. There may be some compensations. A large number of American vessels are sure to be transferred to foreign registrars. Questions may arise about the *bona fides* of the transaction; it would have to be in a legal form. In this way, the trans-Atlantic commercial marine of the United States can continue to be utilized. It is difficult to see how the war will create any great demand for foreign vessels. Is the total of American and Canadian commerce likely to be increased by the war? The nationality of the flag may change; the capacity of the commercial marine of the United States will be lessened by a transfer of a part of it from commerce to an ancilliary position, in the war. In this way a hiatus will be made which foreign vessels may fill. How will the war affect the sum of the foreign commerce of the Republic? It will scarcely increase, and may diminish that commerce considerably. If this should happen, the American vessels diverted from peaceful pursuits to war will not create a demand equal to their tonnage for the aid of foreign vessels.

One million dollars has been voted by the British Columbia Legislature, as a subsidy to Messrs. Mackenzie and Mann, to aid them in building a railway from a British Columbia port to Lake Teslin. The distinct feature of this project is that it takes a British Columbia port as the starting point, and thus looks to the securing of an all-Canadian route. The scheme rejected at Ottawa began at a point beyond the American frontier, and could only have been made an all-Canadian route by a subsequent extension to a British Columbia port, which was held out as a future possible undertaking; but the only provision made respecting it was that, if ever built, it must be built by Mackenzie & Mann. In voting $1,000,000 in aid of the extended enterprise, the British Columbia Legislature showed its willingness to grant a specified sum for a specific purpose. But the method cannot be commended or justified on prudential grounds. If an individual made up his mind to advance a million towards a particular enterprise, with the view of obtaining indirect benefits therefrom, he would not throw the money at the first comer and tell him to go ahead; he would want to know whether the proposal of the first comer was the most advantageous that could be procured, and would make arrangements with others, if concerted action were necessary, to apply the test of competition. As in the original contract with Mackenzie & Mann competition was excluded, the same exclusion is here repeated. Excuses may be found for the exceptional mode of dealing, but justification of her erratic departure would seem to be an impossible task. To what occult influence is the extraordinary feat of granting a million dollars to two men without competition due? And what is the part reserved, in this scheme, for the Government and Legislature of Canada? During the debate in the British Columbia Legislature, a telegram from Sir Wilfrid Laurier was read to the effect that his Government does not intend to do anything farther in the matter of the Lake Teslin Railway. Senator Mills, questioned on the subject of this communication, was not aware that it had been sent.

If mere preparation for war has cost the United States at the rate of $300,000,000 a year, actual war would probably, if long continued, cost twice that sum. The question of new war taxes becomes urgent. Beer, whiskey, and other excisable articles are marked for part of the burthen, and on these there will be no difficulty in putting an additional tax. But the proposed bond issue meets the opposition of the Democrats. The suggestion made by them that the whole burthen of the extra revenue required ought to take the shape of excise duties, and not the creation of debt, would, if acted upon, make the full weight of the war felt financially at once. As a matter of policy, if the public were willing to make the sacrifice, this course would be the reverse of imprudent. The Republicans are willing that bonds payable in "coin" should be issued, if that will remove the objection of the Democrats. This willingness not to insist on gold payment of the bonds is a concession that may bring no practical result, but it will not be without its use to the Silverites. The want of the resource which an income tax affords may be severely felt. In the Civil War, the income tax reached a high figure; in England in 1807 it reached as high as 10 per cent. Now the United States cannot raise the smallest income tax.

It would be hard to express in words a stronger condemnation of the capture of Spanish merchant ships, at the opening of the war, than that implied by the proclamation of President McKinley, which accords to Spanish vessels in the waters of the United States opportunity until the 21st of May to load and depart, with full liberty to continue their voyage, and which also secures immunity to Spanish vessels which started from Spain for the United States before the 21st of April. This is in accordance with modern usage, as observed by both sides, in the Crimean War, when six weeks grace were given, Russia deciding that the six weeks should not begin in the White Sea till after the breaking up of the ice. In the Franco-Prussian war similar conduct on both sides was observed; likewise by Russia and Turkey in 1877. And now, in the Spanish royal decree, April 24, thirty days are allowed for American ships to leave Spanish ports. To do them justice, the American people are not proud of the captures of Spanish merchant vessels, without notice, or opportunity to get to a place of safety, at the very outset of the war and before the declaration of war was issued. Most of these prizes will probably be released by the American Prize Courts. At the same time, it may be true that a state of war has existed since the 21st inst.

At the end of the year 1897, the debt of Cuba was $522,020,200, and the capacity of the island to raise revenue is limited to $35,000,000 or $40,000,000 a year. The debt appears to have been chiefly created in the last twenty years, the total debt in 1868 having been only $20,000,000. Since 1866, the increase of the debt has been abnormal and ought to have created alarm. Recently the question has been raised in Cuba, by whom ought this debt to be paid? Senor Moret expressed the opinion that Spain ought to pay part of it; some Spaniards thought that Spain, in whose cause the debt had been contracted, ought to pay the whole. What will happen, if, as is probable, Spain, by the fortune of war, should lose the island? Who will then pay the debt? Or will it be repudiated? In 1863, the Spanish Minister, de Ultramar, decided that the debt of Cuba ought to be diminished, and in that year, by him, a reduction of $7,386,466 was made. Every year since 1873 has seen a deficit. The American Government, under Polk, offered $100,000,000 for the island, and $120,000,000 was the limit which he was willing to give. Spain refused to sell then, as she would now. Persons who have recently raised the question of a purchase, as the alternative of war, have not named a higher sum than $200,000,000, not much more than one-third the amount of the debt. If Spain be ousted from the island, she may be unable to pay the debt; and the question is whether its new masters will be willing or able to pay. It is a poor look out for Cuban creditors.

FINANCIAL REVIEW.

The Bank Statement up to the end of last month, which we printed in full last week, indicates a considerable revival of active business, from the fact that the loans and discounts have increased nearly $7,000,000. This is not a large increase, and cannot be taken as ground for supposing that we are on the eve of a greater wave of prosperity than is actually apparent. At a time like the present, when there is a good deal of elasticity, so to speak, in the spirits of men, and the business community in regard to business prospects, it is prudent for men of capital and responsibility to rather exercise caution than otherwise.

Sudden increases of business and accessions of prosperity seldom last, and are apt to be followed by a considerable reaction. The present increase then can be taken for what it really indicates, viz.: a moderate and steady growth in various lines of business enterprise, all which would go to show that it is more likely to continue to increase than otherwise.

The developments in the Klondyke region no doubt have had something to do with the increase of business, in fact necessarily so, for the amount of supplies sent into that country must have called for a large expenditure of money in their preparation, and consequently an increase in loans and bills discounted to a certain extent.

But here again a note of caution seems most desirable, for it is becoming evident that the extravagant estimates of what the Klondyke gold region has produced have been largely falsified by the event. Still, there can be no doubt that a large amount of business will result from the development of this surface mining to begin with, and a foundation will be laid for permanent industries in the future; so that a considerable population may be expected to flow in and remain. The check to increase will arise from the fact that the district is so uncomfortable to live in that no one will be likely to reside permanently there if they can possibly get away.

The question will be, then, whether such immigrants will not be likely to return to the more comfortable and pleasant parts of the North-West and make homes in the Edmonton and Peace River districts, if not in regions further to the north. This will be, of course, for the benefit of Canada as a whole, and will tend to the development of these fine regions of country northwestward, which have no doubt great possibilities of good for the future.

There seems to be a probability that the exports of Canada will be on a very large scale this year and that the steamship lines will have full cargoes from the ordinary business of the country; but the outbreak of war may cause a considerable diversion of exports by way of Canadian ports that would otherwise have gone via New York. If so, the capacity of the canals and of the harbor of Montreal, and of the shipping frequenting it, will be taxed to the utmost extent. The demand will create the supply. There are always a certain number of "tramp" steamers and other transients coming to Montreal port during the season, and the number of these might be largely augmented if there was a strong demand for freight.

The prospects of shipping, at any rate for the coming season, are of a very bright and cheerful character, and the developments of this season may emphasize strongly the necessity for extending the harbor accommodation of Montreal much beyond its present bounds. Of course there is considerable harbor accommodation at Quebec, which is not much availed of at present, and that is likely to be brought into full use during the present season, and will materially assist in handling the large export trade of the country.

Along with the increase in discounts and loans of the banks in March has been a decrease of nearly $6,000,000 in deposits. A movement like this may always be looked for more or less when business begins to revive, and if the whole of the details of the movement could be analyzed, it would be probably found that considerable sums had been withdrawn from the banks for investment, or for the purchase of material and supplies for the Klondyke, or for the purchase of land in the North-West. The movement is only small at any rate, but it is significant that the long continued, steady, upward growth of the deposits of the whole country culminated on the 31st of December, when it stood at $316,000,000. This has now gone back to $310,000,000, the whole of the decrease being in the deposits in the banks. The rest of the deposits, viz., those in the Government savings banks and other savings banks, as well as those of the loan companies, have much more to do with the savings of the people, and the fact that these remain at the high figures they reached in December sufficiently shows that it is not a decrease in savings and capital, but an increase of investments in various lines of enterprise, that is causing deposits to be reduced.

Closely connected with the increase of discounts and the decrease in deposits is the pronounced diminution in the available resources of the banks. This diminution amounted during the month of March to ten millions and fifty thousand, and was part of a steady movement in the same direction which has been going on since last November.

The banks to-day have twenty-five millions less of cash reserves immediately available than they held in November last, a state of things which has been gradually coming on during the winter, and is a significant commentary on the idea that money has become more plentiful and that the rate of interest may be, therefore, reasonably lowered. The true barometer of the money market, so far as rates are concerned, is the call loan rate for stock exchange transactions. When money becomes plentiful that rate goes down just as suddenly as the barometer of the weather goes down when the atmosphere is moist. When money becomes scarce the call loan rises just as certainly as the barometer rises in dry weather. Now for the last month or two the call loan rate has been quietly and steadily advancing, until at present it is as much as five per cent. On some transactions even five and a half has been paid. If there is another decline in the available resources of the banks, it is pretty certain that the call loan rate will advance further still. In this case it is quite likely that mercantile discounts may then be affected and the rate put up to more than six per cent.

Of course the war has hardly touched us at all yet, and may never touch us so as to affect business seriously. But when war breaks out between two great nations, no man can tell what may be the ultimate consequences to other nations. However, there is every probability that Canada may go on with its business in a normal and customary manner. Great Britain is apparently taking pains to keep on the most friendly terms possible with the United States, and naturally enough, for the enormous preponderance of her interests as between Spain and the United States is with the latter, and she will doubtless continue in this attitude under all ordinary circumstances. But another month may bring about altogether unexpected developments.

ABSTRACT OF BANK RETURNS.

31st March, 1897. [In thousands.]

Description.	Banks in Quebec.	Banks in Ontario.	Banks in the other Prov's.	Total.
Capital paid up	34,957	17,292	9,644	61,893
Circulation	14,829	10,582	5,671	31,082
Deposits	97,728	75,632	29,992	203,352
Loans, Discounts and Investments	119,920	85,797	38,500	244,217
Cash, Foreign Balances (Net), and Call Loans	36,530	24,231	9,200	69,961
Legals	8,053	4,946	2,957	15,956
Specie	3,834	2,774	1,739	8,347

Large	13,277,500
	$21,142,624

Gold held, $9,779,171 = 46.25 per cent.

WHEAT CONDITIONS.

The wheat market has been subject to the influences of the war and prices have advanced with phenomenal strength, representing a total gain of ten cents per bushel during the week. Farmers are busily at work seeding and not even the present high prices will tempt them to make deliveries, or, perhaps they are disposed to take chances, as they sometimes do, on a continuation of the present range of values. The main impediment in the way of offerings, however, is the scarcity of supplies in the country. Seldom in the history of the trade has there been so free a movement of grain to the seaboard as during the present year. The market has almost steadily risen since the crop was first marketed and there has been every inducement to sell. Stocks in both farmers' and merchants' hands are consequently light.

The visible supply of wheat in Canada and the United States on April 23 was 25,914,000 bushels, as against 36,201,000 bushels the same date 1897, and 58,030,000 bushels in 1896. The markets are somewhat disorganized at present as a consequence of the belligerent situation, and exporters find it difficult to arrive at shipping terms with Old Country importers. The opening up of navigation to the sea, which was exemplified on Tuesday of this week, by the arrival at Montreal of the steamship "Scotsman" in port, may somewhat simplify matters, and assist the trade movement.

Seeding has been carried on in Ontario under favorable circumstances this spring, and with the present high prices ruling every effort has been made to increase the wheat acreage. This has been done in many instances at the expense of the barley crop, which has not within recent years proved remunerative. It is interesting to note that goose wheat is being largely sown instead of the red and winter varieties. The two latter kinds sprouted last year in districts where the goose wheat was of good quality. Mail advices from Manitoba indicate that seeding is well finished in some parts of that Province, and in others is being carried on with activity. Authorities report that there will be an increase in the acreage of from 20 to 35 per cent. as compared with last year. With moderately favorable weather conditions throughout the season the wheat harvest of 1898 should be in excess of all previous records.

THE FRUIT TRADE.

That the fruit crop of 1898 will prove a banner yield is the confident expectation of authorities in the trade. Frost, rain and drought may yet cause serious injury in different sections of the country, but the increased acreage brought under fruit cultivation within recent years must inevitably lead to a marked expansion in the aggregate yield. In few industries is it so evident, as in the fruit trade, that successful production does not necessarily mean profits. The question of marketing the fruit is equally important with its cultivation. The shipping facilities of the Dominion for such goods were never better than they are at present. In spite of the cold storage arrangements which exist in so many trade centres, despatch continues to be the keynote of success in the fruit business. The general rule of the trade is sale by commission, and in selecting houses for consignment too much care cannot be given to financial position, capacity to handle goods and general reputation for fair dealing of the intended consignee. All the care and skill expended in cultivation can easily be made of no avail by bad marketing.

It is necessary to watch carefully the details of shipment. Cards and labels containing the names of shipper and consignee should be securely attached to each package of fruit. The energetic receivers are prepared to acknowledge by advice cards the goods as received each day, and once each week will give an account of the sales and forward cash for the amount of fruit sold. Shippers ought to insist upon this being done, because in the past credit business with delay in making returns has caused serious trouble. The fruit ought to be carefully graded according to quality. Messrs. McWilliams & Everist in a circular to the trade remark that, "Good 'goods' well prepared will always outsell the coarser and rougher varieties; and good fruit put up neatly and packed honestly will always sell best." In packing fruit, as in packing anything else, honest methods require to be followed: any attempt at sharp practices will be quickly detected, and cause loss to the forwarder. The influence of all merchants should be directed to the introduction of better methods in the fruit trade, for its development means much to this country, of which fruit is so important a product.

ONTARIO MINERAL PRODUCTION.

Considering that Ontario has a reputation to maintain, we expect her to be up to-date and to adopt modern improvements. To the reader of Part I. of the Report for 1897 of the Ontario Bureau of Mines, who will compare it with the reports of former years, it is quite apparent that improvement has been made in the typographical attractiveness of the book. It is printed in double column, which is easier to the eye; the paper and ink are good, and the illustrations are better and more numerous than we have been accustomed to find in a Blue Book. This portion of the Report has been hastened in its issue by direction of the Minister, Hon. Mr. Gibson; and subsequent parts are to contain the reports of Prof. Coleman, Prof. Wilmott, Mr. Miller, of Kingston School of Mining, and Mr. Parks, of Toronto University.

On pages 5 and 6 of this part of the report is some racy reading. One does not ordinarily look for contraversial matter or stinging rhetoric in the columns of a Blue Book. But the director of the Bureau of Mines, in the pages cited, pours some tolerably hot shot into Mr. E. P. Rathbone, A.M.I.C.E., M. I. Mech. E., etc., for the temerity of that gentleman in finding fault with mining matters in Ontario which he did not understand. Our readers may remember that a correspondent of THE MONETARY TIMES described the address of this gentleman before a miners' meeting at Rat Portage in January last, and characterized him as very contemptuous of this new country, don't you know.

The very striking statement appears in the front of the book that the number of the mining companies formed in Ontario last year and the amount of their capital authorized exceeded in the aggregate the companies and the capital of the whole of the twenty-six years preceding. That is to say, there were incorporated 140 companies, whose capital amounted to $101,531,000, against 134 companies, with, say, $46,000,000 capital incorporated, between 1870 and 1896 inclusive. Locations sold and leased in the year numbered 1,255, covering 115,000 acres. Crown revenues derived were $144,299, where in the five years previous they were only $131,518 in all.

We had hoped to summarize and compare with 1896 the thirteen pages of the report which refer to mineral production, but find a difficulty in the fact that statistics of stone quarries, limekilns, brickyards and pottery works are this year omitted because of the slowness or stubbornness of proprietors in answering the enquiries of the Bureau.

Again, it is to be noted that, in respect of figures about nickel, the returns of Ontario product made to the Department of Trade and Commerce at Ottawa (under oath) differ by a hundred per cent. from the figures supplied by the same concerns (not under oath) to the Ontario Bureau. Hereby hangs a tale, which any reader will variously interpret according to his understanding of human nature as illustrated, say, in a certain passage in the 116th Psalm.

However, according to the table of mineral products on page 15, there was close upon four million dollars worth ($3,899,821) of metals and mineral substances taken out of Ontario earth in the year 1897, without considering missing returns of stone, lime and brick; gold shows an increased production over 1896, iron a decline, while on nickel and copper we shall not comment in view of what has already been said. Increases are shown in natural gas, gypsum, salt and paraffin wax, but a distinct decline in petroleum. Such structural materials as cement, terra cotta and sewer pipe show increased manufacture, but pressed brick and roofing tile exhibit the reverse. Gas and fuel oils and tar form considerable items. Calcium carbide, as a novel, but not unimportant product, appears in the list for the first time.

Ontario Mineral Product, 1897.	Quantity.	Value.

LESS SMUGGLING.

We are glad to be told that the efforts recently made by Government to enforce the exaction of duties on goods purchased at retail in American cities by dwellers in Canadian frontier towns have resulted in a perceptible lessening of smuggling. At Windsor, for many months past, the complaint has been made by retail dealers that smuggling was ruining their trade. And that this was no empty complaint is shown by the recent failure of three retail concerns in that place. Nor were Windsor merchants the only sufferers. The retailers of Chatham complain that the special trips of boats to Detroit carry off their customers, and the retailers of Wallaceburg and Dresden have a like tale to tell of the effect of cheap fares to Detroit by boat and rail.

Regarding for a moment, on the other hand, the view of the consumer, who deems his or her liberty curtailed when demand is made for payment of duty on goods subject to our tariff, let us examine the administration of the customs law. It is said that favoritism is shown, that poor people are detained and searched, while the richer and more influential smuggle at will. This is clearly wrong and should be stopped. The idea of the law is to raise revenue from foreign goods, whether used by a high or a lower class of the people, and incidentally to protect the Canadian maker of such goods. If Mrs. Cholmondely is allowed to bring in duty free five dollar kid slippers bought in Detroit, while Mrs. Muggins is made to pay duty on two dollar boots, injustice is done, not only to Mrs. Muggins, but to the revenues of the country and the interest of the home manufacturer. On the American side of the line they are strict enough in customs examination, and we should not be less so.

THE RATE WAR AS AN ECONOMICAL EXPERIMENT.

If under the rate war, the railways have taken more money than when the higher peace rates were received, it does not follow that the business has been equally profitable to the companies. There may be something in the idea which has found expression, that the extra business under the lower carriage rates, is an anticipation of what would, under other circumstances, have come later; and that the process is an exhausting one; present increase to be followed by future decrease, as a natural result. But while this may be a partial explanation, the lower rates must have created travel which would otherwise not have existed. The experiment may be useful in tending to show how low economic rates may go, without a sacrifice of net revenue; though it is not likely to be continued long enough, or the rates to be sufficiently varied for the result to form a scientific basis for ascertaining the lowest rates that are possible without a sacrifice of revenue. The Austrian Government, by a lowering of rates on the State railways of Hungary, was successful in increasing the traffic, and the Governor of Iowa undertook to show that a state-enforced reduction of rates proved to be financially beneficial to the roads.

THE GENERAL CONDITION OF MEXICAN TRADE.

BY A CANADIAN, RESIDENT IN MEXICO.

Continued from issue of April 15th.

I now mention the chief imports into this country, and make no apology for the length of the list of articles which the Mexicans buy, for I feel that many of them can he and ought to be supplied from Canada:

IMPORTS.

Coal.—The demand for coal and coke is becoming greater every year in Mexico, one of the greatest drawbacks to the country being absence of native coal in paying quantities. In 1896 the coal imports exceeded those of 1895 by more than 50,000 tons; a large proportion of this excess coming from the United States. The shipment of American coal to Mexico in June, 1896, amounted to 16,480 tons, as against 32,691 tons in June, 1897. A government decree recently promulgated excepts from tonnage duties all vessels entering Mexican ports. carrying cargoes of coal exclusively, which is a point worthy of being borne in mind. The mines of Vancouver supply 45 per cent. of the coal consumption of the Pacific Coast of the United States. There seems to be no reason why the trade should not be extended to the Pacific ports of Mexico. Nova Scotia coal, shipped in sailing vessels (the mode of carriage usually adopted by the United States), could also supply the ports on the Gulf of Mexico. Coal by carloads, at the present time, ranges between $15 and $16 (Mexican), per ton, free on board cars at Mexico City. This is equal to $6.80 to $7.20 Canadian money, at the present rate of exchange. There is no duty on coal.

Wood.—The country is also deficient in wood. The importations of wood and manufactures of wood increased from $549,584, in 1895, to $2,054,483, in 1896. A large proportion of the increase consisted of sawed lumber for constructions. British Columbia sent, during 1896, telegraph poles to the extent of $8,751, and sawed lumber, $2,600. I call attention to such items in the lumber list as "dovetailed lumber," and "manufactures of wood from the United States." Furniture is a large item.

The principal imports into Mexico for the year ending 30th June, 1897, were as follows:

Wood pulp and compressed vegetable fibre for manufacturing paper	$ 17.803
Ordinary wood for construction, sawn into boards, beams and planks	724,817
Barrels set up, or broken down, with hoops	27,662
Wooden boxes, broken down	120.266
Railway ties	116,569
Telegraph poles, cross-bars and pins	42,364
Salted and smoked fish	24,334
Railway cars and coaches	242,011
Animal fats, U.S	106,860
Bones in the rough or broken up or pulverized	224,765
Hides and skins of all kinds, uncured	94,608
Canned meat, fish and shell fish	336,444
Lard	357,095
Butter	63,106
Cheese of all classes	94,105
Manufactures of leather, U.S	48,124

Engines, boilers and machines, operated by steam	787,492
Machinery, including agricultural, run by detached power	2,191,570
Printing presses, lithg. machines, type, etc	88,962
Clocks of all kinds	27,407
Watches	
Carts and wagons without springs	84,629
Wheelbarrows and two-wheeled carts	52,450
Carriages of all kinds	70,889

In our issue of 8th April, the figures of imports into Mexico and exports from her were unfortunately confused, and require to be re-stated. The column headings were transferred, and the totals should have read: 1st and 3rd columns of figures, "Exports;" 2nd and 4th columns, "Imports."

The exports and imports of Mexico for the years 1896 and 1897, were as under:

	1896.		1897.	
To.	Exports.	Imports.	Exports.	Imports.
United States ..$	42,293,230	$20,145,763	$46,261,186	$22.593,860
Other countries..	12,677,604	22,108,175	12,301,772	19,610,235
Totals .. ...$	54,970.834	$42,253,938	$58,562,958	$42,204,095

W. L. M. LINDSEY.

City of Mexico, March, 1898.

To be continued.

RUBBER GOODS.

April is usually an interesting month to the India rubber goods trade. Price lists are reviewed and regulated according to altered conditions. The general feeling in the trade has been one of firmness for some months past. The drain upon supplies has been very great within recent years, and crude material has advanced considerably in price. From January, 1895, to the present time, fine Para rubber has risen from 75 cents per pound to 90 cents, while the inferior qualities, African rubber, have, within the same period, risen from 35 cents to 40 cents per pound. This latter advance is equivalent to a rise of 40 per cent. in value. It is little wonder, then, that the rubber companies, in taking their spring survey of business conditions, decided that manufactured products must be advanced in price. The manufacturers of rubber goods, other than shoes, were the first to announce their plans, and gave notice of 10 per cent. increase in prices. This example has been followed by the shoe manufacturers, whose prices were advanced 7½ per cent. The usual method of altering prices by change of trade discounts was not followed, and the discounts remain unaltered. The list has, however, been remodeled, and it is likely the discounts will apply to this list for some time, as it has been put in harmony with new conditions.

The Canadian Rubber Company, in taking over the jobbing business of Halley Brothers, have made an innovation in the trade. This latter firm has sold exclusively Canadian Rubber Company's goods to the retail trade for some years. The change means that this important manufacturing concern intends to appeal directly to the retail trade. It is, however, announced that the intention of the company is not to interfere with the interests of the jobbers, but simply to continue the trade connection of Messrs. Halley Brothers. The company binds itself in its jobbing capacity to adhere to the price lists, which jobbers are obliged to observe, and will offer no special inducements for the patronage of retailers.

CANADIAN BARLEY IN GREAT BRITAIN.

It is announced this week that Mr. Alex. Cowan, of Balblair, Rosshire, Scotland, is in Canada at present, enquiring into our barley-growing capabilities. Mr. Cowan is the proprietor of the oldest distillery in Scotland, and the object of his visit to Canada is to find out whether Canadian barley is adapted for use in distilleries. Mr. Cowan says the home supply is very much short of the demand, and the Scotch distillers have to depend on other European countries to make up the shortage. His attention was directed to the Canadian article by Mr. W. G. Stuart, the Dominion agent for the North of Scotland, who had some samples. There has been a good enquiry from the United Kingdom, this year, for Canadian barley to be used "for feed purposes." Exporters here are somewhat dubious as to the reality of this phrase, which enters into nearly all orders given the trade. There is a prejudice against Canadian barley because it averages a weight of only 48 pounds per bushel, as compared with the weight of English barley, which ranges between 55 and 60 pounds per bushel. Every maltster, who has given Canadian barley a fair trial, however, will be prepared to admit its qualities as quite equal to those of the home product. Some of our grain authorities believe that already Canadian barley is becoming well established in the British malting industry, although imported under the guise of "for feed purposes."

KINGSTON BOARD OF TRADE.

The annual meeting of the Kingston Board of Trade was held on Tuesday night, April 19th, Mr. Allan Chadwick, the retiring president, in the chair. The annual report, a lengthy one, was read. It referred to negotiations with the Grand Trunk about rates; the proposed extension of the Bay of Quinte railway to North Bay; the dredging of Kingston harbor and the channel at the foot of Wolfe Island; the question of a duty on the export of nickel; bankruptcy legislation and various more purely local matters. A resolution was unanimously passed for the improvement of the harbor of Montreal at government expense. Such an improvement, it was held, must benefit Kingston more in proportion than any other place of like size in the Dominion. Another resolution approved an uniform bankrupt law for the Dominion, and endorsed the principle of the Fortin bill.

Two gentlemen were nominated for the presidency: the retiring president, Mr. Chadwick, and Mr. L. B. Spencer. The other officers were elected by acclamation, as follows: First vice-president, Ald. John McKelvey; Second vice-president, Mr. G. Hague; Secretary-treasurer, Mr. King.

Nominations were made for members of the Council of the Board. The elections for President and Council will take place about the first of May.

SUN LIFE ASSURANCE COMPANY OF CANADA.

For a company which is increasing the volume of its business as rapidly as the Sun Life Assurance Company of Canada, the important things are to see that the assets and investments are carefully looked after, and that the liabilities are calculated upon a safe basis. Apparently these considerations were present to the mind of the actuary, when at the meeting, he dwelt upon the four per cent. standard adopted by the Sun, and the increase in assets during the year. Furthermore, the president seems anxious to re-assure himself with respect to the conduct of the growing foreign business, for he has been some time absent upon an inspection tour of the company's business in Great Britain, India, China, etc. It is something to boast of, certainly, that the company has about doubled in size in each four years of its existence. The need of seeing that this rapidly-growing volume of business is of a desirable and safe character, imposes great responsibility and greatly increased work upon the management, who are naturally anxious to see that the company's growth is of a secure and satisfactory kind.

We now turn with interest to the Company's report and statement of accounts for the year 1897. Net premiums were $1,789,406, as compared with $1,529,624 in 1896; interest and rent income also shows an increase, and there is a considerable sum shown as earned from stock payments and premium on new stock. The death claims and matured endowments of last year were $463,674, as compared with $398,504 in the previous twelve months; while the amount paid policy-holders in cash-profits, surrendered values, etc, was $276,399, almost three times the amount of 1896. Such payments must be, to policy-holders, very satisfactory testimony as to the standing of the company, and as to its liberality and earning power.

The assets of the Sun Life, not including uncalled capital, amount to $7,322,371, more than half of which are first mortgages on real estate; $2,180,000 consists of real estate and debentures, $774,000 of cash, accrued interest and rents, and loans on policies. The reserve on policies by the four per cent. standard is $6,856,752, and other liabilities $151,398, so that the cash surplus to policy-holders at four per cent. is $314,220, while, according to the government standard, and including uncalled capital, a surplus is shown of more than a million dollars. An interesting feature is that the recently established Thrift Department, as the company's industrial business is called, bids fair to become a profitable one.

THE CENTRAL CANADA CHARTER.

As the result of the fight over the charter of the Central Canada Loan & Savings Company, in the Banking Committee of the House of Commons, the right was conceded to invest in the stock of incorporated companies, without limit, and in bank stock, to the extent of 20 per cent. of the whole amount of these securities. The contest was mainly fought over the right to invest in miscellaneous companies' stocks. The right to invest in government and municipal securities was not much challenged. There is no danger that the company will invest in bank stocks, because it could not make money in that way: but it might, by becoming a financial company for loaning on these stocks, greatly encourage speculation, as the history of the Federal Bank and other concerns shows. American financial history is full of the disasters caused by the investment made by one class of companies in the shares of other classes. But the history of these transactions is obscure, and not readily accessible, even to men whose lives are spent in financial operations. For this reason, the gravity of such legislation as this is not appreciated.

AN INTERESTING TABLE.

The following statistics are found in a pamphlet issued by the Northwestern Mutual Life Insurance Company, of Milwaukee. It shows the mortality experience of that company during 1897, and classifies the nature of the diseases, etc., which carried off 1,154 policy-holders. It will be seen that of the 1,154 deaths, the greatest number were due to consumption, 148 deaths having been reported due to this cause. The diseases are classified as under:

			No. of Deaths.
1.	Zymotic diseases		80
2.	Constitutional diseases		239
3.	Diseases of nervous system		171
4.	"	circulation	122
5.	"	respiratory system	112
6.	"	digestive system	104
7.	"	genito-urinary system	108
8.	Violent deaths		218
	Total		1,154

In the class first mentioned, typhoid fever carried off no less than 64 persons; consumption, cancer and diabetes claimed almost all in the second. Apoplexy caused the death of no fewer than 98 out of 171, while insanity and brain disease claimed 44. The deadly pneumonia took three-fourths, and bronchitis one-tenth of those who died from lung or throat troubles; while valvular disease of the heart was assigned in 74 cases in the fourth group. Liver disease 29, and appendicitis 28, are the principal counts in the abdominal disease division. Kidney disease killed 88 out of 104. There were in the last group 71 killed by casualties and 27 cases of suicide. Forty-three died of "senility," which is curiously classified under violent deaths, etc.

FOR GROCERS AND PROVISION DEALERS

Beans are advancing as a result of the war. This will be appreciated by Kent County producers.

The price of bread has been raised in several Canadian cities, as a result of the increased cost of flour.

The Manitoba legislature has refused to sanction a bill having a clause which provided for the repeal of the act preventing municipalities to grant bonuses for flour mills.

The quantity of oranges arriving from California is not sufficient to supply the demand. Good authorities estimate that there are no more than 2,000 cars in California, including navels, seedlings and Mediterranean sweets. Prices are higher in California as a result of the larger demand.

Latest advices from London note an improved demand in that country for currants, without any change in spot values, and note a gradually hardening tendency for future business. As England is by far the largest consumer of currants, should she put forward any orders to Greece, as the stocks there are so unusually light, the market would no doubt immediately do better.

The Valleyfield Canning Company may probably establish a factory in Hintonburgh, Ont. At a meeting of the village council, the company asked a bonus of $6,000 and 20 years exemption from taxation for erecting a $4,000 building to make canned fruits, jams, jellies, vinegar and also the tin boxes to contain the fruits. The average number of hands employed would be from 40 to 60, and in the busy season from 100 to 125.

Manitoba oatmeal millers maintain that they have a grievance in the present duty on oats. The Winnipeg Commercial says: "The duty as at present arranged discriminates against the importation of oats and in favor of bringing in the manufactured product. Consequently, instead of bringing in oats to keep our mills running when there is a local scarcity of this grain, the manufactured product is brought in and the home industry is crushed out."

Zucca & Co., New York, say of lemons: Steamer "R. F. Matthews" is due in Montreal next week, and is expected to sell on Monday or Tuesday, May 2nd or 3rd; contains 28,800 boxes Messina and Palermo lemons, which sale we will attend. This fruit, on entering the United States, will pay, as usual, 1c. per lb. and 30 per cent. on packages, which is equal altogether to about eighty cents per box. The additional duty of ten per cent. will not be charged, as was expected, and by this one act the Treasury Department decided against such discrimination.

The Paddock-Fowler Co., New York, have received from a well-posted and reliable correspondent in Smyrna, the following letter, dated April 9th: "The severe weather that prevailed from November, 1897, to the first half of March last, has been most unfavorable to fig trees. It is generally believed that damage to the extent of 20 to 30 per cent. has been caused, and the most pessimistic go so far as to say that the evil can be far greater, owing to the fact that the male or fertilizing tree has especially suffered, being more precocious. This information must be considered as a warning to avoid going into purchases 'to arrive' at low prices, the delivery of which will be, according to all probabilities, utterly impossible. We are sure your friends have every interest to wait until June, for if the reported damage be exaggerated they may then effect purchases to better advantage; while, on the contrary, if the unfavorable reports be confirmed, they would close purchases with such reliable firms as will positively respect and carry out their engagements."

The hay dealers, of Quebec province, met this week at Montreal, to take some action regarding the claim they have on the United States Government for a large amount of money paid in excess of the duty that should rightly have been charged them in exporting hay to the United States. For years they were charged 20 per cent., ad valorem, the United States contention being that hay was a manufactured article. A test case was brought and the court decided that but 10 per cent., ad valorem, should have been charged, as hay was not a manufactured article. The dealers now wish to have refunded the other 10 per cent. which they over paid. Mr. L. Dorais, president, presided at the meeting, and Mr. Chas. Arpin was secretary. The following committee was appointed to make every effort to have the refund made: Messrs. Dorais, Arpin, Robillard, Smith, Gosselin, Bourrat and Lamarch. A deputation will proceed to Ottawa to lay the matter before the Dominion Government, in the hope that it will be made an international question.

IN THE DRY GOODS STORE.

Reports from the country are considered very satisfactory and indicate that retail conditions are showing a steady improvement.

A feature of the dry goods trade, referred to by our Montreal market reporter, is the extraordinary demand for black silks and satins, and the depletion of supplies of these.

There are signs that for Fall wear plain fabrics in silks and dress goods will have the call. It is only natural, after a protracted season of fancies, that public taste should return to the more quiet and elegant effects of simple weaves in modest colors.

It appears, from the reports of buyers lately back from British, French and German markets, that prices of wool dress goods and indeed of woollen goods generally are firm, with a tendency to advance, not only in the United Kingdom, but on the continent.

It is told by a London, Eng., journal that a draper's assistant, at East Grinstead, applied for a situation with a well-known house at Tunbridge Wells, and the letter paper on which his appeal was made was headed, in old English type, with this text, "Him that cometh to Me, I will in no wise cast out!"

From Belfast, Ireland, it is reported: Canada and Australasia are becoming increasingly good customers, and a steady trade is passing with both colonies. With the West Indies business is dull, and the South American markets generally are the same. Locally, stocks are moderate and prices unaltered.

In veiling material, while the brightest possible colors have heretofore taken precedence in demand over staple assortments, in New York, combinations of black on white, or magpie, in connection with lines showing a highly colored ground, decorated with extraordinary large white chenille spots, are fashionable fancies of the hour.

The industrial war in the cotton industry of New England, which at one time threatened to assume serious proportions, has come to an end with the return to work of the New Bedford strikers. The loss to the operatives in that city from the strike is estimated at $1,500,000, while to the mill management the curtailment of production has doubtless been an advantage.

The millinery department in the average dry goods store is not numbered among the most profitable branches of the business. A singular lack of attention is shown by many merchants to the details of the milliner's art. There is lack of system in both workroom and salesroom. The cost of producing hats and bonnets is not figured out with the exactness essential to success. Too much purchasing power is often left in the hands of the head milliner, who, as a prominent trade paper remarks: "The head milliner, as is well known, usually has some particular jobbing friend, and purchases for the house so conducted are usually at the mercy of conditions which are not very business-like, fair or possible to be molded into profit." There is money in a well-regulated millinery department, if the dry goods merchant is willing to devote a moderate amount of his energy in working up the trade. If he cannot afford to do this it would be far better to leave the industry to other hands, as a poorly conducted millinery department is a detriment to the other branches of the store.

INSURANCE PARAGRAPHS.

A policy-holder writes to the Government Insurance Recorder (Eng.): "I am in receipt of your letter, and, in reply, beg to state that my discontinuing abstinence from intoxicating stimulants is due to the fact that I have given up the practice of abstaining!"

"There is no relief for a tired brain like fun. A man who has an eye for the ludicrous and a keen sense of humor gets more pleasure out of life than a wholly serious person ever knows. The wheels of a career in this work-a-day existence of us Americans run much smoother and easier when lubricated by a hearty laugh."—Chauncey M. Depew.

While in Winnipeg, within a few days, Mr. H. Hampson, of the Montreal firm, Robert Hampson & Son, managers of the Insurance Company of North America, made arrangements with Mr. A. C. Archibald, of the grain exchange, to represent his company for Manitoba and the Northwest Territories. Mr. Archibald succeeds Mr. W. P. Clarke, who has resigned the agency.

If a man doesn't ride a bicycle, play baseball, cricket or golf; never goes boating in summer or skating in winter; has a horror of fire-arms; wouldn't under any circumstances ride behind a horse or on one; has no intention of traveling by rail or water; is so situated that he is not compelled to walk the streets or ride in elevators—in short, if he is safely confined to his house out of harm's way twenty-four hours each day, then, perhaps, he may get along without the protection afforded by an accident insurance policy.—The Inter-State.

It is pleasant to hear of faithful services being recognized, and we are glad to be told that the Provident Savings Life Assurance Society has taken a liberal view of the services of their general manager for Canada, Mr. R. H. Matson, and have granted him a vacation of some weeks. Mr. Matson will therefore leave Montreal for England on Saturday of this week. Mr. Sparling, the assistant Canadian manager, will be in charge, and we doubt not will keep the Provident Savings in its forward place during the absence of his chief. The Provident Savings entered Canada to do life business on the 1st of April, 1889, under Mr. Matson's management, and at the close of 1897, it had $4,123,100 of insurance in force. The premium income in Canada for the year 1897 was $114,949.40, which is a very good showing for eight years and nine months. It means a lot of persistent work

Many persons in Eastern Canada received a shock when, on Thursday evening last, news came that "the most serious and extensive conflagration known in Vancouver, since that city was practically wiped out by the fire-fiend, in 1886, broke out last night, wharves, storehouses, cars and outfits a seething mass of flame !" (April 20th). This alarming announcement was on a par with the shameful exaggeration of such events which is so common in our press reports. We now know that some hay on a wharf at Simpson's slip was set on fire by tramps smoking. The fire-hose was cut by a passing train and the fire spread to some box cars filled with oats; loss on cars, $2,100; on oats, $1,000. A Montreal Star despatch of Saturday says the government bonded ware-house was burned, loss $4,000 on building and $12,000 on contents. Some Klondyke outfits were also burned, some fish sheds took fire but were extinguished. The total loss is placed at $26,000.

FIRE INSURANCE IN MICHIGAN.

In the red pamphlet entitled "Fire Insurance in Michigan for Ten Years," published by The F. H. Leavenworth Publishing Co., of Detroit, for 50 cents, we find a summary of the fire business of all companies for a series of years. It is compiled from official reports, and gives risks written, premiums received, losses incurred and the ratio of losses to premiums of the 141 companies doing business in the State. The average of loss, for the whole period, was $51.92, paid out in losses for every $100 taken in premiums, which is a showing that should leave a reasonable profit, assuming that the average expense does not exceed 30 per cent. of the premium income. The aggregate of risks written last year was $298,937.000 ; the premiums taken were $4,298,618 and the losses $1,930,,497. Last year was the best of the ten, its aggregate of loss being only $40.20, for every $100 in premiums ; and the year 1896 was one of the worst of the ten, for in that year the loss was 68 per cent. of the premiums. The fluctuations are curious ; 1894 was low in losses and 1893 high. Looking up the business of the Western and British America, the two Canadian companies doing business in Michigan, we find the Western's losses below the average, and the B. A.'s above it. But so are those of some of the best English companies that year ; the North British lost nearly 59 per cent., the Sun about the same, the Royal over 53, while the Phoenix got off with only 38.68 per cent., and the Liverpool & London & Globe with 41.40. It cost even a conservative company like the Continental, of New York, $58.79 last year, per $100 of premiums.

CANADIAN PATENTS.

The list of patents which follows is furnished by the firm of Fetherstonhaugh & Co., patent solicitors. The parties are Canadians:

Canadian patents—Hot water furnaces, T. L. Best ; steam and hot water heating radiators, J. T. Jackson ; water furrow cleaner attachment to ploughs, J. A. Micking ; milking pails, E. Silver ; key fasteners, E. Benoit ; spring seat, G. Caxon ; folding chairs, H. F. Rankin ; curd agitators, A. Robinson ; wagon brakes, J. T. Hillman ; garment supports, G. McKnight ; sole presses for boots, J. H. Pellerin ; horse collars, H. L. Gulline ; earth boring augurs, J. Allard ; flag poles, J. Muir ; burglar proof safes, L. West ; anti-friction bearings, L. E. Lawrence ; velocipedes, I. P. Patton ; pedal and pedal bearings, M. Matthews ; bearings for shafts, A. Merner ; bicycle driving gear, G. C. Bateman ; automatic pumping attachment for pneumatic tires, J. H. McCullum ; vehicle springs, J. C. Shepherd ; manufacture of dress stays, G. Beacock ; combined reclining and folding chair, D. B. Kenedy ; heating drum for stoves, R. W. Biggar ; folding boxes, T. J. Alexander ; automatic gates, W. Baillie ; snow locomotives, L. Anderson.

United States patents—Steam engine, W. F. Cleveland and E. W. Rounthwaite ; automatic bicycle lock, G. L. Grass ; game board, W. H. Perry ; reclining chair, F. H. Rankin ; game apparatus, T. Renwick ; soldering machine, B. H. Short ; counter-stool for stores, G. A Coulson and J. McCaw.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, April 28th, 1898, compared with those of the previous week :

CLEARINGS.	April 28th, 1898.	April 21st, 1898.
Montreal	$13,479,108	$12,263,517
Toronto	7,714,336	8,082,398
Winnipeg	1,344,180	1,626,836
Halifax	1,017,341	1,198,614
Hamilton	609,927	691,257
St. John	513,697	574,620
	$24,678,589	$24,437,242

Aggregate balances this week, $3,231,510 ; last week, $3,643,586.

—We published, in our issue of February 25th, the letter of Mr. William Mulock, M.P., in which he offered to pay a lump sum of $150,000, to be taken as a discharge of his liability in connection with the Farmers' Loan & Savings Company, of which failed concern he had been a director and at one time president. He offered in addition, if this proposal were accepted, to give $50,000 to form a fund for widows and orphans who had been serious losers by the company. This liberal offer, which does credit to Mr. Mulock, has been under consideration by the liquidator and committee of creditors for some weeks, and now the Master-in-Ordinary, being asked to adjudicate in the matter, has this week given his decision. The master, having made enquiry into the circumstances, considers that it will be in the interest of the creditors to accept the offer. Only one creditor, out of fifty or sixty present in court, made any objection to its acceptance. The master in giving judgment laid special stress upon the value of the opinion given by Sir Frank Smith, who deems it best that Mr. Mulock's offer be accepted.

—The earliest spring arrival from sea at Montreal for many years is that of the steamship "Scotsman," from Liverpool, on Tuesday morning. She left Liverpool on the 14th and reached Quebec on the 25th April. In the year 1881 a steamer reached Montreal on the 26th, in 1878 on the 20th, and in 1871 on the 20th April. All other records for forty years show the first arrival to have been from one to ten days later than the present year's. The "Scotsman" reports some loose pack ice near Cape Ray, which delayed her somewhat, but there was no other serious detention.

One way to get even with thieves was that adopted not long ago by a farmer in South Dakota (Coddington County, they say) who had a lot of hay stolen from him at different times. The farmer lay in wait for the thieves one night. One of his neighbors came along and loaded a wagon with the watcher's hay and started to drive away. The owner of the hay crept up behind the waggon and fired the hay in several places. The thief had just time to get off the load and cut his horses loose to escape the flames. The hay and the wagon were destroyed.

Meetings.

SUN LIFE ASSURANCE COMPANY OF CANADA.

The annual meeting of the Sun Life Assurance Company of Canada was held at the head office in Montreal on April 4th, the Hon. A. W. Ogilvie, vice-president, in the chair.

The following report of the year's business was submitted:

REPORT.

The applications for new assurances numbered 25,987, for $16,292,754.92. Of these, 24,134, for $14,418,101.10, were accepted and policies issued therefor. New assurances actually paid for in cash before close of the books were 15,136 for $10,561,269.73.

These figures show an advance over 1896 of $5,182,462.73 in the proposals, and $3,092,988.16 in assurances paid for. The total assurances in force at December 31, 1897, were 39,158, for $44,983,796.79, an increase of $6,786,905.87.

The net premium income was $1,851,422 as against $1,650,268.36 in 1896, the increase being specially gratifying in view of the fact that the receipts for annuities, included are but $62,015.58, as against the abnormal amount of $120,644.02 in the previous year. The total income (exclusive of $90,000 received on account of increase in capital stock) was $2,149,159.35, an increase of $262,901.35.

The total payments to policy-holders since the foundation of the company have been $4,380,972.75. The assets are now $7,322,371.44, having been increased $934,226.78 during the year. During 1897 cash profits to the amount of $200,386.45 were distributed among the policy-holders, and $374,051.85 was appropriated to strengthen the reserve by the adoption of the 4 per cent. standard. Two thousand new shares of capital stock were issued, making the subscribed capital $700,000, of which $105,000 is paid up. The stock was issued at a premium of 200 per cent., and was taken up with avidity. The premium of $60,000 realized thereby was put into the general surplus, so that 95 per cent. of it will go to the policy-holders.

The vacancy caused by the death, very much regretted by the directors, of Mr. W. J. Withall, has been filled by the election of Mr. J. R. Dougall.

STATEMENT OF ACCOUNTS FOR 1897.

Income.

Premiums—net	$1,789,406 83
Annuities	62,015 58
	$1,851,422 41
Interest and rents....	297,736 94
Increased capital	30,000 00
Premium on capital stock issued	60,000 00
Total income..	$2,239,159 35

Disbursements.

Death claims and matured endowments, including bonuses..	463,674 37
Annuity payments	14,400 46
Cash profits paid policy-holders, bonuses surrendered, surrender values and accident claims..	276,399 12

Dividends on capital..	10,312 50
Expense account, commissions and medical fees, special expenses in establishing Thrift Department.	587,997 50
Total disbursements.. ...	$1,352,784 01
Surplus over disbursements..	886,375 34
	$2,239,159 35

Assets.

Debentures, market value ...	$1,636,278 69
First mortgages on real estate	3,917,513 24
Real estate, including company's building..	544,419 04
Ground rents....	38,640 00
Loans on company's policies (reserves on same, over $1,200,000)....	557,862 44
Cash in banks and on hand..	54,507 73
Outstanding and deferred premiums, net..	377,076 85
Interest and rents accrued ...	167,297 55
Other assets..	8,775 90
Net assets..	$7,322,371 44

(Including uncalled capital, the total assets are $7,917,371 44).

Liabilities.

Reserve on policies..	$6,482,701 13
Additional amounts reserved to change Standard to Hm. 4 p.c....	374,051 85
Total reserve by 4 p.c. table..	$6,856,752 98
Death claims and matured endowments (awaiting discharge)...	108,129 36
Sundry liabilities..	43,268 97
Total liabilities..	$7,008,151 31
Cash surplus to policy-holders by Hm. 4 p.c. standard.. ..	314,220 13
	$7,322,371 44
Capital paid up..	$ 105,000 00
Net surplus over all liabilities and capital stock..	209,220 13
The net surplus, according to the Government standard is	583,271 98
The surplus to policy-holders, including uncalled capital, according to Government standard is..	$1,178,271 98

The chairman, in moving the adoption of the report, referred to the absence of the president, Mr. R. Macaulay, who will return shortly from an inspection of the company's agencies in Great Britain, India, China, etc. Among the matters arranged by the president had been the appointment of an influential board of British Trustees, composed of the Marquis of Dufferin, the Earl of Albemarle, and Sir Charles Dalrymple, Bart., M.P. With regard to the report, the splendid increases in business and resources were such as, in his opinion, to give everyone interested in the company the highest satisfaction.

Mr. S. H. Ewing seconded the adoption of the report, and made special reference to the very high character of the company's investments.

Mr. T. B. Macaulay, the secretary and actuary of the company, made some forcible statements as to the solidity, progressiveness and profitableness to policy-holders of the company. Not only, he said, are the assets sound, but the liabilities are calculated upon a much more severe basis than the Government requires, and even after paying out over $200,000 in profits, a net surplus remains of $209,220 by this standard, or $583,271 by the Government standard. The increases in income, assets and assurances, given in the report, showed the progressiveness of the company, which has about doubled its size in each four years of its existence. The fact of the policy-holders receiving 95 per cent. of the company's profits showed clearly the extent of its profitableness to them.

Referring to the recently established Thrift Department of the Sun Life Mr. Macaulay stated that the outlook for its future is excellent, and that it bids fair to develop into a profitable part of the company's business.

The retiring directors were unanimously re-elected, and after votes of thanks to them and to the officers and staff, which were duly responded to, the meeting adjourned.

—The Tilsonburg woolen mills, owned by D. Tilson & Co., of that place, were on April 8th bought by Mayor Rumpel, of Berlin. Arrangements were also completed whereby the mills will be relieved of the machinery, which will be shipped to Berlin, where the greater portion of it will be utilized in M. Rumpel's factory.

UPON THE ROCK OF "BARGAIN."

The fact that department store advertising to-day consists almost wholly of bargain offers has induced a bright feminine correspondent of Printers' Ink to write as follows:

"The little grocery store around the corner, and other stores in the specialist category, need not worry because Mrs. McFlarity has transferred her account to the Big Pure Food Show of the department store. There is a terrible fate rapidly making for the department store, one which will crumble its mighty pillars, turn its candy counter into gall, subdue the frolicsome swell of the big searchlight planted in the conservatory, and conquer its proud haughtiness forever. The department store is as surely doomed as was the maiden chained to the rock, while the big sea monster came and made faces at her for a little while, and then swallowed her, chain and all. It is their own fault, too. Nobody else may be blamed. They have simply burned their bridges back of them, and have no war ships handy to take them over the big gulf they have made.

"The terrible rock which is wrecking the mighty and haughty department store is named 'Bargain.' Upon its jagged edges it will surely go to pieces. Department store engineering has become a competition merely of bargain giving. Woman has been fed upon something for nothing, until her taste has become depraved, and she will simply refuse to return to the plain if virtuous method of paying for an article just what it is worth. For instance, the shopper with the price of a fine couch cover in her pocket, upon coming into the seductive contact with a soft, luxurious affair which is just what she needs to convert her couch into a bower of Oriental comfort, simply pats the price on the back when it attempts to rise, remarking, 'Hush, my heart, lie still until Bargain Day or Challenge Sale comes around.' And then she sallies forth, and really gets the same article for less, and has occasion to congratulate herself upon her wisdom every time her eyes fall upon this particular cover, and the department store has but torn another hole in its side. And she does likewise with her dresses, and hats and boots, and everything she buys at the haughty department store. Think what will happen if every shopper in her shrewdness follows this plan! So long as the big stores exist, there will be competition, and as long as competition exists, there will be bargains. Whoever beats must offer the biggest bargains, and to an ordinary mind the result appears to be nothing less than ruin and destruction, and all upon the rock of 'Bargains.' The brilliant mantle of the proud department store will trail in the dust, its proud statues will be broken, and it will simply 'bust' from too much bargain."

THE TRADE OF SPAIN.

Peculiar interest attaches, at the present time, to the statistics and details of Spanish trade, issued this week by the chief of the section of foreign markets of the Department of Agriculture at Washington. Though, of course, not ranking among the leading powers of the earth, in the volume of foreign business done, Spain's commercial transactions amount to a good figure. The statistics, however, possess special interest, because of the fact that the United States, though doing a comparatively small business with Spain, ranks fourth in importance, being exceeded, in fact, only by France, Great Britain and Cuba, in the order named.

During 1895, the latest year for which official statistics in detail are available, the total commercial transactions of Spain aggregated $317,185,275. It is of interest in this connection to recall that Bradstreet's of March 26 contained the figures of import and export trade of Spain, given by Consul Bartleman, of Malaga. The total trade of Spain, according to him, in 1897, was valued at $332,262,000. So it will be seen that Spain's trade has fallen off in the past two years. The total given for 1895 by the section of foreign markets, although exceeded in 1889, 1890 and 1891, was considerably larger than the annual average for the ten years, 1886—95. The heaviest trade in any single year during that period was done in 1891, amounting to $376,546,000, while the smallest trade was done in 1894, only $285,191,000. The yearly average for the ten years ranged from between $315,077,000 yearly in the five-year period ending with 1895, to $317,956,000 annually during the preceding five years. This would appear to point rather toward contraction than expansion were it not for the fact that the 1896 and 1897 figures given in Bradstreet's seem to indicate a broadening of trade, which may be partly explainable, however, on account of the three years' military operations which Spain has been conducting in Cuba and in the Philippines. In 1895 the imports exceeded the exports by about $6,000,000, and the annual average for the ten years shows a considerable balance in favor of imports. This balance appears to have increased, particularly toward the close of the ten-year period ending with 1895.

Spain's foreign trade is largely maritime, only about 16 per cent. being transported by land as against 84 per cent. carried in seagoing vessels. And it is of further interest to note that the proportion of Spanish commerce carried in Spanish vessels has increased since 1891, when less than one-half of the company's sea-borne trade was carried in Spanish ships.. In 1895 the amount of foreign trade carried in Spanish vessels was nearly $147,000,000, whereas that carried by ships of all nations amounted to only $115,000,000. Spain's largest commercial connection, as above indicated, is with France. During the five years ending with 1895, 31 per cent. of the country's total trade was with its northern neighbor. The United Kingdom ranks second, with 22 per cent., and Cuba third, with slightly in excess of 10 per cent. of the total. The United States, with 6.32 per cent., is fourth in rank, the yearly value of the goods transferred averaging about $20,000,000. On December 31, 1895, the merchant marine of Spain comprised 23,073 vessels of an aggregate of 719,572 tons. Compared with the year 1886, ten years before, there was only a slight gain in vessels, but an increase of 119,000 tons. As has been the case with other countries, vessels propelled by steam have been gradually supplanting those under sail. The total tonnage of vessels entering and clearing from Spanish ports in 1895 was 25,922,486, of which Spanish vessels furnished 13,684,668, or considerably more than one-half. The heaviest shipping business appears to be conducted from the ports of the Atlantic seaboard, in spite of the comparatively restricted area bordering on that ocean. The number of ships entering or clearing from the customs districts on the Atlantic averaged 19,704 a year for the five years ending with 1895, as against only 15,738 annually for the districts bordering on the Mediterranean.

Cadiz, on the southwestern Atlantic coast, is the principal port of the country, 15.25 per cent. of the total number of vessels clearing from that port. This proportion, however, is nearly equaled by the district of Vizcaya, on the north Atlantic seaboard, which furnished 15.16 per cent. of the total. Barcelona and Valencia, on the Mediterranean, come next in importance as shipping centers. As regards weight or tonnage of merchandise carried the United Kingdom ranks above all other countries, this being due, perhaps, to the fact that coal, a most important Spanish import, is procured chiefly from Great Britain. It is of interest to note that the neighboring kingdom of Portugal only ranks fifth in the volume of Spanish trade, doing less than 4 per cent. The trade carried on with Puerto Rico is nearly as large as that done with Belgium, or about 3 per cent., while that done with the Philippine Islands, though slightly smaller in volume, amounts to $8,467,013, or 2.69 per cent. The total merchandise annually exchanged between Spain and her colonies, comprising Cuba, Puerto Rico, the minor possessions, exceeds $50,000,000, of which Cuba furnishes $32,139,000.

STICK TO YOUR OWN BUSINESS.

The disposition of some men to meddle with matters outside their own legitimate business, and sometimes in a way which makes them offensive to some members of the community, has been the undoing of many. And while true of all classes of business, especially is it so of industrial insurance, that one of the essentials to success is that a man stick to his own business. This truism was well illustrated a few days since by the experience of Julius S. Kohler, an agent for the Prudential at Poughkeepsie, N. Y. He became possessed of a meddlesome spirit, and in a public speech advocated the establishment of a local labor bureau that would exclude Catholics. He was promptly discharged by the Prudential, and in a letter to Superintendent S. R. Hankinson, in charge of the district, Vice-President Leslie D. Ward very clearly stated the attitude of the company, as follows:

"Dealing, as we do, with all classes of people, it is very important that our representatives should not be prominent in anything outside of their own business. Should their inclinations point otherwise it is their duty to resign at once. Our employes have a perfect right to belong to any church they see fit, or affiliate with any political party; but we must insist that they do not make themselves offensive to any member of the community in which they live. Should they do so their usefulness with us is ended, and we trust that you will conduct our business on the lines indicated."

BRITISH MARKETS.

Messrs. Gillespie & Co.'s Prices current, dated Liverpool, April 15th, 1898, say:

"Sugar.—Raw is steady, supplies of cane being limited. Refined shows no alteration.

"Rice is very firm, and likely to be dearer.

"Chemicals are by no means active, and changes in prices are unimportant. Cream tartar is lower since our last.

"Oils are fairly steady. Olive remains at about £32 10s. per tun for very good ordinary quality. Palm is easier at £19 5s. to £19 10s. per ton for Bonny, and £20 for Lagos. Castor also a shade cheaper.

"Freights, by direct steamers, are quoted about as below. Our figures are through by rail. By water a considerable saving can be effected to points such as Toronto, Hamilton, etc. Groceries, Montreal, 6s. 6d. to 7s. 6d.; Toronto, 19s. to 25s.; Hamilton, 20s. to 26s. 6d. Chemicals, Montreal, 7s. 6d. to 8s. 6d.; Toronto, 20s. to 29s.; Hamilton, 21s. to 30s. 6d. Oils, Montreal, 7s. 6d. to 15s.; Toronto, 20s. to 30s.; Hamilton, 21s. to 31s. 6d. Groceries, chemicals and oils, Halifax, N.S., 12s. 6d. to 15s.; St. John, N.B., 10s. to 15s."

DUTY ON LUMBER WANTED.

A petition to the Dominion Government has been formulated by the Ontario Lumbermen's Association, asking for the imposition of export duties. It has been forwarded to Ottawa. The object is to have imposed on lumber entering Canada duties equivalent to those imposed by the United States on lumber entering that country. Under the Dingley tariff there is a duty of $2 a thousand feet on lumber, 30 cents a thousand pieces on shingles, and 25 cents on laths. The association asks the Dominion Government to impose $2 a thousand on lumber, but in order to avoid inconvenience in the re-adjustment of the Canadian tariff it is asked that, instead of specific duties on shingles and laths, an ad valorem duty of 20 per cent. be imposed.

—Hon. R. R. Dobell tells a correspondent of The Montreal Gazette that the English provisional directors of the new company to provide the fast Atlantic line of steamers are Lord Tweedmouth, chairman; Wm. Johnston, of the Johnston line; Wm. Boumprey, late managing director of the Cunard line; Mr. Thompson, director of the Barry dock; Mr. Gellatly, of Hanky, Gellatly & Co., London; Admiral Markham, Sir Bache Cunard, and Sir John Brimson, late under secretary of the colonies. The trustees are Lord Strathcona and Mr. Mills, of Glyn, Mills, Curry & Co.

Commercial.

TORONTO MARKETS.

Toronto, April 28th, 1898.

Boots and Shoes.—The two interesting features of the trade are the strike and the advance in rubbers. The union is evidently determined to continue the struggle even at the cost of destroying the trade. We elsewhere refer to the situation in rubbers. Fair orders in the assorting trade are coming forward, and retailers express themselves confident of a good season's business.

Dairy Produce.—For dairy tub butter 14 to 15c. per lb. is being paid. Large rolls are in good supply and the market is down about 1c. as compared with last week; dealers quote 14 to 15c. per lb. Pound prints are worth 15 to 16c. per lb. Creamery is in moderate demand, with prints quoted 18 to 20c. and tubs 17 to 18c. per lb. A fair jobbing demand exists for cheese, with local jobbers quoting 8½ to 9c. per lb. The situation for the new make is growing brighter as the season draws nearer to hand. The receipts of eggs are fairly large both in the city and at country points. Picklers are busy at work. Local quotations range about 10c. per doz.

Flour and Meal.—Grading is active and values, in sympathy with the wheat market, have advanced. Winter patents are quoted $4.60, and straight roller $4.50. The export trade is somewhat disorganized so far as present shipment is concerned by the war, but it is thought trade will soon accustom itself to the new channels.

Grain.—The wheat situation is reviewed in another column at some length. Prices have advanced 10c. per bushel during the week. Late advices, which seem reasonable, report the bull movement checked abroad by the phenomenal rise in values. Peas are firm, the demand is good and merchants report an active movement.

A firm market in oats, and prices up 1c. per bushel is reported. The barley season is over, and trade is of a nominal character. Rye remains in good demand at 1 to 2c. per bushel advance. Merchants want supplies of buckwheat and but little is offering. Corn is in good active demand. Large quantities have been brought into the province from the United States during the season.

GREEN FRUIT.—The demand for oranges is falling off, and other fruits, such as strawberries, coming forward more freely are taking their place. The prices realized at the Wednesday sales were not as high as has been realized the past several weeks. Seedlings brought $1.90 to $2.40 and navels $2.40 to $3.25 per box. The supply of lemons is rather limited, but the Montreal sales coming next week will relieve the market. The steamship "R. F. Matthews" arrived in Montreal on Tuesday with the first cargo of fruit from the Mediterranean ports, including Genoa, Messina, Naples and Sorrento. She moored at the Allan line wharf, where she will discharge. The fruit is reported to be in excellent condition, which is due partly to the excellent ventilation of the holds and the fine weather which prevailed. The cargo is consigned to Messrs. Hart & Tuckwell. and it is expected that the fruit will realize good prices when sold. The New York houses are, however, doing their best to discourage attendance at the sales. The cargo consisting of 26,500 packages of Messina lemons, 1,700 Palermo do., and 600 Sorrento do., and 4,000 pkgs. Messina oranges, 280 Palermo do., and 3,500 Sorrento do., will be put up at public auction next week. The steamer "Fremona" is reported in this week. Pineapples, in spite of advices that no more can be expected from Cuba this season, remain in slack demand; prices are somewhat high, dealers quoting 13 to 15c. each. Strawberries are more abundant, and latest arrivals coming forward from North Carolina showing excellent quality are quoted 20c. per quart.

GROCERIES.—There is a moderate trade doing in general supplies. The sugar market again advanced this week, with a rise of 1-16c. placed on granulated. In teas there is little new to report. Shipments are reported here which would have gone direct to the United States had there not been a fear on the part of forwarders that a war tax would be levied by the government on that commodity. A shipment of coffee, from Batavia ex S.S. "Clara," is reported arrived, and of good quality. The movement in canned vegetables has been affected somewhat by the early green vegetables coming forward from Southern markets. Advices from the country indicate a fairly satisfactory trade.

HIDES AND SKINS.—The local market is getting in better shape and traders show a better disposition to work together. Cured hides are quoted 8 to 8¼c., and should bring the latter figure. At the time of writing (Thursday), it seems almost certain that green calfskins will go down to 9c. on Friday of this week. Sheepskins and lambskins are without change. From Chicago, April 25th.—Market was firm. A fairly large volume of business was reported transacted last week, and packers were decidedly firm in their views, tanners finding that to obtain supplies it was necessary to pay full prices. The close was firm at 10¾ to 11c. for native steers, 10 to 10¼c. for Texas, 9½ to 9¾c. for butt brands, 9½c. for branded cows, 8½ to 8¾c. for Colorados. 10½c. for heavy native cows, 11c. for light do.

PROVISIONS.—There is good demand for general supplies and prices remain firm and unchanged. The deliveries of dressed hogs have now declined to merely sufficient for butchers' purposes. Prices in the United States remain somewhat low in spite of the bull appearance of the situation. Packers are evidently operating with a view to secure the bulk of the summer run at a low basis of values.

MONTREAL MARKETS.

Montreal, April 27th, 1898.

ASHES.—The expected improvement in demand, which usually attends the opening of navigation to the sea, is not yet in evidence to any very appreciable extent, and the market is barely as strong as a week ago. As yet there have been no receipts of moment by canal. We quote first quality pots at $3.70 to 3.90 per cental, as to tare, seconds $3.25 to 3.30. pearls about $4.75 per cental.

BOOTS AND SHOES.—Many of the manufacturing houses, in fact most of them, are busy. Some houses are still behind in delivery of their orders for spring footwear. For this and other reasons some of the larger concerns have as yet hardly turned their attention to fall samples of boots and shoes. However, the preparation for fall goods can hardly be delayed much longer.

CEMENTS AND FIREBRICKS.—The steamship "Westmeath" from Hamburg, and another steamer, are now reported in the River St. Lawrence with fresh supplies of Belgian cement, which will somewhat relieve the present scarcity of that article. A very fair demand exists for moderate lots. We quote British $2.25 to 2.35, Belgian $1.95 to $2.10. Firebricks continue to be quoted at $17 to 22 per thousand.

DAIRY PRODUCE.—The cheese market is this week again a shade stronger, with English cable quotations at 41s. for white, and 43s. for colored; spot prices for fine makes range from 8 to 8½c. Some few small lots of fodder cheese have come to hand, but the make thus far is infinitesimal, and the product of this article is expected to be very small during the present spring. Butter values continue pretty much on the low basis reported last week, namely, 16 to 17c. per lb. for fine creamery and dairy, with the probability of lower figures with the advancing season.

DRY GOODS.—For the season of the year there is a good sorting demand. Some travelers are out with samples of dress goods and other fall lines, but it will be some weeks before the main body of travelers get out with full lines of fall samples. There is a big run on black silks and satins, of which goods wholesale stocks are quite depleted, and repeats are being cabled for prompt shipment. Buyers just returned from the other side of the Atlantic have no very special news to report. All woolen goods are firm in Europe and would doubtless have been subject to advance but for the Hispano-American war. Belfast linen manufacturers are reported very busy in light damasks, weighing 4½ ounces to the yard, which now go into the United States at a reduced duty.

FURS.—Moderate receipts of mixed lots of raw furs are reported, but the catch of spring muskrats is smaller than usual. Dealers are buying carefully, and disposed to sort closer in all directions. We quote: Mink, large dark, $1.50; small, do., $1 to $1.25; marten, $1.75 to $2.25; fisher, $4.50 to $7; lynx, $1 to $2; otter, $1 to $12 for dark; pale, $5 to $7; red fox, large, $1.30 to $1.50; small, $1; cross fox, $3 to $6; bear, cubs, $3 to $7; medium, $7 to $10; large, $12 to $15; skunk, 15 to 70c, as to color and stripe; coon, 20 to 75c; rats, fall, 7c. to 10c.; kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

HIDES.—There was some expectation of a change in quotations of hides this week, and the usual Monday meeting of the Dealers' Association was postponed till to-day, but it has been decided to make no present change in beef hides, which are being bought on the basis of 8c. per lb. for No. 1. Lambskins will be advanced next Monday to 15c. each; calfskins are 10 and 8c. per lb. for Nos. 1 and 2, respectively; sheepskins $1 to 1.10 each.

GROCERIES.—Refiners to-day decided on a slight advance in sugars, and the factory price for standard granulated is now 4 7-16c., Austrian refined 4 3-16c., yellows range from 3 9-16 to 4c. In European centers there has been increasing firmness in raw beet sugars, owing to the probabilities that quite a considerable proportion of the supply of raw cane sugars will not be available for some time owing to the Spanish-American war, as expectations from the Philippine Islands and Cuba cannot be expected for some time to come. A few small lots of German refined, aggregating 700 or 800 bags, are reported in first incoming Hamburg steamers. Molasses is firmer by a cent, owing to the closing of the Porto Rico market, and cost of Barbadoes is now figured at 18c. per wine gallon, in bond. The demand for teas from local jobbers is light, but some further considerable shipments are reported to the United States, not only of Japans, but also blacks and Pingsueys. and local agents of large tea houses doing business in leading American cities, report advices from their principals that an active business is being done at prices above the level here. The China and London tea markets are without special feature; in the latter city Ceylons and Indians are reported easy. Local agents for California dried fruits report a good seasonable demand for raisins, with decided firmness in first-class goods, which are scarce. Prunes are distinctly firm. The crop of apricots, owing to frost damage, it is estimated will be only equal to that of 1896, which was an off year.

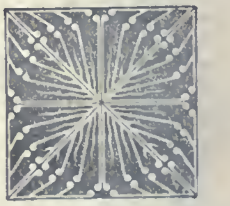
LEATHER.—In the local market the situation is without special feature, though in American centres a firmer feeling is reported, and in Chicago hides have shown material advance, with some considerable scarcity reported. Some moderate demand for stock for fall goods is shortly looked for from shoe manufacturers of moderate calibre, who cater altogether to the jobbing trade. We quote: Spanish sole B.A., No. 1, 24 to 25c. do. No. 2, 22½ to 23½c.; No. 1 ordinary Spanish, 23 to 24c.; No. 2, 20 to 21c.; No. 1 slaughter, 27 to 28c.; No. 2, do., 24 to 25c; common, 20 to 21c; waxed upper, light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 20 to 21c.; juniors, 18 to 20c.; calf-splits, 30 to 35c.; calfskins (35 to 40 lbs.), 60 to 65c.; imitation French calfskins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 24c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; buffed cow, 12 to 14c.; extra heavy buff, 15c.; pebble cow, 13 to 13½c.; polished buff, 11 to 13c.; glove-grain, 12 to 13c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

YOUR LASTING SATISFACTION

Will be sure it you decide to use our

Metal Ceilings

They are rapidly superseding all other styles of interior finish, because they give better results.



One of many Designs

They are permanently beautiful, fire-proof and hygienic—suited to any room of any building, and economical in price.

Mail us an outline showing shape and measurements of your ceilings and walls, and we will send an estimate with full information about this popular metal finish.

METALLIC ROOFING CO., LIMITED,
1178 King St. West, Toronto

Metals and Hardware.—Bullet-making material is dearer, pig lead being cabled 17s. 6d. the ton higher in Europe, though the advance in American is not so pronounced as yet. Spain is one of the largest producers of this article, which has been advanced on spot to $3.75. Antimony is advanced to a very marked degree, cable quotations being £4 higher the ton, and copper also is noticeably stronger. In pig iron there is nothing specially new. Importations of Scotch iron are small; about 600 tons of Summerlee is reported on first vessels, and is being quoted at $17.50 in fair lots ex-wharf. No noteworthy sales of domestic pig iron are reported since last week. Sales of Canadian bars are reported from mill at $1.40. Tin plates are firmer, owing to the Colliers' strike in Wales, and a leading importer reports having to pay an advance of sixpence a box for prompt shipment. Canada plates, of which considerable lots are due by early steamers, are likely to be firmer from the same cause. We quote: Summerlee pig iron, $17.50 to $18; Carron, No. 1, $18; No. 3, $17.25; Ayrsome, No. 1, $17; No. 3, $16.50; Shotts, $17.25 to $17.50; Carnbroe, $16, ex-store; Ferrona, No. 1, $15 to $16; Hamilton No 1, $15 to $15.50; No. 2, ditto, $14 to $14.50; machinery scrap, $14 to $15; common ditto, $12 to $13; bar iron, Canadian, $1.40 to $1.50; British, $2 to $2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas, $2.40; Terne roofing plate, 20x28, $5.75 to $6; Black sheet iron, No. 28, $2.25; No. 26, $2.15; No. 24, $2.05; No. 17, $2; No. 16 and heavier, $2.15; tin plates—Bradley charcoal, $5.60 to $5.70; charcoal, I.C., Alloway, $3.15 to $3.25; do., I.X., $3.90 to $4; P.D. Crown, I.C., $3.60 to $3.75; do., I.X. $4.50; Coke I.C., $2.90 to $2.95; do., standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2.70; galvanized sheets, No. 28, ordinary brands, $4; No. 26, $3.75; No. 24, $3.50 in case lots; Morewood, $5 to $5.10; tinned sheets, coke, No. 24, 5½c.; No. 26, etc., the usual extra for large sizes. Canadian bands, per 100 lbs., $1.65 to $1.75; English hoops $2 to $2.15. Steel boiler plate, ¼-inch and upwards, $1.85 to $1.90 for Dalzell, and equal; do., three-sixteenths inch, $2.50; tank iron, ¼-inch, $1.50; three-sixteenths do., $2; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to $2.50; Russian sheet iron, 9c.; lead, per 100 lbs., pig $3.75 to $3.80; sheet, $4 to $4.25; shot, $6 to $6.50; best cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel, $2.25; ingot tin, 16½c. for L. & F.; Straits, 16 to 16¼c.; bar tin 17c.; ingot copper, 13 to 13½c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.75; Veille Montagne spelter, $4.75 to $5; American spelter, $4.50; antimony, 9½ to 10c.

Oils, Paints and Glass.—The feature of the week is the receipt of cable advice announcing a strong advance in all lines of dry leads, equal to about £1 a ton. The Leadgrinders' Association is expected to shortly make a revision of prices in consequence. Turpentine is again lower a peg, the present quotation being 47c. per gallon by the single barrel, but linseed oil has scored an advance, the figures now being 52c. for boiled and 49c. for raw in jobbing lots. Other lines are without change. The movement continues a good onc. We quote: Turpentine, one to four barrels, 47c.; five to nine barrels, 46c.; net thirty days. Linseed oil, raw, one to four barrels, 49c.; five to nine barrels, 48c.; boiled, one to four barrels, 52c.; five to nine barrels, 51c., net 30 days; olive oil, machinery, 90c.; Nfld. cod, 35 to 37c. per gal.; Gaspe oil, 30 to 32c. per gal.; steam refined seal, 45 to 47½c. per gallon in small lots. Castor oil, 9 to 9½c. as to quantity. Leads (chemically pure and first-class brands only), $5.37½; No. 1, $5; No. 2, $4.67½; No. 3, $4.25; No. 4. $3.87½; dry white lead, 4¾ to 5c.; genuine red do., 4¼c.; No. 1 red lead, 4c.; Putty in bulk, bbls., $1.65; kegs, $1.80; bladder putty, in bbls., $1.80; smaller quantities, $1.95; 25 lb. tins, $2.05, 12½ lbs., tins, $2.30. London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to $1.75; yellow ochre $1.25 to $1.50; spruce ochre, $1.75 to $2. Paris green, 50 and 100 lbs. drums 15c, 25 lb drums, 15½c.; 1 lb. cartoons, 16c.; pound tins, 16½c.; window glass, $1.40 per 50 feet for first break; $1.50 for second break; third break, $3.10.

We offer at par, subject to allotment: TORONTO, April 25th, 1898.

$70,000 5 Per Cent. 20-YEAR FIRST MORTGAGE BONDS

Of the Belleville City Railroad.

Interest payable Semi-Annually, on the first day of May and November. Coupons payable at the BANK OF MONTREAL, Toronto. Bonds of the Denomination of $100 each, dated April 25th, 1898. The Bonds being secured by a First Mortgage Deed, made to the TRUSTS CORPORATION OF ONTARIO, on the entire Plant, Franchise, Property and Extensions to be made of the BELLEVILLE TRACTION COMPANY, LIMITED, of Belleville, Ontario.

Subscriptions will be received for the above issue in amounts to suit purchasers, according to Application Blank below.

PRESENT ROAD AND EQUIPMENT, BUILT IN 1895.

Two miles of track have already been laid ; the construction is first-class.

ROAD-BED.—Macadam stone ballast.

TIES.—2,640 to the mile, hemlock, cedar and tamarack, in good condition.

RAILS are bonded with copper wire and cross-bonded every 125 feet.

POLES.—Thirty feet seven inch top cedar poles in good condition, set in rock five feet or dirt six feet, 100 feet apart on tangents, twenty feet apart on curves, all in good alignment.

OVER-HEAD CONSTRUCTION.—Span work in good condition, guy and span wire ½ in. stranded galvanized wire iron, trolley wire—O—copper.

POWER-HOUSE PROPERTY.—The buildings are situated on the banks of the Moira River and are in good repair. **The Company own the property, which includes one of the best mill sites on the River, capable of generating easily 100 H.P. for eight or nine months of the year.** The buildings on the property consist of stone power-house 40 x 50; boiler-room 30 x 60, separated from engine-room by stone wall; storehouses 40 x 15, attached to main building, square brick stack, sixty feet set in stone foundation, flue thirty inches square, base five feet square; a double two-story brick house; a one and a half story brick house.

POWER-HOUSE EQUIPMENT.—One cross compound Brown engine, 13 x 20 x 30 ; independent jet condenser, 6 x 9 x 12; one horizontal tubular boiler, 62 x 14 x 3 tubes; brick foundation and setting; one vertical boiler, 30 x 5; one duplex steam pump; all necessary piping, valves and belting; one Canadian G. E. generator. 100 K.W.M.P., 650 revolutions, 500 volts; one slate panel switch board, complete, 200 amperes, 500 volts. The **present power-house equipment is amply sufficient** to furnish more power than is **necessary for the proposed extension.**

CAR EQUIPMENT.—One twenty-one feet closed motor car, equipped with two twenty-five H.P.G.E. 800 motors and two series parallel controllers, Brill No. 21 truck; one sixteen feet closed motor car, same as above; two ten-bench open cars, converted into motors. The proposed extension will necessitate the building of about three miles additional road, which it is intended to do in the most substantial manner and to equip it with the most modern and improved car service.

FRANCHISE.—The franchise is **for twenty years**, with the right of renewal **for twenty years longer**; gives exclusive right on all the roads and bridges, and **exempts the Company from taxation**; does not require to pay any percentage of the receipts to the City, and allows the road to cease operations during the months of December, January, February and March, if not considered paying by the management. The charter gives the Company permission to run excursion boats.

BONDS.—The proceeds of the sale of bonds are to be used in building **three miles of extensions**, purchasing **closed and excursion cars** of the latest improved pattern, to accommodate the increased business of the Company, erecting a car-house, re-laying the present two miles with steel rails, building a **dam** across the River Moira, paying off a floating indebtedness, and either purchasing or leasing thirty acres of land and fitting up for a park, as hereafter mentioned.

EXTENSIONS AND IMPROVEMENTS.—It is proposed to extend the line from Front Street West to the proposed Park and Cemetery, which will run, nearly the whole way, through a thickly settled section, and will have on the route the Government Institution for the Deaf and Dumb, the Mineral Baths and the Agricultural Grounds.

There are no parks at present in Belleville, but within three miles from the centre of the City, on the shore of the Bay of Quinte, is situate the Belleville Cemetery. Adjoining the Cemetery, on the City side, the Company have selected about thirty acres for a park, one of the most charming spots on the bay. This thirty acres is to be fitted up with half mile horse and bicycle track, cricket crease, lacrosse and baseball grounds. A large pavilion for refreshments and general amusements is to be built.

RECEIPTS.—At present, only two miles of track being laid, with termini at the railroad depot and steamboat dock, the residential portion of the city is not reached, and the receipts are derived from these connections only.

As shown by the books of the Company, from this patronage was realized for the two complete years it has been in operation $11,138.42, an average per year of	$5,569 21
It is estimated that the revenue to be derived from the extension—	
Park and its attractions (only estimating twenty days for special attractions and 750 attendance)	$3,740 00
Car service	1,500 00
Average daily attendance to park and cemetery, May to October, 130 days, 300	3,900 00
Ordinary traffic outside of park and cemetery, per day, $7.50, 300 days	2 250 00
	$16,959 21
As shown by the books of the Company, the running expenses for the two years have been, per year	$4,036 00
Additional expense for fuel to new increased car service	936 00
Additional help, 312 days	1,248 00
Contingencies	1,000 00
	$7,220 00
When the dam is built (which it is proposed doing at once) it will save $8 per day in fuel, for eight months at least, say 200 days	1,600 00
	$5,620 00
The estimate, which has been carefully gone into, is very conservative and based on the lowest possible results, showing a net profit of	$11,339 21
Interest on $70,000 issue of 5% bonds	3,500 00
Net after paying all charges	$7,839 21

We have carefully examined the above figures and certify that the receipts for the last two years are correct, also believe that the estimate as to future earnings and expenses are conservative.

(Signed)
S. S. LAZIER, Local Master of Supreme Court.
CAMERON BROWN, Manager of the Daily Sun Publishing and Printing Co.
JOHN J. B. FLINT, Police Magistrate of the City.
DAVID B. ROBERTSON, City Clerk.

Dated Belleville, April 7th, 1898.

BELLEVILLE.—The City of Belleville, in the County of Hastings, with a population of about 12,000, is situated on the Bay of Quinte, about 120 miles from Toronto and 200 from Montreal.

It is a thriving, busy place, surrounded by excellent farming lands, and has one of the best markets in the Province.

The buildings are principally of brick and stone, the private residences being superior to those in places of much larger size.

The streets are broad, good macadamized roads, and the principal sidewalks are concrete.

It has an excellent system of water supply, gas and electric light.

Shops of the Grand Trunk Railway are situated here. Belleville being a divisional point of the road.

The railway depot is located at the North-East part of the City, about one and one-half miles from the main centre of Front Street (the principal business thoroughfare), and is about two miles from the steamboat dock.

The following places are worthy of notice: Three Colleges, one Government Institution for the Deaf and Dumb, three Daily Newspapers, three Foundries, two Canning Factories, four Flour Mills, one Tinware Factory, three Cabinet Factories, one Furniture Factory, one Paper Mill, one Carriage Factory and one Woolen Mill.

Yours respectfully,

WYATT & CO., Member of Toronto Stock Exchange,
Canada Life Building, Toronto

E. L. SAWYER & CO.,

BELLEVILLE TRACTION BONDS.

FORM OF APPLICATION.

WYATT & CO. or E. L. SAWYER & CO.,
CANADA LIFE BUILDING, TORONTO, Ont.

☞This Form should be mailed to
E. L. Sawyer & Co., Toronto, Ont.
or Wyatt & Co., Toronto, Ont.

GENTLEMEN:

I request that you allot me .... Bonds, of the par value of $100 each.

This is in accordance with your prospectus, issued the 25th day of April, 1898, wherein you offer the bonds of the Belleville Traction Company, Limited; and I agree to pay for said Bonds on Allotment. I also agree to accept any lesser amount that may be apportioned me.

The Bonds can be paid for either by remitting direct to our Bankers, the BANK OF MONTREAL, or authorizing us to draw through your Bank, with Bonds attached to draft.

Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co.,

Extended Insurance

IS granted by the Unconditional Accumulative Policy of the Confederation Life Ass'n. Under this provision the full amount of the policy is, in the event of the non-payment of the third or any subsequent premium, extended as a term insurance, and the policyholder is held fully covered for the full face value of the policy for a term of years definitely stated therein.

Paid-up and Cash Values are also guaranteed.

Rates and full information sent on application to the Head Office, Toronto, or to any of the Association's Agents.

leaves his family anywhere near money enough to continue the comforts he has educated them to need and expect. This suggests immediate action on their part, in the direction of Life Insurance.

The Commercial Policy
OF THE

North American

Life Assurance Co.

furnishes safe and legitimate insurance at a low cost, thereby enabling business men to build up an estate for their dependents, which otherwise might be left undone.

Head Office, TORONTO

For full particulars address...
Wm. McCabe,
Managing Director.

British Empire Mutual Life Office

The Fifty-first Annual Report has just been issued. During 1897 the premium income reached $1,354,061, and the interest income $495,086.

The total business in force was $43,486,000 under 25,688 policies.

The cash bonus distributed last year amounted to $135,709; and besides this handsome sum there was a bonus reduction of premiums.

The next division of profits in this strong mutual company will take place in 1900.

Head Office for Canada,
MONTREAL, QUE.

THE

Difference

The difference in taking down a section of line shaft, removing couplings, etc., and putting on solid iron pulley and then putting all back in place, and in putting on a "REEVES" Patent Wood Split Pulley, leaving the shaft unmolested, will in nearly every case pay for the "REEVES" entire.

R. O. McCULLOCH, The Goldie & McCulloch Co., Limited, GALT, ONT. R. B. OSBORNE, General Superintendent.

CONDUCTS A SYSTEMATIC INTERCHANGE OF EXPERIENCE IN CREDITS BETWEEN WHOLESALE MERCHANTS AND MANUFACTURERS SELLING GOODS TO THE RETAIL TRADE.

THIS COMPANY IS NOT A COLLECTION AGENCY,

AND DOES NOT ATTEMPT TO FURNISH INFORMATION NOW BEING SUPPLIED BY OTHER AGENCIES OR SYSTEMS

IT IS ECONOMY TO EQUIP THE CREDIT DEPARTMENT WITH ALL MODERN METHODS, WHICH EXPERIENCE AND GOOD JUDGMENT DEMONSTRATE ARE USEFUL IN PREVENTING LOSSES BY BAD DEBTS.

The following are among many Testimonial Letters received from Members

MONTREAL, April 5th, 1898.

THE CREDIT EXCHANGE, Limited,
Bell Telephone Building, CITY.

Dear Sirs,—We find your reports carefully compiled and of great value to us. Already they have saved us five times their cost, and we should think no wholesale house in the Dominion could afford to be without them.

Yours truly,
THE WHITHAM SHOE CO., Limited.
Per B.

HAMILTON, Ont., March 30th, 1898.

CREDIT EXCHANGE, Limited,
TORONTO, ONT.

Dear Sirs,—We have been subscribers of yours since you began business, and we beg to express our satisfaction at the information you have furnished us so far in response to our applications. We believe you have struck the right principle, and that the plan of each subscriber contributing his quota of information concerning a customer and receiving the benefit of the experience of many, is unquestionably a sound one. The information furnished has materially helped us in crediting.

The further success of your venture must materially depend upon further additions to your list of subscribers, and we sincerely hope that you will be able to get all the prominent wholesale and manufacturing firms of the country to see the benefit of assisting in your enterprise.

We are, yours truly,
W. E. SANFORD MANUFACTURING CO., Limited.
Per J. GREENE, Sec.-Treas.

TORONTO, April 5th, 1898.

Messrs. THE CREDIT EXCHANGE, Limited.
TORONTO, ONT.

Gentlemen,—As you desire from us our opinion of the merits of your system, since we have become the pioneer subscribers in this city, would say that since we have seen it in practical operation we have become more convinced than ever that it possesses many advantages over the other systems in general use in this city.

The great benefits that must accrue to merchants by the general adoption of your scheme, and the fact that the information they obtain represents the actual state of affairs, instead of surmises, must certainly commend itself to all business men, and we feel when this is fully realized that it must supersede the other systems now in use.

Yours truly,
THE DAVIDSON & HAY, Limited.
WM. LOGAN, Sec.-Treas.

TORONTO, March 28th, 1898.

CREDIT EXCHANGE, Limited,
CITY.

Gentlemen,—Our experience of your reports, so far as it has gone, has been quite satisfactory; in fact, we have come to value them very highly. As soon as you get all the representative houses on your list of subscribers, it should be next to impossible for retailers who are insolvent to continue in trade. We have, in more than one instance, been saved money by information received from you.

Yours truly,
GORDON, MACKAY & CO.
Per J. W. WOODS.

DECISIONS IN COMMERCIAL LAW.

DAVIDSON v. COCHRANE.—Mrs. Cochrane kept a savings bank account, and desiring to transfer it to her son, wrote in her pass-book an assignment of the money in his favor. She notified neither the son nor the bank of this action, but left the book with a third party to be handed to the son on attaining his majority. Held, that the assignment was incomplete and the money remained the property of the mother. In cases of alleged gift, the test is whether everything has been done that is required in law to be done to transfer the property. If not, the gift is incomplete, the property is still in the alleged donor, and the court will not assist or volunteer to complete what is lacking.

MACDONALD v. LAKE SIMCOE ICE CO.—The cutting of a channel through ice formed on a water lot in a harbor to enable ice cut outside of such water lot to be conveyed to the ice house of the defendant company situated on the shore of the harbor, is a use of the said water lot for the purposes of navigation. The owner of such water lot, whose grant was subject to the rights of navigation, cannot interfere with such user.

MAIL PRINTING COMPANY v. CLARKSON.—An advertising contract made between Messrs. Samson, Kennedy & Co. and the Mail Printing Company gave the advertisers, in consideration of the sum of $1,000, the right to use certain advertising space in newspapers owned by the Mail Company, at any time within twelve months. The advertisers agreed to pay at the end of each month for the space used in that month, and at the expiration of twelve months, whether the space had been used or not, to pay $1,000, less such sums as might have in the meantime been paid. Before having used any space acccording to the contract, and before the expiration of the twelve months, Messrs. Samson, Kennedy & Co. made an assignment for the benefit of creditors pursuant to R.S.O., cap. 124. Held, reversing the judgment of Boyd, C. that the $1,000 would not necessarily become due by effluxion of time, and that the newspaper could not rank on the estate. Thus, where an estate is being admininistered under the Assignment and Preferences Act, R.S.O., cap. 124, claims depending upon a contingency cannot rank, but only debts strictly so called.

ANDREW v. CANADIAN MUTUAL LOAN CO.—The company held a sum of money as deposit to the credit of the plaintiff. In an action to recover this it was shown that the whole amount had been paid into court and to the creditors of another person of the same name under garnishee judgments in a Division Court without any knowledge of the mistake being made. Held, that this did not protect the defendants, and that sec. 195 R.S O., 1887, c. 51, only protects a garnishee against being called upon by a primary debtor to pay over again and does not protect him against any third person.

AT Rat Portage, Ont., on Friday of last week, the ferry boats were running and navigation was expected to be open by 2nd May. Tenders were in for the waterworks system, but who has the contract was not made public. Plans are made for a three-story Government building for Rat Portage. A "big mining deal" is mentioned, which is to have an important effect upon the mining affairs of 1898, but the Free Press correspondent mysteriously says he is not allowed to mention any particulars for publication.

Society's Present and Near-by Events

Gentlemen will have in mind the Horse Show and the not-too-far-away date of the O. J. C., races, in placing orders for clothing so as to be dressed becomingly for such occasions and withal have garments made that will not cease their usefulness after such events have passed.—This space will not allow of any description of what should, ought and will be worn, but it will be satisfactory information to know that Henry A. Taylor, draper, the Rossin Block, has made special note of correct dress for such times and a consultation with him will preclude the possibility of one going unbecomingly garbed, and that he has a specially wide range of high-class woolens in suitings and overcoatings bought specially with such events in view.

Mercantile Summary.

A NEW industry is to be established at Lockeport—a factory for canning dried codfish.

THE finance committee of the Guelph council has struck a rate of 24 mills in the dollar.

IT is likely that the Beaver Line steamer "Lake Ontario" will be sold to the United States Government.

CUSTOMS returns at a number of Canadian cities for April show decreases compared with 1897. Montreal's, for example, fell off from $626,029 to $538,894; St. John's, too, showed a decline.

THE executors to the estate of the late Thos. Hessian, carrying on for a long period a confectionery and fruit business in Halifax, N.S., under the style of Hessian & Devine, are endeavoring to settle liabilities of $10,200 at 25 cents on the dollar.

AN assignment has been made by the Pratt Manufacturing Co., of Montreal, being an ordinary partnership composed of several brothers, engaged in the manufacture of dies, etc. The liabilities are $2,519, with nominal assets in machinery, etc., of $4,900.

A MEETING of the creditors of G. H. Megloughlin, dry goods merchant, of Ottawa, was held on Friday last at the office of Mr. P. Larmonth. Mr. Larmonth was confirmed as assignee and directed to sell the stock either by tender or public auction. The liabilities amount to $5,000 and the assets $4,500.

THE Fort MacLeod Gazette tells its readers that the Crow's Nest Coal Company is actively preparing to develop its mines at Coal Creek. All the machinery is ready to ship and coking ovens, etc., are in course of construction, and only waiting for the completion of the railway to place coal and coke on the market.

WE learn that Mr. W. J. McBride, hardware merchant, of Toronto Junction, has sold out his large and well-established business at the corner of Dundas and Keele streets to Mr. Edwin R. Rogers, late of Calgary, Alberta Mr. Rogers resided in Toronto formerly, and was engaged in the hardware business in Uxbridge, Winnipeg and Calgary, at different times.

OUR traveler, Mr. T. G. Oliver, writing from Smith's Falls this week says: "This is a bright and prospering place. Its name is derived from the noted falls on the Rideau River, and it is very prettily situated. It is also to-day one of the noted manufacturing towns of Ontario, especially for agricultural machinery and implements. You know, of course, that Frost & Wood have one of the largest establishments of this kind in the Dominion here. Their shops, foundry and offices cover a large area, and they give employment to 225 hands. Several additions have lately been made to the premises and they have all they can do, especially in filling the numerous orders for harvesting machinery. A merchant, who has been foundryman and machinist at the falls some 21 years, is J. H. Gould. He has lately added a large building to his establishment. He makes ploughs, harrows, cultivators, etc., which are distributed over a large extent of country." Mr. Oliver also mentions the Malleable Iron Works, and two large flouring mills, one of them Robinson & Crate's, turning out some 150 barrels daily.

Publishes each issue ESSAYS ON ACCOUNTING PRACTICE IN LEADING ESTABLISHMENTS in various industries; SHORT ARTICLES ESPECIALLY ADAPTED to the wants of BEGINNERS in office work; REVIEWS AND CRITICISMS of books on accounting and business subjects, written in a way to correctly describe the works; LETTERS OF EXPERIENCE from ACCOUNTANTS AND OFFICE MEN, QUESTIONS AND ANSWERS of interest to subscribers, NOTICES OF MEETINGS and BRIEF REPORTS OF PROCEEDINGS of leading ACCOUNTANTS' AND BUSINESS MEN'S ASSOCIATIONS; ILLUSTRATED DESCRIPTIONS of the BEST and NEWEST devices for OFFICE EQUIPMENT; brief EDITORIAL LEADERS ON TOPICS OF THE MONTH or interest in accounting and office circles; PORTRAITS OF EMINENT ACCOUNTANTS, with BIOGRAPHICAL SKETCHES; ACCOUNTING MISCELLANY, etc.

Monthly. $1 a year. Ten cents a copy.
ACCOUNTICS ASSOCIATION, Publishers,
262 West Broadway, New York

Mercantile Summary.

THE Canadian Pacific Railway Company is engaging a number of men for the construction of the new docks at Fort William.

LAST Friday's St. John Sun says that L. G. Crosby, who shipped from that port to the British West Indies by the steamer "Duart Castle," some days since, 3,000 barrels of Canadian flour, received from Barbadoes, a cable enquiring if he could send down a full cargo of 8,000 or 10,000 barrels.

STREAM driving on the Miramichi river, of New Brunswick, had not commenced when the St. John Telegraph, of 30th ult. went to press. The rain then falling was expected, however, to swell the streams to driving pitch. "The several operators have stream driving crews in the woods, awaiting a rise of water."

NEWS from Truro, N.S., last Saturday tells of the assignment of J. P. Archibald & Co., dealers in hats, furs and men's furnishings. The firm was interested in a fire cracker business in Boston, which the war forced to go into liquidation. This affected the Truro business, which had been prosperous. The firm makes preferences amounting to $38,000, the heaviest being the Merchants Bank of Halifax for $25,355.

AN unusually large fleet of Newfoundland vessels will engage in the codfishery on the Grand Banks this summer. The belief is general among the owners of the vessels that the war between Spain and the United States will result in driving American fishing vessels off the Banks, from fear of capture by Spaniards, thus throwing a practical monopoly of the fishery into the hands of the Canadians and Newfoundlanders.—Sydney Advocate.

A GENERAL dealer of Church Point, N.B., named A. J. Davidson, is reported an absentee. His real estate is mortgaged, and he apparently sold off as much stock as he could before leaving. He seems to have left quite a fair amount of unsettled debts behind him.——J. H. Parsons, of Fredericton, N.B., fish dealer, etc., has assigned to the sheriff for the general benefit.——W. A. Copp, senr., a trader of Hopewell, in the same Province, has assigned, with small liabilities.

FOR a second time the courts have decided in favor of the company, the much-discussed case of the Water and Power Company and the city. The Court of Appeals has upheld the judgment of the Superior Court, which maintained the sufficiency of the company's tender and rejected the city's claim. The situation is not unlike that which the electric conduit case raised, and in which, in obedience to a presumed popular clamor, the city went from court to court, only to find that law, as well as common sense, was against it. The time has come for taking a business view of this water case, and for stopping further useless legal proceedings.—Montreal Gazette.

FROM the Rossland Miner of April 21st we learn that Messrs. Julius Price, artist for the Illustrated London News, and Lionel W. Harris, special commissioner for the London Financial News, are in Rossland Camp. Their mission is to take pictures of the interesting features, and to write up our mining and other resources. These gentlemen have visited the celebrated mining districts of South Africa, and are familiar with the mines of West Australia and other parts of the world. We are greatly pleased at this evidence of interest taken by English people in the Kootenay country. It is a compliment to any district to have an artist sent by a paper of the high standing of the Illustrated London News to report upon and sketch it.

ONTARIO letters patent incorporate Ezra H. Thomas and others, broom makers; C. G. Hulet, and others, general merchants, as the E. H. Thomas Co., of Norwich, Limited, to take over the business of H. E. Thomas & Co., to make brooms and woodenware, and deal in fire appliances, etc.; capital $45,000. The Elliott & Brooke Company, Limited, capital, $40,000, is incorporated in Ontario to make paper, wood, tin and other boxes, and to take over the business of David Elliott, of Toronto. The parties are David Elliott, John I. Davidson, Harold J. Brooke, of Toronto; John Elliott and Wesley Elliott, of Kendall, in Durham county. The Wentworth Growers Canning and Preserving Co., Limited, capital, $24,000, is formed to can, preserve and pack fruits, vegetables and meats, composed of four Hamilton, and seven residents of East Flamboro.

SATISFACTORY accounts are given of the first attempt at champagne making in Ontario. An expert at the business was brought out some years ago from the champagne district of France by the proprietors of the Vin Villa vineyards of Pelee Island, in Lake Erie, and we understand that the first lot of what they have named "L'Empereur" champagne has been put upon the market. It is of the vintage of 1894; the wine was made on the island, and ripened at the company's warehouses in Brantford, under the natural fermentation in bottle process. Messrs. J. S. Hamilton & Co. are to be congratulated on this forward step in native wine manufacture. They have been successful in still wine making, as many customers attest, and connoisseurs say that "L'Empereur" champagne is a creditable product, and likely to meet with popular approval.

EDMONTON is giving evidence of growth in activity and business promise. A three-story brick building is being erected for a furniture store by Gariepy & Chessier; the Marks & Dobie Co., limited, have put up a two-story frame structure for a general store; C. Gallagher is erecting a brick shop 26 x 60 feet. An event deserving record is the opening a week or two ago of Macdougall & Secord's handsome three-story brick premises, fifty feet by eighty. The first story is fitted up in modern style for groceries, dry goods, millinery and leather goods; the second flat is for ready-made clothing, and the third floor is altogether wholesale. There are high ceilings, plate glass windows, and cedar panellings internally. The firm does an extensive fur-trading business, having trading posts at all important points between Edmonton and Fort Providence. The town is a busy one, and its growth is remarkable.

Mercantile Summarv,

LONDON city council has struck a rate of 21½ mills on the dollar.

IN St. Thomas, the rate of taxation has been fixed at 17 mills on the dollar. Last year it was 15 mills.

THE customs returns for the port of Ottawa for April were $32,346.73, as compared with $31,384.16 in April last year.

MR. JAMES MCSHANE, "the People's Jimmy," has been appointed Harbor Master of the port of Montreal, in succession to the late Captain Howard.

THE Bertram Engine Works Company will send out this week a couple more boats for traffic on the Yukon. A number of workmen will accompany the vessels, which will be put together at Vancouver.

THE steamer "Catalina," from New Orleans, April 22nd, for Barcelona, Spain, was laden with a valuable cargo of staves, the property of the Sutherland-Innes Company of Chatham, Ontario. She was seized by an American war ship, but released on Monday.

WE recently noted the failure of E. Roy & Fils, dry goods men, of Quebec city. They have succeeded in compromising liabilities of $7,700 at 50 cents on the dollar, secured, payable in 3, 6 and 9 months.——J. S. Dery & Co., shoe retailers, of the same city, who opened last fall, have assigned, after suits had been entered by four different creditors. They owe some $3,000.

AMONG the number of manufacturing industries at Toronto Junction and its neighborhood is the Wilkinson Plow Works. They have been extending their premises, and are making besides ploughs a variety of other agricultural implements, such as rollers, straw cutters, etc. They are employing at present 103 hands, and have orders for more goods than they can supply in some lines. The manager is Mr. C. G. E. Ffolkes.

ANNA MCQUEEN, wife of J. D. McQueen, has conducted a general store in Gladstone, Man., since 1888. Previous to that date her husband failed in Cape Breton. Her stock has always been, we understand, covered by a chattel mortgage to her principal creditor. This has been foreclosed and the stock sold. A receiver has taken possession of the brewery of Hewitt & Townsend at Grand Forks, B.C. This step seems to have been taken mainly owing to a dispute between the partners.

A DESPATCH from Stonewall, Manitoba, announces the finding of great belts of building stone in addition to those already known to exist. Near that place Mr. John Gunn, of Winnipeg, has made a find of stone lying only eleven feet below the surface; "the first layer is perfectly smooth, of a variegated pink color, and will answer for monumental purposes. The lower belts are varied in thickness, generally of a blue-buff color, and can be cut into immense blocks, being easy to chisel."

ABOUT four years ago G. F. Carey, jeweller, Aylmer, got into trouble through counterfeiting. After he had made amends for this, his father left him money, and he started business some years ago, but without success. He has this week made an assignment. — In Jan., 1897, W. H. Paulin, who had been a clerk in Owen Sound, went to Simcoe, where he opened a stove and tin shop. In the month of May following he mortgaged his chattels. Creditors are now offered 30 per cent. of their claims. He owes $2,000, and has nominal assets of half this sum.——John Hamilton, merchant at Blenheim, assigns.

The Gurney-Massey Co., Limited, Montreal

Gendron and Reliance BICYCLES

Are made to meet a two-fold requirement—

TO APPEAR WELL and
TO WEAR WELL . . . . —A Strong Testimony

The only Canadian wheel to compete against the world's greatest cyclist, Jimmie Michael, was a **GENDRON**, winning the mile heat in the record time of 1.53 2-5, on the Island Track, Toronto

The first 100-mile championship road race ever rode in Canada was won on a **GENDRON** at Chatham, July 3rd, 1897.

The wheel selected for the World's Championships at Glasgow, Scotland, in 1897, by the Canadian representative, was a **GENDRON.**

The only wheel that ever captured first, second and third prizes in an annual Dunlop 20-mile road race was the **GENDRON**, fitted with "**Buckeye**" Tires.

The only wheel to win three out of four Dunlop 20 mile road races was the **GENDRON**, fitted with "**Buckeye**" Tires, London, 1896; Winnipeg, 1896; Toronto. 1897.

The only wheel to be ridden by 25 riders out of 28 in a bicycle club race was the **GENDRON.** The "Ramblers" of Toronto, 10-mile handicap, 1897.

The only wheel to win 50 prizes out of a possible 100 in an annual R. Q. T. 20-mile road race was the **GENDRON**, fitted with "**Buckeye**" Tires, 1897.

The only wheel to win the Kingston 20-mile road race in 897 was the **GENDRON**, fitted with "**Buckeye**" Tires.

The 5-mile Canadian championship was won in 1897 on a **GENDRON.** All the Manitoba championships were won on the **GENDRON**, fitted with "**Buckeye**" Tires.

Every track race rode in Hamilton last year was won on **GENDRON** wheels ridden by Barnes and Isbister.

Every other race of any importance last year was won on the **GENDRON**, fitted with "**Buckeye**" Tires.

Many other important achievements of the Gendron wheel have to be omitted for want of space.

The Gendron Manufacturing Co., Limited
TORONTO

Mercantile Summary.

The first raft of logs of the season left Fredericton, N.B., last Monday, being towed down the St. John River by the tug "Bismarck."

Growth of business, in Winnipeg, is shown by the bank clearings. These were $4,032,000 in April, 1896; $4,162,000 in April 1897, and $6,240,000 in April this year.

A despatch from Sydney, C.B., reports the assignment of McDonald, Hanaharn & Co., general merchants. Their liabilities are placed at $15,000; nominal assets, $21,000.

A professional accountant, writing on the subject of bookkeeping to the London Grocers' Gazette, states that he has known in his experience many thousands of good, honest traders to be ruined simply through omitting to keep a regular set of books, and through falling into the error of estimating their profits, and regulating their private expenditure in conformity.

The Merchants Cotton Co., Montreal, which is putting in a number of revolving-top flat cards, drawing frames, roving machinery and mules in its present mill, has placed its entire contract for the equipment of its new mill in course of erection for fifty carding engines. forty roving frames, with drawing frames and mules, in the hands of the Boston agent of an English firm of manufacturers.

The Woodstock, N.B., Board of Trade protests strongly against freight rates on the C P.R. One merchant, it says, paid $160 on a carload of goods from Galt, Ont. As it weighed 12 tons, he points out that this was about 75 . per 100 lbs. The Board has adopted a resolution to memorialize the Federal Government to see that freight rates are regulated according to mileage, by the appointment of a railway commission.

An abandonment of her estate has been made by Dame Helen Warren, of Murray Bay, Que., doing business as H. Dupour & Co., as general merchants and dealers in spool wood. A meeting of creditors is called for May 11th. The liabilities are stated at about $7,000. — Mr. Hypolite Dupour has been in business at Murray Bay for some years, but not very successfully, having failed before some five years ago, since which time he has made use of his wife's name.

When a young man, some twenty-six years ago, W. A. McCollum opened a drug store in Tilsonburg and for a considerable time prospered. In January of the present year his statement showed a surplus of $15,000. About that time a loan company issued a writ against him in connection with real estate operations, and after it obtained judgment he assigned. For some time past Mr. McCollum has locked some capital in operations along with his brother in pine lands in Michigan.

There are only two failures to be noticed in Toronto this week, which is again a light record. A commission business was started here by S K. Moyer, in a small way, eleven years ago. Afterward he moved into larger premises and opened a wholesale fruit store. Although he did a good trade, he appears to have been, as a business man, somewhat easy-going, and allowed a large accumulation of debt to creep into his books. The result is only what would be expected under such circumstances—an assignment. He owes $12,000. It is not likely that the estate will be able to pay more than 40 per cent. — The assets of Lauder Bros., brass founders, have been sold by a bailiff.

THE shoe stock of Wm. Davis, Ingersoll has been sold at 71⅓ per cent., and the clothing stock of J. O. Peck, Windsor, realized 50½ per cent.

THE St. John Globe states that Macdonald, Hanrahan & Co., general merchants at Sydney, C.B., have assigned to Mr. C. D. Jones, of St. John. It is expected they will pay their liabilities in full.

Tenders for Loan.

Sealed tenders marked "Tender for Loan" addressed to the Town Clerk of the Town of Chatham, N.B., will be received up to noon of the

16th Day of May Next

for the purchase of bonds of the said town to the amount of $10 000, or any portion thereof.

The above is the first $10,000 of the second issue of bonds of $20,000 authorized by the Act of the General Assembly of New Brunswick at the past session, are redeemable in 40 years, and are in denominations of $500 each, bearing interest at 4 per cent. per annum payable semi-annually at the office of the Town Treasurer

The highest or any tender not necessarily accepted.

Dated at Chatham. N.B., the 5th day of April, 1898.

WARREN C. WINSLOW, Mayor.
JAMES F. CONNORS, Town Clerkt

TENDERS

Sealed Tenders marked " For Mounted Police Provisions and Light Supplies," and " Clothing Supplies," addressed to the Honorable the President of the Privy Council, Ottawa, will be received up to noon on Monday, 16th May, 1898.

Printed forms of tender containing full information as to the articles and approximate quantities required, may be had on application as follows :—

"Provision and Light Supplies," at any of the Mounted Police Posts in the North-West, or at the office of the undersigned. "Clothing Supplies," at the office of the undersigned.

No tender will be received unless made on such printed forms.

The lowest or any tender not necessarily accepted.

Each tender must be accompanied by an accepted Canadian bank cheque for an amount equal to ten per cent. of the total value of the articles tendered for, which will be forfeited if the party declines to enter into a contract when called upon to do so, or if he fails to complete the service contracted for. If the tender be not accepted the cheque will be returned.

No payment will be made to newspapers inserting this advertisement without authority having been first obtained.

FRED. WHITE,
Comptroller N. W. M. Police.
Ottawa, April 26th, 1898.

TENDERS

Sealed Tenders marked " For Mounted Police Provisions and Light Supplies, Yukon District," and addressed to the Honorable the President of the Privy Council, Ottawa, will be received up to noon on Saturday, 7th May, 1898.

Printed forms of tender containing full information as to the articles and qua tities required, may be had on application to Superintendent A. B. Perry, N. W. Mounted Police, Vancouver, B.C., or at the office of the undersigned.

No tender will be received unless made on such rinted forms.

The lowest or any tender not necessarily accepted.

Each tender must be accompanied by an accepted Canadian bank cheque for an amount equal to ten per cent. of the total value of the articles tendered for, which will be forfeited if the party declines to enter into a contract when called upon to do so, or if he fails to complete the service contracted for. If the tender be not accepted the cheque will be returned.

No payment will be made to newspapers inserting this advertisement without authority having been first obtained.

FRED. WHITE,
Comptroller of N. W. M. Police.
Ottawa, 14th April, 1898.

LAST year, says a letter from Bathurst, north-eastern New Brunswick, proved a comparative failure in lobster and salmon fishing. This year there are better hopes among the fishermen, who are making great preparations.

THE Bank of Montreal intends, according to last week's Rossland Miner, to erect a three-story fireproof building in that town, to be occupied as a banking office. Mr. Fraser, the local manager, states that the plans are being prepared.

THE STANDARD LIFE

Annual Meeting Held

THE seventy-second (72nd) ANNUAL GENERAL MEETING of THE STANDARD LIFE ASSURANCE COMPANY was held at EDINBURGH, on TUESDAY, the 19th of April, 1898.

The following results for the year ended 15th Nov., 1897, were reported on that occasion :

5446 New Proposals for Life Assurance were received during the year for	**$11,144,034**
4738 Policies were Issued, assuring ...	**8,974,551**
The Total Existing Assurances in force at 15th Nov., 1897, amounted to	**116,409,469**
The Claims by Death during the year amounted, including Bonus Additions, to	**2,799,155**
The Claims under Endowments matured during the year amounted, including Bonus Additions, to	**150,925**
The Revenue for the year ended 15th Nov., 1897, amounted to	**5,465,329**
The Accumulated Funds at same date amounted to	**42,849,647**
Being an increase during the year of	**1,734,572**

THE SITUATION.

In the destruction of the Manila squadron of Spain, the first decisive blow of the war between that power and the United States was struck. The surrender of the town must follow, as a matter of course, giving the Republic a base of operations, which will be of essential service in protecting her Pacific coast. The capture of the whole of the Spanish Philippines which is now assured, will convey to Russia the intelligence that a new power has shown its ability to make itself felt in that part of the world. The time must come when Russia and the United States will contend for the mastery in the Pacific; the contest may take a peaceful form, but it will exist not the less, in one form or another. The completion of Russia's Siberian railway will hasten the time when Russia will aim at domination in these waters. In the Philippines, the United States will probably retain at least a coaling station, which the needs of her growing commerce in that quarter of the world makes necessary. If she should desire to make herself felt in the Chinese question, the taking of Manila affirms her right to do so.

There is not universal agreement in treating coal as contraband of war, Italy deciding for herself, that the black diamond is not liable to that restriction. In 1871, Italy entered into a treaty with the United States in which, with the exception of contraband of war, both countries agreed, in the event of war between them, to exempt from seizure on the high seas or elsewhere, private property of their citizens, except in the sole case of an attempt to run a blockade. Spain decides that the war puts an end to her treaty of 1795 with the United States, though it was made to meet the contingency of war, and its vitality during the present contest would have been of essential service to her, in making coal an article of ordinary commerce.

There is probably a good deal of truth in the statement made in the American press that the Spanish race, alike in Mexico, Central and South America, is almost unanimous in its sympathy with Spain in the present war. The reason may be that, though the Monroe doctrine is avowedly in their favor, in guaranteeing them against European absorption, they do not quite see how it is going to work, now that it has reached its militant phase. The problem is not made easier of solution when Mexico and Columbia recall the fact that, in 1826, they would themselves probably have been able to drive Spain from Cuba, but for the threatened interference of the United States. It may be that the mystery that hangs over their own fate in the uncertain future makes them distrustful. What will become of Cuba appears to Spanish America uncertain; though they may not doubt the good intentions of President McKinley, they see that others already advocate the annexation of the island, and they may think that this may have a portent which has a bearing on their own destiny.

During the discussion of the submission of Prohibition to the electorate, it was made plain that the Government neither endorses nor opposes the measure; it simply undertakes to submit the question for decision at the poll. Though Prohibition would, according to the Premier, involve a loss of $7,000,000 to the revenue, the electorate will not be asked their opinion of how the loss should be made good. But Sir Wilfrid Laurier stated, in so many words, that the deficiency would have to be made up by taxes on tea, coffee or tobacco. The doubt about tobacco being able to bear more duty arises from the danger of smuggling, which even now is not unknown. In naming tea, coffee and tobacco as substitutes for spirits, in carrying the burthen of $7,000,000 of taxes, there is a certain congruity, inasmuch as all of them perform functions of stimulation akin to those of spirits. It is tolerably clear that these are the articles on which the additional taxes would have to fall, unless sugar were selected in lieu of tobacco, as a revenue necessity. And if the tobacco duties could not be considerably increased without causing a corresponding loss to the revenue by smuggling, which is more or less doubtful, sugar would also have to bear its share of the burden. An addition to the duties in that part of the tariff which, protective in its character, the Minister of Finance has taught us to regard as out of the question. Public opinion expressed at the last election compels the Government to travel in the other direction at a slow pace indeed, mainly perceptible in the incident of preferential legislation. An affirmative vote on the question of prohibition would in the same way compel the Government to act accordingly. Whether the world is to witness one more experiment in prohibition will probably be known before the next session of Parliament.

A question asked of the Government of British Columbia, in the Legislative Assembly, elicited the admission that negotiations are still going on with the Dominion Government on the question of railway connection with the Yukon. The correspondence, being incomplete, cannot be brought down. If Premier Laurier is to be taken at his word, the Dominion Government does not intend to join in the new scheme; but intentions may alter, and there is no saying what may happen. The form of the British Columbia procedure is open to the objection that it eliminates competition, and makes it impossible to get the work done on the best terms; it dispenses with the safeguards which, as a rule, all legislatures are legally bound to observe. It looks as if an attempt were being made to surprise the judgment and forestall the decision of the authorities at Ottawa, and to get the Government and the legislature into a corner from which there is no escape, except, as before, through the door of the Senate.

Owing to the recent engineers' strike in Great Britain Messrs. Peterson & Tate, contractors for the Canadian fast line of steamers, will not be ready with their first two vessels by the 21st May, as required by the agreement, and they have succeeded in getting the time extended nearly a year, to wit, till the 1st May, 1899. This is done by a supplementary contract with the Government of Ottawa. At the extended date, not only are two steamers to be ready, but all the four which are to comprise the line. The supplementary contract makes other changes. By the first agreement the draft of the vessels was not to exceed 25 feet 6 inches; by the supplementary contract the draft may be greater. This may raise a question of navigation between Quebec and Montreal, which the two cities, if left to themselves, would propose to solve in different ways. But it is too late to revert to the arrangement with which nature, unassisted, had originally much to do, and which made Quebec the ocean port and Montreal an inland port. Provision may, under the supplementary contract, be made for calling at an Irish port, but as this cannot be done without an extra subsidy, the change might be made to serve as a ground for an increase in the annual payment. One of the steamers may be kept in reserve for extra occasions; the purpose of the reserve is not quite clear without explanation. The great fact is that the fast line, in which many disbelieved, is now in a fair way to become an assured fact.

Emperor William of Germany, report comes, while agreeing with England on the Chinese trade question, objects to preferential trade between Great Britain and her colonies. If any nation had a right to object, it would be one which, like Germany, has no double tariff. But the case of Canada with her preferential tariff is by no means analagous to that of China, in which England has demanded for other countries, as well as herself, liberty to trade on equal terms. China is not a colony of any European power, and is not subject to the rule of preference or monopoly of trade on which colonies were originally founded. Relaxation of these restrictions has gone to different lengths among the nations from which colonies spring. England alone permitted complete commercial freedom. Preference in its present phase is a colonial aspiration, having had its birth in Canada. It is equivalent to a commercial treaty, and neither England nor Canada needs to make any excuse to outsiders for entering into it. At the same time we can perfectly understand the protest of Germany; it is one which her own attitude entitles her to make, but it does not follow that it deserves or is likely to prevail. As a means of infusing some little liberality into our tariff, preference is useful; in some other directions it is not wholly free from objection.

The West India Cable Company is reported to have received from Barbadoes a notification that the Government has established a censorship there "to supervise and control the forwarding of telegrams, with a view to carrying out strictly the neutrality laws." This means that the telegraph cannot be used to forward the purposes of the persons engaged in moving contraband of war from one place to another; as, for instance, the owner of a vessel arranging to meet Spanish war vessels out at sea with coal, since delivering coal in that way would be contrary to the neutrality laws; and though the business is one in which individuals may engage at their own risk, they will not be permitted the facilities of the telegraph in carrying it on.

IMPROVED ROADS IN QUEBEC.

Not only, we observe, is the spirit of emulation sought to be aroused by the Government of Quebec among the municipalities, in the matter of improving the country roads, but the spur of a material inducement is likewise being applied. The result of the special grants made last year has proved so far successful that no fewer than 77 municipalities have had their names enrolled as competitors for Government bounties; and between June, 1897, and March last 150 miles of road have been repaired by means of the special machines purchased by the Government and hired—or upon conditions given—to the municipalities for the purposes of road repair. By this time, probably, it has begun to dawn upon the minds of Quebec farmers, as it has done upon those of many Ontario rural dwellers, that *good roads pay*, and that a change from the old and stupid system of statute labor tinkering at mud roads was necessary, in the common interest.

The manner in which the Provincial authorities of Quebec began the treatment of the road question, and the modifications now thought desirable, are explained in a recent circular from the Department of Agriculture, thus:

> A special grant of $300 was placed last summer at the disposal of each county, to be divided into premiums of $125, $100 and $75 betweeen the first three municipalities that availed themselves of the same. The same grant will be given this year to the counties which shall have claimed it in whole or part between this and the month of July next.
>
> In counties where the total amount of $300 shall have been distributed between now and July, the department will again grant from and after that date three premiums of $75 each to the first three municipalities applying for the same. If a single municipality in a county has then availed itself of the offer made to each county, the department will place at the disposal of the same county a bonus of $100 and two of $75.
>
> Moreover, in order to encourage the stoning of roads, the department has decided to grant each county municipality aid towards the purchase of stone-breakers, with engine, roller and sorter, provided that the total cost of such machines do not exceed $2,400 per county

An amendment to the Municipal Code authorizes county councils to arrange with a near-by parish, village or town for doing repairs to the roads of the latter. That is, as we understand it, if Shefford county, for example, having a good and successful road repairing outfit, can offer Waterloo to fix up the roads of that village more cheaply or expeditiously than the village authorities can themselves do the work, Shefford may make a bargain with Waterloo to that effect, sending a notification of the fact to the Provincial Government. A parish or other municipality desiring to get the advantages the Government offers, may obtain the promised premium when it certifies that two miles at least of road has been repaired. To prevent undue trafficking in the possession of machines, however, it is stipulated that in case of the purchase of a stone-breaker, half a mile of macadamized road must have been completed and accepted by an officer of the Department before the Government contributions shall be paid. Further, machines for repairing earth roads that are bought by the municipalities with the help of the Government shall remain the property of such municipalities for at least three years; and the county councils that purchase stonebreakers cannot sell such machines before they have been at least five years in use in the same county.

We look to see a material improvement in the character of roads and streets in Quebec parishes and towns effected by the continuance of such a policy. As a measure of economy and progress, the move is to be highly commended, and we congratulate the enlightened Minister on so advantageous a move, and on the way in which his offers are being received.

TRADE WITH MEXICO.

Referring to the series of letters on Mexico, now appearing in our columns, some of the items in the list of Mexican imports sent us by Mr. Lindsey should be scanned with care by Canadians. They are clearly in our line of production, and we may as well ship them to the Mexicans direct as allow New York and Boston exporters and American steam or sail lines to make a handsome profit out of them, besides getting credit in Blue Books and consular reports for goods as "American" which are in reality Canadian.

One of the first things we notice is that the Mexicans bought last year $120,000 worth of "wooden boxes broken down," that is to say, wooden boxes whose sides and ends are not yet nailed together, but shipped flat, like boards. Parts of barrels are sent to Mexico, it seems, in similar shape; the staves, heads and hoops separate to save freight space. "Dove-tailed lumber," $357,000, is a still larger item in the list. We think this must mean tongued and grooved lumber, such as flooring, for we can hardly imagine so large a quantity as $357,000 represents being sent to Mexico in the shape of dove-tailed box stuff. "Boards, beams and planks," $724,000, is a suggestive item. The wooden boxes for packing were sent them not only from Florida, which is near at hand, but from Michigan and Wisconsin.

Furniture is something we make, cheaply and well. If American makers of furniture in Chicago, Wisconsin and Michigan, can ship it at a good profit to Mexico, down the Mississippi or by rail, why may not Canada ship by ocean? Pails and buckets go to Mexico not only from New York but from Detroit and Chicago; wheelbarrows from Ohio; tool handles, carriage spokes and such like wood goods from these and other parts of the States. These things are directly in our line and the opportunity to sell them to Mexico should not be overlooked.

Other descriptions of merchandise in this list which seem to commend themselves to Canadian exporters are canned fish, salted and smoked fish, butter, cheese and lard, the value of which imported by Mexico exceeded $800,000 last year. Wines and liquors, $2,330,000 is a heavy item; a little of it, but a very little, probably represented by Canadian whiskey and ale. Leather, harness, boots and shoes, are goods which we are able to send; leather belting, too.

In the list of principal places exporting to Mexico published in our issue of April 8th, "Agricultural implements" are stated as received from Chicago and St. Louis, from Cincinnati and Toledo. Some Canadian implements go to Mexico, but more might go. Other suggestive items which it appears the Mexicans are always ready to buy are carriages, bicycles, musical instruments, rubber goods and stoves. And a very important statement is that which puts down the import of "Paper and its Applications" at $1,367,000. Enough has been said, however, we trust, to emphasize the significance to Canada of so varied a trade in products of soil and manufacture, many of which we are perfectly able to furnish.

THE NEW WOOL SEASON.

The wool growers and wool merchants of the Dominion are anxiously enquiring about the prospects of the new wool season. Although a definite answer cannot be given describing the situation fully, it must be admitted that the nearer the season's approach, the less bright have prospects become. The export market, practically, in the United States, has always been the controlling factor in Canadian wool, and developments there during the past month have been distinctly adverse to the interests of wool growers. A prominent Philadelphia house is authority for the statement that "sales of wool during last month were the smallest since 1896. Prices have fallen on an average of 5c. per scoured pound from the highest point reached just previous to the destruction of the "Maine." As much of the large stock of wool held by manufacturers, bought last year to cover orders for goods is still unpaid for, the hardening rates for money have had their influence in inducing some holders to convert their wool into cash. Certain lines of business have already been benefited by the war conditions and Government orders, although the appropriations for national defence are but slowly finding their way into circulation. Thus far, while the Government orders for woolen goods may have checked the decline, they have not been large enough to cause any perceptible hardening in prices of wool."

During the month of March, the withdrawals from the United States Government bonded warehouses for consumption were less than 5,000,000 lbs. as against 55,000,000 lbs. for the same month of last year, a falling off of over 91 per cent. The most unfavorable part of market conditions is that styles are not such as require Canadian fleece wool in the production of cloth. The tendency being toward a smooth finish and close weaves, to which the wools of this country are not so well adapted.

Some of the Canadian growers are said to be basing their ideas of high values for the coming season's clip upon the argument that little or none of last year's growth remains in the country. It is true that prior to the passing of the Dingley bill all the fleece wool in Canada was rushed across the border line in great haste. But unfortunately shipment did not in all cases mean sale and, much less, consumption. A leading authority in the New England States estimates that not more than one-half of last year's Canadian fleece wool imports has been converted into cloth. Holders are asking 29 to 30 cents per pound for their stock. When from this we make an allowance for 12 cents a pound duty, freight charges, and a small margin to the dealer for his trouble, it will be seen that Canadian growers will have to be content with very little for their wool this season, unless a radical change in the situation occurs. Only unwashed wool is as yet coming forward. The weather is too cold for washing purposes, but so soon as it becomes warmer we may look for the first receipts of washed fleece wool. In the meantime it is impossible to give market quotations, but from present indications not more than 16 cents should be paid for wool delivered in Toronto. Buyers cannot be too conservative and cautious in opening the market.

TARDY PRUDENCE.

It is curious to find, as we so often do in Canada, municipal councils standing in the way of the providing or improving of fire appliances in towns and villages which are needed for the safety of the community. Year after year goes by, and the hose, the hooks and ladders, the fire-alarm are neglected, the pump or the steamer is unprovided, and when the insurance companies send their inspector round and he does his duty by recommending such-and-such a town provide fire appliances, the councillors miscall him for daring to say that their town or village needs such things, and then abuse and threaten the underwriters for charging too much insurance. Even when representative business men of a place concede the reasonable need of what the insurers ask, councillors will sometimes fly in the face of the Board of Trade and refuse to make the required effort at fire protection. We have seen this again and again, not only in small places but in large.

In a paragraph of the report for 1897 of the Guelph Board of Trade occur these words: "The Board is on record as having urged the city council to improve the fire equipments in order to meet the requirements of the underwriters, and it is to be hoped that something will be done by our city council in this important matter at once." For more than four years, if we remember rightly, the associated underwriters have been trying to get Guelph to improve her fire appliances, for which there is a crying need. Whether niggardliness or stubborness animated the council we cannot say, but for years they refused. It is agreeable to learn, however, that they last week agreed to remodel the old fire hall, at a cost of $1,650. Probably, too, they will see the reasonableness of other recommendations, such as drilling the brigade and procuring chemical extinguishers. There are other places than Guelph whose authorities have persisted in repelling the efforts of insurance men to get them to protect themselves. It is as if they deliberately said, "I will be burned; I *will* be burned; and nobody *shall* prevent me," for fire is no respecter of places. Let us hope the act of wisdom will not be put off until a dreadful fire destroys ten times the cost of the apparatus they are asked to provide.

THE WEALTH OF BRITAIN.

If any one should drop hints, or indulge in forebodings, as people sometimes do, as to the decadence of Britain's trade or the decline of her power, a tolerably satisfactory answer to such a person would be to refer him to the exhibit made last week by Great Britain's Chancellor of the Exchequer, in his Budget speech. The figures then submitted were in several respects remarkable—nay astonishing. While the expenditure of the United Kingdom had reached the largest total ever known, namely, £115,089,000, or nearly $575,000,000, the revenue had sufficed not only to cover this enormous sum, but to apply £6,605,000 to the reduction of the national debt, and to show a surplus of £3,560,000. The receipts from the post office, in which is included the telegraphs, which are owned by the State, showed an increase of £410,000 in the twelve months.

Such statistics as these illustrate in the most impressive way the wonderful activity, progress and wealth of Great Britain. Is there any other nation which can make such a showing, bearing such burdens as our "old country" bears? More noteworthy still, Sir Michael Hicks Beach went on to submit the estimates for the coming year, putting down the expenditure at £106,829,000 and revenue at £108,615,000, giving a probable surplus of £1,786,000, or over eight million dollars of our money. And in the face of such a menacing aspect of foreign disturbance on a grand scale and of actual war between two powers, the treasurer of this self-contained little island calmly promises, instead of higher taxes in view of enlarged expenditure, to reduce the income tax, legacy duties, and duties on manufactured tobacco, which would reduce the surplus to £281,000. Well may we be proud of the "little mother isle, God bless her."

CREDITS AND BAD DEBTS.

You go to a meeting of creditors of a retailer to whom you have given credit for years. You are surprised at the number of people you see there, creditors like yourself. And you are still more surprised to find that the insolvent owes twice what you thought he did. If you had supposed he owed so many creditors, you would have looked more sharply after your $300 account, on which you have to accept 40 per cent. Something like the incident above happens many times in the experience of a Canadian wholesale importer. And such annoying bad debts are the result of lack of proper information about the circumstances of the trader credited. You may have made enquiry and found his local repute fair to good. You may even have asked the man himself about his position, and received false or equivocal replies. In both cases you were misled and you made a loss.

Under the present loose system of granting credits in Canada, many a loss is made which would not be made if creditors knew the real circumstances of their debtors. Nay, they would not be made if it were known how much the debtor owed and how badly he paid the many he owed. How, then, can the number of his creditors and his relations towards them be ascertained? The Credit Clearing House, of the United States, is furnishing an answer to the question. It appears to be acting upon a reversal of the principle that a man's best plan is to sell a retailer all he will buy, but ask or give no information about him and so retain the bulk of his account. The plan of the Credit Clearing House is rather mutual confidence and the concession of mutuality of interest. Each member of this body gives to the manager of the Clearing House, if requested by his associates, a statement of his experience in selling A. B——. on credit; how long he has dealt; how much he has bought; the sum he now owes; the way he has kept his word—in short the general character of his account. This information is furnished under a subscriber's number, not his signature, so that the identity of the furnisher is not disclosed. Every member of the body dealing with A. B——. gives his testimony in this way, and receives in return the experience of other members. The result is a body of facts that is invaluable. Something of the kind has been inaugurated in Canada in the establishment of the Credit Exchange, in Montreal and Toronto; the aim of which is to furnish just such an interchange of experiences as has been described above. We have taken some pains to inform ourselves about its system and consider that it must prove of very great assistance in restricting credits within proper limits, and what is more, in weeding out undesirable traders and thereby clearing the air for the healthy ones. The testimony given by a number of the most prominent Canadian manufacturers and wholesale dealers, who have had experience of this method, goes to prove that it is of decided practical value in the directions we have indicated, and we hope to see the system spread.

EVENTS AND PROSPECTS IN MANITOBA.

From our Special Correspondent in Winnipeg.

There have appeared recently, in the columns of The Monetary Times and other Ontario or Quebec journals, accounts of business activity, manufacturing and transportation enterprise, forming of new companies and enlarging of old ones, that make interesting and encouraging reading to the business man. We in the West are glad to hear of it all, for what does good to the East of Canada, is bound to help, in one way or another, every other part of the Dominion. In accordance with your instructions to keep you advised of business movements here or farther west, I propose to write a few pages about matters that have lately come under my notice.

A significant thing as to the general development of Manitoba and the Territories, is the way your Eastern banks have been extending their agencies in our midst. A perfect network of branches of the chartered banks has spread over our cities and towns within a comparatively short period, and I think it is in some degree the result of visits of general managers to this country. It used to be only the Bank of Montreal and the Merchants Bank whose head men came out and made arrangements looking to the future. But of late Mr. Wilkie, of the Imperial, Mr. Walker of the Commerce, Mr. Thomas of the Molsons, and representatives of Maritime Province banks, as well as the French banks of Quebec have spied out the land, found it was a goodly one, and acted accordingly. Maybe they have learned, as the loan companies and wholesale merchants did, that better profits are obtainable out here. Anyhow their policy is a forward one, and they deserve to get a reward for their enterprise.

I am very pleased to tell your readers, as the result of a tour through a large part of Manitoba, that seeding is well advanced this spring. The land being in good state and the climatic conditions favorable, the farmers are getting in their crops in grand shape. There will be a much larger acreage of wheat this year than in any previous one to my knowledge. It has, in fact, been an ideal spring for farm work, and appearances justify great hopes for a generous harvest.

You have paid attention, we are grateful to see, to the efforts of public-spirited folk in this and other towns to awaken interest in immigration to our prairie and ranching lands. The Winnipeg Exhibition authorities have done valuable missionary work in getting visitors here by cheap railway fares from the United States, and letting them see at Fair time what surprised them as it would delight you—evidence of the astonishing strides our farmers and cattle-raisers have made. You were told eight months ago, and often since, that farm land sales had increased greatly, and that immigrants were coming in in unusual numbers. This is what we most need. Send us people of the right sort, and we will satisfy them that this is the right country to come to.

From where I write, close by the stock-yards, I can see at this moment, and for days past, outside on the railway track, numbers of immigrants daily unloading their goods, chattels and implements. They come from Dakota, Michigan, Minnesota, Kansas, and other parts of the great Republic. There is a big immigration already this spring, and there are more to come. And, mind I tell you, every man who comes in here and gets a satisfactory crop and fair treatment, becomes an immigration agent to bring more people. Farm lands have advanced considerably in price, and should the crops of 1898 realize what they promise, and present war prices for breadstuffs continue into 1899, this country is bound to "boom." For the farmers are in better financial shape now than for years; and year by year they are learning from experience how to overcome drawbacks of climate and how to make the most of their lot.

I don't need to tell you what progress is making in cattle-raising and cattle-handling, for I see you have noted what our meat packers are doing. One man I know is delivering, this week and last, 1,300 head of one-year-old steers to a firm at Lethbridge, Alberta. These were bought from farmers in Manitoba, and they will be let run on the ranges there until four years old. Then they will be sold for beef. There has also been done quite a lively trade in beef cattle for the Pacific coast trade during several weeks past, as the result of the Yukon "boom." One man is out there just now with a shipment, and he will make well out of it. I note, by a circular lately issued, that H. A. Mullins, who has been trading cattle back and forth in the West for some time, has located himself in Winnipeg and is offering to buy live stock on a large scale.

The news we get lately from the Klondyke country would certainly appear to indicate that the extravagant hopes and expectations of gold seekers and other speculative adventurers are not being realized to the full. Gold mining, hard work at any time, is doubly, trebly hard when pursued at such a distance and in such a trying climate. And many will find the game not worth the candle. To pass by a grain-growing, cattle-raising region, such as that existing, not only here, but to the north-west of us, in the Edmonton and Peace River country, and rush to the Klondyke to dig gold by auroral light, clad like Esquimaux and living almost as hard a life as they, seems to me like "dropping the bone to grasp the shadow." A man has no need to shorten his life by hardship and exposure or accident, as he will do in going Alaska-wards But rather will he lengthen it in the pure air of our North-West. As to making a fortune (which is what drives so many to the Yukon) he is just as likely to make it one place as the other.

AGRICOLA.

Winnipeg, 2nd May, 1898.

VANCOUVER AND THE NORTH.

BY AN ONTARIO ADVENTURER.

I promised to write you from Vancouver, but you will have to forgive me that I did not. It feels good to lie off here and look about one and rest before getting back to Toronto. That is a wonderful country out there in the West, and Vancouver is a wonderful place. But if a man hasn't got a steady job, or at least something in prospect, he had better be away.

There are plenty of people there who seem to have nothing to do but stand round the streets. They went out, I suppose, expecting that the rush of people up to the North would give employment, somehow or other, to many people, and so they went, on chance as it were. I saw four fellows loafing round, from a little town in Eastern Ontario, and got talking to them. They said they had had enough, and were coming home. One day I met a nice chap from Montreal, well dressed, but "strapped," asking at the stores for work. Next day when I was down at the wharves I saw him handling a truck, toting freight at 35 cents an hour and glad to get it.

The town is very full. Every hotel is crowded and some of them have rented terraces, to put their extra guests into. Boarding houses are mostly full, and the average board you pay is $24 a month; but at a first-class place you would have to pay $30 or $35. Some fellows have to "go it alone" or become self-feeders, as they say, paying for bed in some shack and buying their own food. Others live in tents, waiting till they can get away north. Hotels charge $2 to $3 a day. Of course, if you go to the swell Vancouver Hotel, you expect to pay $3 to $5 a day, and it is probably worth it, compared to some of the places.

Business is brisk. Every merchant seems as if he was busy and happy, too. Maybe the climate has to do with that, for the weather is fine now that the rainy season is over. There is a tremendous lot of shipping to and from the Sound and up to Northern ports, and the railway traffic is something immense. It made me wonder where it all came from. One day last week there were 56 carloads of freight from the C.P.R. put on board the regular 'Frisco boat. But these boats for the North! they're a caution. I went on board one or two and got enough. You see tiers of bunks, one above the other, so close together a man can hardly squeeze into them. Fellows were lying in them; some asleep, some smoking. Up above them on the promenade deck were dogs and horses; then on the next deck below them would be cattle, and squeezed in everywhere freight and dunnage. It was a terror. I don't know how all those folks were fed, but I guess the feeding was pretty queer. Canned stuff and hard tack is plentiful, of course, and if you get milk in your tea it is condensed milk. The first drink of milk I have had for six weeks I got here to day.

It is not so crowded in Vancouver as it was a month or two ago. Perhaps New Westminster helped her sister city to stow away some of the crowd. But besides that many have taken the boats to Northern points. And up there, until such time as the passes get open, there must be hard times for many a man. At Skagway, for instance, it is awfully crowded. We don't hear the worst through the papers; but once in a while you can get hold of a man who will tell you things to make you shiver.

Coming home on the train I started to travel Colonist, but it was too tough and crowded, so I blew in what few dollars I could spare on a sleeping berth. But I had to do with one or two meals a day, and it was "robbing my stomach to save my back" and get decent sleep. The car folks were very kind to me though. On the train there were all sorts. There was a funny-looking woman from Australia, four or five missionaries from China, and eastern folks, both Yankees and Canadians. There were some English people, of course; they keep coming and going, but you can't find out where they are going to, for they won't tell you. Just close to Field Station a land-slide of sand and rock came down on Wednesday (27th April), and delayed the train ahead of us for twenty-four hours. They put in charges of dynamite to blow the rocks off the tracks; it was close to a tunnel and the men ran into the tunnel for shelter, and for a while they thought tunnel and all was burst, the noise was so loud. Our train was not kept back much; we got into Winnipeg nearly on time.

A fine city is Winnipeg, and I wish I could have stayed a week or two and go and see some of the farming country round about. We hear a lot about Edmonton and the Edmonton route to the Klondyke. Out at the coast you don't hear so much about it, of course, but at Kamloops and along there we saw lots of parties making ready to go North. And at Revelstoke, all the talk was "Kootenay, Kootenay;" companies and claims, smelting and coal, and the Crow's Nest Pass. There are plenty of Americans thereabout.

Well, I think I will wind up now, and go out and see if I can find some people I know. I don't think I can tell you anything more. But you need not be afraid to say that going to the Klondyke is not what it is cracked up to be.

K. L.

Sudbury, 1st May, 1898.

WHEAT MARKETS EXCITED.

Another interesting week in the grain trade has passed. Wheat has shown remarkable strength, and prices in the local market have advanced five cents per bushel, which is a phenomenal rise when the recent advances made the past few weeks are taken into account. Transactions in Ontario winter wheat have been made at $1.07 per bushel, which, purchased at little more than 80 cents per bushel, must have yielded the holders handsome profits. The present range of prices will be better appreciated by a comparison of the quotations with those of similar date the past two years:

	1898.	1897.	1896.
Winter wheat	$1.00-1.07	72-77c.	74-79c.
Spring "	1.03-1.07	67-73c.	66-72c.
Manitoba Hard	1.15-1.31	75-85c.	75-80c.

While a considerable part of the market's strength is due to the war element, and the situation is, to a certain extent, dependent upon the continuation of hostilities between Spain and the United States, there are other factors which add to the firm tone of the market. The announcement is made that the French duty on wheat has been suspended, the suspension to remain in force until July 1st. The French duty is equivalent to 36 cents per bushel, and the abrogation of such an important source of revenue by the French Government is regarded as a strong demonstration of the scarcity of the "invisible" supplies throughout the continent generally, in spite of a recent statement by the French Minister of Agriculture that there are great quantities of wheat in French warehouses and en route for France, and that it is likely that the crops of Algeria and Tunis will be early and very important. Latest reports of the French wheat stocks show a supply on April 1st of 5,160,000 bushels, comparing with 6,300,000 bushels on March 1st, and 7,500,000 bushels on April 1, 1897.

The abolition of the French duty is in itself of the greatest importance and served to strengthen the position of holders, but scarcely had it been announced when the news came that Italy had followed the example of France, and that Germany would probably take similar action. Reports of large acceptances by United Kingdom and continental buyers, and strong Liverpool cables, have been stimulating features, while the report that Russia was about to prohibit exportations of wheat completed a series of advices all calculated to increase values. Stocks of wheat all over the continent show a considerable reduction, comparing with last month and last year. This is indicated by the following report of stocks at forty chief continental points:—

	April 1, '98. Bushels.	Mch. 1, '98. Bushels.	April 1. '97. Bushels.
At twenty importing ports.	8,752,000	10 664,000	13,448,000
At twenty exporting ports..	10,464,000	11,768,000	17,832,000
Total................	19,216,000	22,432,000	31,280,000

There yet remains a considerable time before the close of the season. A British authority estimates the requirements of the United Kingdom and the Continent during the balance of the season at 1,200,000 bushels per week, of which the United Kingdom is credited with 450,000 quarters, France at 300,000 quarters, and the rest of the Continent at 450,000 quarters." Referring to these writers Beerbohm's says editorially: "We leave the consideration of this question to our readers, and can only add that 1,000,000 quarters per week, in our opinion, may easily prove to be the real requirements of European importing countries during the remainder of the season, so greatly have the wants of France and Italy, to say nothing of Germany, developed."

To assist in meeting this consumption there remains in the United States very reduced stocks of wheat The visible supply April 30th, was 23,263,000 bushels, as against 25,914,000 bushels the previous week. The shortage is evident when compared with 34,412,000 bushels on the same date 1897, and 55,519,000 bushels May 2nd, 1896

The flour markets have naturally been affected by the hardening prices of wheat. Considerable sales are reported on behalf of Ontario millers and merchants on Eastern account. The market is an exciting one and in some respects more complicated than in the wheat trade. Any sudden falling off in values would probably lead to the usual cancellations on the many subterfuges to which buyers are accustomed to resort when the market is turning against them. Traders are thus compelled to work cautiously and carefully examine their position before concluding large transactions.

THE GENERAL CONDITION OF MEXICAN TRADE.

BY A CANADIAN, RESIDENT IN MEXICO.

[We continue below the list of imports into Mexico for the fiscal year ending June, 1897, which we were unable to complete in last issue. Our exporters will note what articles can be advantageously supplied from Canada. Mr. Lindsey rightly says that a number of them can be sent from this country.]

In a later letter, Mr. Lindsey states that a coal famine in Mexico is imminent, owing to the President's proclamation prohibiting the export of coal from the United States by reason of the war. He points out that there would be a magnificent profit in shipments of Canadian coal to Mexico by water. The price to be fixed per ton there would have to be on the basis of 2,240 lbs., which is the quantity in a ton in Mexico. Here, therefore, is a chance for Canadian exporters. We have no doubt that Mr. Lindsey would answer enquiries on the subject that might be addressed to him from Canada.

Principal imports into Mexico, continued.

Carriages, unpainted and unupholstered......	5,573
Baby carriages......	6,611
Diligences and omnibuses......	16,411
Bicycles......	116,687

Brooms...	10,444
Lead, lead pipe and solder......	40,544
Zinc and mfrs......	42,507
Total Imports.....	$42,204,095

Canada's trade with Mexico is, at present, very limited. It ought surely to be greater. For the year ending June 30th, 1896, Mexican imports and exports were as follows from the Dominion:

Article.	Province.	Imports.	Exports.
Explosives	Quebec	$1,898	....
Sewing machines	Ontario	2.710	....
Hardware	"	760	....
Whiskey	"	4,789	....
Music	"	243	....
Iron and steel mfg.	Quebec	2,553	....
Telegraph poles	British Columbia	8,751	....
Lumber	" "	26	....
Exp. Tobacco	Quebec		374
Exp. Tobacco, Cigars	Quebec		216
Exp. Coffee, green	Ontario		13.506
		$21,730	$14,096

It is submitted that Canada's imports into Mexico might extend to the following articles. There may be others which I have not enumerated:

Ashes, pot and pearl; apples, dried and green: asbestos, agricultural implements, bicycles, butter, boots and shoes, barrels, k.d.; boxes, k.d.; biscuits, coal, cordage, rope and twine, carriages, calcium carbide, cheese, confectionery, cod liver oil, Canada balsam, explosives and fulminates, Halifax tweeds, fish, dry, salted, pickled, smoked and canned; furniture, k.d.; gypsum, horses, carriage and riding; hardware, small; lumber, rough and dressed; matches, wooden; malt, mining machinery, nickel, oysters, canned; organs, pianos, paper, pails and tubs, k.d., and hollow ware; sewing machines, tea, telegraph poles, whiskey, wood pulp, mfrs. of wood.

To these articles, on closer trade relations being established, others would soon be added, no doubt.

It is not beyond the range of possibility that the Mexican Government may be open to negotiations for reciprocal trade, which could not be otherwise than favorable to Canada, but on this point Canada's Commissioner, recently in this country, would doubtless be able to give definite information.

All figures in this series of papers are reduced to Canadian money and weights.

W. L. M. LINDSEY.

13 1a Santa Maria Ce.
City of Mexico, March, 1898.

MR. AWREY'S LIFE INSURANCE.

It appears that the late Nicholas Awrey, M P.P., was so inconsiderate as to depend for his life insurance upon a couple of mere certificates, issued by the Mutual Reserve Fund of New York, indicating $11,000. He had the comfort, during his lifetime, of feeling that he had made a provision, though not quite "a certain provision," for his family if he should die early. But he ought to have known, as a sensible man he must have known, that he was not paying a sufficient premium to secure reliable and certain life insurance. It appears that from carelessness of habit, or from lack of confidence in the concern, or from some other reason, his payments to it upon certificates Nos. 133,633 and 167,094 fell in arrears. But the local agent at Hamilton, Mr. S. R. McIlroy, accepted $236.76 from him on December 31st, 1896—we are told it was mainly in a note—after the so-called insurance had lapsed about six months, and gave him a receipt which stated in the body of it: "This carries both policies in full force and effect up till 1st January, 1898," but underneath his signature, on the form used, was the following significant printed warning:

> "NOTICE —This receipt shall not be valid, and its issue is not authorized, unless payment is made on or before the day it is due and this receipt is duly countersigned."

The Mutual Reserve Fund now relies upon this portion of the receipt, and upon the letter subsequently mailed Mr. Awrey (but which he appears never to have opened, for it was found in a drawer after his death), requiring a medical certificate of health. A petition to the association, signed by nearly all the members of the legislature, was procured and forwarded, but so far it does not appear to have had any effect in bringing the much desired $11 000. It is stated by manager McMurtry that no money was paid by the deceased since July 1st, 1896. But Mr. Awrey's brother quotes a letter, dated September, 1897, acknowledging $49.50 and $137.76, "tendered in payment of semi-annual calls Nos. 86 and 89."

However, whatever the upshot of this case may be, it is calculated to do good in leading all holders of certificates in assessment societies to read them, and find out whether they have got any real insurance or not. Since the previous Mutual Reserve Fund trouble at Hamilton over the cases of Dr. R. H. Gowland and others, a good many people have been reading their receipts, as well as their certificates, and a good many have found both documents worthless. Worthless so far as forming any legal claim to insurance money is concerned. Many people have been profoundly surprised to find what scores of uncertain features their certificates contain – how many "rivers to cross" before arriving at any fixed value. Take for instance the following for a sample eye-opener as to what many thousands of fraternals find in their so-called "policies":—

> I, ——, of the above named ——, do hereby direct that the mortuary benefit due at my death on this benefit certificate shall be paid to the undermentioned beneficiaries.
>
> Name in full of each beneficiary. Age. Relationship to yourself.
>
> I hereby expressly agree that the constitutions and laws of the —— of ——, as well as any amendments thereof which may be adopted from time to time by the ——, shall be a part of this contract, particular and special reference being made, by the parties hereto, to the following sections of the said constitutions and laws, viz.: 1, 2, 3, 26, 27, 28, 40, 42, 47, 55, 57, 59, 96, 98, 99, 103 104, 112, 117, 120, 123, 124, 131, 132, 134, 152, 155, 161, 162, 164, 165, 166, 167, 168, 169, 170, 171, 172 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 188, 194, 196, 197, 198, 203, 204, 205, 206, 207, 214, 218, 219, 225, 226, 227, 228, 229, 231, 235, 236, 237, 238, 239, 240, 242, 244, 245, 246, 247, 249, 250, 251, 255. 257, 260, 261, 264, 265 and 266.
>
> I hereby further expressly agree to the provisions of sections 187 213, 217, 222 and 258 of the constitutions and laws of the —— of ——.
>
> I also expressly agree that I shall not be entitled to the benefits provided for in sections 232 and 256 if the laws of the State or country in which I live do not permit such benefits to be given by fraternal benefit societies.

Now if every reader of this article will clip out the foregoing and paste it in his hat, and ask his neighbors on which of the foregoing NINETY-FIVE "special reference" sections he expects his wife to stand, and whether his wife is aware of the precise wording of each of them, or has ever seen a copy of the various clauses in the big book, he will have done some good missionary work. And it is not only the present ninety-five clauses her title rests upon, but (just think of it) "as well as any amendments thereof which may be adopted from time to time.' Truly, as P. T. Barnum said, the people delight in being humbugged when they will pay away good money for such a flim-flam contract as the above.

We have purposely left blanks where the name of the association appears in the original from which we copy, as well as where the holder's name and that of his wife are written by the society. Some of our readers will recognize the correctness of the copy at a glance, though not willing to confess that they are placing much dependence upon them.

GUELPH BOARD OF TRADE.

The president, Mr. J. E. McElderry, was in the chair at the annual meeting of the Guelph Board of Trade, on Tuesday evening of last week. The annual report showed a membership of 129. Among the matters referred to in this document were increased railway facilities procured, reduced postage rates in Canada favored, an Insolvency Act advocated, the necessity for a system of sewerage pointed out and urged upon the city authorities. During last year, it appears, three miles additional of cement sidewalk was put down, which, being added to what was previously laid, makes about twenty miles of this sort of footpath in the city. It is not too much to say that Guelph has set an excellent example to other cities in this respect Sidewalks of this kind were advocated with great persistence by the late Thomas Goldie, during whose mayoralty, we believe, the first of them was laid down, and the city is now enjoying the fruit of his foresight and earnestness.

Statistics submitted showed a marked increase of both foreign imports and exports during the last two years, and that inland revenue receipts had increased in like ratio, giving unmistakable token of growing trade. It is further shown that the factories of the city have been actively employed. The output of the Bell Organ and Piano Co. was 3,600 organs and 1,000 pianos; that of the Goldie Flour Mills, $540,000 in volume; Burr Bros.' Furniture Factory, $120,000, while the Armstrong Carriage Goods Co., the Raymond Sewing Machine Co., the Woodyatt Factory, the Murton Mills and other concerns did their share. The value of farm produce sold at Guelph market in the twelve months was about $650,000; pork packing and pork shipping have now reached an important scale in Guelph. To the fire insurance paragraphs of the report we refer elsewhere. Officers were chosen as under:

President—E. R. Bollert.
Vice-President - H. Murton.
Sec.-Treas.—W. E. Buckingham.
Council—J. M. Duff, James Watt, Col. Higinbotham, G. B. Ryan, A. F. H. Jones, A Scott, James Goldie, James Millar, M. O'Connor, J. M. Bond, R. L. Torrance, James C. Keleher, Jas. Innes, ex-M.P., C. Kloepfer, M.P., J. E. McElderry.

A pleasing incident of the evening was the presentation of a silver service to the secretary, Mr. A. Scott, who has acted as secretary of the board for years, and would accept no salary.

MITCHELL BOARD OF TRADE.

The Mitchell Board of Trade held its annual meeting on April 22nd, Mr. T. S. Ford, president, in the chair. A resolution was passed approving of a two cent postage rate on letters, and an insolvency law for the Dominion. The secretary's report noted that the town still suffers for the want of industries to give employment to men. The closing of the flax mill during last year lessened the population. The creameries established near by have done good, and an extension of them is hoped for. The cattle export trade of the neighborhood is referred to, also the pork products of a local packing-house. Grain, flour and oatmeal are among the exports of the place. The four per cent. debentures of the town have sold at a premium, it is stated, and the debt is less than $37,000. No fires have devastated the town during the twelve months, and the fire-preventing appliances are referred to with satisfaction. Officers of the board for 1898 are:

President—W. G. Hinds.
Vice-President—S. R. Stuart.
Secretary-treasurer—Isaac Hord.
Council—Wm. Forrester, J. W. Cull, Wm. Barley, T. S. Ford, W. G. Murphy, F. Dufton, A. Cameron, J. Jones, A. Burritt, W. Ryan, W. W. Hicks and John Whyte, jr.

FOR GROCERS AND PROVISION DEALERS.

The Wednesday sale of the Toronto Fruit Auction Company was well attended, and for choice lots the bidding was spirited.

Imports into the United Kingdom last week were 2,408,000 bushels of wheat, 2,376,000 bushels of corn and 197,000 barrels of flour. The imports and the farmers' deliveries made an aggregate of 4,320,000 bushels for the week's supply, indicating a decrease of 319,500 bushels in the English visible.

Cables from Greece the earlier part of the week noted a substantial advance in that market, and late cables announce a still further advance. The cause of the higher market is not known on this side, but as stocks there are so light it is fair to presume that with a gradually diminishing supply the price should do correspondingly better.

Owing to the bread famine in Italy the price of Italian rice in Genoa has advanced 5 lire, according to last mail advices. It was not expected that a further advance would occur in the near future, as the supplies were ample. Higher prices on macaroni were looked for because of the scarcity of grain.

According to our Montreal letter of Wednesday last, the movement of teas from that city across the border has fallen off considerably, which is probably due to the fact that the expected war duty has not been imposed by the United States, though letters from leading centres would indicate that there are still expectations that the Government may yet decide upon some such step. Local jobbers are comparatively light buyers at the moment. Good medium grades of Japan have been seldom scarcer, and prices continue firm. The public cable announces that the market for new crop opened in Japan on Monday two yen the picul higher than last year, but our correspondent says he has had communication of a private cable from a leading Japan house to their Montreal branch, stating that the market has opened on just about the same basis as last year.

LEMONS ON SALE.

Merchants throughout the country are now laying in their stocks of lemons for future use. The first Montreal fruit sale of the season was held last Tuesday. The fruit arrived ex-steamship "Matthews," and consisted of 22,000 boxes of Messina lemons, oranges and Palermo and Sorrento oranges. The condition of the fruit was fully up to the standard and the prices realized seemed to be satisfactory to all concerned. The attendance of buyers was large and they were principally Canadians, there being only a half dozen from the United States, who bought very sparingly, only about three or four car loads being taken. Prominent New York firms exerted their influence against the sales, which, combined with an increase in duty upon shipment, is responsible for the falling off in the attendance of American buyers. Messina lemons sold at 70c. to $1.40 for common; $1.50 to $1.85 for choice, and $2 to $2.45 for fancy. Messina oranges brought $1.80 to $2 per box, and 80c. to $2.35 per half boxes. Palermo oranges realized $1.30 to $1.85 per box, and Sorrentos $1.50 to $3 per box, and $1.25 to $1.80 per half box. It is impossible to make any comparisons with last season's prices, because the increase in the United States duty alters the condition of affairs considerably. The principal buyers present were as follows; J. W. Lumsden, of New York; Mr. Kneen, of Minneapolis; Mr. Daniel, of Keokuk; G. W. Hunt and H. Brouse, of Ottawa; Mr. Steel, Mr. Mountjoy, and Mr. Shettleworth, of London, Ont.; Walker, of Guelph; Dickson, of Hamilton; McWilliam, Husband, Dawson and Clemes, of Toronto; McPherson, of Winnipeg; P. Rheume, A. Legare, G. Beauchamp, L Simard, R. Borden, of Quebec. The principal buyers were: Hart & Tuckwell, Vipond & McBride, J. F. McLean, of the Montreal Fruit Exchange; J. Bell & Co., J. J. Vipond, John Barry & Son, Bowes & McWilliams, and O. & E. Hart, of Montreal.

THE NEW CHEESE SEASON.

The cheese season of 1898 may be considered to have been opened with the first of this month. A number of the factories have started the season's work. As yet, however, all the cheese made is what is known as fodder cheese, and many of the prominent factories will not begin the year until May 16th, when the cattle should all be at pasture. The past few weeks have witnessed a marked improvement in the cheese market, and placed prices on a more remunerative basis. From 7½ to 7¾c. is quoted for the new make. These prices are thought by some merchants to be in excess of the true value, but are in marked contrast to the opening prices a year ago. On May 6th, 1897, we reported sales of new cheese at 10½c. per pound. Several cheese salesmen have been in the city during the current week, making arrangements for the disposal of the new output. It seems to be the unanimous opinion that the cheese makers lost money last year by holding back their output for a rise in values that never came, and apparently they are not disposed to repeat the experiment this year.

Recent advices from the United Kingdom report that: "There has been a considerable increase in the amount of business done in Canadian cheese, but it is more of a speculative character than of a consumptive demand. Holders of stocks are asking higher figures and hoping to get them, but up to the present no important change in prices can be recorded." While values in the British markets have increased since the declaration of war between Spain and the United States, they are still very much less than they were a year ago. The following table shows a comparison of cheese quotations at the beginning of May, 1897 and 1898:

Kind of Cheese.	1898.		1897.	
	Choicest.	Finest.	Choicest.	Finest.
American ..	38 to 39s.	36 to 38s.	56 to 57s.	54 to 55s.
Canadian ..	40 " 41s.	37 " 39s.	57 " 58s.	55 " 56s.

NEW YORK TARIFF ASSOCIATION DISSOLVED.

As the not unexpected conclusion of a long period of unrest, friction and recrimination between insurance companies which were members of the body, the New York Tariff Association of Fire Underwriters came to an end on Saturday last, the executive committee having suspended all rates and rules. Marshal S. Briggs, president of the association; W. W. Underhill, Benoni Lockwood and S. Albert Reed, the general manager, were constituted a committee to wind up the business affairs of the association.

More or less alarm is felt or expressed at the probable result of this move. Some say that thousands of policies will this week be turned in for cancellation, while the risks they represent will be re-written at less than cost. But it scarcely follows, we think, that this will be the effect. It is six years since the association came into existence, and it put an end to a rate war of four years' duration. It covered New York city alone, and had for its first object the improvement of risks by applying schedules of rating, making charges for various removable hazards, such as the bad arrangements of heating and lighting apparatus. The effect of this was to lessen the frequency and the extent of fires, accordingly cheapening the cost of insurance to the public. It came into existence at a time when, in the congested districts of the city, the demand for fire insurance was greater than the supply. Now, however, with more companies, a favorable recent loss ratio and bigger lines written, it looks as if the supply is greater than the demand. Hence there is likely to be a time of relaxed rates A prominent New York underwriter stated on Monday that, of all causes contributory to the dissolution of the association, the one which led to the deepest resentment was the dishonorable advantages taken by some of the most extensive underwriting institutions in the association. It is the old story. How difficult it always is to maintain good faith in a combination of the kind.

INSURANCE MATTERS.

Huntingdon, Que , voted last week on the question, waterworks or no waterworks, and the scheme was carried in favor of the works by 75 against 31 votes.

The following, according to a Chicago paper, are the new officers of the Western Factory Association: Eugene Harbeck, president; A. F. Dean, vice-president; George W. Blossom, secretary and treasurer.

A defective flue is said to have caused a fire at Nelson, B.C., last week, which burned down the ore house at the Payne mine. The loss is estimated at $10,000. Of the 110 men employed, fifty have been laid off until repairs are made and the machinery replaced.

The Chronicle, of New York, says that rates of marine insurance on trans-atlantic cargoes carried away in neutral bottoms still continue to advance. Importers who have goods bound to this country, even though they are carried in foreign bottoms, are paying war rates.

There is reason to believe that the loss on the terra cotta works of the Messrs. Rathbun, at Deseronto, by the burning of the main building on Saturday last, has been much exaggerated. A Montreal paper put it down at $100,000; a Toronto paper at a still higher figure. We were told yesterday on good authority that the loss will not exceed $50,000, and that the insurance was probably $30,000.

We observe that the village of Carberry, Manitoba, wisely proposes to have fire apparatus. The council has approved a measure to expend $6,000 for the purpose, and a by-law to this effect is to be voted on by the ratepayers on May 26th. "The principal of the said debt is to be made payable by annual instalments extending over a period of twenty years, the same bearing interest at the rate of five per centum per annum."

For ten or twelve days past the offices in Toronto of the British Empire Mutual Life and the Imperial Fire Companies have been thronged daily with enquirers. Not so much by enquirers about risks or policies, rates or claims, as by friends who desired to ascertain what progress Mr. Alfred W. Smith was making towards recovery. That popular gentleman, who was thrown from his horse and sustained severe injuries, is happily pronounced to be out of danger, and is now able occasionally to sit up in bed. He may be expected on Toronto street in a few weeks.

It was in April or May, 1863, which is thirty-five years ago, that the Montreal Fire Department was organized into a paid brigade. It is now recalled by a veteran that of those who enrolled themselves at that time five officers are still doing active service. They are assistant Chiefs Jackson and Beckingham ; Joseph Beaulieu, supply officer ; Captain Wm. Mann, of No. 5, and Captain I. Rock, of No. 17 station. Captain Mann has been twenty-five years at No. 5 station.

Another illustration of the manner in which life insurance is becoming more and more a factor in commercial transactions is furnished by an incident that recently occurred in a London police court, where a widow applied to a magistrate for advice under the following circumstances : Some little time before his death her husband had purchased, on credit, furniture to the amount of $150, on which he had made a few payments, and the widow was afraid lest the furniture should be taken from her and the payments forfeited. A court missionary was requested by the magistrate to look into the matter, and was informed by the furniture house that the goods were the absolute property of the widow, since it was the practice of the firm in all such cases to take out term insurance on the life of the purchaser, the insurance in case of his death being applied to the payment of the account. The idea appears to be a very practical one, and capable of wide application.—Investigator.

When a company whose headquarters are elsewhere has more than twelve millions of dollars invested in Canada, and has made its name familiar as a household word among us, it may be looked upon almost as a home company. These things may be truly said of the Standard Life Company, of Edinburgh, which has done business here for the extent of an average man's lifetime. At the annual meeting held a fortnight ago, satisfactory increases were shown in the company's business for the year 1897. More new insurance was written than in 1896, and the aggregate insurance in force is now $116,409,000, a very handsome figure. There was paid out in death claims and bonus additions not far from $3,000,000, and over $150,000 was paid in matured endowments. As an unmistakable instance of the earning power of the Standard, it is shown that $1,734,000 was added to the funds during twelve months. The accumulated funds have now reached the enormous sum of $42,849,000.

BIG LAKE CARGOES.

The size of steam vessels navigating the great lakes of America continues to increase. Cargoes of 6,300 net tons each are common, says the Marine Review, and when the steel ships of 450 feet over all, building at Lorain, on Lake Erie, and the Rockefeller steamer (476 feet over all) building at West Bay City, on Lake Superior, go into commission later in the season, the 7,000-ton mark will very probably be passed.

Actual recorded cargoes up to the present time, what are called "record" cargoes, show some remarkable figures reached. For example, the steel schooner "Australia" carried 226,000 bushels of corn, equal to 6,328 net tons, from Chicago to Buffalo; steamer "Crescent City," A. B. Wolvin, of Duluth, 225,000 bushels of corn equal to 6,300 net tons, South Chicago to Buffalo, draft of 17 feet steamer "Andrew Carnegie," 332,100 bushels of oats, equal to 5,313 net tons, Manitowoc to Buffalo.

In the carriage of iron ore the schooner 'Amazon," 5,631 tons gross, or 6,307 net, Duluth to South Chicago, draft 17 of feet 1 inch ; steamer "Empire City," of Duluth, 5,622 tons gross, or 6,296 net, Two Harbors to Cleveland, draft of 17 feet 2 inches.

The most extensive cargoes of coal up the lakes have been the following: Schooner "Polynesia," 5,654 net tons of bituminous, Cleveland to Duluth, 16 feet draft ; steamer "Carnegie," 5,369 net tons of bituminous, Cleveland to Duluth.

BOOKS RECEIVED.

Consular Reports.—The present volume of United States consular reports forms No. 211 of volume 56, and is issued by the Bureau of Foreign Commerce, at Washington, formerly the Bureau of Statistics. It is for April, 1898, and contains, in addition to tables of values of foreign coins, foreign weights and measures, 150 pages of reports from United States consuls in South and Central America, Canada, European countries, China, Hawaii and Japan. "American Bicycles in Canada," is the title of a paper by Harry P. Dill, commercial agent at Port Hope, Ont.

A Historic Canadian Building.—This handsome illuminated pamphlet is largely devoted to illustrating the new quarters of the North American Life Building on King street, Toronto, a subject which is, both within and without, well deserving the pains of worthy illustration. Part of the letter-press is by F. Howard Annes.

Official Hand Book of the Dominion.—The Department of the Interior at Ottawa and the Government Printing Bureau have done themselves unusual credit in the preparation and issuance of this most beautiful of Canadian Blue Books—if the expression Blue Book be correct in connection with this one. From cover to cover, it is uniformly admirably printed and illustrated ; the man who planned it is a bookmaker to be proud of. "This pamphlet is respectfully commended," says the preface, "to the attention of the very many people in other countries who in their present surroundings have but little prospect of improving their position." The condensed descriptions of Canada's characteristics and resources are good, the maps and photo-gravures well done.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, May 5th, 1898, compared with those of the previous week :

Clearings.	May 5th, 1898.	April 28th, 1898.
Montreal	$13,471,505	$13,479,108
Toronto	8,455,145	7,714,336
Winnipeg	1,704,964	1,344,180
Halifax	1,350,167	1,017,341
Hamilton	764,652	609,927
St. John	612,097	513,697
	$26,358,530	$24,678,589

Aggregate balances this week, $3,674,602 ; last week, $3,231,510.

—It does not appear that the proprietors of Ottawa River saw-mills are at all disturbed in view of the fact that the law against the dumping of sawdust and mill refuse into the rivers of Canada went into effect on Sunday, May 1st. All exemptions have expired, and only by an Act of Parliament can an exemption be granted. The Ottawa Journal says that the Bronsons and Weston Lumber Company, Limited, and Mr. J. R. Booth will be affected by the law. A representative of the latter said that they had made no preparations to carry their sawdust to any other place than the river. Mr. Levi Crannell, secretary for the Bronsons and Weston Lumber Company, however, said that the company is experimenting with a system of carriers. The penalties for infraction of the law are cumulative. For a first offence the fine is $20 and costs ; for a second $40 and costs, and in addition a further penalty not exceeding ten dollars for every day during which such offence is continued—and for the third or any subsequent offence, a larger fine and an assessment of $20 per day. After long delays and successive exemptions, we shall see if any resolute effort will now be made to enforce the law.

—It is interesting to learn that La Chambre de Commerce, of Montreal, will to-day occupy its new premises, No. 83 St. James street, in that city, which have been for some time in preparation for its occupancy. The Government at Ottawa has replied to the memorial of the Chamber that the expense of a wharf at Father Point is not likely to be undertaken, seeing that there is already at Rimouski one which has cost $300,000. The Quebec Government promises, through Hon. Mr. Marchand, to send the Chamber all its official publications bearing on commercial questions. And the Dominion Minister of Public Works agrees to have copies of plans and specifications, forms of tenders, etc., of projected public works, deposited with the Chamber and the Board of Trade in future, for the better information of contractors.

—A branch of the Bank of Nova Scotia has been opened at Paspebiac, on the shores of the Bay of Chaleur, Que. This old settlement, so interestingly described by Sir James Lemoine and other writers upon the Lower St. Lawrence, is well known, and principally distinguished as a station of the Robins and the Le Boutilliers, the great fishery houses of old France. Paspebiac is now, however, we believe, a station on the Chaleur Railway, and is getting modernized—a fact which one scarcely knows whether to welcome or regret.

—On the Atlantic coast of the United States, seaside cottages are not renting, and hotels and boarding houses miss their summer applicants for accommodation. At one place in Maine, where 1,000 summer visitors can ordinarily be counted on, there have been no applicants for cottages or board. It is probable that large numbers of these summer birds of passage will find their way to our lake country, and if they come once, some of them are sure to return in future years.

Meetings.

ROYAL VICTORIA LIFE COMPANY

When we briefly mentioned, the other day, the annual meeting of the Royal Victoria Life Insurance Company, and gave the names of its directors, etc., we were not in possession of the fuller and more interesting facts of the company's progress, that have since come to hand. While the meeting was officially dealing with only figures of the three months' business of the company, to the end of 1897, there was nevertheless before it, a statement of six months' business to the close of March, 1898. A resume of this was given by the president, Mr. Crathern, who took pleasure in informing the members what had been done since the first of the present year. The business offered to the company for the first six months of its existence exceeded half a million dollars, and the amount accepted upon which policies had been issued, represented first year's premiums of nearly $19,000. Such results for the first six months he considered to be very satisfactory in the face of the keen competition in the business. At that rate of progress there is every prospect that the year 1898 will result in a very gratifying growth in the company's business.

The figures submitted for the first three months ended December 31st, 1897, were as under:

Receipts.	
Cash paid on capital, insurance premiums and interest.... ..	$137,298 21
Disbursements.	
Cost of charter, preliminary expenses, printing, stationery, commissions, medical fees, salaries, traveling expenses, advertising, etc..	$ 12,386 34
Balance ledger assets..	124,911 87
	$137,298 21
Assets.	
Security with Dominion Government, loans on securities, cash in banks, accrued interest, premiums outstanding, etc., etc....	$129,795 02
Balance of capital subscribed to Dec. 31st....	554,480 00
	$684,275 02
Liabilities.	
Capital paid up........	$128,620 00
Reserves on policies....	9,138 91
	$137,758 21

Reference was made in the report, and quite justly, to the Royal Victoria's list of shareholders, as containing those who are among the most prominent and influential business men in Canada, representing the leading financial, commercial and manufacturing interests in the country. This fact, the report argues, places the company immediately in the front rank of life insurance institutions and guarantees to policy-holders security beyond question. It is the intention of the Board to extend the business during the year 1898 in keeping with judicious and conservative management, and while seeking for a reasonable volume of business, they will, we are assured, at the same time guard carefully the quality of the business that is accepted.

The adoption of the report, which had been moved by the president, was seconded by the vice-president, Mr. Andrew F. Gault. That gentleman declared himself well pleased with the progress made by the company. Many obstacles had to be overcome, and great care and discretion exercised in the selection of agents and others entrusted with the interests of the company. The amount of business for the first three months he regarded as warranting him in looking forward with confidence to a great future for the Royal Victoria.

Interesting testimony was borne, also, by Dr. T. G. Roddick, M.P., to the attention given, and trouble taken in connection with that very essential feature, the establishment of the company's medical staff. The work of appointing medical examiners throughout Canada had been steadily progressing, said the doctor, since the company started. Great care had been exercised in making selections, preference being always given to those doctors who had had experience in making examinations for other companies, which was a very important qualification for the work. Strict attention must have been given to all the applications received for insurance, as the report showed considerable business declined as not being up to the company's standard. In his opinion, the standing of the medical examiners appointed by the company throughout Canada, was second to that of no other company, and he felt sure, too, that a good class of risks had been secured.

Those present at the meeting included James Crathern, Andrew F. Gault, David Morrice, Samuel Finley, Dr. T. G. Roddick, Jonathan Hodgson, Gaspard LeMoine, John Cassils, Robert Mackay, David Burke, James Stephenson, George Hague, David McFarlane, Col. G. R. Starke, John Macintosh, James Wilson, C. F. Smith, Frank E. Gilman, Robert A. Dunton, Henry Morton, W. J. White, C. P. Metcalfe, C. J. Hodgson, and others.

FUR SALES IN BRITAIN.

The recent sales of furs in the United Kingdom have established a higher range of values. The weather afforded little or no impulse to the trade in furs, and the causes contributing to the advance are mainly to be found in the not inconsiderable reduction in the supplies, and the extension in the demand for America. Of the finer furs Russia bought with greater freedom than they were expected to do. Messrs. Culverwell, Brooks & Co., report of the March sales:

Otter.—For good colored skins there was an active demand and an advance of 7 per cent.; other descriptions realizing about late rates.

Sea Otter.—The supply was less than last year, and with active competition from the Russian trade, prices advanced on average 20 per cent. Dark and black silvery tipped skins were in great request and extreme prices were often paid. The small supply of Japanese skins came in for keen competition; the satisfactory average of £66 per skin being obtained in our sale.

Fox, Silver.—In demand for Russia and 25 per cent. dearer.

Fox, Cross.—Met a quiet trade, and prices unchanged.

Fox, Red.—Advanced 15 to 20 per cent.

Fox, White.—Improved 25 per cent.

Fox, Blue.—Realized about last year's rates.

Fisher.—Declined 7 per cent.

Mink.—There was an improved demand for good colored skins of 1st and 2nd selection, and prices rose 35 to 40 per cent. The lower grades advanced 12 per cent.

Marten.—A smaller supply than last year, in combination with an increased demand, led to an average advance of 15 per cent.; the rise being most pronounced on the dark colored skins.

Lynx.—Still remain at a low level, although prices show a slight improvement on the rates ruling last spring.

Wolf.—Remain at about late rates.

Skunk.—The low prices current last spring having stimulated consumption, an advance of 20 to 25 per cent, resulted.

Raccoon.—The total quantity was less than half that available last spring and prices were firm at the rates current in January.

Bear, Black.—The descriptions suitable for military equipment advanced 75 per cent., other sorts averaging 20 per cent. dearer.

AMERICAN BUSINESS.

Confusing accounts about the great industries cannot cause surprise in view of the contradictory influence of monetary stringency curtailing many orders, heavy orders by the government in many branches, and all pervading confidence that, after temporary conditions have passed, business is going to be better. Government is buying many uniforms and great quantities of supplies, cloths, shoes, copper wire, and iron for vessels and armament, and the purchasing of many ships compels building of other vessels. Banking caution at the same time is stopping work in some iron and woolen mills. Yet confidence as to future business causes refusal of very many contracts for long time, the holding of wool above its current manufacturing value, and a marked rise in hides.

The consumption of iron is still the greatest ever known, though many structural and car contracts have been deferred. The week has witnessed Eastern inquiries for plate at Chicago, and a general advance of $2 per ton. . . . . . . Considerable orders for steel rails for export have been received during the week. With but two or three structural orders of consequence, the works are fully employed for months to come. Boot and shoe shipments have been larger than in any year excepting 1895, for the month of April, which were 2.0 per cent. larger, while in 1892 shipments were 30 per cent. smaller. The new orders continue fair, but there is a sharp upward turn in hides at Chicago.

The cotton manufacturer has been helped by some government contracts and a little better outside demand, and the temporary advance in raw cotton to 6.44 cents, though the price has since declined again to 6.37 cents. Supplies have been larger in some previous years than they are now, and yet are enormous, and the demand for goods is still hindered by the great stocks in sight or reported. Woolen manufacturers are doing rather better, large government orders helping some works while other demands are more encouraging.—Dun's Review.

CITY AND DISTRICT SAVINGS BANK

On Tuesday last was held the fifty-first annual meeting of the Montreal City and District Savings Bank, when the chair was occupied by the president, Sir William Hingston. The report referred to the "causeless run by a small section of the depositors of the bank on the 8th and 9th October last" The brief run was met with ease and without calling in any of the bank's loans to brokers. The vacancy on the board caused by the death of J. H. R. Molson was filled by the election of H. Markland Molson. Having adopted the report and passed a vote of thanks to directors and officers the meeting went on to elect officers The retiring board was re-elected, as under: Hon. Sir W. H. Hingston, M.D., Mr. R. Bellemare, Hon James O'Brien, Hon. Judge J. A Ouimet, Messrs. E. J. Barbeau, F. T. Judah, Q C., Hon. Sir J. A. Chapleau, Messrs. Michael Burke, Robert Mackay and H. Markland Molson.

By reason of a reduction into the interest rate, and to the difficulty of finding safe investments, the net profits of the year had been considerably reduced. They were $81,486. Deposits now amount to $9,547,693; and if to these be added $400,000 of a reserve fund, $600,000 stock, and the amount due the Receiver-General and at profit and loss, etc., a total of $11,079,816 liabilities is reached. The bank holds $1,526,000 in Government stock, $2,898,000 in provincial and municipal debentures, $5,016,000 of loans secured by collaterals, $748,000 cash on hand and in bank, $400,000 in bank premises, and $491,000 in other assets. It has 49,883 accounts, and the amount of these averages $188.44

—It is estimated that Michigan still has 10,000,000,000 standing feet of pine; Wisconsin twice as much; Minnesota, 35,000,000,000 feet.

WHAT IS THE MEANING OF "FRATERNAL?"

Fraternal insurance of course makes no provision for extended insurance; it cannot, and would not be allowed to do so if it could. As the fakir remarked: "What can you expect for a nickel—humming birds?" Fraternal insurance does what it can, and brothers must pay up assessments or be lapsed. George E. Dowling, of Montague, Mich., belonged to a society of this sort, and neglected to pay an assessment. Of course just then he saw fit to die and leave his widow penniless. But a keen-nosed lawyer discovered that Dowling had paid twenty cents too much on a previous assessment, that he was credited on the society's books to that extent, and that the notice of his last assessment was made out for the amount in full and omitted to give credit for the twenty cents. Hence the notice has been held void by the Supreme Court of Michigan, and Dowling's widow obtains his insurance. It is highly improbable that any society will ever be caught napping again in the same way, so that we do not recommend brothers to try any experiment a la the late Dowling.—Investigator.

CHEAPER RAILWAY TRAVEL.

This journal never had anything to do with the management of railways, knows nothing whatever about railways, and that is why it speaks with the utmost confidence when it asserts that railway travel is not a fixed quantity, but is as free and indeterminable as human fancy. At three cents a mile, travel is a fixed quantity, for at that rate it is so high that no one travels but those who are compelled. At half a cent or even at one cent a mile, travel would be restricted by nothing more substantial than whim or fancy, and those who never dream of travelling now, would be constantly tripping about the country. The present cut rates are producing more money. Continue the rates, and the travel will increase. People will travel frequently at a cost of $1, while they will never travel at all when it costs $3. A man at $9 a week can stand a dollar, when he could not think of $3. Eight-tenths of the population of Canada are of that stamp.—Bob. Ind.

ADIOS.

Land of garlic and tortillas,
Land of xebecs and mantillas,
Land of mules and smuggled bitters,
Land of raisins and of fritters,
Land of Pedro and of Sancho,
Land of Weyler, also Blanco,
Land of bull fights and pesetas,
Land of dusky senoritas,
Land of manners stiff and haughty,
Land of Isabella naughty,
Land of Bobadil and Hamil,
Don't you hear your Uncle Sam'l ?
" Git !"

—Cleveland Plaindealer.

THE GRAIN TRADE.

The annual report of the Buffalo Board of Trade, just received, has some interesting figures showing the growth of the lake trade centering in that city. The report gives statistics of the quantity of grain received at New York by rail and canal during the last ten years, principally from Buffalo, as follows:

In.	By Canal.	By Rail.	Total.
1888....	33,100,000	23,700,000	56,800,000
1890.....	30,100,000	31,500,000	61,600,000
1892. ...	25,400,000	62,000,000	87,400,000
1895. ...	14,600,000	54,200,000	68,800,000
1897. ...	20,900,000	97,100,000	118,000,000

These figures indicate that whilst the export of grain from New York has doubled during the last ten years, there has been quite a revolution in the mode of transporting it to the market. Ten years ago the Erie Canal carried more than half the grain received in New York, but the proportion carried by rail has been increasing year by year, until last year the railways carried more than four times as much as the canal, the figures being 97,100,000 bushels by rail against 20,900,000 by canal.

This result confirms, in a singular manner, the contention of the Hon. Mr. Shehyn in a discussion which took place at the Quebec Board of Trade a number of years ago. Mr. Shehyn's contention was that in the course of a few years, the railways would far outstrip the canals in the quantity of grain carried. These facts also go to show that Mr. Booth's new plan of bringing the western grain trade to the St. Lawrence for shipment, by means of the Parry Sound Railway, will unquestionably bring about that result. Some of our commercial men should go to Parry Sound and see for themselves the enormous traffic which is being centered there.—Quebec Chronicle.

A NEW PAINT FOR A SHIP'S BOTTOM.

A new ship's bottom paint, consisting of seaweed, which, while green and moist, is ground in oil and mixed with litharge, lead acetate, turpentine and linseed oil, is noted in the Farben Zeitung. Such a coating is said to be not only a valuable protection against the adhering of shells, but also to prevent worms from entering wooden ship bottoms or any wooden submarine constructions. The method of manufacture pursued in the production of this peculiar article is as follows: Into a definite quantity of linseed oil, say forty-eight liters, there are put one-half pound of litharge and one-half pound of sugar of lead, these being then boiled for five hours at a temperature of 600 deg. F. The next stage is to bring this mixture to the proper painting consistency with turpentine, adding one-half liter of seaweed, which has been ground in oil, in the green and wet condition. For coloring various substances, such as ochre, etc., may be added, the paint being then ready for use.

READ THE ADERTISEMENTS.

The subscriber who fails to read and carefully examine the advertisements in his trade journal misses the valuable information contained in it, and thus sometimes loses opportunities of the highest importance to him as a business man. The advertisements are, in fact, communications on business subjects addressed directly to each reader of the journal, and a careful business man would as soon think of neglecting his morning's mail as of skipping the advertisements in his trade paper. It is in the advertisements that he must seek all that is new, useful and profitable in his line of trade. He must not stop at that, however. When he finds an announcement that interests him, he should follow it up by acting upon it, by corresponding with the advertiser and learning all there is to learn about it.—Keystone.

BUSINESS IN WALL STREET.

The New York circular of Henry Clews & Co., dated 30th April, says:

The first week of war has produced no material change in the aspect of affairs in Wall Street. The most notable feature is the contraction of operations on the Stock Exchange. Investment transactions are almost suspended; the "outside" element in speculation has virtually disappeared ; and business is almost entirely confined to quick in-and-out operations; the result being that dealings have contracted to about one-third of their normal volume. On the whole, prices have been steady to firm, the chief influence causing fluctuations being the varying aspects of naval movements and of other indications as to the drift of hostilities. Evidently, until the struggle has ceased, we may expect the Stock Market to keep even pace with the fortunes of war, while ordinary influences will be held largely in abeyance. . . . During the war, government securities are likely to be materially increased, but railroad securities will not be. There will be no time, however, that a government bond will go below the basis of 3½ per cent. interest, in my opinion, even in the event of a naval reverse, which, though possible, is not likely. The use of money for business purposes will be curtailed more or less during the war, as no new enterprises will be entered into. Business, therefore, for some little time, will be apt to settle down to a stereotyped condition conducted on conservative lines. The demand for money will diminish instead of increase for some time to come. . . . .

The Stock Market hereafter will fluctuate according to the fortunes or misfortunes of war. Disasters will put prices down—victories will advance them, and fluctuations will hereafter be influenced by people's spirits, which war news will affect from time to time. Operators must keep a sharp eye on the projectile guns.

The best way to bring the war to a speedy termination is for us to take the Philippine Islands from Spain and then trade them back to Cuba. This would satisfy Spanish honor, as Cuba in that case would only be given up for full value, and, as Cuba is the bone of contention with us, honors would be easy.

Commercial.

TORONTO MARKETS.

Toronto, May 5th, 1898.

Dairy Products.—In the butter market the feeling is distinctly weaker and prices have fallen off. Large dairy rolls are coming forward freely and dealers report it difficult to keep receipts well sold up. Buyers, in fact, have everything their own way. Several lots of large rolls are reported to have exchanged hands recently at as low as 12c. per lb. Creamery is offering very freely, but dealers may expect a decline in receipts within a week or so when the cheese factories have opened. Few of the summer creameries are yet in operation. Late mail from London reports " the weather in the daytime is rapidly becoming spring-like all over the United Kingdom, though the nights are cold and some slightly frosty. In Scandinavia winter lingers, and two days ago it was snowing in Stockholm. The pastures in Ireland are growing fairly fast, and though the grass in England is not specially forward for the time of year, yet there is an increasing quantity of butter of home production coming into the country markets." In Ontario the cattle are only beginning to get into pasture, and many of the cheese factories will not open until the 16th. Local jobbing prices range about 9c. per lb. Eggs are a little firmer with 10 cents quoted ; picklers are actively at work.

Dry Goods.—Trade is now "between seasons,' and it is as active as the time of the year would warrant. The wholesale houses seldom buy at all freely in the month of May, as it means June dating, while June purchases are on September dating. In cotton goods there is no change in values, and trade remains steady. Woolens are active, and mills engaged on blankets, hosiery and underwear are busily employed. It is said some of the factory owners are arranging for a night staff of employees. Reports from the country of retail conditions are very favorable, and indicate satisfactory conditions.

Flour and Feed.—The flour market is excited and prices have advanced sharply. Manitoba patents are quoted $6.30 and strong bakers $5.95 per barrel. Large sales have been reported here to parties in Quebec and the Maritime Provinces. Feed has not advanced with flour and remains quiet and unchanged at previous quotations.

Green Fruit.—The cold weather has been unfavorable to trade conditions this week, and the consumption has not been up to the usual early May movement. At the Wednesday sales fair prices were realized for Washington navels, California seedlings, and blood oranges. Good stock lemons sold rather low. We quote: New Messina, fancy, 300s, 360s, $2 50 to $3; choice do., 300s, 360s, $2.25 to 2.50. Bananas are in good demand at fair prices. The movement is increasing as the season advances. Strawberries of North Carolina are in the market, of good stock, and bringing 18 to 20c. per quart.

Groceries.—Most of the wholesale houses are actively engaged in distributing goods to the trade. Sugars at the advanced prices are free in movement. For California fruits there is fair demand. Dealers quoting prunes, 50/60, per lb. 7c.; do., 40/50, per lb. 7½c.; peaches, fancy, 25 lb. boxes, per lb. 9c. Canned goods are not so active, the range in values standing as follows: Tomatoes, 3 lbs. (1897), per doz. $1.25; corn, 2 lbs., per doz. 90c.; peas, per doz. 90c.; beans, per doz. 85c.; pine apple, extra standard, per doz. $2; do., standard, per doz. $1.75; strawberries, per doz. $1.50; peaches, 3 lbs., per doz. $2; do., 2 lbs. per doz. $1.30; plums, Green Gages, 2 lbs., per doz. $1.15; do., Lombards, 2 lbs., per doz. $1; do., Lombards, 3 lbs., per doz. $1.40. Teas are without features of special interest.

Hides and Skins.—There is a somewhat brighter feeling in the hide market, and although it has not crystallized into an advance in quotations, merchants are well satisfied with the trade prospects. There are no accumulations of hides at this point, and in fact some of the merchants are said to be pretty well sold ahead. Merchants are asking 8¼c. per lb. for cured hides, and are paying 7½c. to butchers for green hides. Calfskins, as we intimated last week, declined 1c. per lb. There are few sheepskins coming forward. Lambskins are quoted 15c. Tallow remains quiet and dull, with prices nominal. From Chicago, May 3rd, buyers gave a fair amount of attention to the market for packers' hides, but owing to the extreme prices named by packers only a limited volume of business was transacted, closing firm at 11 to 11¼c. for native steers, 10¾ to 11c. for Texas, 9¾ to 10c. for butt brand, 9¾c. for branded cows, 8¾ to 9c. for Coloradoes, 10½c. for heavy native cows, and 11c. for light do.

Provisions.—The offerings of dressed hogs are limited to the satisfaction of butchers' requirements. There is active trading for the season of the year. Prices are firm, and although no advance in quotations has taken place, a stronger tone characterizes the market. Heavy meats are not in large supply. Long clear bacon is in good demand. Lard is scarce and firm in value.

Wool.—The market is quiet and without change. There are some small deliveries of unwashed wool coming in, but this movement is of but a very limited nature. We elsewhere review the situation. A new series of sales opens in London, May 5th, and we are advised: "London, April 30th.—The week was a very quiet one in the wool trade, owing to the approaching series, which will open next week. It was rumored that several bales of fine Australasian greasy, which was shipped by America, stopped here, and will probably be offered at the coming sales. The arrivals for the fourth series aggregate 58,129 bales, including 9,000 forwarded direct. The imports of the week were as follows: New South Wales 356 bales; Melbourne, 573; New Zealand, 13,781; Cape of Good Hope and Natal, 3,985; Fort Henry, 1,273. The offerings next week number 48,300 bales. The series is scheduled to close May 21st."

MONTREAL MARKETS.

Montreal, 4th May, 1898.

Ashes.—There is still an absence of improved demand in this line, nor have the receipts, usually following the opening of canal navigation, come to hand, from which it is judged they must be seeking other markets, probably New York, as was recently noted with regard to the product of some Western makers. Prices are quoted at about $3.60 to $3.75 for first pots, $3.25 to $3.30 for seconds, and about $4.75 for pearls.

Cements and Firebricks.—For cements there is an active demand. Stocks in store are quite exhausted, and one firm, who had 5,000 brls. of Belgian cement in the "Westmeath," just discharged, have already shipped it all out. Another moderate lot of English cement just landed, has also been all placed. Prices now quoted are ex-wharf, namely: $1.90 to $2.05 for Belgian, English $2.15 to $2.30. Firebricks are dull, as is general at this season; prices range from $17 to $22 per thousand.

Dairy Products.—Receipts of new cheese are thus far small, only a few moderate lots of fodder cheese having yet come forward. The market seems a little firmer, with cable quotations 42 shillings for white, and 44 for colored, while stocks in Liverpool are reported some 22,000 boxes less than at this time a year ago. As nearly as can be indicated, the present range of prices would be about from 7¾ to 8¼c. The butter market rules easy, with 17c. the inside figure for creamery, dairy 15 to 16c., and good rolls 13½ to 14c. per lb.

Dry Goods.—The 4th of May is considered a fair-sized day as regards aggregate of payments in the dry goods trade coming due, and all the indications tend to show that customers' paper is being well taken up this year. One leading house reports that up to noon to-day they could count on 75 per cent. of their customers' bills being provided for; another large house states they expect fully 65 to 70 per cent., and that their April collections were 30 to 40 per cent. ahead of April, 1896. Sorting business is showing some signs of falling off, though a few houses still report good business in this line. A certain amount of selling is being done of fall lines, principally Canadian woolens, so far.

Furs.—We learn of little new in this line. A fair number of mixed lots are reported to be still coming in. We quote: Mink, large dark, $1.50; small, do., $1 to $1.25; marten, $1.75 to $2.25; fisher, $4.50 to $7; lynx, $1 to $2; otter, $1 to $12 for dark; pale, $5 to $7; red fox, large, $1.30 to $1.50; small, $1; cross fox, $3 to $6; bear, cubs, $3 to $7; medium, $7 to $10; large, $12 to $15; skunk, 15 to 70c, as to color and stripe; coon, 20 to 75c; rats, fall, 7c. to 10c.; kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

Groceries.—The houses in the trade generally report a very fair steady distribution of goods, with remittances coming in well. On Friday of last week, refiners again advanced sugars a sixteenth, making present factory price for standard granulated 4½c., second grade ditto, 4¼c.; yellows from 3 11-10c. upwards. The big freighter, "Westmeath," from Hamburg, brought some 5,000 pckgs. of foreign refined sugars, principally Austrian, in 200 and 100 lb. sacks, and mostly on order, it is said. Raw beet is stated to be a little easier in European markets, but Javas are reported very firm. Molasses is again firmer, a cable from Barbadoes to-day quoting 19½c., a gain of a cent and a half within the week, but local jobbers have not further advanced their figures. Some supplies of new rice have come to hand, for the local milling company, and prices in this line incline to increasing firmness. The starch manufacturing companies have agreed on a general advance of a quarter of a cent per lb. Rope is advanced a cent a lb. Tea jobbers are light buyers at the moment. Good medium Japans are scarce, and prices well maintained.

Hides.—Receipts of hides continue light, but calfskins are plentiful, and there was some talk of a reduction in prices of this latter line, but no change has been made. Lambskins and clips have been advanced this week to 15c., as was predicted in last report. Hides are firmer in Chicago, but local dealers are still buying on the basis of 8c. for No. 1; calfskins 10c. for No. 1, and 8c. for No. 2, per pound.

Leather.—The feature of the week in leather is the active English enquiry for both sole and black leathers. Local dealers, as well as Western tanners, report cable offers for stock, and considerable lots of sole are being shipped by outgoing steamers, while sales of glove grain are reported at half a cent advance. Advices from American centres also report good European demand. Several of the larger shoe manufacturing concerns here are busy taking stock, and the local demand is still somewhat dull. We quote: Spanish sole, B.A., No. 1, 24 to 25c.; do. No. 2, 22½ to 23½c.; No. 1 ordinary Spanish, 23 to 24c.; No. 2, 20 to 21c.; No. 1 slaughter, 26 to 28c.; No. 2, do., 24 to 25c; common, 20 to 21c; waxed upper, light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 18 to 20c.; juniors, 18 to 20c.; calf-splits, 30 to 35c.; calfskins (35 to 40 lbs.), 60 to 65c.; imitation French calf-

METALLIC ROOFING CO., LIMITED,
1178 King St. West, Toronto

skins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 24c.; colored pebble cow, 13 to 15c.; russet sheepskin linings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; buffed cow, 12 to 14c.; extra heavy buff, 15c.; pebble cow, 13 to 13½c.; polished buff, 11 to 13c.; glove-grain, 11 to 13c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

METALS AND HARDWARE.—Some increase of activity is to be noted in heavy metals. We hear of some very fair orders being placed for Hamilton iron within the past week, aggregating 1,000 tons or so, on the basis of $15 for round lots. A sale of 150 tons of low grade American iron, said to be No. 4 Buffalo, is reported at $12. In Scotch iron we hear of little new business. A recent steamer brought about 750 tons of Summerlee pig, mostly on order, booked some time ago, and a balance of 50 tons is said to have been sold something below $17, to clear it off the wharf. Lead has undergone further advance, since last writing, though latest cables show a little easing off; $3.90 is being asked in a jobbing way. Copper keeps firm. Carnegie has advanced boiler plates $2 to $3 a ton, and iron piping is slightly dearer. We quote: Summerlee pig iron, $17.50 to $18; Carron, No. 1, $18; No. 3, $17.25; Ayrsome, No. 1, $17; No. 3, $16.50; Shotts, $17.25 to $17.50; Carnbroe, $16, ex-store; Ferrona, No. 1, $15; Hamilton No. 1, $15 to $15.50; No. 2, ditto, $14 to $14.50; machinery scrap, $14 to $15; common ditto, $12 to $13; bar iron, Canadian, $1.40 to $1.50; British, $2 to $2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas, $2.40; Terne roofing plate, 20x28, $5.75 to $6; Black sheet iron, No. 28, $2.25; No. 26, $2.15; No. 24, $2.05; No. 17, $2; No. 16 and heavier, $2.15; tin plates—Bradley charcoal, $5.60 to $5.70; charcoal, I.C., Alloway, $3.15 to $3.25; do., I.X., $3.90 to $4; P.D. Crown, I.C., $3.60 to $3.75; do., I.X. $4.50; Coke I.C., $2.90 to $2.95; do., standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2.70; galvanized sheets, No. 28, ordinary brands, $4; No. 26, $3.75; No. 24, $3.50 in case lots; Morewood, $5 to $5.10; tinned sheets, coke, No. 24, 5½c.; No. 26, etc., the usual extra for large sizes. Canadian bands, per 100 lbs., $1.65 to $1.75; English hoops $2 to $2.15. Steel boiler plate, ¼-inch and upwards, $1.85 to $1.90 for Dalzell, and equal; do., three-sixteenths inch, $2.50; tank iron, ¼-inch, $1.50; three-sixteenths do., $2; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to $2.50; Russian sheet iron, 9c.; lead, per 100 lbs., $3.85 to $3.90; sheet, $4 to $4.25; shot, $6 to $6.50; best cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel, $2.25; ingot tin, 16½c. for L. & F.; Straits, 16 to 16¼c.; bar tin 17c.; ingot copper, 13 to 13½c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.75; Veille Montagne spelter, $4.75 to $5; American spelter, $4.50; antimony, 9½ to 10c.

OILS, PAINTS AND GLASS.—New stocks of glass are arriving, but no change has been made in prices, and European manufacturers are said to be very firm in their quotations. As anticipated in last week's report, an advance was made by the lead grinders' association, immediately after writing, quotations being put up 25c. per 100 lbs. all around. Turpentine has been undergoing considerable fluctuation of late, and is advanced again to 50c. Paris green is advanced to 17c. in bulk, and 18c. in small pckgs. Dry leads are also firmer. We quote: Turpentine, one to four barrels, 50c.; five to nine barrels, 49c.; net thirty days. Linseed oil, raw, one to four barrels, 49c.; five to nine barrels, 48c.; boiled, one to four barrels, 52c.; five to nine barrels, 51c., net 30 days; olive oil, machinery, 90c.; Nfld. cod. 35 to 3-c. per gal.; Gaspe oil, 30 to 32c. per gal.; steam refined seal, 45 to 47½c. per gallon in small lots. Castor oil, 9 to 9½c. as to quantity. Leads (chemically pure and first-class brands only), $5.62½; No. 1, $5.25; No. 2, $4.92½; No. 3, $4.50; No. 4, $4.12½; dry white lead 5c.; genuine red do., 4¼c. to 4½c; No. 1 red lead, 4c. to 4¼c.; Putty in bulk, bbls., $1.65; kegs, $1.80; bladder putty, in bbls., $1.80; smaller quantities, $1.95; 25 lb. tins, $2.05, 12½ lbs., tins, $2.30. London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to $1.75; yellow ochre $1.25 to $1.50; spruce ochre, $1.75 to $2. Paris Green, 50 and 100 lbs. drums 17c, 25 lb drums, 17½c.; 1 lb. cartoons, 18c.; pound tins, 18½c.; window glass, $1.40 per 50 feet for first break; $1.50 for second break; third break, $3.10.

WOOL.—The May series of the London wool sales opened yesterday, and a cable announces that opening prices show a decline of about 5 per cent. on the closing figures of last series, but is expected that this will be recovered. On spot, recent transactions have been moderate in extent, but at firm prices. We quote: Cape 14½ to 16½c.; B.A., scoured, 28 to 36c. per pound.

We offer at par, subject to allotment :

Toronto, April 25th, 1898.

$70,000 5 Per Cent. 20-YEAR FIRST MORTGAGE BONDS

Of the Belleville City Railroad.

Interest payable Semi-Annually, on the first day of May and November. Coupons payable at the BANK OF MONTREAL, Toronto. Bonds of the Denomination of $100 each, dated April 25th, 1898. The Bonds being secured by a First Mortgage Deed, made to the TRUSTS CORPORATION OF ONTARIO, on the entire Plant, Franchise, Property and Extensions to be made of the BELLEVILLE TRACTION COMPANY, LIMITED, of Belleville, Ontario.

Subscriptions will be received for the above issue in amounts to suit purchasers, according to Application Blank below.

PRESENT ROAD AND EQUIPMENT, BUILT IN 1895.

Two miles of track have already been laid ; the construction is first-class.

ROAD-BED.—Macadam stone ballast.

TIES.—2,640 to the mile, hemlock, cedar and tamarack, in good condition.

RAILS are bonded with copper wire and cross-bonded every 125 feet.

POLES.—Thirty feet seven inch top cedar poles in good condition, set in rock five feet or dirt six feet, 100 feet apart on tangents, twenty feet apart on curves, all in good alignment.

OVER-HEAD CONSTRUCTION.—Span work in good condition, guy and span wire ½ in. stranded galvanized wire iron, trolley wire—O—copper.

POWER-HOUSE PROPERTY.—The buildings are situated on the banks of the Moira River and are in good repair. **The Company own the property, which includes one of the best mill sites on the River, capable of generating easily 100 H.P. for eight or nine months of the year.** The buildings on the property consist of stone power-house 40 x 50; boiler-room 30 x 60, separated from engine-room by stone wall; storehouses 40 x 15, attached to main building, square brick stack, sixty feet set in stone foundation, flue thirty inches square, base five feet square; a double two-story brick house; a one and a half story brick house.

POWER-HOUSE EQUIPMENT.—One cross compound Brown engine, 13 x 20 x 30; independent jet condenser, 6 x 9 x 12; one horizontal tubular boiler, 62 x 14 x 3 tubes; brick foundation and setting; one vertical boiler, 30 x 5; one duplex steam pump; all necessary piping, valves and belting; one Canadian G. E. generator, 100 K.W.M.P., 650 revolutions, 500 volts; one slate panel switch board, complete, 200 amperes, 500 volts. The **present power-house equipment is amply sufficient** to furnish more power than is **necessary for the proposed extension.**

CAR EQUIPMENT.—One twenty-one feet closed motor car, equipped with two twenty-five H.P.G.E. 800 motors and two series parallel controllers, Brill No. 21 truck; one sixteen feet closed motor car, same as above; two ten-bench open cars, converted into motors. The proposed extension will necessitate the building of about three miles additional road, which it is intended to do in the most substantial manner and to equip it with the most modern and improved car service.

FRANCHISE.—The franchise is **for twenty years**, with the right of renewal **for twenty years longer**; gives exclusive right on all the roads and bridges, and **exempts the Company from taxation**; does not require to pay any percentage of the receipts to the City, and allows the road to cease operations during the months of December, January, February and March, if not considered paying by the management. The charter gives the Company permission to run excursion boats.

BONDS.—The proceeds of the sale of bonds are to be used in building **three miles of extensions**, purchasing **closed and excursion cars** of the latest improved pattern, to accommodate the increased business of the Company, erecting a car-house, re-laying the present two miles with steel rails, building a **dam** across the River Moira, paying off a floating indebtedness, and either purchasing or leasing thirty acres of land and fitting up for a park, as hereafter mentioned.

EXTENSIONS AND IMPROVEMENTS.—It is proposed to extend the line from Front Street West to the proposed Park and Cemetery, which will run, nearly the whole way, through a thickly settled section, and will have on the route the Government Institution for the Deaf and Dumb, the Mineral Baths and the Agricultural Grounds.

There are no parks at present in Belleville, but within three miles from the centre of the City, on the shore of the Bay of Quinte, is situate the Belleville Cemetery. Adjoining the Cemetery, on the City side, the Company have selected about thirty acres for a park, one of the most charming spots on the bay. This thirty acres is to be fitted up with half mile horse and bicycle track, cricket crease, lacrosse and baseball grounds. A large pavilion for refreshments and general amusements is to be built.

RECEIPTS.—At present, only two miles of track being laid, with termini at the railroad depot and steamboat dock, the residential portion of the city is not reached, and the receipts are derived from these connections only.

As shown by the books of the Company, from this patronage was realized for the two complete years it has been in operation $11,138.42, an average per year of	$5,569 21
It is estimated that the revenue to be derived from the extension—	
Park and its attractions (only estimating twenty days for special attractions and 750 attendance)	$3,740 00
Car service	1,500 00
Average daily attendance to park and cemetery, May to October, 130 days, 300	3,900 00
Ordinary traffic outside of park and cemetery, per day, $7.50, 300 days	2,250 00
	$16,959 21
As shown by the books of the Company, the running expenses for the two years have been, per year	$4,036 00
Additional expense for fuel to new increased car service	936 00
Additional help, 312 days	1,248 00
Contingencies	1,000 00
	$7,220 00
When the dam is built (which it is proposed doing at once) it will save $8 per day in fuel, for eight months at least, say 200 days	1,600 00
	$5,620 00
The estimate, which has been carefully gone into, is very conservative and based on the lowest possible results, showing a net profit of	$11,339 21
Interest on $70,000 issue of 5% bonds	3,500 00
Net after paying all charges	$7,839 21

We have carefully examined the above figures and certify that the receipts for the last two years are correct, also believe that the estimate as to future earnings and expenses are conservative.

(Signed)

S. S. LAZIER, Local Master of Supreme Court.
CAMERON BROWN, Manager of the Daily Sun Publishing and Printing Co.
JOHN J. B. FLINT, Police Magistrate of the City.
DAVID B. ROBERTSON, City Clerk.

Dated Belleville, April 7th, 1898.

BELLEVILLE.—The City of Belleville, in the County of Hastings, with a population of about 12,000, is situated on the Bay of Quinte, about 120 miles from Toronto and 200 from Montreal.

It is a thriving, busy place, surrounded by excellent farming lands, and has one of the best markets in the Province.

The buildings are principally of brick and stone, the private residences being superior to those in places of much larger size.

The streets are broad, good macadamized roads, and the principal sidewalks are concrete.

It has an excellent system of water supply, gas and electric light.

Shops of the Grand Trunk Railway are situated here, Belleville being a divisional point of the road.

The railway depot is located at the North-East part of the City, about one and one-half miles from the main centre of Front Street (the principal business thoroughfare), and is about two miles from the steamboat dock.

The following places are worthy of notice: Three Colleges, one Government Institution for the Deaf and Dumb, three Daily Newspapers, three Foundries, two Canning Factories, four Flour Mills, one Tinware Factory, three Cabinet Factories, one Furniture Factory, one Paper Mill, one Carriage Factory and one Woolen Mill.

Yours respectfully,

WYATT & CO., Member of Toronto Stock Exchange,
Canada Life Building, Toronto

E. L. SAWYER & CO.,
42 King Street West, TORONTO.

BELLEVILLE TRACTION BONDS.

FORM OF APPLICATION.

WYATT & CO. or E. L. SAWYER & CO.,
CANADA LIFE BUILDING, TORONTO, Ont.

☞ **This Form should be mailed to E. L. Sawyer & Co., Toronto, Ont. or Wyatt & Co., Toronto, Ont.**

Gentlemen:

I request that you allot me..Bonds, of the par value of $100 each.

This is in accordance with your prospectus, issued the 25th day of April, 1898, wherein you offer the bonds of the Belleville Traction Company, Limited; and I agree to pay for said Bonds on Allotment. I also agree to accept any lesser amount that may be apportioned me.

The Bonds can be paid for either by remitting direct to our Bankers, the BANK OF MONTREAL, or authorizing us to draw through your Bank, with Bonds attached to draft.

Queen City Chambers, Church St., Toronto.
DIRECTORS:
JAS. GOLDIE, Pres. J. L. SPINK, Vice-Pres.
THOS. WALMSLEY, Treas. HUGH SCOTT, Mgr. and Sec.
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co.
32 Church Street, Toronto, Ont.

Manager, **R. S. STRONG, Galt.**

WHAT WAR TAXES THE AMERICANS PROPOSE.

A loan of $500,000 is provided for in the new war tariff bill in the form of 3 per cent. ten-twenty bonds, $100,000,000 certificates of indebtedness, to bear 3 per cent. interest, are also provided for.

The loan provisions of the bill authorize the Secretary of the Treasury to borrow on the credit of the United States the sum of $500,000,000, or so much thereof as may be necessary, and to prepare and issue therefor, at not less than par, coupon or registered bonds of the United States, in such form as he may prescribe, and in denominations of fifty dollars or some multiple of that sum, redeemable in coin at the pleasure of the United States, after ten years from the date of their issue and payable twenty years from such date, and bearing interest payable quarterly in coin, at the rate of 3 per cent. per annum.

That the Secretary of the Treasury is authorized to borrow from time to time at the market rate of interest, not exceeding 3 per cent. per annum, such sum or sums as in his judgment may be necessary to meet public expenditure, and to issue therefor certificates of indebtedness in such form as he may prescribe . . provided that the amount of such certificates outstanding shall at no time exceed $100,000,000.

The tax upon tobacco, snuff is increased to 12 cents a pound, upon cigars to $4 per 1,000, weighing more than three pounds per 1,000, and $2 on cigars weighing less than three pounds per 1,000, $4 upon cigarettes weighing more than three pounds per thousand, and $2 on cigarettes weighing less than three pounds.

Licenses are placed on tobacco dealers, graded from $24 to $48; a stamp tax includes proprietary medicines and similar preparations. The same schedule applies to perfumery, cosmetics and chewing gum. All classes of mineral waters are embraced in the measure, as are bonds, debentures and certificates of indebtedness. Bank cheques, bills of exchange, letters of credit, certificates of deposit are to contribute to the fund. Memorandums of sales of goods, stocks, bonds and real estate or property of any kind issued by brokers are to pay a graded tax.

Telegraph messages, except press despatches, costing less than 20 cents, are taxed one cent and three cents above that. Custom House entries are taxed slightly, as are clearance papers for cargoes destined for a foreign port. Law papers of all kind, note protests, cheques, acceptances, warehouse receipts, etc., pay small dues.

The bill also imposes a system of tonnage taxes of eight cents per ton per year upon all vessels from foreign ports and from the receipts from these duties, $750,000 is appropriated for the marine hospital service.

THE CUNARD S.S. CO.'S REPORT.

The Cunard Steamship Company's report for last year, submitted on April 12th, says:

"The profits, including £2,181 14s. 5d. brought forward from 1896, are £222,475 8s. 2d, and, after reserving £166,938 9s. 2d. for depreciation of ships and wharf properties, and £27,999 13s. 4d. for the company's insurance fund, there remains at the credit of profit and loss account, £26,691 5s. 8d. This credit has been increased by a transfer of £15,000 from the insurance fund to £41,691 5s. 8d. A dividend of 2½ per cent., absorbing £40-000, is recommended. The balance at the credit of the insurance fund has been increased from £202,000 to £212,000.

"The company suffered, with other Atlantic lines, from the loss of passenger traffic between Europe and the United States, which marks 1897 as the worst of recent years. In first cabin business, the total falling off, for the British and continental lines, compared with 1896, was about 14 per cent., in second cabin 5 per cent., and in the steerage 18 per cent. The decrease in outward steerage alone was 76,000 souls.

"Owing to the engineers' strike, and other causes, the delivery of the three ships ordered for the Mediterranean cargo trade, was delayed, and the third ship has only just now been completed. They are very satisfactory. A further vessel of the same type has been ordered to be delivered in February, 1899. One of the old Atlantic ships, the 'Gallia,' and one of the Mediterranean ships were sold."

THE FUNCTIONS OF THE ASSISTANT MANAGER.

Among the papers presented at the recent meeting of the Fire Underwriters' Association of the Pacific, was one by Mr. Wm. H. Blagden, of the North British and Mercantile Insurance Company, on a topic rarely discussed, "Assistant Managers." The Insurance Monitor, in quoting from this paper, calls attention to an important principle in business life, viz., the futility of the head of a great concern attempting to look after details.

With rare exceptions, an executive or chief, with broad general duties to perform and great responsibilities to assume, cannot afford to devote himself to details. The attempt is apt to impair his efficiency as a directing head, and if not the strain is likely to end in ruined health, insanity, or even death, in extreme cases.

A valued officer of one of our great life companies attempted this double task some years ago. Nothing was too minute to escape his personal attention. He was directing the conduct of several financial institutions, and at the same time charging himself with watching each employee's petty acts, and the audit of every trifling bill. His memory for details was his boast. One day there came a sudden crash. The brain collapsed under the mental strain, and he left his office chair for a mad-house. To release the general manager from the pressure of details, is, as we understand Mr. Blagden, the important function of the assistant, as well as that of supplying a substitute when needed. The paper in question says:

"In a general way it may be said that the assistant manager should have, not merely a superficial acquaintance with the office work, but a knowledge of every detail so thorough that, should occasion require, he can acceptably fill any position in the office. He should be able to find any book and trace any record at a moment's notice, without hesitation or enquiry.

Especially should the assistant manager be familiar with the routine of the accountant's desk, as, in his absence, he is the natural temporary occupant of that responsible position, and, even in offices having an assistant accountant, it is desirable that in the absence of the accountant the assistant manager should, at least, examine the cash and audit the accounts daily.

In the very important matter of correspondence, the assistant should relieve the manager of the ordinary details, and should be competent to answer agency letters in such a courteous and correct way as will clearly show that the English language is not suffering at his hands.

The ideal assistant manager, as sketched in the preceeding lines, may not, perhaps, actually exist, but the necessity for such a position is, I believe, apparent. However capably other positions may be filled, there should be some one person in each department, who combines, to a requisite extent, the attributes of both field and office men."

RECIPROCAL TRADE.

Enlightened people and able journals in the northern states of the American Union see the importance of reciprocity with Canada. And they see that friendliness with us will pay. Here is what The New York Evening Post says: "We agree that it is time to do something to save our Canadian trade. That we shall lose an important part of it unless we meet the Canadians half way, and in a fair spirit, there is no room to doubt. If the preferential duty of 25 per cent. does not prove sufficient for the purpose which the Dominion Government had in view, it will be very easy to make it higher, and if it is made higher, we shall still have no cause of complaint. They are merely giving us our own medicine. We are even now negotiating treaties whose object is preferential duties for this or that country in return for some advantage offered to us. We are not admirers of that policy, but, being in it, we see no reason why we should restrict ourselves to countries where our trade is, and must continue to be, relatively small, and omit one which is coterminous with us for a distance of 3,500 miles, and which, under a more liberal policy, would be a purchaser of our products to the amount of $100,000,000 per year."

THE OAK ISLAND TREASURE.

The Oak Island treasure seekers are making better progress of late than they have been doing for some time. They are now sinking a shaft to be used as a pumping shaft and had reached a depth of 152 feet last Saturday night, and intend to go to a depth of 180 feet, when after setting up their large new pumps they will drive a tunnel toward the drain that leads into the money pit from the shore and take the water out by way of the new pit. Those who ought to know say they will have no trouble to handle all the water that comes.

While sinking this pit they were doing some prospecting with a drill and struck iron and metal at 125 feet, 126 feet, 153 feet, 166 feet and 170 feet. At the 153 feet depth they went through an oak box full of metal of some kind and brought up from it a small piece of parchment which no doubt some of our readers have seen. This box is bedded in a cement analyzed and found to be composed of lime and sand.—Yarmouth Herald.

NOT THEIR EXACT WORDS.

The general tendency to look at the actions of others through one's own particular spectacles is frequently observed. Perhaps not so often noticed, however, is the habit of unconsciously rendering another's speech into one's own language.

A Boston girl who had been taking her first lesson in bicycle riding expressed her satisfaction at home at the result of her experiment.

"The man said," she repeated, "that I had made most satisfactory progress for a novice."

"Why, did he really say that?" was the surprised query.

"Well, no," answered the Boston young woman, after a moment's reflection; "what he did say was, 'You'll do fust-rate for a new beginner!'"

A friend of the poet Bryant chanced to be alone in his study when a cabinetmaker brought home a chair that had been altered. When Mr. Bryant returned, he asked:

"Miss Robbins, what did the fellow say about my chair?"

"He said," answered the visitor, "that the equilibrium is now admirably adjusted."

"What a fine fellow!" said Mr. Bryant, laughing. "I never heard him talk like that. Were those his exact words?"

"Well, he said 'it joggles just right!'" repeated Miss Robbins.—Youth's Companion.

AN IMPORTANT SALVAGE CASE.

Before the Admiralty Court, London, on April 21, Sir Francis Jeune presiding, there came up an action brought by the owners, master and crew of the steamship "North Cambria" for salvage for services rendered the steamship "Maylands" on November 18 to 24 last. On November 1 the "Maylands," a steamship of 2,517 tons, while on a voyage from West Hartlepool to Quebec, in ballast, when in lat. 55 21 North and long. 39 41 W. broke her main shaft. She was taken in tow by the SS. "Norwegian," and towed to the westward till November 4, when the hawsers parted in a gale of wind and the "Norwegian" was lost sight of. The "Maylands" drove before the gale till November 8, by which date the engineers had succeeded in mending the shaft and the "Maylands" then proceeded to the south-eastward with her engines working at slow speed till November 14, when the shaft again broke. On November 18, when in lat. 45 50 N. and long. 36 W., the "North Cambria" came up and took the "Maylands" in tow. In fine weather the towage continued till November 24, when the "Maylands" was anchored in St. Michael's harbor. The "North Cambria" is a steamer of 1,983 tons, and at the time was on a voyage from New York to Queenstown. The value of the "North Cambria," her cargo and freight was £37,504, and the property salved was valued at £25,000. The president said that the service was an easy one and was performed in fine weather. The "Maylands" was towed a distance of seven hundred miles. By performing this service the "North Cambria" was delayed for nine days. The risks she ran were only those incidental to sea towage. With the assistance of the Trinity Masters he thought that a sum of £1,485 was a sufficient award to make in this case. Of this sum the owners were to receive £1,175, the master £110 and the crew £200.

AN INTERESTING DECISION.

BANNERMAN BROTHERS V. CONSUMERS' CORDAGE COMPANY.—An interesting judgment was given on the 4th inst. at Montreal. The suit taken to recover $1,875 for three months' rent due on premises leased by the plaintiffs to the defendants in 1890, for a term of twenty-one years, at a rental of $7,500 per annum. The premises, which are situated at Lachute, consisted of a rope factory, rope walk and other buildings. The company defendant pleaded the action should be dismissed because the said lease was passed in order to create a monopoly in the cordage, rope and twine business in the whole Dominion of Canada and that the consideration being illegal the lease itself was a nullity and carried no obligation between the parties. The court, in dismissing the plea and giving judgment for the amount claimed, stated that while it might be true that the defendant intended to and did for a time create a monopoly in Canada in the cordage business, the plaintiffs were no party to such a monoply, they only leasing the small factory in good faith and selling the good-will of their establishment, as is very often done in business. There was no reason why they should not recover the rent due on the said lease, the collapse of the business, although a change in the customs duties or some other public cause, not affecting plaintiff's rights in any way, but showing meanwhile that the monopoly, if it existed, was entirely independent of plaintiff's will.

THE Free Press understands that the Manitoba Trusts Co. has decided to increase its capital stock from $100,000 to $250,000 paid up.

RACE

STYLES
FOR GENTLEMEN

Next week will be race week. Being an afternoon function, the natural question for gentlemen to ask will be, what will constitute a correctly attired individual at such? Lord and Master Fashion is liberal in his dictates this season for such as the O. J. C. Meeting, and while the frock coat will be the absolutely correct dress, the three-button cutaway is permissible.

Of course the neat sack suit will be in evidence.

The Black Chesterfield overcoat of some fine soft goods will predominate. Other 'racey' styles are the Paletot and Paddock coats, and the gentleman who appears at the races with his field glass and attired in one or other of these latter will be following the letter of the law, as is considered 'quite English.' That the O. J. C. will be more than ever a dressy affair, HENRY A. TAYLOR, Draper, the Rossin Block, will testify, he having already placed a great many orders for these special race garments.

Mercantile Summary.

THE British Board of Trade returns for the month of April show an increase in the imports of £50,110,200, and a decrease in the exports of £2,204,100.

THE mill of Charles T. White, at Apple River, Nova Scotia, was burned down last week. Loss, $20,000; insured for $7,000 in the Union, and $2,500 in the Sun.

THE Hall mines smelter keeps turning out product with great regularity. Its output for the four weeks ending 30th April, 1898, which represented twenty days and ten hours' smelting, was 4,734 tons of ore smelted, yielding 218 tons of matte, containing (approximately) 92 tons copper, 71,460 ozs. silver and 254 ozs. gold.

SHORTLY after S. R. Callaway was appointed president of the New York Central Railway he issued a circular appointing certain officers and changing the duties or titles of others. For example, Mr. H. Walter Webb having resigned, owing to ill-health, the office of third vice-president was abolished. Mr. J. M. Toucey, long general manager, was appointed assistant to the president, the office of general manager being discontinued. But Mr. Toucey did not take kindly to the new arrangement and consequently resigned.

FAILURES seem to be more numerous in the Maritime Provinces at the moment than in other sections of the Dominion. The following are the commercial disasters reported for the week in Nova Scotia: From Truro word comes of the assignment of S. Archibald & Sons, manufacturers of fertilizers, etc. The senior was formerly for years in the tanning business, and the present firm dates from 1892. Complications arising out of the failure of J. P. Archibald & Co., noted last week, are assigned as the cause of this stoppage, There are first preferences of about $7,500, and second preferences of about $3,000.——The assignment of D. W. Smith, farmer and grocer, East Mines Station, who owes $2,000, is also attributed to the same cause as above.——Daniel Harkness, of Hansford, a lumberer in a small way, having a small portable mill, which he moved about the country, has assigned.——McDonald & Hanrahan, general dealers at Sydney, are reported as again embarrassed, and to have put their affairs in the hands of the assignee. In 1896 they compromised liabilities of some $25,000 at 60 per cent. They are now said to owe about $15,000, of which some $10,000 or $12,000 is preferred, and they show nominal assets of $20,000.——W. S. Porteous & Co., carrying on a small general store at Pugwash, have assigned. Mr. P. came from Montreal and started business in 1895, with the assistance of a relative, to whom the assignment has been made. Liabilities are placed at $2,000, with assets of about $1,600.

IN New Brunswick, the following recent failures are noted: C. N. Wetmore, a St. John grocer, asks a settlement on a year's time, at the rate of 30 cents on liabilities of $2,000. He bought out the bankrupt stock of G. J. Babcock in January, 1896.——Mrs. M. L. Bonnell, grocer, in the same city, has failed. Her husband was formerly of Bonnell & Cowan, St. John, who failed in 1892.——Finkell & Moran, of St. Stephen, began a manufacturing confectionery business three years ago on limited capital, and have had an uphill fight. After showing signs of embarrassment for some time back, they have assigned owing $7,000, with assets very much less.——J. Edgar, in the saw-milling business, at Three Brooks, has assigned.

Monthly. $1 a year. Ten cents a copy.
ACCOUNTICS ASSOCIATION, Publishers,
262 West Broadway, New York.

Mercantile Summary.

The Woodstock Bicycle Company, limited, has been incorporated; capital, $20,000.

A dry goods stock worth about $13,000, belonging to the estate of Peck & Belleperche, of Chatham, will be offered for sale at London, on the 19th inst.

As indicative of the present depression in the lumber business, a prominent New Brunswick lumberman recalls that one year ago merchantable spruce logs were selling at $7.75 per thousand feet. To-day such logs bring only $6.

Hon. Mr. Emmerson, of Dorchester, N. B., is authority for the statement that the farmers in the parish of Dorchester this winter have hauled something like 400,000 loads of marsh mud on to their upland. This, at the lowest estimate, Mr. Emmerson says, represents about $100,000 spent in enriching the soil.

A license is granted by the Ontario Government to William Jessop & Sons, limited, incorporated in Great Britain; they are authorized to do mining, prospecting, smelting, and to carry on the business of a mining, milling and development company. Their attorney is C. L. Bailey, of Toronto.

Gross earnings of all railways in the United States reporting for April were $31,371,682 which is 17½ per cent. over last year, and 11 per cent. over 1892. The report now includes leading roads in different sections of the country complete for the month. The report for the fourth week shows an improvement over earlier returns for all classes of roads.

The Fredericton Gleaner of May 6th, says that logs are running freely into the St. John River booms, and bear the marks of all the operators, indicating that the drives are progressing well. "Reports say Aiken with 6,000,000; Cushing having 7,000,000: Murray with his big cut; Stetson, with about 5,000,000, and Miller who is driving nearly 15,000,000, are all safe in corporation limits, or nearing there."

We have just been informed that in our issue of April 8th we did injustice to a worthy man by stating, on page 1315, that W. Henry Lawrence, of Burtt's Corners, New Brunswick, had left the place involved in debt. The information we now receive is that Mr. Lawrence still continues in business as before and that he is thoroughly solvent. We regret to have been misinformed, and beg to tender an apology to Mr. Lawrence for the error.

It appears there is to be another bank at Dawson City, in which there will be some British Columbia capital, and probably more English capital. Statutory incorporation at Ottawa is sought for the Klondyke and Dawson City Bank. The founders are Mr. J. M. Cotton, of London, England, and Messrs. C. F. and T. Dupont, Boscowitz and Spicer, of Victoria. The authorized capital of the bank is placed at $2,500,000, which is a very considerable sum.

Word came from St. John on Monday last that the Portland Rolling Mills Company had suspended payment. The liabilities are about $80,000, and the assets are put at $140,000. For the present the mills will be kept in operation, but it is expected a receiver will be appointed in a few days. The company, of which Messrs J. C. Robertson, S. Hayward, W. H. Murray, Geo. F. Baird, J. A. Likely and James Mowat are the directors, has a capital stock of $200,000, of which $100,000 is preference stock. The expenditures on capital account since the present company took charge in 1885 have been very heavy, and the expectations of the company have not been realized regarding the sale of stock, so that the working capital has not been as large as it should be. Advances have been made by the Bank of New Brunswick on the security of the manufactured stock, but last week they declined to assist further, and this has compelled the company to suspend payment.

Mercantile Summarv.

ROPE is higher in price because of the war. The fibre is harder to get.

TRADERS from the north of Manitoba report this season's yield of fur as being away below the average.

THE Commercial says that Burch & Co., general storkeepers, Red Deer, Alberta, have sold out their hardware stock to Piper & Co.

THE only recent Montreal failures are two unimportant ones, as follows: A. Dugal, druggist, assigns, owing $2,400, and Thos. Picard, a suburban grocer, who owes $1,200, does likewise.

THE proprietors of shingle mills on the Pacific coast are afraid of a big decline in prices. So the shingle men at Seattle and Tacoma have issued a circular advising the mills to close down for a time.

THE Halifax Tramway Company have recently finished the installation of a second 5,000 light monocyclic alternator, which they are installing for their electric lighting service. This makes a total of 16,000 lights capacity.

THE output of steel rails by our American neighbors in 1898 promises to be heavy. The American Iron and Steel Association has ascertained from the manufacturers that the production in the United States in 1897 of all kinds of rails, including light and heavy rails, and street, electric and mine rails, was 1,647,892 gross tons, against 1,122,010 tons in 1896, an increase of 525,882 tons, or over 46 per cent.

IT looks now as if the Vancouver smelter has got beyond the project stage. A representative of the Van Anda Copper and Gold Co. of New York, addressed the city council last week, saying he had the machinery now in Seattle for a hundred ton plant, and would erect the same within five miles of Vancouver if granted fifty cents a ton or a hundred thousand tons of ore smelted. The council has made a conditional promise to accept his proposal.

EXPERIMENTS are being conducted on a system for telegraphing without wires between Lavernoch Point to Flat Holm Island in the British Channel, a distance of 3½ miles. The Morse code of signals is used and the messages are read by sound. It is stated that 40 words per minute have been signaled across and read without any difficulty. The system is the invention of W. H. Preece, engineer-in-chief of the English General Post Office.

FROM Quebec is reported the failure of Tozer & Co., a leading firm of butchers and victuallers, with liabilities reported from $40,000 to $50,000. They had a large family connection, and at one time did a very active business in supplying ships with provisions, but this latter has much declined of late years. —— A. L. Dombrowsky, a pork dealer and hardware merchant, of the same city, has suspended payment, owing to complications with the above firm. It is reported he is on accommodation paper to the extent of some $15,000.

A SMALL general store concern, E. Bourgouin & Fils, at St. Flavie Station, Que., have assigned, owing about $1,000.——Albert Leveille, general store, St. Laurent, Que., is reported insolvent, liabilities being some $1,600. He assigns upon the demand of his recent partner, Mr. Gagnon, with whom he commenced business two years ago.——Another small failure is that of Miss V. Fortin, who started a millinery and dry goods business at Etchemin, Que., a couple of years ago. She owes $645, and assigned after being sued for $150 by a Montreal millinery house.

FREEHOLD LOAN & SAVINGS CO.

DIVIDEND NO. 77.

Notice is hereby given that a dividend at the rate of 6 per cent. per annum on the capital stock of the company has been declared for the current half-year, payable on and after the First Day of June next at the office of the company, corner of Victoria and Adelaide streets, Toronto.

The Transfer Books will be closed from the 17th to the 31st May, both days inclusive.

Notice is hereby given that the General Annual Meeting of the Shareholders of the company will be held at 2 p.m., Tuesday, June the 7th, 1898, at the office of the company, for the purpose of receiving the annual report, the election of directors, etc., and that at such meeting there will be submitted for the approval of the shareholders by-laws changing the date of the annual meeting of the shareholders of the company from the first Tuesday of June to such day in the month of February in each year as the directors may appoint, and to provide that the fiscal year of the company shall terminate on the 31st December in each year as required by the loan corporations' act of the Province of Ontario Revised Statutes of Ontario, 1897, chapter 205.

By order of the board.

S. C. WOOD, Managing Director.

Toronto, 27th April, 1898.

Mercantile Summary.

THE town of Truro, N.S., advertises for tenders for a municipal loan of $39,200.

"GREATER BUFFALO" is the name of a monthly illustrated publication, setting forth the growth and commercial importance of that city across the lake. It is officially endorsed by the Buffalo Merchants Exchange.

AT Victoria, says the News-Advertiser of May 3rd, the agent of the Great North-Western Telegraph Company assured the Board of Trade that his company would be ready to handle business in that city by June 1st, and asked the board to give their influence towards securing municipal concessions.

LETTERS patent have been secured by the G. M. Rose & Sons Company, limited, to acquire from the estate of the late G. M. Rose the publishing business formerly done by him. The new concern's capital is $25,000, and the parties are Daniel A. Rose, Frederick W. Rose, Robert Hunter Rose, Jessie G. Campbell, wife of Wm. B. Campbell, and James F. Stokes.

THE great shipping company of Japan, the name of which is Nippon Yusen Kaisha, has contracted, April 28th, with D. and W. Henderson & Co., Glasgow, for a steamer of 6,000 tons gross, to be a duplicate of the "Wakasa Maru," recently built by Messrs. Henderson, but with an increased speed, and to be delivered about June, 1899. She will be 460 feet in length.

FOR the past ten years Harry Sharpe has been in the grocery business in a moderate way at Kingston, Ont., and was formerly a grocery traveler for a Kingston house. He makes an assignment.——S. N. Burns, began a small grocery and livery business at Westport, Ont., in 1896. In six months he moved to Delta, and he has now assigned, owing $1,100 with apparent assets of $350 only.

HERE are some suggestions made by the London Punch of names, more or less appropriate, for new mining companies: The Miners' Visionary Gold Mine, Unlimited: Beyond-the-Dreams-of-Avarice Gold Mine; Fools' Paradise; Iouan Promised Land Company; Impudence and Assurance Company; Lunar Greencheese Fields Exploration Company; Spanish Castles Company, Limited.

IT is stated by an American journal that the ships of Britain, from 1891 to 1895, got the biggest share of carrying Cuban trade. Of the total tonnage Great Britain carried 57.75 per cent. France ranked second, with 12.97 per cent. of the total, and the Netherlands, with 8.52 per cent., stood third. The United States fourth, with a record of 3.91 per cent. But this only refers, we remark, to the carrying trade. Ten years ago as much as 72 per cent. of Cuba's exports went to the United States, and certainly that island has been supplied with a very large share of her imports from American ports.

IN the county of Compton, Quebec, near the New Hampshire hills, lived in 1890 a farmer named A. Loubiere. He tired of the hum-drum life of the farm, and being told that storekeeping was an easy job and that credit was cheap, he procured a stock of goods and started as a merchant in a village near Lake Megantic. This business, however, he soon abandoned to go into hotel-keeping at Lake Megantic. This, too, he gave up after a short experience, and was out of "business" for a time, but resumed storekeeping in the spring of 1897, and seems to have had no difficulty in getting $3,200 credit. Now it is said he has taken the very familiar step of getting a compromise, which is at the rate of 25 per cent.

AN offer of a site for their offices has been made to the Grand Trunk Railway authorities by a committee of the Montreal council. It is part of the St. Ann's market property, fronting on McGill and Commissioners street. Mr. Hays has expressed himself satisfied with it, and will proceed to erect a $250,000 building upon it if the city council ratifies the offer made.

ON Monday 2nd, at Ogdensburg, the Ogdensburg and Lake Champlain Railroad was sold under mortgage foreclosure. Only one bid was received, and the road was struck off for $2,500,000 to Charles H. Parsons, receiver of the road, Charles R. Batt, president of the National Security Bank, of Boston, and Wm. Lummis, of New York, committee representing the first mortgage bondholders. Mr. W. A. Shepard, of Boston, representing income bondholders, asked a postponement.

ARTHUR MOORE began business in the wholesale flour and grain line in Toronto in December, 1893. He was formerly for fifteen years in the firm of McLaughlin & Moore, merchant millers, from which business he withdrew considerable money. He has for several years lived in Virginia, where he has been engaged in coal mining The business here has been managed by one Wilson, but unfortunately it has not been paying, and now it will be liquidated.

Two years ago Geo. L. Flower opened a fancy goods store, in Belleville, and was then estimated to be worth about $3,000, principally in real estate. Now, owing to strong competition, he finds himself unable to pay 100 cents on the dollar, and offers to pay only 25; but his creditors think he should be able to manage at least 50. His assets amount to $3,560 and liabilities to $4,840.——C. T. Botting, harness dealer, in Napanee, is offering creditors 20 cents on the dollar to settle their claims, which aggregate $1,800——In February last, Griffin & McLean, tailors, at Owen Sound, dissolved partnership, McLean continuing. Now he has assigned owing less than $1,000.

GENDRON AND RELIANCE BICYCLES

Are made to meet a two-fold requirement—

TO APPEAR WELL and TO WEAR WELL . . . —A Strong Testimony!

The only Canadian wheel to compete against the world's greatest cyclist, Jimmie Michael, was a **GENDRON,** winning the mile heat in the record time of 1.53 2-5, on the Island Track, Toronto.

The first 100-mile championship road race ever rode in Canada was won on a **GENDRON** at Chatham, July 3rd, 1897.

The wheel selected for the World s Championships at Glasgow, Scotland, in 1897, by the Canadian representative, was a **GENDRON.**

The only wheel that ever captured first, second and third prizes in an annual Dunlop 20-mile road race was the **GENDRON,** fitted with "**Buckeye**" Tires.

The only wheel to win three out of four Dunlop 20-mile road races was the **GENDRON,** fitted with "**Buckeye**" Tires, London, 1896; Winnipeg, 1896; Toronto, 1897.

The only wheel to be ridden by 25 riders out of 28 in a bicycle club race was the **GENDRON.** The "Ramblers" of Toronto, 10-mile handicap, 1897.

The only wheel to win 50 prizes out of a possible 100 in an annual R. Q. T. 20-mile road race was the **GENDRON,** fitted with "**Buckeye**" Tires, 1897.

The only wheel to win the Kingston 20-mile road race in 1897 was the **GENDRON,** fitted with "**Buckeye**" Tires.

The 5-mile Canadian championship was won in 1897 on a **GENDRON.** All the Manitoba championships were won on the **GENDRON,** fitted with "**Buckeye**" Tires.

Every track race rode in Hamilton last year was won on **GENDRON** wheels ridden by Barnes and Isbister.

Every other race of any importance last year was won on the **GENDRON,** fitted with "**Buckeye**" Tires.

Many other important achievements of the Gendron wheel have to be omitted for want of space.

The Gendron Manufacturing Co., Limited,
TORONTO

Tenders Wanted

The Trustees of the Gratuity Fund of the Board of Trade ot the City of Toronto will receive sealed tenders up to noon on Friday, the 20th inst., for the sale of the whole or part of about $100,000 of securities held by them. The highest or any tender not necessarily accepted.

Full particulars can be obtained at the offices of the Board.

EDGAR A. WILLS,
Secretary to the Trustees

TOWN OF TRURO LOAN, $39,200

Sealed Tenders endorsed "Town of Truro Loan," and addressed Town Clerk, Truro, will be received till 12 o'clock noon on Saturday, 21st May instant, from persons wishing to loan money to the Town of Truro. $39,200 is required at once. This loan has been authorized by a regularly called meeting of the ratepayers of the Town of Truro, and debentures will be issued as soon as the Nova Scotia Legislature passes the act, which will probably be in April next.

These debentures will run twenty years and will bear interest at 4 per cent. half-yearly.

Offers will be received for the whole amount in one sum or for sums of $500 and upwards. From the time money is received till the debentures are delivered the interest at 4 per cent. will be paid for the principal.

Persons offering will state what premium they are prepared to give

The Town Council do not bind themselves to accept the highest or any tender.

By order,
W. D. McCALLUM,
Town Clerk and Treasurer

Truro, 4th May, 898.

Dry Goods

Will be sold by Public Auction, by J. W. JONES, at his Auction Rooms, 243 Dundas street, London, on Thursday, May 19th, at 2.30 p.m., the dry goods stock which was known as the Peck & Belleperche stock, Chatham.

This stock consists of about $13,000 worth of dry goods and $525 of fixtures; no millinery. Business reverses of Mr. Peck necessitated his withdrawal, and the vendor will now sell out the stock at a rate on the dollar. It is a going business, the stock is well assorted, and it occupies the best stand in Chatham, which is a splendid business town. The building is a three-story one, equipped with passenger elevat r, and has been a successful dry goods corner for thirty years. Purchasers of the stock can make satisfactory arrangements for leasing the premises. Stock is now being taken, and schedule will be published in Toronto papers on Saturday or Monday next, and on Monday, Tuesday and Wednesday, the 16th, 17th and 18th, stock and stock lists will be open for examination on the premises, corner of King and Fifth streets, Chatham.

Terms—25 per cent. cash, 10 per cent. of which must be paid at the time of purchase and 15 per cent. when stock is checked. The balance in equal payments in 1, 3 and 5 months, secured to the satisfaction of the vendor, with interest at 7 per cent. per annum.

For further particulars address

A. J. E. BELLEPERCHE,
Vendor, Chatham.

Valuable Improved Property

IN WINNIPEG

For Sale or Exchange

KLONDYKE HOTEL—That excellent hotel property situate on the east side of Main street, nearly opposite the City Hall. Description as follows: Three story brick veneered building with stone foundation, heated by hot air furnace, gas and electric lights, large parlor, dining room, billiard room, about thirty bedrooms. Yearly rental $1,500, yearly taxes $302, yearly insurance $4,000, $120, net revenue $1,078. Also

A FRAME TERRACE

of seven houses, each house containing seven good rooms and large halls and closets. Yearly rental $961, taxes $162, insurance $40. Net revenue $751.

The owner w ll accept as part payment property in the Province of Ontario or Manitoba, free from encumbrance. For further particulars apply to

WALTER SUCKLING & CO.
Real Estate Agents and Managers,
WINNIPEG.

Among recent assignments are those of Ridley & Co., clothiers, Chatham; J. M. Breen, butcher, London; J. B. Traub, manufacturer, Elderslie.

It is interesting to learn also from Brantford that the Consumers' Cordage Company, which was idle all winter, has started its works again to making binder-twine, etc.

One Chicago dealer on margin, Robert Lindblom, failed on Wednesday by reason of the fluctuations in the wheat market within a few days. He owed $125,000.

The Consumers' Cordage Company held its annual meeting in Montreal on Tuesday. The report showed that there had been a loss in the past year's operations, due to the new tariff and to the competition of prison labor. The future plans of the company will be decided upon at another meeting.

A subscriber in Manitou, Manitoba, writes as follows at the close of April: "Our wheat crop in this district is all in the ground, and since sowing we have had a few nice showers of rain, so that the prospects at present look very bright. One dollar per bushel is offered here for wheat, but there is very little left in the farmers' hands. Cattle and hogs are a good price, the latter selling for $4.75 per 100 lbs. live weight."

NOVA SCOTIA GOLD.

Two very nice bricks of gold arrived at Mr. Geo. A. Pyke's office yesterday from Isaac's Harbor. One was brought in by Mr. John McMillan from the Hurricane Point mine, valued at $2,800; and the other by Mr. A. B. Cox, manager of the well-known Richardson Gold Mining Co. It was worth $4,600, making a yield of $7,400 in all from those properties for last month's work. As those mines are worked carefully and on strict business principles, they are a good source of income to the shareholders, and are of great benefit to the working people of Isaac's Harbor, who receive their pay in cash each month.—Halifax Chronicle, 10th.

THE SITUATION.

If Admiral Dewey's utter destruction of the Spanish squadron, at Manila, were to be the only great naval encounter of the war, the event might prove that the victory had been too easily purchased. The odds in his favor—and in spite of the fact that he had to encounter the land batteries as well as the Spanish fleet, the odds were in his favor—do not obscure the fact that his success was due to superior skill, and leave no doubt that if the Spanish forces had been equal to his own, science would still have won the day. Success may justify Admiral Dewey's temerity in entering on an unknown field of mines, in Manila harbor; but prudent men may still think that he risked too much; the explosion of one mine, in front of his flagship, shows what might have happened if the mines had been more numerous and the hand that exploded them been more sure. The feat of destroying the squadron, without the loss of a man, is indeed a cheap victory; and it will be strange if inexperience can exercise the restraint necessary to avoid putting an exaggerated value upon it. But the war is not over, and the greatest skill in seamanship and gunnery cannot be expected always to secure equal immunity.

Before the war opened the avowed object of the United States intervention was to secure the freedom of Cuba; an intervention which, as the President thought, was to be independent alike of both the rebels and the Spaniards. Recognition of the insurgents was refused. But it was plain to lookers-on that the intervention would drift to the side of the insurgents. This has already happened; and the ideas of the object of the war are undergoing rapid change in many minds. The first real stroke of the war to free Cuba was the destruction of the Spanish squadron at Manila; and now the question is raised, what is to be done with the Philippines when the conquest of them is made, as it will be, complete? It is possible that the *ante bellum* declarations of the United States may be found to be embarrassing when this question is ripe for settlement, though it is perhaps not probable. Such things have happened before. In 1814, England finding herself in military occupation of the Ionian Islands, desired to convert the tenure into absolute sovereignty. The Russian Minister, however, exhumed some proclamations in which a different intention was avowed before the war. The Czar objected to England holding the Isles otherwise than by a Protectorate, and Castlereigh yielded. This precedent the Americans seem to have forgotton. It is, however, worth remembering, though it would not necessarily rule in the case of the Philippines. Indeed, another British Minister in the place of Castlereigh might have insisted on and obtained a different result. The incident is valuable as showing that *ante bellum* professions are liable to count for something.

Opinion in the United States is fast tending to a retention of the Philippines. The desire of the Senate, not yet officially expressed, is known to be in favor of retention. Should this view prevail, when peace comes the United States will have thrown off her isolation and become an Eastern as well as an American power. She will then be in a better position for trading with China, a country of which the commercial development is capable of incalculable expansion. It is not every country that knows how to secure a portion of that trade equal to the expenditure made to secure it. A far-seeing Frenchman, Monsieur Caillaud (*Histoire de l'Intervention Francaise au Ton-king*) foresaw and predicted that the French expenditure in that part of the world enure to the profit of England through Hong Kong, and not to that of France through Saignon. In 1883, the trade of Hong Kong was 143 times as great as that of Saignon; to this day, all Europe, with the exception of England, which controls the great bulk of the Chinese trade, has got a share in it which is much less than that which the United States has secured. Experience shows that the attempts of France to extend her trade in China have been unsuccessful and are not much to be feared. It is probably true that her recent efforts in that quarter will bring more profit to England and the United States than to herself.

When Premier Laurier telegraphed a member of the British Columbia Legislature that the Ottawa Government did not intend to do anything farther in regard to railway communication with the Klondyke, he may have had in his mind what the English company chartered last session was doing at the White Pass. The charter gives the right to build a road as far as Selkirk. The engineers, under their chief Hawkins, are now at work locating the line. For the first section, from Skaguay to Lake Bennett, rails and other materials are said to have begun to be shipped; the rolling stock, it is added, is under contract, and will be delivered with all practicable speed. Sanguine persons expect that the section over the White Pass will be in operation in two or three months, say by the 1st of August. If this feat can be accomplished, that part of the road will be ready before the Mackenzie-Mann line was to have been open, if the Senate veto had not interposed. The present road offers a shorter route, and is approachable by water at all seasons of the year. *Per contra*, it is not an all-Canadian route; but if both countries interested in this line will be content to act in a reasonable spirit, there is not much reason why the trade should meet greater obstruction at this than at any other point where the international frontier has to be crossed. And, a decided consolation, we save the 3,500,000 acres of land which the Mackenzie-Mann contract called for.

There are signs that the Government of Ottawa and that of Washington have begun to act in a spirit of mutual accommodation in regard to the transit over the American

Pacific strip into the Yukon region. Our Government in consenting to issue to Americans mining licenses at the boundary, instead of compelling them to go to the coast cities of British Columbia for them, has done so. Senator Mills tells of the promise of the United States Government to make concessions in return. What these concessions are has not yet been stated. The only prospect of an all-Canadian railway to the Yukon, which meets the eye at present, is in the action of the Legislature of British Columbia; and it remains to be seen whether the aid so granted will be equal to the emergency. If the Klondyke region be found to answer the expectations formed of it, other means of access besides that over the White Pass will be found. The British Columbia road would pass for a considerable distance over a good agricultural country, and would be useful for colonization purposes. In a greater degree this would be true of a road north from Edmonton. In time all these means of communication, and many more, will be needful; at present it is necessaay to proceed with reasonable caution. Senator Mills' opposition to Hamilton Smith's bill for a railway from the Lynn Canal to a point near Selkirk, shows that the Government will not permit it to pass the House of Commons.

There is a bill before the Legislature of British Columbia to authorize the Government to borrow $5,000,000 to be granted in aid of the construction of a number of railways, including a narrow gauge road from a British Columbia port to Lake Teslin, 400 miles long; another from English Bluff, near Point Roberts, via Chilliwack, 220 miles; a third from Bute Inlet to Quesnelle, 230 miles. The Governor-in-Council may make agreements with any person or company to undertake the construction and operation of the roads, without competition or calling for tenders. The roads when built will be the property of private parties; the province will get no claim on any of the earnings in return for its $5,000,000. Is this the last word of Government railway finance?

A commission on national wheat stores in England, has reported in favor of a permanent reserve of 8,000,000 quarters, equal to 64,000,000 bushels. It seems as if the time had come when something of this kind is likely to be done. The quantity named, it is pointed out, would only last the British population fourteen weeks; but if a beginning be once made, the stock can be supplemented as occasion may offer. The grain so stored would have to be guarded against whatever tended to its destruction, and the question would arise whether bread food could be best preserved in the form of grain or of flour. By compression, experiments seem to prove flour can be preserved in a perfect state for a long time. The world could easily supply the additional demand, and a simple notice that an extra quantity would be required, would probably at once cause the production of even a greater quantity. People who talk of Canada being made the chief source of supply of wheat for England, have surely not reflected on the consequences of a possible deficiency in the harvest of a single country, or borne in mind that while harvests fail here and there, such a thing as a general failure of the world's harvests has now become impossible. In any extra demand for wheat to be kept as a reserve against war, Canada's chance of contributing to the supply would be among the best.

United Italy, before it has had time to consolidate its various parts, is vexed with revolutionary movements. There has been serious fighting at Milan, where 300 are reported killed and 1,000 wounded. Republicans and Socialists appear to have joined their forces in the outbreak, which was not fortuitous, but made in pursuance of a regular plan. Once more the unexpected has happened. The danger which threatened the Quirinal was supposed to centre in the Vatican. When the present Pope succeeded Pius IX., he gave indications of pursuing a new policy, by accepting accomplished facts; but as time went on he, too, like his predecessor, spoke of himself as a prisoner in his palace of nine thousand rooms. He has not, however, repeated the threat of appealing to 300,000,000 of Catholics to aid in recovering the civil power and the territory that went with it. If the French Empire had survived, the danger of intervention from that quarter would have recurred under circumstances such as now exist. The policy of France was always, so far as she had the choice, to have weak states for neighbors; and a divided Italy would probably suit her better now than a united Italy ruled from the Quirinal. Austria might possibly become a danger to King Humbert's government, if there were any chance of recovering the possessions which she formerly held in the peninsula.

HOW IS BUSINESS?

Replies to this query are more hopeful this month than they have been for a good while before. The feeling that a good year's trade is assured seems general in Canada. Whether manufacturers or importers are consulted, the tenor of their replies is generally that their customers are in good spirits, ordering freely and paying better than usual. The dry goods houses have been busy as a rule. A Montreal house says its orders are greater by one-third than those of last year at same time; a Toronto house tells us that its turnover far exceeds any recent spring season; others are disappointed with April orders, but say that orders for fall are very good. Wholesale grocers in Hamilton, Toronto and Montreal, find business in good shape—orders steady, customers confident and cheerful; failures few. And what is very significant, the business of several wholesale jewelry and fancy goods houses shows a very marked increase; in one case the output is doubled for the first four months this year. This being the case in a line of trade of the nature of luxuries, shows that people are freehanded. The enforced economy of the last few years throughout the Dominion has resulted in an addition to people's means, which now permits them to do shopping with some freedom.

Among manufacturers a very similar story is told. From Peterboro, Galt, Brantford, as well as from Sherbrooke, Montreal and Toronto accounts of plentiful orders and full employment in the foundries, engine works and other allied industries are the rule. Very satisfactory word comes from Brantford as to the condition of such works. Some of the factories have been working extra time for weeks, others for months. The Waterous Engine Works Company are obliged to work nights to keep up with orders; the same may be said of the Cockshutt Plough Works. Agricultural implement makers are busy; the Massey-Harris Company and also the Verity Plough Company are working extra hours. In the same city the Goold Bicycle Company are working two sets of hands, one for day and one for night, and yet are unable to keep up with commands. Textile mills, too, are busy, as letters from the Province of Quebec and various parts of Ontario attest. The group of knitting mills in half a dozen places in this province have been working nights to keep pace with orders, which were largely for Klondyke trade. Clothing houses are also well employed.

While in some respects the news from Maritime Province points is encouraging, mining in particular showing activity, the war is interfering with some of their outlets for exports and affects lumber shipment, as well as that of farm produce. From Ottawa the news is that the Spanish-American war has affected Canadian lumber trade unfavorably, and that shipments to the United States have fallen off greatly from, say, 27th April to 5th May.

The extraordinary conditions in the wheat trade and the Leiter "corner" in Chicago have given a fillip to our grain dealers and something more than a fillip to speculators. Wild stories are afloat as to the profits made by Montreal wheat operators in May wheat, but it is true that extraordinary prices are being paid for Canadian wheat, and some fair profits are doubtless being made by dealers at Winnipeg, Toronto and elsewhere. Our advices from London are that the recent advance in breadstuffs has stimulated business of all kinds thereabout, and that factories and wholesale houses are busy.

THE WOOL SEASON OPENING.

The first parcels of washed fleece wool are coming forward from the different growing districts of Ontario. The movement, however, is not at all general, and no large deliveries can be expected for several weeks. The Manitoba and Territorial clip has not yet commenced to move. With the first offerings in the market the question of price, which has already excited considerable speculation, becomes of first importance. The United States duties, as affecting Canadian wool, are as follows:—

Washed combing fleece	12c. per lb.
Unwashed combing fleece	12c. "
Tub washed, all grades	36c. "
Unwashed clothing	11c. "
Washed clothing	22c. "
Cotted, burry, seedy and black	12c. "

The ordinary wool exports from Canada are thus subject to the very considerable duty of 12 cents per pound. John Hallam, a recognized authority, sums up the situation in the following form:—

"Owing to the extraordinary purchases of last year, many of the large mills having supplied themselves with stock sufficient for two years, there has been little or no demand for Canada wool; and there is still unsold in the United States over a million pounds of last year's clip belonging to Canadian dealers. Current quotations in a number of the United States markets for Canada wool range from 28 to 30 cents. Deducting from this 12 cents for duty, one cent for freight and charges; 16 cents is all dealers should pay; and for the few lots offered in this market that has been the price given." The farmers from our advices, have exaggerated ideas of wool values, and if the true situation of the market cannot be revealed to them, there is every prospect that the wool will be held back. They may be in a better position to do this as a result of the phenomenal advances in the price of wheat.

The interest taken in the present series of London sales by the trade on this side of the Atlantic is rather limited. By advices dated May 9th, it was reported. "Scoured merinos were keenly competed for and good crossbreds were well maintained. Low grades showed an improving tendency and a good selection of Cape of Good Hope and Natal stock, principally greasy, sold well. A few lots of short wool of a poor quality were withdrawn. The general tone of the sale was firm, and all around activity prevailed.

—At its annual meeting last week the Montreal Stock Exchange elected officers for the ensuing year, as follows: Chairman, Hartland S. Macdougall; vice-chairman, W. R. Millar; secretary-treasurer, George H. Smithers; committee, Messrs. J. R. Meeker and A. A. Wilson.

CANADIAN FLOUR TO REPLACE AMERICAN.

A letter received from the Maritime Provinces too late for our last issue gives some information of interest respecting the shipment of Canadian flour to the West Indies. The war with Spain, it appears, has seriously interfered with the supply of United States to the British West India islands, if indeed it has not shut out that flour altogether for the present. A cable received at St. John on May 5th ordered the charter of a British bottom to carry a cargo of Canadian flour to Barbadoes, Trinidad and Demerara, at once, if that quantity proved available. This, we understand to be entirely apart from and in addition to the small lots taken by the Pickford & Black line of steamers on their regular trips. Canadian flour has made a good impression there, and appears to stand the climate satisfactorily. Now would appear to be the time to take advantage of a chance to ship on a larger scale. Mr. Crosby, of Yarmouth, is alive to the opportunity; Mr. Chipman, of Halifax, too, is in evidence as working energetically in the interest of Canadian trade with the West Indies and Demerara.

BUTTER EXPORT TRADE.

There is every reason to expect during the coming summer an increased production of creamery butter. Dairymen, in Ontario certainly, and in the other Provinces we have no doubt, are putting their best energies into the work of production, and with the expansion of the demand in foreign markets, considerable development should be effected. Prices in the United Kingdom are in excess of last year's quotations, recent mail advices giving 94 to 96s. for choicest, and 90 to 92s. for finest, as against 90 to 92s. for choicest and 84 to 88s. for finest, the first week in May, 1897. The course of trade in the past two years may be gathered from the following table, showing exports of Canadian butter to Great Britain in the months mentioned:

	Cwts. 1897.	Cwts. 1898.
September	24,165	34.085
October	16,167	22,954
November	17,643	13,334
December	6,343	10,665
January	789	3,687
February	2,867	2,073
March	713	1,059
April	235	2,020
Total	68,922	89,877

There yet remains considerable room for improvement in this department of the dairy export trade. While the quality of the butter is by no means perfection, yet it has the merit of undergoing improvement. It is in some of the accessories of trade that improvement can most easily be made, with an accompanying gain in price. British receivers complain that the wood employed in making the boxes is not sufficiently dried or well seasoned, and the use of a better quality of paper is also suggested. Moreover, while 56 lb. packages are generally favored, it has been pointed out that a smaller package of 28 lbs. would supply a want among small tradespeople.

While making the British market the main objective point of butter shipments, Canadian dairymen should not neglect other importing countries. American consular reports from Japan show that there were imported into the port of Nagasaki during the year 1897, 33,884 pounds of butter, mostly from the United States and France. Small quantities were received from Australia, Denmark, Canada and Holland. The butter is packed in tubs and tins; that in tubs is from the United States, each tub containing about sixty rolls of two pounds each in brine. In China the natives consume little butter, but the needs of the foreign population of that country, which must be supplied by importations, are considerable. The butter principally used by foreign residents of China is of French make, and the quality excellent. All shipments for that market require to be made in hermetically sealed tins or jars.

FIRE UNDERWRITING IN CANADA.

Among other things shown in the preliminary statement with regard to fire insurance in Canada during 1897, issued last Friday at Ottawa, is a comparison of the extent of the business thirty years ago and now, and the proportion of it done by different groups of companies, British, Canadian and American. In the year 1869 the aggregate held at risk in Canada by all companies was $188,359,809 and by the close of 1897 it had increased to $863,597,599. The proportions done by different groups of companies in the two years were as under, as shown by the Blue Book, from which also we take the table appearing on page 1458 of this issue:

RISKS WRITTEN.

Year 1869,	British companies	$115,222,003	equal to	61.17	per cent.
"	Canadian "	59,340,916	"	31.50	"
"	American "	13,796,890	"	7.33	"
	Total	$188,359,809	"	100.00	"

The gain made by the British and United States companies and the corresponding decline in the share done by our home companies is shown by the next table:

Year 1897,	British companies	$611,840,429	equal to	70.84	per cent.
"	Canadian "	149,307,279	"	17.30	"
"	American "	102,449,891	"	11.86	"
	Total	$863,597,599	"	100.00	"

Thus the bulk of the business has been all along done by the British companies, though in 1876 Canadian companies did as much as $231,000,000 of the total. American companies, too, did a larger share some years ago than now, their risks reaching $124,000,000 in 1893. But the British companies have a larger proportion of the risks now than they had in 1869, while in the interval quite a number of Canadian companies have arisen, tried the field, and disappeared, finding the business a losing one. How it comes that British companies can do business at a profit and increase their business when American and Canadian ones lessen theirs or retire does not immediately appear. We incline to think, however, that it is, in part, because the British ones do business at a less expense ratio; it may be, too, that they are more careful in the risks they underwrite.

As a matter of fact, however, the profits of fire underwriting in Canada have been, and still are, precarious. The ratio of loss during the five years last past has been almost exactly 68 per cent. of the premiums—ranging from 74.37 per cent. in 1893 to 71.91 per cent. in 1895, and 66.12 per cent. in 1897. And if, as is the common estimate, we add 30 per cent. as the cost of management expenses and commissions, we have about 98 per cent. outgo (97.95 to be exact), which is not encouraging to a capitalist. The reports of the Insurance Superintendent show that since 1869 companies doing fire insurance business in Canada took $133,257,922 in premiums and paid out $91,640,239 in losses. If we assume 30 per cent. for expenses, the experience of the last twenty-nine years has not been profitable. The Blue Book tells us that fourteen out of thirty-six stock companies licensed to do fire and marine business in Canada last year reported total cash expenditure exceeding 100 per cent. of the total cash receipts.

Following are the aggregate fire premiums and losses of Canadian fire underwriting companies reporting to Ottawa during the five years past. We have made up and append the ratio of loss in each twelve-month, which calculation shows that 1896 was the only encouraging year in that period:—

Year.	Premiums.	Losses.	Percentage of Loss.
1893	$6,793,595	$5,052,690	74.37
1894	6,711,369	4,589,363	68.38
1895	6,943,382	4,993,750	71.91
1896	7,075,850	4,173,501	58.98
1897	7,214,612	4,670,549	66.12

Clearly the ratio of loss here shown is fatal to profit, if it cost 30 per cent. to manage the business. But the question is, ought it to cost that much. In view of the figures given above, Canada requires to learn to be more careful in fire prevention if she would hope to have rates of premium maintained as low as they are now, to say nothing of getting them reduced.

FRIENDLY SOCIETIES AND LIFE ASSURANCE.

Before the Banking and Commerce Committee of Parliament last week a discussion took place which is of interest to the thousands of members of fraternal organizations throughout Canada. It arose on the bill to incorporate the subsidiary High Court of the Ancient Order of Foresters. There was also a kindred measure to incorporate the Supreme Grand Lodge of the Sons of England Benefit Society.

The bill was objected to in the public interest by the Dominion Superintendent of Insurance, Mr. Fitzgerald, who stated broadly that nearly all these fraternal organizations charged rates which were too low for properly conducting the life insurance business. While admitting that the A.O.F. rates since 1894 were better than most other friendly societies, still the rates were 20 per cent. less than would enable the society fairly to meet its liabilities. Furthermore, he stated that the Independent Order of Foresters, which is Oronhyatekha's company, intends at next Supreme Court meeting to raise its rates enormously on new business, and possibly on old memberships as well.

This attitude of the Superintendent of Insurance is significant, especially when taken in connection with the statement made a year or two ago by the Inspector of Insurance of Ontario on the same subject. That gentleman in a valuable leaflet, quoted by us on January 8th, 1897, and since, arraigned one friendly society in particular and others in general for professing to give life assurance and pay endowments while charging premiums not one-fourth, in some cases not one-tenth, what is necessary to be charged for such purpose. After showing how one society promised to give $500 endowment where the total sum paid in for a quarter century only amounted with interest to $50.71, Mr. Hunter added: "No usurer in the land would impose upon his victims such a monstrous bargain as the members of this society are now imposing upon themselves for the benefit of *the few first maturing* endowments." He closed by pointing out that the suffering caused by the failure of a life assurance society is very great, and it falls upon the most helpless classes of the community. "There are now in such societies [Friendly Societies], a large number of persons who, from age or ailments, have become uninsurable elsewhere."

The evidence of two such officials, both barristers, both students of economic science, both in positions enabling them to see the dangers of assessment insurance, ought to go a long way to convince the public that the hat-passing method of life underwriting is based upon fallacy. It is something, at any rate, to learn from Mr. Fitzgerald, that the whole question of friendly society legislation is to be dealt with by a general bill to be introduced next session of Parliament. Friendly societies are very well in their way, and have doubtless done good, but many of them go too far when they promise indemnities and endowments that cannot be paid under the rates of assessment charged.

BUSINESS EDUCATION.

The other day, in Buffalo, N.Y., a supervisor of grammar schools conceived the plan of acquainting pupils with the functions of banks and certain processes of mercantile business by means of an object lesson. This object lesson was the establishment of a mock bank in the school, just as has been done by the British American Commercial College in this city, and, we believe, by other like institutions. But Mr. Millard, the Buffalo supervisor, had not the money to carry out his idea; neither the city nor State authority had provided for it, and there were 2,500 pupils of this grade. So he wrote to various banks in Buffalo asking them to help his scheme. Several banks expressed a willingness to assist, but the first to respond (by return mail, be it observed) was Mr. Cornwell, president of the City Bank, who promptly and heartily said: "Our bank will be happy to furnish the whole outfit. In front of each pass book will be bound a condensed statement of how deposits are made, the use of a cheque book, the advantages of starting a bank account early in life and making payments in cheques, and other simple memoranda as to the uses of a bank in the community." A further step is the furnishing of imitation bank bills, in denominations of $1, $2, $5, $10 and $20. Each pupil will be supplied with $100, with which to start his account. He will also be provided with a deposit blank pad, a bank book and a cheque book, the cheque containing ten cheques, with the pads, etc., precisely like those issued by the City Bank to its customers. In the bank books are posted practical rules and instructions for keeping a bank account.

Very sensibly, in our opinion, there is furnished to each of these pupils, in print, a definition of what a bank is for; how its deposits are used for the benefit]of other than depositors; what the advantages of saving are; how and why cheques are used, etc., etc. The grammar school supervisor on his part has drawn up a course of study embracing ten lessons, which is offered to the teachers, explaining first the nature of banks; the reasons for bank procedure; methods of depositing and withdrawal; the meaning of cheques, endorsements, exchanges. The scheme is noteworthy, in that it proposes to get into the minds of the American people some needed information about banks and banking. And to do this it begins with school pupils.

SAVINGS BANK INTEREST.

Commenting, under the heading "A Leaf from Canada," upon the fact that our Government had been long paying too much interest to depositors in Government Savings Banks, the U. S. Treasury Detector says that a suggestive hint is afforded in the criticism that has been heard concerning the reduction in this rate of interest. It calculates that every half per cent. reduction of the kind effects a saving to the country of $250,000 a year. "Why should not the Government save $250,000 or $500,000 a year if it can? It is to the credit of Canada and its people that it is generally conceded that the saving should be effected, even if depositors do get a little less interest on their savings than formerly,

"But," says the journal, "there are jingoes and demagogues across the border as well as on this side of it, and there have been some criticisms hurled at the heads of the government officials for robbing the poor savings bank depositor, merely to put money into the Dominion treasury. Now if we hear such things in conservative Canada, where the blatant stump orator or the yellow journal does not flourish, what may we expect in the United States where the arts of demagogy reach their highest fruition?"

That the United States would dare to take so salutary a step the Detector does not admit, for it thinks the Government would give way to the clamor of depositors. "What," it asks "if the Government could borrow in the money markets of the world at 2 per cent., and its postal savings bank depositors clamored for 4 or even 6 per cent., does anyone believe that the Government would deny half a million people with a protest in one hand and a vote in the other, what they cried for? No. The Government would run its charity shop regardless of expense or of ordinary business rules."

GREAT BRITAIN'S REVENUE.

A subscriber, in referring to the article in our last issue on Great Britain's revenue, etc., asks what is the largest item in the estimated revenue of £108,615,000. We reply that the largest item of revenue is not produced from customs, but from excise. The estimates for the fiscal year 1898-99 are as under:

Customs	£22,200,000
Excise	28,950,000
Death duties	10,950,000
General stamps	7,600,000
Land tax	930,000
House duty	1,570,000
Property and income tax	17,800,000
Post Office	12,600,000
Telegraphs	3,140,000
Crown lands	430,000
Suez Canal shares	715,000
Miscellaneous	1,730,000
Total revenue	£108,615,000

It will be noticed that a great sum, approaching eleven millions sterling, is raised by means of the death duties, and that the postal and telegraph revenues exceed fifteen million pounds. The estimated outgo for the year is £106,829,000, which is £1,786,000 less than the estimated income. The disposition proposed to be made of this surplus is a lessening of the tobacco duty by £1,120,000; changes in the death dues and the land tax, which will take off, say, £285,000, and the income tax will be reduced by £100,000, which will leave a final surplus of £281,000.

ST. JOHN HARBOR.

Since writing, the other day, on the winter business of the port of St. John, we have received particulars of the comparative shipments of different classes of exports that lend additional interest to the subject. The shipments of grain oceanwards amounted to 3,639,130 bushels, as compared with 1,436,125 in the previous twelve months, cheese and provisions were much greater, but flour showed a falling off. The reports of the different products are as follows in the two years:—

	1897.	1898.
Flour, brls.	230,508	167,765
Wheat, bushels	245,590	808,540
Peas	325,491	306,245
Corn	165,847	500,137
Bran	41,987	2,282
Oatmeal	21,495	34,700
Barley	43,223	38,037
Rye	34,627	136,959
Flaxseed	58,695	....
Buckwheat	7,825	42,913
Cheese and butter, pkgs.	48,780	73,825
Provisions, pkgs.	28,583	33,995
Apples, brls.	14,528	11,960
Cattle, head	7,958	6,775
Sheep, head	3,291	3,844
Horses, head	1,268	371

The improvement of the terminal facilities at St. John reflect credit on that city. The wharf frontage extends 2,100 feet, forming five distinct steamship berths of over 400 feet each, all of which will accommodate, it is said, at the lowest state of the tide, vessels drawing 28 feet of water, and these wharves are to be provided with the necessary conveyors that will enable vessels to take on grain and cargo, without moving from the original position, and permit them at the same time to receive from and despatch into the shed their package freight without intermission or delay. The warehouse accommodation is extensive and substantial, and the extension now being made to the elevator will give it a capacity of a million bushels.

APRIL FIRES.

The fire loss of the United States and Canada for the month of April shows a total of $8,211,000. This is a very moderate sum for that month, as will be seen from the following comparative table:

	1896.	1897.	1898.
January	$11,040,000	$12,049,700	$ 9,472,500
February	9,730 100	8,676,750	12,629,300
March	14,839,600	10,502,950	7,645,200
April	12,010,600	10,833,000	8,211,000
Totals	$47,620,300	$42,062,400	$37.958,000

During April there were 171 fires of a greater destructiveness than $10,000 each. A glance at the aggregates for the first quarters of the years 1896, 1897 and 1898, says the Journal and Bulletin of Commerce, will exhibit how great a reduction has taken place this year in the fire loss, but looking at it from the standpoint of the future interests of the fire underwriters, it would seem that the temporary profits now being made are an injury rather than a gain, because there is so much dissatisfaction and disloyalty in the various rating associations that a continuation of moderate fire loss means an encouragement to plunge into rate wars in at present profitable sections. And it might have been added that the disruption last week of the New York Tariff Association is significant in this connection. A series of heavy fires at this time would operate in the direction of restraining combative minds, and it is probable that an increase of, say, fifty per cent. in the May, June and July aggregates this year, as against 1897, would be to the ultimate advantage of the fire insurance companies. At present too many of them are flushed with the profits of 1896 and 1897, and their managers are eager to engage in rate fights, evidently regarding surplus as ammunition for the management rather than treasure for the stockholders.

TORONTO TRADE FIGURES.

An increase of thirty-nine per cent. in her aggregate foreign trade for the month of April is a good record for Toronto, compared with last year. The imports were $2,208,223 in value, and the exports $626,108. In the previous April they were respectively $1,503,096 and $470,713. A large proportion of the increase consists of free goods, raw materials for manufactures, among them being hides and skins, crude rubber, and wool. There is likewise a large item, steel rails for railways; and coin and bullion imported, $252,343, is an unusually large item. According to our custom, we give here a list of the principal items among dutiable goods :

DUTIABLE IMPORTS

	April, 1898.	April, 1897.
Brass and manufactures of........	$ 8,222	$ 5,193
Copper "	917	673
Iron and steel "	186,049	104,351
Lead "	7,936	1,711
Metals and composition	12,100	9,359
Total metals..................	$215,224	$121,287
Cotton and manufactures of........	$ 96,953	$ 79,802
Fancy goods	48,488	45,842
Hats, caps, bonnets................	61,080	42,583
Silk and manufactures of	95,768	55,017
Woolen manufactures......	147,777	74,098
Total dry goods................	$450,066	$297,342
Books and pamphlets..............	$28,771	$27,168
Bicycles, etc.....................	72,143	131,540
Coal, bituminous.........	28,900	16,821
" anthracite (free)	40,424	77,912
Drugs and medicines..............	27,943	23,081
Earthen, stone and chinaware......	17,017	18,120
Fruits, green and dried............	22,092	30,477
Glass and glassware..............	13,081	19,825
Flax	26,245	....
Jewelry and watches	36,738	39,006
Leather and manufactures of	32,322	24,260
Musical instruments	11,631	9,340
Oils of all kinds................	20,156	13,122
Paper and envelopes	32,066	30,926
Spirits and wines..................	6,503	13,199
Wood goods	8,041	12,443

Exports were larger than usual all over the list, with the single exception of forest products. Those of dead meat amounted to $343,111. Field products were greater than in April, 1897, but still meagre in aggregate. None of the items among manufactures is considerable but "other articles," $167,292, which we find on enquiry at the Custom House to be almost wholly agricultural implements.

EXPORTS, CANADIAN PRODUCE.

Produce of	April, 1898.	April, 1897.
The Mine..........................	$ 100	....
" Fisheries	87	....
" Forest	4,927	$20,154
" Field..........................	48,604	24 836
Animals and their produce	364,617	255,665
Manufactures	183,540	154,964
Total	$601,875	$455,669

THE WHEAT SITUATION.

The wheat market has continued to gain in strength, and quotations have made sharp advances during the week. Ontario winter wheat is quoted at $1.03 to $1.10 and spring wheat $1.05 to $1.12 per bushel. The greatest advance, however, has been made in Manitoba hard wheat, which is quoted $1.25 to $1.48 per bushel. The wheat is now well out of primary hands, and these quotations should not be taken as representing phenomenal profits to the farmers. A conservative trader estimates that not ten per cent. of the 1897 crop is still held by the farmers. In Manitoba and the North-West the deliveries of grain by the farmers during the past few days have been the largest during the spring season, the very high price prevailing inducing those farmers who have any on hand to dispose of it at a good profit.

The high prices realized for wheat this year will, beyond a doubt, lead to an immense increase in the acreage under this cereal. In the Maritime Provinces there is a revival in the interest taken in wheat-growing, which, as a result of Western competition, had declined to a low ebb in that part of Canada. The New Brunswick Government has not only provided farmers with the best grades of seed wheat at cost prices and subsidized mills to made the wheat into flour, but has arranged through the Exhibition Association of St. John to give special prizes to different counties for the best specimens of wheat shown at the coming exhibition. It is hoped that in this way the province may be made independent of the wheat and flour supplies now imported from the other provinces.

The wheat situation in Europe still remains strong. The war and the prospects of further complications have exercised the most potent influences on the market. The authorities in the trade attribute a large part of the demand to purchases made under the direct influence of continental Governments as a precaution, lest the Spanish war become general. They account for this by pointing out the removal of the duties on wheat by France, Italy, Spain and Portugal. Germany was reported to have also decided to suspend the duties, but later advices announce that Baron Von Thielmann, secretary of the Imperial Treasury, had declared in the Reichstag that the German Government had no intention of asking a suspension of the duties. There now comes a report that Austria is considering a suspension of grain duties.

THE CHEESE MARKETS.

A number of the cheese boards of Ontario reorganized this week for the season. Eleven meetings were held, at which 5,678 boxes were boarded and 2,913 boxes sold. Quotations ranged from $7\frac{5}{8}$ to 8 3-16 cents per pound. There is very little old cheese left in the market, and the new cheese, when the season is well established, should soon be sold on a profitable basis. We append a table containing detailed information of the sales during the week :—

Boards.	Date of meeting.		No. of factories.	Cheese boarded. Boxes.	Cheese sold. Boxes.	Price per lb. Cts.	Date of next meeting
Chesterville......	May	5	..	244	84	$8\frac{1}{16}$-$8\frac{3}{16}$	......
Iroquois	"	6	..	350	....	$8\frac{1}{16}$	......
Belleville........	"	10	18	821	716	$7\frac{7}{8}$-$7\frac{15}{16}$	......
Ingersoll	"	10	11	1,203	....	$7\frac{3}{4}$	......
Campbellford	"	10	..	445	445	$7\frac{7}{8}$	......
Madoc	"	10	..	351	351	8-$8\frac{1}{16}$	......
Tweed	"	11	11	328	328	$7\frac{7}{8}$	May 18
Woodstock	"	11	11	784	135	8	......
Napanee	"	11	..	505	505	$8\frac{1}{16}$	......
Picton	"	11	..	121	....	$7\frac{5}{8}$	......
Stirling..........	"	11	..	526	349	$7\frac{7}{8}$	May 18

Cheese boarded, 5,678 boxes; sales, 2,913 boxes.

KINGSTON BOARD OF TRADE.

Forty-eight gentlemen were present at the annual meeting of the Kingston Board of Trade in the council chamber last week, seven of them aldermen. Mr. A. Chadwick, retiring president, in the chair. The annual report was adopted. There was a contest between Mr Chadwick and Mr. G. H. Allen for the presidency during the coming year, and Mr. Chadwick was re-elected by a vote of 24 to 19. The officers elected by acclamation were: First vice-president, Ald. McKelvey; second vice, G. E. Hague; secretary-treasurer, Francis King. Members of council were elected as under: Messrs. L. B Spencer, J. Minnes, J Hewton, G. Richardson, J. Gaskin, R. J. Carson, W. B. Dalton, E. J. B. Pense, C. Livingston, and J. Redden.

LONDON ASSURANCE CORPORATION.

Four millions of pounds sterling is the aggregate sum in the balance sheet of this venerable company, which has just recently made its exhibit of affairs and transactions for the year 1897. That is to say, i had at the close of the year assets of £4,008,485, against which were life reserves, £2,105,219 ; fire reserve, £675,051 ; marine reserve, £200,210, besides a shareholders' general reserve fund of £310,000 and shareholders' capital £896,550, half of which is paid up. So that those who are interested in the London may feel that their interests are financially safe.

The company made money last year in both its fire and life departments, but not in marine, which indeed showed a loss on the twelve months. What we in Canada are most interested in is the company's fire department, the premiums of which amounted to £385,006, with re-assurances deducted. The fire losses were £209,232, which is equal to a ratio of 54.33 of the premiums. Twenty per cent. dividend, which means two pounds ten per share, was paid to shareholders, who doubtless rejoiced. The Canadian business of the Lon don, with $128,400 premiums suffered $99,545 losses, which means some 77 per cent. loss ratio, so that if we make the usual addition for expenses the company, like some others, made no money in the Dominion, though in the prevous year it had the light loss record of 51.52.

UNION ASSURANCE SOCIETY.

Another of the reports of old and strong fire underwriting corporations in the United States is that of the Union Assurance Society, which has just held its 184th annual meeting. The extent and character of its business and the great aggregate of its funds must give confidence to all policy-holders. The report for the year ending 31st December, 1897, gives the total annual income during the year at £902,286, showing an increase of £65,035, and the accumulated funds at the close of the year amounted to £3,147,574, being £214,877 more than at the close of the preceding year. In the fire department of the company's business the premiums received, less re-insurances, amounted to £454,683, an increase of £36,565, as compared with the year 1896. The losses of the year, paid and outstanding, were £254,819, being at the rate of 56.04 per cent. on the premiums received, which is a low rate. The expenses of management, including commission, totalled £151,787, being at the rate of 33.38 per cent., which leaves a margin of more than 10½ per cent. profit. The Union likewise does life business; indeed it has 27,987 policies outstanding, for £9,840,000, and has life funds of more than two million of pounds sterling. The Canadian business of the Union was very satisfactory last year, the premiums exceeding $271,000, and the losses being under 46 per cent.

FOR GROCERS AND PROVISION DEALERS.

California small fruits are likely to be high. Stocks of prunes and apricots are small and raisins are none too plentiful. Dried fruits generally are firmly held.

The maple sugar crop of the State of Vermont this year is exceedingly light, probably not more than one-third of the average, and the price is a cent a pound higher than a year ago. The crop in the Eastern Townships is light, too.

Next to money, butter is about the the scarcest thing in the market at present. Our town merchants are complaining of the small supply and the big demand. A Pictou man was obliged to wire to Montreal for a quantity the other day.—Digby, N.S., Courier.

The catch of salmon, up to 7th May, had continued very light on the Columbia River, and very little canning had been done. The Puget Sound packers, with the exception of the Seaborg Association, have formed a combination to maintain prices on the coming Chinook pack at 85 cents for talls, 95 for flats and 62½ for half flats.

The following is a comparative statement of the quantity and value of lobsters shipped to Boston from the port of Yarmouth for the four months ending 30th April, 1897 and 1898:—

1897.	Value.	1898.	Value.
13,932 packages....	$154 300	15,416 packages....	$163,044

In reference to purchases of lemons in Canada, Messrs. Zucca & Co., New York, say: "The only good trade that can possibly be obtained is on the 360 size, which are not sought by the Canadian merchants as much as the 300's, while here in New York the 360's are proportionately higher, in consequence of having a better demand than the 300's."

Advices respecting teas favor higher prices, though the movement is not specially active in Canada. Indian teas and Ceylons are showing an advancing tendency in London, while from Japan comes the news that prices of those offering are above the parity of the figures now obtainable here. No more teas are going from Montreal to the United States at the moment.

Messrs. Tuckett & Sons, Hamilton, are said to have decided to establish a tobacco factory at Chatham, Ont. It is thought that Canadian leaf may be largely used for the purposes of manufacture. Throughout the whole of Kent and Essex counties tobacco growing is being taken up by farmers who see in it a profitable product. The introduction of a factory to manufacture the raw leaf into a mercantile article in Chatham will give a good impetus to the industry.

Wm. G. Hale & Co., in their circular dated Saigon, March 28th, say of rice: "Our market has advanced steadily under a fairly strong and well maintained demand from Hong Kong and Japan, and mills are engaged forward into May; although supplies are 65,000 piculs daily, there are some twenty steamers loading, and there is consequently no accumulation of stocks. Prices having gradually advanced, considerable difficulty is experienced in forcing sellers of paddy to carry out existing contracts; some failures among them have already occurred, and more are likely.

In the House of Commons last week, on the vote of $243,000 for fisheries, of which $34,500 is for the maintenance of fish-breeding establishments and lobster hatcheries, Sir Louis Davies spoke of the conflicting views on the preservation of the lobster fishery. There are those who are interested in the fishery as a national industry, and the packers who have an interest in catching lobsters as long as they can. The department is putting on two small steam launches this summer to guard the fish during the close season and destroy all traps found. He said he was determined to do all in his power to preserve the lobster fishery and so insure to the fishermen their 18c. to 20c. a piece.

Messrs. Smith, Baker & Co. have compiled the following statistics of the exports of tea from Yokohama for the season up to April 11th:

	1897	1896.
New York, steam or sail and railroad	$ 9,487,335	$ 6,951,247
New York by sail	122,266	235,979
New York via Suez Canal	2,524,930	5,964,637
San Francisco....................	5,189,654	4,831,720
Chicago and West................	16,215,886	14,070,763
Canada..........................	8,758,249	10,556,094
England, etc.	46,525	423,274
Total........................	$42,344,845	$43,033,714

Wisner & Co., writing from Shanghai, under the date of April 7th, say: Black teas—No business has been reported since the date of our last circular; stock, 8,743 half-chests. The prospectus of the Liang Hu Tea Improvement Company has been issued, the principal native tea men being represented on the board of directors. The objects of the company are to resuscitate the trade by importing machinery, etc., and generally to improve the production in all possible ways. Official protection has been guaranteed to the employees and to the plant used in the manufacture. It is hoped that some tea may be prepared for the market this season, although it is not certain that this can be done. Green teas—In country kinds nothing has been done. Pingsueys—A further shipment of 1,250 half-chests on native account is reported.

ABOUT METALS AND MANUFACTURES.

The recently organized Union Carbide Company, of Niagara Falls, has arranged to control the entire calcium carbide output in the United States, the company having practically bought out all the carbide companies in the country. They have been incorporated under the laws of West Virginia, with a capital stock of $6,000,000. The three factories to be continued in operation are located at Appleton, Wis.; Sault Ste. Marie, Mich., and at Niagara Falls. The latter to be enlarged.

According to advices from Glasgow under date 30th April, the finished iron and steel trades of Scotland continued well employed. In some instances partial stoppage of work had been rendered necessary by a want of coal; but coal is now being supplied with regularity. In the last week of April, the shipments of pig iron from Scotch ports totalled 5,180 tons, as against 4,195 tons in the corresponding week 1897. The number of blast-furnaces in operation in Scotland, on 1st of May, was 79, as compared with 81 a year ago.

The exports of mineral ore from Spain during the whole of the past year, as compared with 1896, were as under:

	1897. Tons.	1896. Tons.
Iron ore	6,884,588	6,272,588
Copper ore........................	822,570	629,546
Lead "	8,267	6,285
Zinc "	40,445	35,876

Mr. James Breen, manager of the Le Roi smelter, said on May 3rd that they were smelting 300 tons of Le Roi ore daily and that everything was running smoothly.

The 1898 shipments of iron from Tennessee and Alabama are placed at 50,000 tons. In March and April 5,000 tons were shipped from a single yard of the American Pig Iron Storage Warrant Co., at Ensley City, Alabama, to European points, the latest shipment of 1,000 tons going to Genoa, Italy. The Journal of Commerce understands that the Tennessee Coal, Iron and Railroad Company are also making heavy shipments to Stockholm, Liverpool and Genoa, while orders and enquiries from all over Europe were in April more active than at any time for many months.

The shipbuilding yard of Davis & Sons, at Kingston, Ont., is busy. There is being built a passenger and freight steamer for Homer & Co., Gravenhurst, Ont., 65 feet long; rebuilding the steamer "Kenozha" for the Muskoka Navigation Co., 108 feet long, and adding to her length. Also rebuilding and lengthening a yacht for C. Mickle, Gravenhurst, and building several steam yachts and launches.

The James Cooper Manufacturing Company, Montreal, has contracted to furnish to the British Columbia Copper Co. of Anaconda, in the Boundary Creek district of Kootenay, B.C., an Ingersoll-Sergeant ten-drill compressor plant, complete with ten drills, battery of boilers, hoisting engine, pumps, heaters and all necessary equipment to make plant complete.

A complete mining plant for the Montreal-London Gold and Silver Development Company has been shipped by the James Cooper Company, of Montreal, to the works of the former company at Salmon River, Nova Scotia. It is a compressor plant, intended, we understand, to equip the Dufferin property.

A company is being organized to utilize the power of the Fenelon Falls in generating electricity, to be transmitted to Lindsay and possibly elsewhere.

The quantity of ore raised and shipped through Nelson, B.C., for four months of 1898, was 31,929 tons of a value of $3,116,242.

The Electric Reduction Co., of Buckingham, Que, has ordered from the General Electric Company a 1,000 h.p. three-phase revolving field generator.

The Canadian General Electric Co. has closed a contract with the owners of the War Eagle mine, Rossland, B.C., for the electrical apparatus for operating a compressor plant and elevator.

By reason of the war between Spain and the United States lead has advanced as much as $10 per ton in England. White lead is also higher because of the advance in pig lead.

According to Lloyds' Register the British ship-building trade is more active now than for many years. Indeed it is doubtful if the yards were ever so busy. Some of the yards have even worked on Sunday, which is an especially shocking thing in Scotland. The actual tonnage under construction in the United Kingdom at the end of March was 1,185,121 tons, which is an increase of 356,640 tons on the tonnage under construction at the end of the March quarter of 1897. The bounding activity which now prevails in the ship-plate industry is thus easily explained. At the present moment there are 355,934 tons of British and foreign warships under construction in the United Kingdom, of which 238,505 tons are for the British navy, and 117,429 tons are for foreign navies. One of the most satisfactory features of the present boom in shipbuilding is the large amount of work that is being done for foreign nations. We have now on hand about 265,000 tons of new shipping for foreign countries, and 920,976 tons for the United Kingdom, so that about 22 per cent. of the whole is being constructed for other nations.

INSURANCE ITEMS.

The directors of the Ætna Fire Insurance Company, at a special meeting, held last week, unanimously voted that all their employees who enter the service of the country in the war against Spain shall have their salaries continued in full and their places held open for them on their return.

The Ætna Life Insurance Company, in a patriotic spirit, has suspended the clause in the contract with insurants relating to their enlisting in the army or navy in time of war. Thus there is granted a permit to all who hold policies in the company at the present time to fight for Uncle Sam, without forfeiting their insurance.

The factory of the Truro, N.S, Condensed Milk and Canning Co. was burned on May 4th, together with the dwelling of the manager, Mr. Thomas. The company had set up a new $1,200 engine on Saturday. An immense quantity of stock was in, partly manufactured, and some was ready for shipment. The amount of loss is over $50,000; there is $27,000 insurance, mostly in English companies. There were forty hands employed. Efforts will be made to rebuild at once or to begin manufacture as soon as proper machinery can be obtained.

There is to be held in Detroit, on the 15th and 16th of July next, a meeting of the National Association of Local Fire Insurance Agents. Among the subjects to be discussed are: Overhead Underwriting, what it is and how it is to be treated; the True and Just Rule Governing Agencies; the Solicitor and Broker question; Will a Uniform Commission rectify the ills in our Business? Mr. A. G. Simrall, of Covington, Kentucky, is president of the body; there are vice-presidents in Mobile, St. Louis, Buffalo and Cleveland. The secretary-treasurer is R. S. Brannen, of Denver, Colorado.

—With respect to ocean shipping the harbor of Montreal shows great activity. From the opening of navigation to May 9th this year the number of sea-going steamships arrived was 48, of a tonnage of 92,212, as compared with 20 steamships of 40,940 tons up to same date last spring, but the interval was shorter in 1897. Sailing vessels, too, are more numerous this spring.

—We learn that Mr Shortt, formerly accountant in the Bank of British North America at St. John, has been promoted to the post of manager of the same bank at Slocan, British Columbia.

CLEARING-HOUSE FIGURES.

The following are the figures of the Canadian clearing houses for the week ended with Thursday, May 12th, 1898, compared with those of the previous week:

CLEARINGS.	May 12h, 1898.	May 5th, 1898.
Montreal	$13,659,793	$13,471,505
Toronto	8,672,004	8,455,145
Winnipeg	2,268,965	1,704,964
Halifax	1,186,805	1,350,167
Hamilton	752,433	764,652
St. John	633,541	612,097
	$27,173,541	$26,358 530

Aggregate balances this week, $3,856,845; last week, $3,674,602.

—At a meeting of council of the Montreal Board of Trade last week correspondence with the Government was read relating to the inspection of fish. Merchants' opinions differ with respect to compulsory inspection; some have petitioned against it. The fact remains, however, that country merchants are imposed upon by having 160-pound barrels of fish sent them for 200-pound barrels, while Labrador herrings, so-called, are put on the market, never having seen Labrador. At the request of the Metal and Hardware Manufacturers' and Merchants' Association of the Board, the deputation referred to in the following resolution of that association was endorsed by the council. This was a proposal for the establishment of a board of customs experts, the board to consist of five members, being one for each of the principal branches of trade, as follows: (1) Dry goods; (2) hardware, oils, paints, etc.; (3) drugs, chemicals, fancy goods souvenirs and jewelry; (4) groceries, provisions and fruits; (5) leather and shoe fittings. Mr. John Macfarlane, having been sworn a member of the council, was appointed a member of the Insolvency, Legislation, and Municipal Committees.

—During the coming summer several conventions of railway men are to be held in Canada, and more of them in the United States. June 14th is set as the date of meeting in Montreal of the Train Despatchers' Association of America. And on July 6th the National Association of Railway Surgeons will meet in Toronto. The Railway and Engineering Review informs us that the Association of American Railway Accounting Officers will meet at Atlantic City, N.J., on May 25th. Additional dates are: June 14th, National Association of Local Freight Agents, at Cincinnati, O. June 15th, Association of Railway Telegraph Superintendents, Omaha, Neb. June 20th, American Railway Master Mechanics' Association, Saratoga, N.Y. July 13th, American Society of Railroad Superintendents, Alexandria Bay, N.Y. July 20th, American Association of General Baggage Agents, Detroit, Mich.

—The Wholesale Grocers' Association of this city has sent a memorial to the Government at Ottawa recommending that a bonus be offered for the growing of sugar beets. They contend that Ontario possesses a valuable belt of land north and west of Toronto, within which the sugar beet can be successfully grown. And they think that $1 per 100 pounds for the first year, 75 cents for the second, 50 cents for the third, and 25 cents each for the two following years is a reasonable bonus for Government to offer. Some such encouragement, it appears, would induce a Scotch company to erect a refinery in Toronto. The unfortunate experience of Quebec province in sugar beet culture is not to be forgotten, nor the part that high-priced labor plays in the industry. It is affirmed as to this, however, that Ontario has the climate to grow sugar beets, while Quebec has not.

—It was stated the other day, on the authority of the London Times, that so satisfactory had the seal fishery been that the revenue of the Island of Newfoundland for the quarter ended with March, showed an increase of $100,000 above that for the like period of 1897. A similar increase, the despatch added, is expected in the current quarter, from the same cause.

—A branch of the Molsons Bank has been opened in Simcoe. It is in temporary premises just now, the intention being to remodel and occupy the present office of the Bank of Hamilton, when the latter removes to its own building. Mr. H. H. Groff has been appointed manager of the Simcoe branch.

ABSTRACT FOR THE YEAR 1897.

FIRE INSURANCE IN CANADA.

CANADIAN COMPANIES.

	Net Cash received for Premiums.	Reinsurance, Return Premiums, etc.	Gross Cash received for Premiums.	Gross Amount of policies, new and renewed.	Net Amount at Risk at date.	Net Amount of Losses incurred during the Year.	Net Amount paid for losses.	Unsettled Claims.

BUSINESS IN THE STATES.

The general condition of business has been materially improved, says Dun's Review. One day's work by the officers and men at Manila has given many days' work to thousands of people at home, of whom they knew nothing, and has placed all American industries and interests on a stronger footing for any conceivable future.

Industries have received a wonderful stimulus from the conviction that hostilities will not last long, and from heavy Government orders. Besides great demand for steel plates, and other iron products and ammunition, Government has ordered 2,500,000 yards woolen cloths, 125,000 blankets, 3,000,000 yards cotton goods, and great quantities of provisions and other supplies, and meanwhile reviving confidence has multiplied other demands.

Textile establishments have been receiving larger orders within the past few days, outside those from Government, so that the stoppage or reduction of time in four woolen mills, early in the week, may have been premature. No decline whatever appears in the prices of staple cloths or dress goods. . . . . Wool has declined about half a cent in April, taking the average of 100 quotations by Coates Brothers, and the better demand for goods has caused more enquiry, but thus far no improvement in prices. Print cloths have again made a new low record, $1.94, but a better market is seen for other cotton products. Demands for boots and shoes are very heavy, considering the extraordinary orders previously placed, and shipments are still the largest ever known for the season. Silk works are doing well, and the domestic demand for the minor metals in manufacture is remarkably heavy.

The railroads report better earnings by 17.5 per cent. for April than last year, and 11.0 per cent. better than in 1892. Eastbound tonnage from Chicago was over 50 per cent. larger than last year, and 14 per cent. larger than in 1892. Failures in April, in spite of expectations of war, and during the last ten days' actual war, have been smaller than in the same month for four previous years.

Thirteen leading cities, outside New York, report slightly larger bank exchanges for April than in 1892, but the gain is not nearly so much as for the preceding months this year. Below is given average daily bank exchanges at fourteen leading United States cities for periods mentioned:

	1898.	1897.
Jan....	$222,296 000	$164,678,000
Feb..	233,956,000	149 699,000
March	193,055,000	142,844,000
April..	175,293,000	147,194,000
Average. .. .	$208,150,000	$151,104,000

BOMBARDMENT INSURANCE.

Manager E. F. Beddall, of the Royal, in a lengthy article, gives his reasons to an American paper why bombardment insurance should not be written by fire insurance companies. He shows first that the standard form of policy expressly forbids it, and then goes on to show that the writing of such insurance is unsafe. He quotes the aggregate values at New York and Brooklyn and says the writing of insurance on this hazard, if the total writing exceeded the surplus and capital of the company, would be an immoral transaction, for the obligation could not be fulfilled if the contingency insured against should arise. He believes a company has no right to expose the money of all its policy-holders in order to give protection to a few in the seaport towns, and he shows that by the very contingency which the companies might insure against their own assets might be destroyed, for the insurance companies are large holders of property in the seaport towns, and so the security for the performance of their contracts might be destroyed by the very cause which produced the losses.

POST OFFICE DEPOSITS.

The correspondence in a city paper on the investment of Post Office Savings Bank deposits has drawn one reasonable suggestion. The writer points out that while St. Martin's-le-Grand pay's 2½ per cent. interest to depositors, it has to pay 3 per cent. itself when borrowing funds for building or improvements. The suggestion that the Post Office should save the ½ per cent. by borrowing the depositors' money is, however, not likely to be carried out, since the Act requires this money to be invested in Consols. Besides, St. Martin's-le-Grand would probably be as shocked if it were told to be economical as it would be if it were told that it existed for the convenience of the public.—London Shareholder.

The Christian World, of London, Eng., says on the same subject: "One explanation given why the Post Office Savings Bank can go on paying interest at 2½ per cent., while the interest on Consols at the present price yields less, is that there are a very large number of small sums in the bank on which no interest is paid, but which, in their accumulated form, yield an income. A time, however, must come when, if Consols alone are available to the Department, the depositor will have to receive less than 2½ per cent."

COUNTRY STORES AND CASH.

The Commercial was, only a few days ago, given the history of a trader, which may be used to illustrate the point. This merchant went into business, did a liberal credit business and failed, as many have done before him. After his failure, a friend offered to lend him $2,000 with which to embark in business again, on the condition that he would buy only for cash. The offer was accepted. The merchant has been now three years in business since starting up the second time, and in these three years he has accumulated a considerable surplus. He has now sufficient cash in the bank to put in a spring stock suitable for his requirements, all for spot cash. Besides this his stock is all paid for, and he has a few hundred dollars of good accounts on his books. He has made a good living for himself and family in the meantime, and has paid ten per cent. on the original $2,000 loaned him.

Now, it may be said, that the secret of this man's success was that he bought for cash. This is part of the secret, but it is the smaller part of it. Being obliged to buy for cash, he was also obliged to curtail his credit business to the smallest possible proportions, and herein lies very much of the secret of his success. Buying for cash compelled him not only to keep his stock down, but also to keep his collections up. With only $2,000 capital to start with, he did a successful cash business from the outset.

Take another case, of a trader who was obliged to ask for an extension of time from his creditors. The latter merchant has a surplus of over $20,000 in his business, but it is partly in land and store premises, and book debts, as well as in stock. With this large surplus he was not only unable to buy for cash, but he was unable to meet his bills payable, and was in a position that his creditors could have forced him to sacrifice his property to meet his bills. He had made the mistake which many do of putting too much of his capital into store premises and book accounts.

The merchant who drives the cash team is bound to win, for the cash business is not a one-horse turnout. It is cash for goods going out as well as cash for goods coming in. If the trade could be got down to this basis, many merchants would be able to carry on business more successfully than they are now doing with half the capital which they now have in their business.

Our trader with the $2,000 capital had to buy very carefully on account of the fact that he was obliged to buy for cash only. He bought goods only as he required them, and though his orders were small, they came in frequently, and he got the lowest prices going because he paid spot cash. He was saving his candle at both ends instead of burning it at both ends, as the slow-pay buyer and free-credit giver must do. Saving interest and discounts and top prices on the one hand, and on the other hand saving the losses from bad accounts, interest on goods sold on credit, and expense of heavy bookkeeping and collecting. We repeat, there are many merchants in Manitoba who would be better off with one-half the capital they now have, if they could shift over and drive a double team cash business.—Winnipeg Commercial.

—The Commissioners of the State Reservation at Niagara, have directed the construction of a new stone arched bridge from Goat Island to the first river island, at a cost of $15,000.

—What He Was.—"Anyway, the pedestrian has the law on his side." "Oh, of course, but he has the wheelman on his neck."—Indianapolis Journal.

—The Westinghouse Electric & Manufacturing Company will supply the Niagara Falls Power Company with two transformers and the necessary apparatus for establishing a transformer station at North Tonawanda, which place the company is to supply with electric power.

—The City of Cleveland, Ohio, which pensions its old and disabled firemen, has enacted a new law by the terms of which second wives or the children of such will not enjoy the benefits thereof on the pensioners death. Fire and Water says that a mischievous practice has long obtained in that city, young girls marrying widowed pensioned firemen for the sole purpose of receiving the pension after the fireman's death.

—On the subject of sleeping car nomenclature, we learn that general manager Yager, of the Wagner Palace Car Company, has issued a circular designating specifically the various compartments of sleepers. The circular states that hereafter all rooms having three berths will be termed drawing rooms; rooms having two berths and rooms now known as compartments will be termed staterooms; cars heretofore termed drawing-room cars will be termed parlor cars, and rooms in these cars will be termed compartments.

—Parodying a song of recent popularity, the Press, of Neepawa, Manitoba, perpetrates the following, which is by no means bad:

"We don't want to buy at your place,
  We won't buy there any more;
You'll be sorry when you see us
  Going to some other store;
You can't sell us any stale goods,
  We have opened wide our eyes;
We don't want to trade at your store,
  'Cause you never advertise."

"I'll take a pint of milk this morning, Abel. Are we going to have war?"

"Sure. Whoa, there! There ain't no way out of it, ma'am."

"War is a dreadful thing, isn't it, Abel?"

"Yes'm, but there's some things that's worse than war. Thanks. Well, I must be getting along."

"You are nearly an hour late this morning, Abel."

"Yes'm. I had to stop an' talk to about forty ijjits about the war. Mornin', ma'am."—Chicago Tribune.

—Canada's direct trade with Spain is but small. In 1897, Canadian exports to that country were valued at only $50,452, and our imports from Spain were $386,532, principally wines, oranges and lemons, which could be supplied by other countries in the event of the Spanish supplies being cut off. The United States does a larger trade with Spain, exporting to the value of $11,000,000, and of this $80,000 is breadstuffs, $35,000 chemicals, $8,739,000 unmanufactured cotton, $988,000 tobacco, $664,000 oil (mineral), and shooks, staves and headings $556,000, which leaves very little for other exports. Spain could get the cotton from Egypt and India and oil from Russia.

INTEMPERANCE DECREASING.

Chauncey M. Depew, in the course of an address before the Ry. Y. M. C. A., of New York, was enabled to give a very encouraging comparison of the extent of drinking among railway men, as between the old days and the present. He said, 23 years ago, there were about 15,000 men in New York Central service. Now there are over 30,000. At that period it is safe to say that 20 per cent. of the force were discharged for drunkenness within a given period. The saloon everywhere abounded; it was the great force at all railway centres; it was the great force wherever there were railway shops. It surrounded all the company's terminals, and its alluring features were inviting all the employees, so that at least 20 per cent. of them at that period were discharged or dropped for drunkenness, and that means that their families were reduced to absolute misery. To-day, said Mr. Depew, the company have twice that number of men in the service and not 1 per cent. disappear from drunkenness. Concluding, Mr. Depew said: "It is the rarest thing in the world that it is brought to my attention that any man in the service, upon whom depends the lives of others or the safety of trains is disciplined for that vice."

NOVA SCOTIA GOLD FIELDS.

Mr. B. T. A. Bell, of Ottawa, has been visiting the mining districts of Nova Scotia. He states that while there is no "boom" the mineral industries of that province are making steady progress. The output of coal in 1897, exceeded 2,200,000 tons, being the largest in the history of this industry, while with respect to gold, on an invested capital of something less than half a million dollars, the province yielded during the same period 28,000 ounces of gold, of a value of about $500,000. In his opinion a great future awaits the gold mining industry in Nova Scotia. Judicious capitalization and careful and skilled management were wanted. The easy means of access to the province, the low cost of working, the cheapness of labor, fuel and supplies, and the probable permanent nature of the deposits, are good reasons why capital would find remunerative investment in that industry. Mr. Bell said that English capitalists were turning their attention to the province and that the output would be still larger this year. The dividend-paying mines last year were the Brookfield, in Queen's county; the Richardson, at Country Harbor; New Edgerton, at Fifteen-Mile Stream; Blue Nose, at Goldenville; Oland, at Montague; Woodstock, at Isaac's Harbor. The Richardson has a forty stamp battery, to be increased this year to sixty stamps, and the working costs, mining and milling, are as low as $1.68 per ton.

Commercial.

TORONTO MARKETS.

TORONTO, May 12th, 1898.

BOOTS AND SHOES.—A fair sorting business is being done in general supplies. All of the houses now have their travelers on the road with fall samples, and the campaign may be said to be fully opened. In harmony with the price of hides, and the additional cost of leather manufacturers should secure an increase in the prices of footwear. It remains to be seen whether they have the nerve to accomplish this desirable result and secure their own in the trade. The strike still continues, to the serious injury of the industry in Toronto, and we are told that the employer affected contemplates removing important branches of manufacture to his eastern factory.

DAIRY PRODUCTS.—The deliveries of large roll dairy butter continue very free, and the continued heavy deliveries have, as was to be expected, resulted in a decline in price, dealers quoting 12 to 13c. per lb. There is no disposition on the part of dairymen to pack tubs with fodder butter, and not until after May 24th can we look for any considerable offerings of this description. Winter creameries continue in operation in spite of the opening of the cheese season and deliveries are large. There are some merchants who consider a decline in the price of creamery to 15c. per lb. as quite possible within the next several weeks. Cheese (old) is quoted locally at 8 to 9c. per lb. The delivery of eggs is heavy, but prices still remain at 10½c. per dozen; dealers maintain that a decline within the next few days is inevitable. Picklers continue actively at work.

DRY GOODS.—The retail trade is reported as opening up prosperously and throughout the country a good movement in general supplies is taking place. In wholesale circles a fair business in general sorting lines is being done. Manufacturers' agents are already beginning to secure orders from the clothiers for the requirements of next summer. The tweed, blanket and hosiery mills are all busily engaged, and in a number of instances night shifts are being employed. Values have not advanced to correspond with the increased demand for goods.

FLOUR AND FEED.—The advance which we reported in the flour market last week has been established and strengthened. Manitoba patents are quoted $6 30; Manitoba strong bakers', $6.30; patents (winter wheat), $4.75 to 4.90, and straight roller, $4.70 per barrel. Bran has declined and is worth only $11 per ton, while shorts are up to $14 per ton.

GRAIN.—The wheat market is firm as elsewhere noted. Peas are rather weak although quotations remain as given last week. Barley shows no alteration. There remains a nominal trade in buckwheat. Corn is weak, although prices remain unaltered. Oats have advanced 1c. per bushel during the week.

GROCERIES.—There is fair movement in the trade. Sugars are not selling quite as brisk, and the inference is that the retailers have finished their preparations for the fruit season. In several staples prices have advanced. Tapioca is scarce and firm. Sago is higher at an advance of ¾c. per lb. Starch remains firm at ¼c. advance, noted last week. Rice is up about ⅜c. from the lowest point and is firm. There is nothing new in the tea trade, but news may be expected in a couple of weeks. Mail advices from Smyrna report a continuance of frosts, and a very unfavorable outlook consequently for the fig crop. Persian dates are reported firmer in London. A letter from Liverpool dated April 21st, says that there is an active demand for cheap grades of Brazil nuts in that market, and reports sales for the preceding week of about 200 tons at 18s. to 21s. From the beginning of the season to April 21st the arrivals of Brazil nuts in Liverpool amounted to 1,321 tons, or 97 tons more than for the same period a year ago.

HIDES AND SKINS.—The hide market is firmer and values have advanced. For green hides No. 1 Toronto inspected the butchers are now obtaining 8c. per lb. Cured are not bringing a proportionate advance. Although dealers quote them at 8¾c., we have not heard of any transactions at more than 8½c. per lb. The strength of the market is mainly dependent upon Chicago, where the business transacted at the close of last week established an advance of ½c. per pound in practically all the principal grades, and indications were that additional sales could be made at the advance, but in the absence of offerings no sales of importance were made. We are advised, Chicago, May 10: "Packer hides continued to meet with a fairly good call, and as sellers were indifferent, the business transacted was at full values. Sales reported were 1,200 native steers, April take-off at 11½c.; 3,000 do., March-April do. at Kansas City, at 11¼c., Chicago freight, and 5,000 heavy native cows at 11c. The close was firm at 11½ to 12c. for native steers, 11¼ to 11½c. for Texas, 10¼ to 10¾c. for butt brands, 10 to 10¼c. for branded cows, 9½ to 10c. for Colorados, 11c. for heavy native cows and 11½c. for light do. In the local market calfskins are rather dull and unchanged in price. Some shearlings are offering, and with lambskins bring 20c. Tallow is quiet and without change.

PROVISIONS.—Values of hog products are very firm and a general upward movement is taking place. Holders are fully ½c. per lb. firmer in their views and view the situation as one of considerable strength. In the United States the markets have suffered from the all-absorbing interest taken in wheat.

WOOL.—As elsewhere noted the first offerings of the new clip are beginning to come forward. Washing cannot, however, be at all general until warmer weather, and not before the first week of June will the season show much activity. The mills are busy and large quantities of wool are going into consumption, but as the price of Canadian fleece is almost entirely dependent on the situation in the United States, where affairs in the textile trades are depressed, the outlook for the season is not bright.

MONTREAL MARKETS.

Montreal, 11th May, 1898.

ASHES.—The market is again duller and weaker, and it is a question if much beyond $3.40 to $3.50 could be realized for first kinds of pots, and $3.15 to $3.20 for seconds. Pearls continue nominally about $4.75. The English demand is unimproved, and it is said the exports, since opening of navigation, will barely exceed 60 brls. or so.

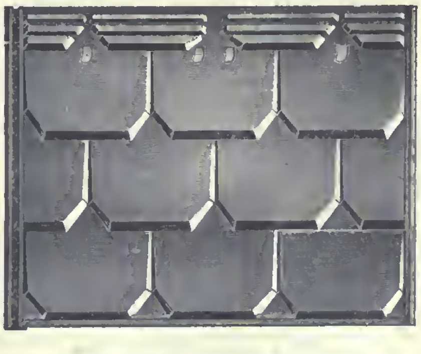
CEMENTS AND FIREBRICKS.—Receipts of cements are now coming forward pretty freely. Last week the figures were 0,700 brls. of Belgian, and 2,200 English, and for the week ending to-day, 8,100 brls. of Belgian are reported, and 3,300 English. The demand is good; a sale of 4,000 brls. was reported last week, and one of 2,500 a few days ago, while the aggregate of moderate orders is quite satisfactory. Prices are now altogether quoted ex-wharf, and are $2.20 to $2.30 for English, and $1.80 to $1.95 for ordinary brands of Belgian; large-sized brls. would be extra. Receipts of firebricks for the week 74,000; prices are easier at $16 to $21 per thousand.

DAIRY PRODUCTS.—Receipts of new cheese are as yet small, and business doing on spot is only moderate. A shipment of 1,000 boxes of new cheese was made on the "Devona" for Bristol this week. The tendency of the market is towards a rather firmer tone, with holders asking 8½c. for finest, though this it might be hard to get. The output of butter has not increased much of late, and prices are pretty steady at 17c. for fine creamery, 16c. for best dairy, and 14½ to 15c. for rolls.

DRY GOODS.—The weather has been somewhat cool of late, not favoring the

EASTLAKE

LOOK WELL
and
LAST WELL! ...SHINGLES



Shows one Shingle.

They're fire, rust and leak proof.

The only shingles made with one patent cleat and water gutter.

Avoid all imitations—genuine Eastlakes give genuine economical satisfaction.

Tenders for Loan.

Sealed tenders marked "Tender for Loan" addressed o the Town Clerk of the Town of Chatham, N.B., will be received up to noon of the

16th Day of May Next

for the purchase of bonds of the said town to the amoun of $10 000, or any portion thereof.

The above is the first $10,000 of the second issue of bonds of $20,000 authorized by the Act of the General Assembly of New Brunswick at the past session, are redeemable in 40 years, and are in denominations of $500 each, bearing interest at 4 per cent. per annum payable semi-annually at the office of the Town Treasurer

The highest or any tender not necessarily accepted.

Dated at Chatham. N.B., the 5th day of April, 1898.

WARREN C. WINSLOW, Mayor.
JAMES F. CONNORS, Town Clerk

TENDERS

Sealed Tenders marked "For Mounted Police Provisions and Light Supplies," and "Clothing Supplies," addressed to the Honorable the President of the Privy Council, Ottawa, will be received up to noon on Monday, 16th May, 1898.

Printed forms of tender containing full information as to the articles and approximate quantities required, may be had on application as follows :—

"Provision and Light Supplies," at any of the Mounted Police Posts in the North-West, or at the office of the undersigned. "Clothing Supplies," at the office of the undersigned.

No tender will be received unless made on such printed forms.

The lowest or any tender not necessarily accepted.

Each tender must be accompanied by an accepted Canadian bank cheque for an amount equal to ten per cent. of the total value of the articles tendered for, which will be forfeited if the party declines to enter into a contract when called upon to do so, or if he fails to complete the service contracted for. If the tender be not accepted the cheque will be returned.

No payment will be made to newspapers inserting this advertisement without authority having been first obtained.

FRED. WHITE,
Comptroller N. W. M. Police.

Ottawa, April 26th, 1898.

Trent Canal

NOTICE TO CONTRACTORS

Hydraulic Lift Lock at Peterborough

Sealed Tenders addressed to the undersigned, and endorsed "Tenders for Hydraulic Lift Lock," at Peterborough, will be received at this office up to noon on Tuesday, May 31st, 1898, for the construction of this Hydraulic Lift Lock.

Plans and specifications of the work can be seen at the office of the Chief Engineer of Railways and Canals, Ottawa, on and after 5th May, 1898, where forms of tender can be obtained by the parties tendering.

In the case of firms there must be attached the actual signature of the full name, the nature of the occupation and place of residence of each member of the same, and further, an accepted bank cheque for the sum of $18,000 must accompany the tender; this accepted cheque must be endorsed over to the Minister of Railways and Canals, and will be forfeited if the party tendering declines entering into contract for the work at the rates and on the terms stated in the offer submitted.

The accepted cheque thus sent in will be returned to the respective parties whose tenders are not accepted.

This department does not, however, bind itself to accept the lowest or any tender.

By order,
L. K. JONES, Secretary.

Department of Railways and Canals,
Ottawa, 2nd May, 1898.

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

---

active movement of summer goods from the shelves of retailers, and wholesalers say the country demand for cottons and other light fabrics has not been very brisk during the past week or so. Orders for certain lines of fall goods are coming in very fairly, and remittances continue to be favorably reported on.

FURS.—We learn of nothing new with regard to Canadian raw furs. Of Western American raccoon skins there is said to be a scarcity, and it is said there is likely to be a considerable rise in the price of the common grades of coonskin coats this fall from this particular cause. We quote: Mink, large dark, $1.50; small, do., $1 to $1.25: marten, $1.75 to $2.25: fisher, $4.50 to $7: lynx, $1 to $2; otter, $1 to $12 for dark: pale, $5 to $7; red fox, large, $1.30 to $1.50: small, $1; cross fox, $3 to $6: bear, cubs, $3 to $7; medium, $7 to $10; large, $12 to $15: skunk, 15 to 70c, as to color and stripe; coon, 20 to 75c: rats, fall, 7c. to 10c.: kits, 2 to 5c. Beaver, not quoted, killing being forbidden by law.

GROCERIES.—The boom in molasses keeps up, and the price on the island is now cabled at 12c. first cost with an excited market. The Guild price for Barbadoes, which was put up last week to 28c. in car lots, and 29c. per gal. the single puncheon, has been further advanced to 30 and 31c. For sugars there is not an active present demand, but the refineries are kept busy on deliveries of orders already booked. Quotations have not undergone recent revision, and are steady at 4½c. per lb. for standard granulated, 4¼c. for Austrian, and 3 11-16c. to 4c. for yellows. There is not much doing in dried fruits, but all the dealers look upon any supplies they have as good stock. All advices would tend to show that California goods are in light supply, notably prunes, while stocks of apricots and desirable raisins are also in small compass. The demand for canned goods is also light at the moment, but prices are pretty firmly held. Teas are quiet; local jobbers are not bidding very freely just now, and the movement to the United States, where the raised standards went into effect on the 1st inst., is at the moment suspended. Values, however, continue firm. Advices from Japan show that none of the teas now offering can be laid down here under 22c. From London an upward tendency is reported in Ceylons and Indians.

HIDES AND TALLOW.—The local hide market is unchanged in any particular, though Chicago advices indicate growing strength there. Dealers are buying beef hides, of which receipts are light, at 8, 7 and 6c. per lb. for Nos. 1, 2 and 3 respectively. Calfskins, 10 and 8c. per lb.; lambskins and clips 15c. each; sheepskins, $1 to $1.05 each. Tallow is very dull, butchers realizing only 1 to 1½c. per lb. for rough, while rendered quotes at 3 to 3½c.

LEATHER.—Further English enquiry for leather is to be noted, and some fair shipments of black leathers on outgoing steamers are reported on account of Western tanners at satisfactory prices, with continued steady export of sole. On spot some of the larger shoe manufacturers are beginning to look around for fall stock, and we hear of the sale of a 1,000 side lot of glove grain, and some few other parcels at firm figures. Sole is also stiffly held, 28c. being asked for best brands of No. 1 slaughter, and 22½c. to 23½c. for manufacturers' sole. We quote: Spanish sole, B.A., No. 1, 24 to 25c.; do. No. 2, 22½ to 23½c.; No. 1 ordinary Spanish, 23 to 24c.; No. 2, 20 to 21c.; No. 1 slaughter, 26 to 28c.; No. 2, do., 24 to 25c; common, 20 to 21c; waxed upper, light and medium, 30 to 35c.; do. heavy, 27 to 30c.; grained, 32 to 35c.; Scotch grained, 30 to 35c.; western splits, 22 to 25c.; Quebec do., 18 to 20c.; juniors, 18 to 20c.; calf-splits, 30 to 35c.; calfskins (35 to 40 lbs.), 60 to 65c.; imitation French calfskins, 65 to 75c.; colored calf, American, 25 to 28c.; Canadian, 20 to 24c.; colored pebble cow, 13 to 15c.; russet sheepskin lin-

---

Tenders for Coal

1898

The undersigned will receive tenders, to be addressed to them at their office, in the Parliament Buildings, Toronto, and marked "Tenders for Coal," up to noon on

WEDNESDAY, 25TH MAY, 1898

for the delivery of coal in the sheds of the institutions named below, on or before the 15th day of July next, except as regards the coal for the London and Hamilton Asylums and Central Prison, as noted :—

Asylum for Insane, Toronto

Hard coal, 1,050 tons large egg size, 200 tons stove size, 80 tons nut size; soft coal, 450 tons lump, 100 tons hard screenings, 150 tons soft screenings.

Asylum for Insane, London

Hard coal, 2,300 tons small egg size, 300 tons egg size (Scranton coal), 265 tons stove size, 70 tons chestnut size; soft coal, 40 tons for grates. Of the 2,300 tons, 1,700 may not be required till January, 1899; also 50 tons Scranton egg.

Asylum for Insane, Kingston

Hard coal, 1 300 tons large egg size, 225 tons small egg size, 20 tons chestnut size, 350 tons hard screenings, 350 tons soft screenings, 25 tons stove size (hard).

Asylum for Insane, Hamilton

Hard coal, 1,950 tons small egg size, 173 tons stove size, 113 tons chestnut size; Straitsville, for grates, 30 tons; for pump-house, 150 tons soft screenings, 75 tons hard screenings. Of the above quantity 1,563 tons may not be required until January, 1899.

Asylum for Insane, Mimico

Hard coal, 1,850 tons large egg size, 175 tons stove size, 10 tons channel coal, 75 tons soft screenings; 50 cords hardwood.

Asylum for Idiots, Orillia

Reynoldsville screenings, 1,000 tons, 75 tons stove size, 10 tons Briar Hill coal.

Asylum for Insane, Brockville

Hard coal, 1,700 tons large egg size, 125 tons stove size, 25 tons small egg.

Central Prison, Toronto

Hard coal, 25 tons nut size, 60 tons small egg size; soft coal, 1,800 tons Reynoldsville screenings. The soft coal to be delivered in lots of 160 tons monthly.

Institution for Deaf and Dumb, Belleville

Hard coal, 650 tons large egg size, 90 tons small egg size, 15 tons stove size, 22 tons No. 4 size; soft coal for grates, 4 tons.

Institution for Blind, Brantford

Hard coal, 400 tons egg size, 175 tons stove size, 20 tons chestnut size.

Mercer Reformatory, Toronto

Reynoldsville screenings, 600 tons; stove coal, 75 tons.

Tenderers are to name the mine or mines from which they propose to supply the coal, and to designate the quality of same, and if required will have to furnish satisfactory evidence that the coal delivered is true to name.

Delivery is to be effected satisfactory to the authorities of the respective institutions.

Tenders will be received for the whole quantity above specified or for the quantities required in each institution.

An accepted cheque for $500, payable to the order of the Hon. the Provincial Treasurer, must be furnished by each tenderer as a guarantee of his bona fides, and two sufficient sureties will be required for the due fulfilment of each contract.

Specifications and forms and conditions of tenders are to be obtained from the Bursars of the respective institutions. The lowest or any tender not necessarily accepted.

Newspapers inserting this advertisement without authority from the Department will not be paid for it.

R. CHRISTIE,
T. F. CHAMBERLAIN,
JAMES NOXON,
Inspectors of Asylums, Prisons, and Public Charities, Parliament Buildings.

Toronto, May 9th, 1898.

ings, 30 to 40c.; colored, 6 to 7½c.; harness, 24 to 27c.; buffed cow, 12½ to 14c.; extra heavy buff, 15c.; pebble cow, 13 to 13½c.; polished buff, 11 to 13c.; glove-grain, 12 to 13c.; rough, 22 to 23c.; russet and bridle, 35 to 45c.

METALS.—The deals in Hamilton pig iron, reported under way last week, have all been consummated, 1,000 tons in all being placed at quotations. Since then there has been a lull in the market, nor have any further lots of Scotch come forward. Quotations for Summerlee continue as before, though Scotch warrants are cabled rather stronger at 46s. 6d. The well-known brands of Carron and Ayrsome have not been quoted this spring, though the local agents hope to do some business after the July reduction in duty comes into force. Approximate quotations would be about $18 for Carron, and $17.50 for Ayrsome. Domestic bars are unchanged in price. Lead is again taking a turn upwards, the cable quoting £14 3s. 9d. Canada plates are reported from 10 to 15s. the ton higher, but local quotations are still the same. Terne plates are dealt in at $5.75 to $5.90. Galvanized sheets are very firm on the other side, owing to stronger prices in sheets and spelter, and English makers are just waiting for signs of strength in the American market to advance the quotations. We quote: Summerlee pig iron, $17.50 to $18; Carron, No. 1, $18; No. 3. $17.25; Ayrsome, No.1, $17.50; No. 3. $16.50; Shotts, $17.25 to $17.50; Carnbroe, $16, ex-store; Ferrona, No. 1, $15; Hamilton No. 1, $15 to $15.50; No. 2, ditto, $14 to $14.50; machinery scrap, $14 to $15; common ditto, $12 to $13; bar iron, Canadian, $1.40 to $1.50; British, $2 to $2.15; best refined, $2.40; Low Moor, $5; Canada plates—Pontypool, or equal, $2.10 to $2.15; 52 sheets to box; 60 sheets, $2.25; 75 sheets, $2.35; all polished Canadas, $2.40; Terne roofing plate, 20x28, $5.75 to $5.90; Black sheet iron, No 28. $2.25; No 26, $2.15; No. 24, $2.05; No. 17, $2; No. 16 and heavier, $2.15; tin plates—Bradley charcoal, $5.60 to $5.70; charcoal, I.C., Alloway, $3.15 to $3.25; do., I.X., $3.90 to $4; P.D. Crown, I.C., $3.60 to $3.75; do., I.X. $4.50; Coke I.C., $2.90 to $2.95; do., standard, $2.75 to $2.80 for 100 lbs.; coke, wasters, $2.70; galvanized sheets, No. 28, ordinary brands, $4; No. 26, $3.75; No. 24, $3.50 in case lots; Morewood, $5 to $5.10; tinned sheets, coke, No. 24, 5½c.; No. 26, etc., the usual extra for large sizes. Canadian bands, per 100 lbs., $1.65 to $1.75; English hoops $2 to $2.15. Steel boiler plate, ¼-inch and upwards, $1.85 to $1.90 for Dalzell, and equal; do., three-sixteenths inch, $2.50; tank iron, ¼-inch, $1.50; three-sixteenths do., $2; tank steel, $1.75; heads, seven-sixteenths and upwards, $2.45 to $2.50; Russian sheet iron, 9c.; lead, per 100 lbs., $3.85 to $3.90; sheet, $4 to $4.25; shot, $6 to $6.50; best cast-steel, 8 to 10c.; toe calk, $2.25; spring, $2.50; sleigh shoe, $1.85; tire, $1.90; round machinery steel, $2.25; ingot tin, 16½c. for L. & F.; Straits, 16 to 16½c.; bar tin 17c.; ingot copper, 13 to 13½c.; sheet zinc, $5 to $5.25; Silesian spelter, $4.75; Veille Montagne spelter, $4.75 to $5; American spelter, $4.50; antimony, 9½ to 10c.

OILS, PAINTS AND GLASS.—The demand in these lines continues good. Turpentine continues to bob up and down, and this week shows a decline of two cents. Linseed oil is very firm at quotations; some considerable supplies by two London steamers arrived on a bare market, and have already been absorbed. Leads and Paris green are firm at the advance lately noted. We quote: Turpentine, one to four barrels. 48c.; five to nine barrels, 47c.; net thirty days. Linseed oil, raw, one to four barrels, 49c.; five to nine barrels, 48c.; boiled, one to four barrels, 52c.; five to nine barrels, 51c., net 30 days; olive oil, machinery, 90c.; Nfld. cod. 35 to 37c. per gal.; Gaspe oil, 30 to 32c. per gal.; steam refined seal, 45 to 47½c. per gallon in small lots. Castor oil, 9 to 9½c. as to quantity. Leads (chemically pure and first-class brands only), $5.62½; No. 1, $5.25; No. 2, $4.92½: No. 3, $4.50; No. 4, $4.12½; dry white lead 5c.; genuine red do., 4¼c. to 4½c; No. 1 red lead, 4c. to 4¼c.; Putty in bulk, bbls., $1.65; kegs, $1.80; bladder putty, in bbls., $1.80; smaller quantities, $1.95; 25 lb. tins, $2.05, 12½ lbs., tins, $2.30. London washed whiting, 40 to 45c.; Paris white, 85 to 90c.; Venetian red, $1.50 to $1.75; yellow ochre $1.25 to $1.50; spruce ochre, $1.75 to $2. Paris Green, 50 and 100 lbs. drums 17c, 25 lb drums, 17½c.; 1 lb. cartoons, 18c.; pound tins, 18½c.; window glass, $1.40 per 50 feet for first break; $1.50 for second break; third break, $3.10.

WOOL.—The London sales show an improved tone since last writing, and the slight decline on the opening day has been fully regained. The attendance of continental buyers is large, but there is comparatively little purchasing on American account. United States advices, however, report a better condition of things in the market there. On spot there is just moderate trading at the firm prices last noted.

We offer at par, subject to allotment :

TORONTO, April 25th, 1898.

$70,000 5 Per Cent. 20-YEAR FIRST MORTGAGE BONDS

Of the Belleville City Railroad.

Interest payable Semi-Annually, on the first day of May and November. Coupons payable at the BANK OF MONTREAL, Toronto. Bonds of the Denomination of $100 each, dated April 25th, 1898. The Bonds being secured by a First Mortgage Deed, made to the TRUSTS CORPORATION OF ONTARIO, on the entire Plant, Franchise, Property and Extensions to be made of the BELLEVILLE TRACTION COMPANY, LIMITED, of Belleville, Ontario.

Subscriptions will be received for the above issue in amounts to suit purchasers, according to Application Blank below.

PRESENT ROAD AND EQUIPMENT, BUILT IN 1895.

Two miles of track have already been laid ; the construction is first-class.

ROAD-BED.—Macadam stone ballast.

TIES.—2,640 to the mile, hemlock, cedar and tamarack, in good condition.

RAILS are bonded with copper wire and cross-bonded every 125 feet.

POLES.—Thirty feet seven inch top cedar poles in good condition, set in rock five feet or dirt six feet, 100 feet apart on tangents, twenty feet apart on curves, all in good alignment.

OVER-HEAD CONSTRUCTION.—Span work in good condition, guy and span wire ¼ in. stranded galvanized wire iron, trolley wire—O—copper.

POWER-HOUSE PROPERTY.—The buildings are situated on the banks of the Moira River and are in good repair. **The Company own the property, which includes one of the best mill sites on the River, capable of generating easily 100 H.P. for eight or nine months of the year.** The buildings on the property consist of stone power-house 40 x 50; boiler-room 30 x 60, separated from engine-room by stone wall; storehouses 40 x 15, attached to main building, square brick stack, sixty feet set in stone foundation, flue thirty inches square, base five feet square; a double two-story brick house; a one and a half story brick house.

POWER-HOUSE EQUIPMENT.—One cross compound Brown engine, 13 x 20 x 30; independent jet condenser, 6 x 9 x 12; one horizontal tubular boiler, 62 x 14 x 3 tubes; brick foundation and setting; one vertical boiler, 30 x 5; one duplex steam pump; all necessary piping, valves and belting; one Canadian G. E. generator, 100 K.W.M.P., 650 revolutions, 500 volts; one slate panel switch board, complete, 200 amperes, 500 volts. **The present power-house equipment is amply sufficient** to furnish more power than is **necessary for the proposed extension.**

CAR EQUIPMENT.—One twenty-one feet closed motor car, equipped with two twenty-five H.P.G.E. 800 motors and two series parallel controllers, Brill No. 21 truck; one sixteen feet closed motor car, same as above; two ten-bench open cars, converted into motors. The proposed extension will necessitate the building of about three miles additional road, which it is intended to do in the most substantial manner and to equip it with the most modern and improved car service.

FRANCHISE.—The franchise is **for twenty years**, with the right of renewal **for twenty years longer**; gives exclusive right on all the roads and bridges, and **exempts the Company from taxation ;** does not require to pay any percentage of the receipts to the City, and allows the road to cease operations during the months of December, January, February and March, if not considered paying by the management. The charter gives the Company permission to run excursion boats.

BONDS.—The proceeds of the sale of bonds are to be used in building **three miles of extensions,** purchasing **closed and excursion cars** of the latest improved pattern, to accommodate the increased business of the Company, erecting a car-house, re-laying the present two miles with steel rails, building a **dam** across the River Moira, paying off a floating indebtedness, and either purchasing or leasing thirty acres of land and fitting up for a park, as hereafter mentioned.

EXTENSIONS AND IMPROVEMENTS.—It is proposed to extend the line from Front Street West to the proposed Park and Cemetery, which will run, nearly the whole way, through a thickly settled section, and will have on the route the Government Institution for the Deaf and Dumb, the Mineral Baths and the Agricultural Grounds.

There are no parks at present in Belleville, but within three miles from the centre of the City, on the shore of the Bay of Quinte, is situate the Belleville Cemetery. Adjoining the Cemetery, on the City side, the Company have selected about thirty acres for a park, one of the most charming spots on the bay. This thirty acres is to be fitted up with half mile horse and bicycle track, cricket crease, lacrosse and baseball grounds. A large pavilion for refreshments and general amusements is to be built.

RECEIPTS.—At present, only two miles of track being laid, with termini at the railroad depot and steamboat dock, the residential portion of the city is not reached, and the receipts are derived from these connections only.

As shown by the books of the Company, from this patronage was realized for the two complete years it has been in operation $11,138.42, an average per year of	$5,569 21
It is estimated that the reveune to be derived from the extension—	
Park and its attractions (only estimating twenty days for special attractions and 750 attendance)	$3,740 00
Car service	1,500 00
Average daily attendance to park and cemetery, May to October, 130 days, 300	3,900 00
Ordinary traffic outside of park and cemetery, per day, $7.50, 300 days	2,250 00
	$16,959 21
As shown by the books of the Company, the running expenses for the two years have been, per year	$4,036 00
Additional expense for fuel to new increased car service	936 00
Additional help, 312 days	1,248 00
Contingencies	1,000 00
	$7,220 00
When the dam is built (which it is proposed doing at once) it will save $8 per day in fuel, for eight months at least, say 200 days	1,600 00
	$5,620 00
The estimate, which has been carefully gone into, is very conservative and based on the lowest possible results, showing a net profit of	$11,339 21
Interest on $70,000 issue of 5% bonds	3,500 00
Net after paying all charges	$7,839 21

We have carefully examined the above figures and certify that the receipts for the last two years are correct, also believe that the estimate as to future earnings and expenses are conservative.

(Signed)
S. S. LAZIER, Local Master of Supreme Court.
CAMERON BROWN, Manager of the Daily Sun Publishing and Printing Co.
JOHN J. B. FLINT, Police Magistrate of the City.
DAVID B. ROBERTSON, City Clerk.

Dated Belleville, April 7th, 1898.

BELLEVILLE.—The City of Belleville, in the County of Hastings, with a population of about 12,000, is situated on the Bay of Quinte, about 120 miles from Toronto and 200 from Montreal.

It is a thriving, busy place, surrounded by excellent farming lands, and has one of the best markets in the Province.

The buildings are principally of brick and stone, the private residences being superior to those in places of much larger size.

The streets are broad, good macadamized roads, and the principal sidewalks are concrete.

It has an excellent system of water supply, gas and electric light.

Shops of the Grand Trunk Railway are situated here, Belleville being a divisional point of the road.

The railway depot is located at the North-East part of the City, about one and one-half miles from the main centre of Front Street (the principal business thoroughfare), and is about two miles from the steamboat dock.

The following places are worthy of notice: Three Colleges, one Government Institution for the Deaf and Dumb, three Daily Newspapers, three Foundries, two Canning Factories, four Flour Mills, one Tinware Factory, three Cabinet Factories, one Furniture Factory, one Paper Mill, one Carriage Factory and one Woolen Mill.

Yours respectfully,

WYATT & CO., Member of Toronto Stock Exchange,
Canada Life Building, Toronto

E. L. SAWYER & CO.,
42 King Street West, TORONTO.

BELLEVILLE TRACTION BONDS.

FORM OF APPLICATION.

WYATT & CO. or E. L. SAWYER & CO.,
CANADA LIFE BUILDING, TORONTO, Ont.

☞This Form should be mailed to
E. L. Sawyer & Co., Toronto, Ont.
or Wyatt & Co., Toronto, Ont.

GENTLEMEN :

I request that you allot me..Bonds, of the par value of $100 each.

This is in accordance with your prospectus, issued the 25th day of April, 1898, wherein you offer the bonds of the Belleville Traction Company, Limited; and I agree to pay for said Bonds on Allotment. I also agree to accept any lesser amount that may be apportioned me.

The Bonds can be paid for either by remitting direct to our Bankers, the BANK OF MONTREAL, or authorizing us to draw through your Bank, with Bonds attached to draft.

C. S. SCOTT, Resident Agent, Hamilton. Ont.

Millers' & Manuf'rs Ins. Co

Established 1885.

HEAD OFFICE:
Queen City Chambers, Church St., Toronto.

DIRECTORS:
JAS. GOLDIE, Pres. J. L. SPINK, Vice-Pres.
Thos. Walmsley, Treas. Hugh Scott, Mgr. and Sec.
Adam Austin, Inspector.

This Company was organized in 1885, specially for the purpose of insuring manufacturing industries, warehouses and contents.

The primary object being to give protection against loss by fire at a minimum cost consistent with absolute security.

The system adopted has been to inspect all risk before acceptance and fix the rate to be exacted equitably in accordance with the hazard assumed.

Assurers with this company have made a saving, upwards of $108,000.00 on the current rates charged, in addition to which, on the rates exacted by us, dividends have been declared to policy-holders amounting to over $24,000.00, together, making the very substantial sum of over $132,000.00 that our policy-holders have saved during the eleven years we have been in operation.

As no canvassers are employed, dealing directly with the assured, those desiring to avail themselves of the advantages thus offered will please address

Millers' and Manufacturers' Insurance Co..
32 Church Street, Toronto, Ont.

The DOMINION Life

ASSURANCE COMPANY

HEAD OFFICE, ... WATERLOO, ONT.

Authorised Capital	**$1,000,000**
Gov't Deposit at Ottawa	**50,000**
Subscribed Capital	**257,600**
Paid-up Capital	**64,400**

The Dominion Life has made handsome gains in very essential feature during 1897.

It has gained in number of lives assured, 8.2 per cent.; in cash premiums, 8.5 per cent.; in number of policies, 8.0 per cent.; in amount assured, 10.5 per cent.; in interest receipts, 16.5 per cent.; in assets, 19.0 per cent.; in surplus over all liabilities, 42.2 per cent.

No Company anywhere is safer, sounder, more equitable or more favorable to the assured in all its arrangements than the Dominion Life. Call on its agent when thinking of putting on more life assurance.

James Innes, M.P., Pres. Chr. Kumpf, Esq., Vice-Pres
Thos. Hilliard, Managing Director.

FRATERNAL INSURANCE.

The applications of the Ancient Order of Foresters and of the sons of England for Dominion incorporation, with the object of doing a life insurance and sick benefit business, caused a brief but spirited discussion on the question of rates in the Banking and Commerce Committee of Parliament. It is probable that a great many Canadians are insured in these and other friendly and fraternal societies, who would not be insured at all if they had not joined on account of social considerations. Many of them are perfectly satisfied with such insurance as the friendly society affords, and they could not be persuaded to carry an additional policy in an old-line company; some could not afford to carry both. It is somewhat startling to be told by Mr. Fitzgerald, the Government Superintendent of Insurance, that the rates of the great majority of the societies are not sufficient to meet the insurance risks covered by the payments. Mr. Fitzgerald stated that the Independent Order of Foresters would, at the next meeting of the Supreme Court, very materially increase rates. He had this on the highest authority. The increase, if endorsed, would apply to all new business, and perhaps to old business as well.

Mr. Fielding and Sir Louis Davies, speaking for the Government, intimated that Parliament will be called upon next session to deal with the whole subject of mutual benefit insurance in a general bill, and they recommended that the applications before the Committee should be held over, but that advice was not taken, the majority holding that the A. O. F. and the S. O. E. societies should not be debarred from privileges already conferred upon the I. O. F. The Globe's Ottawa correspondent says that the recent disastrous failure of the Massachusetts Benefit Society seems to have aroused the conscience of the House to a sense of the importance of the questions. Tens of thousands of men in the Dominion are placing all their hope of leaving any provision for their family, in case of death, upon one or other of the great friendly societies. Were the societies to go down they would cause more widespread disaster and more hardship than the failure of the greatest bank of the country. If, therefore, Mr. Fitzgerald is speaking by the book when he says that the rates of friendly societies generally are not nearly high enough for safety; if this opinion is the result, not of prejudice in favor of old-line companies, but of sincere conviction, after careful study, then Parliament can scarcely refuse to act. The Insurance Inspector of Ontario, Mr. Hunter, has, on various occasions, sounded a note of warning. The voices of Mr. Fielding, Sir Louis Davies and Mr. Fitzgerald, added to this, must certainly arouse public interest, and bring about a full discussion of the whole matter.—Hamilton Times.

POSTAL ECONOMY.

In seeking to reduce the aggregate amount carried by the Post Office Appropriation Bill, the Senate has cut out the sum apportioned for free rural delivery, $300,000, and reduced by $1,000,000, the appropriation for the pay of letter carriers. These are but small items in a legislative measure carrying nearly $100,000,000; yet they indicate the drift and tendency of Congressional action in regard to the public mail facilities. The Post Office Department is costing the people more than it earns. For the past Government year the excess of expenditures over receipts was nearly $11,500,000; for the previous year the deficit was about $8,000,000. With population and business constantly increasing, the out-lay of the Post Office Department in every direction must also increase, unless existing methods and channels of mail service are to be rendered less effective or abolished entirely. It remains to be disclosed whether the lower branch of Congress will agree with the Senate majority in establishing a procrustean policy of economy by the simple process of wiping out rural free delivery and limiting free deliveries in cities to four times a day.

In regard to free delivery in rural districts, the service has thus far been largely experimental. Last year, with an available appropriation of only $50,000, the department established free rural delivery over 150 routes, branching out from seventy post offices, located in thirty States and Territories. In laying out new routes the department officials found it possible, in many instances, to render them operative without any increased charge on the postal revenues by reason of the resulting discontinuance of "star routes." and fourth-class post offices. The Senate, however, refused to retain the $300,000 appropriation for free rural delivery in the bill lest the system might in time expand unduly and swamp the revenues of the department.

The limitation of free deliveries in cities to four a day, as proposed by the Senate amendment, without regard to the social and commercial customs and necessities of the communities thus affected, would involve a change in established methods of intercommunication, which would embarrass the dwellers in cities.—Philadelphia Record.

CANADIAN CHAMBER OF MINES.

An establishment with this name has been established in London, England, offices at No. 64 Gresham St., where a comfortable reading-room has been fitted up for the members. Government publications, as well as the leading mining and financial papers of London and the colonies, are kept on file. Other features of interest are the files of mining companies, prospectuses, and a register of Canadian and Australian mining engineers and managers, which is being compiled. The chamber has an influential list of officers. It is proposed to ask the Marquis of Dufferin to act as president, and Lord Strathcona and the Earl of Warwick as vice-presidents. On the council British interests are represented in Mr. H. Seton-Karr, M.P. (chairman), Mr. E. Grant-Govan (vice-chairman), and Mr. F. Faithfull Begg, M.P., Hon. Forbes G. Vernon (Agent-General of British Columbia), and Messrs. C. A. Duff-Miller, Louis Campbell-Johnston, T. Mills, E. Pope and Ross Robinson. The secretary is Mr. E. Jerome Dyer, F.R.G.S., the author of a work on Canada's mineral resources.

A HINT TO YOUNG MEN.

In the May issue of the Ladies' Home Journal, the following good advice to young men is given:

"Insurance on a small income. If a young man with a wife and child is earning a thousand dollars a year, he should, by all means, regulate his expenses so as to make it possible for him to take out a life insurance policy. No matter if it is only a policy for a small amount; he should train and accustom himself to look to the future of his wife and child. I believe thoroughly in life insurance and cannot impress too strongly upon all young men, when they marry, to lay aside a part of their yearly income for the purpose of insuring their lives. Many women would have been saved heart-breaking experiences, if their husbands, during their lifetime, had thought of life insurance more carefully than they did."

THE CALCULAGRAPH.

A new instrument has been placed in the local exchange of the Bell Telephone Co. It is a calculagraph, and its purpose is to keep check on the time of long-distance conversations. The calculagraph may be called a mammoth stop watch. When a person begins a long-distance conversation the operator slips the check card into the calculagraph and by pressing a lever prints in the proper place on the card the dial of a clock showing the actual time at which the connection was given and the conversation commenced. The pressing of another lever produces two other blank dials, and when the conversation has been concluded another pull of the lever, and these blank dials are filled in, showing the minutes and seconds that have elapsed since the first lever was pulled and the conversation started. This instrument places all disputes as to the length of a conversation out of the question.—Review.

THE ERIE WATERWAY.

An announcement of some commercial interest to Montreal is to the effect that the enlargement work on the Erie canal will have to be suspended for at least two years. Through some miscalculation or mismanagement—through boodling some papers allege—the nine millions voted for the work has been expended, and the waterway is available for no larger craft than have navigated it for years past. It will take two years, under the law, it seems, to obtain authorization for a further loan, and some time more to complete the enlargement operations. Meantime, if the present programme is carried out, next season will see the enlarged St. Lawrence canals available, and this port will have at least a year's start of New York in the use of the improved waterway.—Gazette.

SOUTH AFRICA COMPANY.

Mr. Cecil Rhodes, after his temporary eclipse, seems to be coming surely to the front again. A London despatch of Saturday last describes a meeting of the shareholders of the British Chartered South Africa Company, on which occasion, Cecil Rhodes, who was chairman of the company until 1896, when he resigned, was unanimously re-elected a director. The charter of the company was granted in 1889, owing to the efforts of Mr. Rhodes, who was formerly premier of Cape Colony. Mr. Rhodes made a speech before the meeting, in which he said that the £6,000,000 which had already been spent in the development of Rhodesia, ought eventually to be assumed as a debt by the people.

KOOTENAY DIVIDENDS.

The lode mines of Kootenay have, thus far, paid dividends amounting to $4,032,000. The largest of these is the Payne mine, with $1,800,000 to its credit. The dividend payers and the amounts they have distributed to shareholders are: Whitewater, $123,000; Hall Mines, $160,000; Fern, $10,000; Payne, $1,800,000; Slocan Star, $400,000; Reco, $297,500; Idaho, $220,000; Rambler-Cariboo, $40,000; Goodenough, $32,500; Last Chance, $37,000; Le Roi, $725,000; War Eagle, $187,000. Of these dividends the payments of 1897 were: Whitewater, $87,000; Hall Mines, $133,750; Payne, $960,000; Le Roi, $400,000.—B. C. Critic.

—On Tuesday last, at Winnipeg, Premier Greenway presented his railway resolution in the Legislature, but the matter was held over till Thursday. The resolutions provide for a bonus of $8,000 per mile to the Southeastern Railway for a road of eighty miles to Lake of the Woods, and the same amount to the Lake Manitoba Railway Company for extending the Dauphin line northward towards Hudsons Bay. The policy of the Government would appear to be with regard to the proposed line to Lake Superior, to first secure the construction of that section from Winnipeg to a point at or near the Lake of the Woods this year. Then at the next session of the Legislature to propose aid for the sections across or around the Lake of the Woods to a point on Rainy river.
